We have at hand two catalogues and a supplement under dates of January 1, September 1 and December 1, 1895, from the Union Mfg. & Plating Co., Freeport, Ill. The company announce that they have succeeded to the business of the Kingsley Specialty Co., and that they will continue to carry in stock most of the goods formerly sold by that company. The Union Mfg. & Plating Co. manufacture box openers, bird cage hooks, cake turners, ceiling hooks, curling irons, corn huskers, drawer pulls, electric curlers, fish spears, flower pot brackets, garden sets, hammers, hinges, horse tooth files, house numbers, ice shaves, ice picks, ice box latches, lamp brackets, lid lifters, mincing knives, nut crackers, pinching irons, pokers, soldering sets, tack claws, timbale irons, tracing wheels, wagon jacks, weeding hooks and many other articles.

Patterson, Gottfried & Hunter, Nos. 146–150 Centre Street, New York, are sending their friends a "wheel of fortune," which, properly manipulated, tells one a great many things he did not know before. Its special message seems to be the Reeves Wood-Split Pulley, which the firm handles.

William Johnson, the Hedenberg Works, Newark, N. J., has issued a price sheet of Conductors' Punches manufactured by him. It shows various designs, gives prices, etc.

Side Line Offered.

SALESMEN wanted on commission to hand'e as side line or otherwise a line of leather cup valves, cylinder and plunger valves for pumps, etc. Address GEORGE OBERNE & Co, No. 383-401 North Halsted Street, Chicago, Ill.

Side Line Wanted.

TRAVELING salesman, twelve years with present house, wants line table cutlery, house-furnishing goods, tinware, or A1 specialties, in connection with old line, for Michigan, Indiana and Ohio. Address M. I. & O., care HARDWARE, No. 143 Chambers Street, New York.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc, will be gladly received, and promptly published.

New Companies, Etc.

Bloomington, Ill.—The Wire Truss Fence Supply Co., a new corporation, have purchased the old plant known as the Keystone wire fence factory, owned by William F. Gerstner & Co., and are putting in machinery to manufacture supplies for building the wire truss fence. They will employ fifteen men during the winter and expect to put on more men next spring.

Chicago, Ill.—Wallis, Meacham & Co. have been incorporated; capital stock, $10,000; to manufacture Hardware; incorporators, Adolph Kurz, Morris Schuhmann and William A. Rogan.

Dayton, Ohio.—The certificate of incorporation of the Dayton Knife & Bar Co., which is organized for the purpose of making and selling and dealing in knives, engine bars, edged tools of every description, etc., having its principal office here, has been recorded. The incorporators are: Henry H. Shoup, Sulphur Grove, Ohio; David C. Stutsman, James A. Marley, Marion V. Mumma and William P. Jenkins, Dayton, Ohio.

Detroit, Mich.—The McRae & Roberts Mfg. Co., No. 74 East Fort Street, will erect a $30,000 brass foundry.

East St. Louis, Ill.— Denverside Tool Co. have been incorporated by J. A. Douglas, G. O. Haughand and B. F. Hart. Capital stock, $5000.

Jersey City, N. J.—Articles of incorporation of the "Douglas Saw Mfg. Co.," capital stock $3,000,000, have been filed. The company will manufacture and deal in saws, especially those made under the patents held by C. H. Douglas for working wood, metal, stone and other material, and will also manufacture machinery used in metal and stone working.

Lakeville, Conn.—The Holley Knife Co.'s stone block is nearly finished, and is going to be illuminated with electric lights. The wires have been put in. The dynamo will be located in the lower floor of the knife factory as soon as it comes, and will be operated with the water power that drives the machinery of the factory.

Milwaukee, Wis.—Karger Brass Fixture Mfg. Co. have been incorporated; capital, $2000; incorporators: Solomon Karger, David Karger, J. E. Darly.

New Castle, Pa.—Pittsburg capitalists are taking steps to establish a manufacturing concern here. The new plant is to manufacture railroad specialties, such as nut locks, brace bars, hammers and other articles, all of which are patented.

New York, N. Y.—The Betts Patent Headlight Co., to manufacture headlights, bicycles, carriages and Hardware specialties; capital, $100,000; directors, George B. Wilson and G. S. Wilson, of Philadelphia; William H. Crary, L. F. Betts and Joseph Tripp, of Brooklyn.

Putnam, Conn.—The Putnam Machine Tool Co. have been organized with a capital of $10,000.

Saybrook, Conn.—The Russell Jennings Mfg. Co. has been organized by Simeon H. Jennings, Henry L. Shaler, Stephens E. Jennings and others; to manufacture augers and bits. Capital stock, $200,000.

Seymour, Conn.—The James Swan Co. has been organized to manufacture boring tools and mechanical tools of all kinds. Capital stock, $125,000.

St. Louis, Mo.—The American Safety Vent & Bung Co. has been incorporated by Marcus and Abraham Bischoff and Nathan Fuchs. Capital stock, $20,000.

Terrell, Tex.—The Terrell Hardware Co. have been organized. The following named gentlemen were elected directors and officers: Directors—F. M. Barton, P. R. Scott, James Wallace, W. B. Winberly, C. M. Kitchen and J. T. L. Whitworth. F. M. Barton, president; P. R. Scott, business manager. The company places its capital stock at $6000.

Tremont, Ill.—Truss Fence Supply Co. has been incorporated by Louis A. Kinsey and others. Capital stock, $10,000.

Changes and Removals.

Akron, Ohio.—A transfer of all of the Akron Tool Co.'s property to Geo. W. Crouse has been made. The consideration named is $25,000. The transfer covers all of the company's property and that in addition to paying the purchase price, Mr. Crouse assumes all the obligations of the company.

Bridgeport, Pa. — The Pioneer Lawn Mower Co. have sold their factory building and lot here to B. Brooke Adams, of Upper Merion, and others, on private terms.

Brockville, Ont.—The Garner Tool Works are to be removed from Brockville to Sherbrooke.

Lockport, N. Y.—The industry known as the Lockport File Works, has been bought outright by E. H. Rogers, Jr. and W. J. Rogers, and hereafter will be known as the Star File Works. The output consists of files, rasps, and veterinary floats. The firm also make a specialty of recutting files and have an immense trade in this line from the Erie, and Buffalo, Rochester and Pittsburg railways. The plant is to be located in the Webb building at No. 21 Adam Street, and the machinery and stock is now in process of removal.

Marion, Kan.—The Carter & Evans Hardware and Furniture Co. have been succeeded by Evans & Evans.

Pittsfield, Mass.—The Pittsfield Brass Co. will soon be located in its new quarters in the old tannery building.

Plantsville, Conn.—D. D. Perkins has moved his rivet factory to New Haven, in the Dann Bros. building on State Street.

New Buildings and Improvements.

Chicago, Ill.—The Chicago Hardware Co.'s plant at North Chicago is being pushed at present, and the contractors say that it will be done on time—January 1. In the structure are 1,000,000 bricks. The buildings are: A brass foundry, 111x44; the pattern vault, 14x82; the iron foundry, 93x42; the carpenter shop, 123x84; power house, 32x92, and the main building, 212x44, three stories in height, and a wing to the main building, 22x32, four stories in height.

Kansas City, Mo.—The Richards & Conover Hardware Co., have purchased for a warehouse the five-story brick building situated in the alley between Fifth and Fourth Streets, extending from Wyandotte to Central Street, and formerly occupied by Ramsey, Millett & Hudson. The purchase price is said to have been $29,000.

Knoxville, Tenn.—C. M. McClung & Co., the wholesale Hardware merchants on Jackson Street will erect a big warehouse in the near future. It will be built on the lot adjoining their present eight-story building and will be 25x150 feet in size and five stories high.

Kingston, Mass.—E. P. Hurd, who owns valuable water privileges, will increase his tack manufacturing business by the erection of a new factory 58x120 feet.

Lebanon, Pa.—The Pennsylvania Bolt & Nut Co. are erecting a large shed in their yards which will protect the large steam shears and allow their operation during the winter months. The shed will also be used as a storage department.

Paterson, N. J.—Owing to lack of space in their present quarters, the brass-working firm of McNab & Harlin will erect a new new foundry about 100 feet from their present location. The property has already been purchased for $17,000.

Recent Fires.

St. Louis, Mo.—The main building of the St. Louis Shovel Co.'s extensive plant in this city has been burned. The loss is estimated at between $80,000 and $100,000, and is barely covered by insurance. The officers of the company have decided to rebuild at once and to double the capacity of the plant.

General

Bath, N. Y.—The Miller Keyless Lock Co., of Kent, O., wants to remove its plant to this village, and a special meeting of the board of trade has been held for the purpose of considering the matter. The firm asks the free rental of a building wherein to carry on its business.

Centerville, Mass.—The new tack factory, owned by Greeley & Barrows, has commenced operation.

Ogdensburg, N. Y.—At a recent meeting of the directors of the Ashley Hardware & Iron Co., held at the office of the company, the following officers were elected for the ensuing year: Charles Ashley, president; Chilion P. Conger, vice-president and treasurer; Egbert N. Burt, secretary; Henry H. Bosworth, manager.

Tonawanda, N. Y.—The mammoth bolt and nut factory of Plumb, Burdict & Barnard, which has been in course of construction for two years past, has commenced operations. There was only a small force of men, but from now on the force will be added to continually until the full force of employees, from 500 to 800 are at work.

Polar Star Instant Ice Cream Freezer.

⊙ **A Marvel to all who behold it in operation.** ⊙

Size, 21x7x7. **Retail Price $3.50.** Capacity unlimited.

It makes perfectly smooth ice cream with all milk. Cream added makes it somewhat richer, but not smoother. It makes very superior, smooth water ices, frozen fruits, frozen custards, sherbets, etc., and is a very simple, convenient and economical freezer.

No Gearing, cogs or fixings to get out of order.

Noiseless in operation. A child can operate it. Makes a plate of ice cream in 30 seconds or a quart in 5 minutes. All other quick freezers merely SCRAPE it off a TIN CYLINDER, but do not BEAT IT or WORK IT.

Our Freezer **Mixes, Mashes, Pulls, Grinds** and **Whips** the cream more in **30 seconds** than any paddle freezer does in **30 minutes.** Dealers will do well to investigate this promptly. Correspondence solicited.

Manufactured solely by **Polar Star Freezer Co.,**

When you begin handling bicycles

One of the important things for you to do is to find the pneumatic tire which has the most friends. When you have found it, stick to that tire. It will be well for you to know that more than sixty-five per cent. of the total tire business is done by Morgan & Wright, Chicago. They have a guarantee which guarantees. They know how to take care of their customers. You have often seen their trade-mark—

MORGAN & WRIGHT TIRES ARE GOOD TIRES

The M. & W. quick-repair pamphlet is interestingly illustrated from life.

Yes.

Screen Doors are Cheap and Plenty Now,

But owing to circumstances over which people have no control, the supply may not be so great when the season comes on, and, in case of returning prosperity, the demand may exceed the supply, which, of course, does not tend to reduce prices. Then those who bought reliable goods of reliable concerns will pat themselves on the back and smile because of their foresight. Others will go about kicking themselves and scowling because a nickel prevented them from seeing a dollar. . . . . .

If you buy "Flyer" Window Screens

and "others," charging 5 cents more for the "Flyers," you will be likely to carry over the "others," and have to order more "Flyers." This was demonstrated last season, **So Don't Buy "Flyers."** They will surely get you into a "muss." The Lord knows there is trouble enough without buying things that prevent one from selling his "old plunder." However, it is well to keep posted on things that people "go crazy" over, and you may want some other product of the Phillips factories. It might not be imprudent to get a new catalogue from . . . . . .

THE COLBURN Window Spring.

PATENTED.

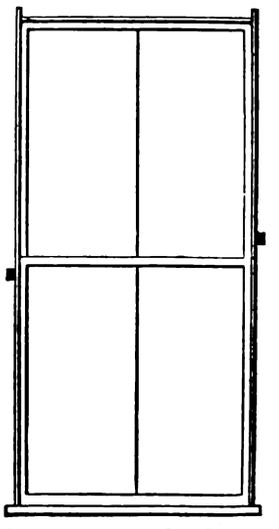
Entirely new, simple, easily adjusted, practical, cannot break, and will last a lifetime. "You push the window, the little wheel and tension spring does the rest."

FOR THE HOME — **CHEAP**

Have this Spring put in your house. The cost is ½ less than weights and cord. You can easily and quickly adjust it to any window. It don't get out of order.

FOR HOTELS — **PERFECT**

This creates a revolution in window springs. Hotel windows raised or lowered with perfect ease.



FOR R. R. CARS — **INDISPENSABLE**

Car windows opened with ease and held at any desired position: no unexpected dropping.

FOR INSIDE BLINDS — **INVALUABLE**

How easily you can manipulate a Venetian Blind when the Colburn Spring holds it.

SATISFACTORY.

Our 1896 Jobbing Line is now ready.

Our Defiance or jobbing line of bicycles, including 24, 26 and 28 inch wheels for both children and adults, is ready for inspection, and our travelers are now on the road. Defiance bicycles are made of the very best bicycle material, by the most skilled bicycle mechanics, in the finest equipped bicycle factory in the world. They are strictly up-to-date, and in beauty of design and finish, in lightness, strength and speed, they are particularly prominent.

DEFIANCE

bicycles are made by the makers of the Monarch, the best bicycle in the world, which is sufficient guarantee of their excellence. We invite correspondence from dealers and jobbers. As we have already closed several large contracts, and are daily closing others, delays are dangerous. Our largely increased manufacturing facilities will enable us to make prompt delivery, a most important consideration, as many dealers who contracted with small manufacturers for this season's trade know to their sorrow.

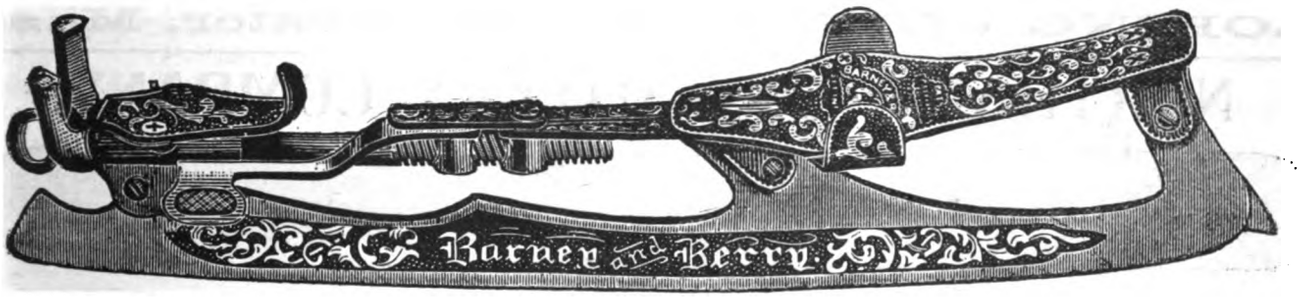
Tripoli Stone Block System.

Set up ready for use. There are two crocks, each of four gallons capacity—an upper one holding the Filter Block, and the lower one, which can be used as a water cooler if desired. This Block is four inches in diameter by the same in height, and is hollowed out on inside. This fits on a metal tube, which fastens by means of a nut to bottom of Filter Jar. Block can be lifted off tube, cleaned and replaced in two minutes, and with no trouble at all. Water passes from outside of block, through the walls, into the hollow chamber, and from thence, by the means of the Drip Tube, into the lower receptacle.



The Finest Piece of Salt Glazed Stoneware Ever Offered the Public.
F. H. WEEKS, - AKRON, O.

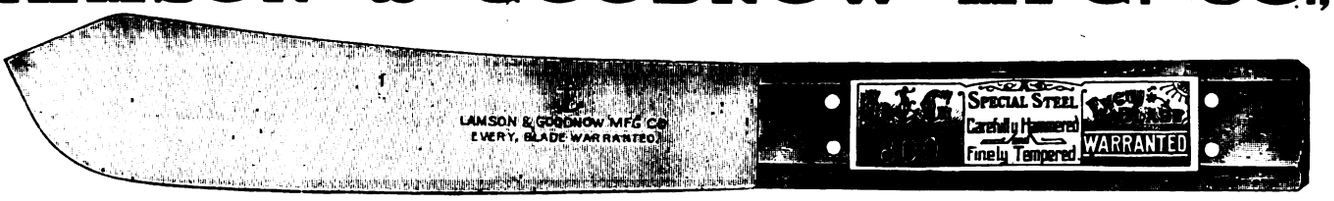
ONE REASON WHY

Our business has grown out of all proportion to any other manufacturer of

CUTLERY IN THE U. S.

Is that while our goods are unsurpassed in finish and general appearance our special aim has been to adapt them to the purpose for which they are to be used.



In the matter of Carvers, your customer wants a Knife to cut with as well as to look at. All our Carver blades are made from carefully tested Butcher Knife Steel. They take and hold a fine cutting edge.

We also make Table Knives, Butcher Knives, Shoe Knives in great variety. All fully Warranted.

TRADE UN★X★LD MARK.

NORTHFIELD KNIFE CO.

NORTHFIELD, CONN.

STANDARD FIBER-WARE COMPANY. STANDARD TRADE MARK. MANKATO, MINN.

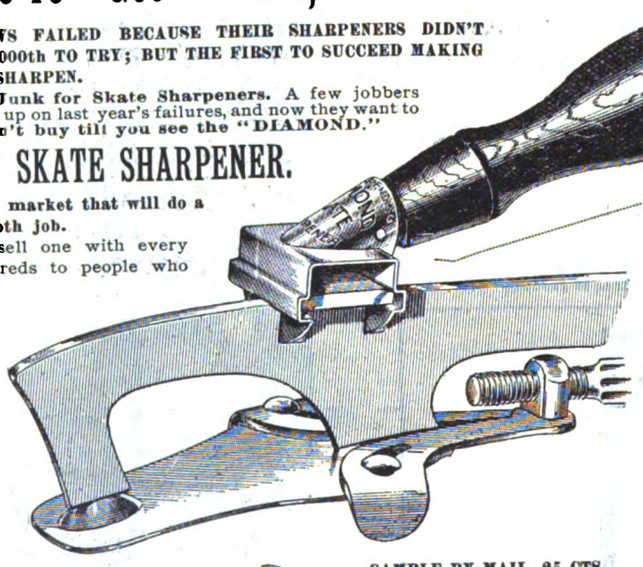
WE PAY THE FREIGHT.

Instead of trying to crowd our goods upon an unwilling market the past two years, we have been working for better processes—to make **better goods for less money**, and now "we have got there with both feet." Our **pails are larger** than other makes, yet **cost no more.** Made of **strong fiber, wound, and steel bound,** they don't split open, nor chip off at edges. They have a **chime** you can **catch on to,** and a truss bottom that don't warp, loosen or **leak.**

All "Standard Pails, Slop Jars, Spittoons, Wash Basins, etc., are **water-proofed** and **indurated throughout** by our newly applied process, and **are absolutely unsoakable.**

An **Ebony enamel,** hard and smooth, gives "Standard" ware an **attractive** appearance, and a **durable** finish. **Scores of families** in every county will use it largely if it can be got "at the store." **Do you want their trade?** Lots of 100 lbs. or more, delivered f. o. b. cars, at their depot, to all responsible dealers.

At Last We've Got "'Em," SHARPENERS THAT SHARPEN!



THE OTHER 999 FELLOWS FAILED BECAUSE THEIR SHARPENERS DIDN'T SHARPEN. WE ARE THE 1000th TO TRY; BUT THE FIRST TO SUCCEED MAKING SHARPENERS THAT WILL SHARPEN.

Dealers! Don't Buy Junk for Skate Sharpeners. A few jobbers were foolish enough to load up on last year's failures, and now they want to dispose of them badly. **Don't buy till you see the "DIAMOND."**

THE "DIAMOND" SKATE SHARPENER.

The only Sharpener on the market that will do a clean, smooth job.

HARDWARE DEALERS sell one with every pair of skates, and hundreds to people who already own skates.

All our Sharpeners are elegantly nickel-plated and packed one dozen in a box.

SAMPLE BY MAIL, 25 CTS.

SOMETHING ENTIRELY NEW!

Every Boy Sharpens his own Skates.

See that Pivot!

Fits the Curve of any Skate.

TRAVELING salesman of ten years' experience wants side line of pocket cutlery, scissors or any light Hardware. Will cover Virginia and West Virginia. Now represent lubricating oil and filter houses. Best of reference if required. Address W. S. BUCHANAN, Oakland P. O., Louisa County, Va.

GOOD selling specialties wanted to handle in western New England. F. E. WHEELER, No. 476 Main Street, Springfield, Mass.

WANTED by traveling salesman for a large Hardware house, a side line of pocket cutlery, scissors, etc., visiting New York towns and cities. Address L. K. Wadsworth, South Butler, Wayne County, N. Y.

Side Line Offered.

WANTED—Profitable side line. Salesmen calling on Hardware trade can make big money for next two months. A strictly holiday specialty. Address QUADRUPED NOVELTY CO., Canton, Ohio.

SALESMAN for paying side line, flatware, etc., selling to Hardware and general store trade. Commission. Address L. L., Room 55, No. 221 Fifth Avenue, Chicago.

WANTED—Salesman to handle as a side line, a first-class line of pocket cutlery and scissors, paying good commission, to retail trade in New York State, Pennsylvania and Ohio. Address L. M. N., care HARDWARE, No. 143 Chambers Street, New York.

WANTED salesman to handle as a side line a first class line of Pocket Cutlery and Scissors, paying good commission, to retail trade in New York State, Pennsylvania and Ohio. Address R. S. T., care of HARDWARE, No. 143 Chambers Street, New York.

SALESMEN in every State wanted to take as a side line a patented article on commission. Goods sold at sight and are demanded by all classes. For particulars, address T. MFG. CO., Box 7, Malden, Mass.

SALESMEN, to sell a patented staple specialty which is as great a success as it is a seller. Good commission. A splendid side line for the Hardware, household and kindred trades. Season now on. Address Gibbs Mfg. Co, Canton, Ohio.

SALESMEN that canvas the retail Hardware trade in New York, Pennsylvania, Ohio, Michigan and Indiana, and want a good side line, address, stating territory covered and class of goods now selling, "Side Line," office of HARDWARE, No. 143 Chambers Street, New York.

WE want traveling salesmen to carry as side line direct to retail trade, on commission basis, our line of Wire Hangers for garments. Commission liberal. Further particulars by addressing Barber-Koenig Mfg. Co., No 115 North Vine Street, Hazleton, Pa.

SALESMEN wanted to sell patented staple specialty to the Hardware and grocery trade. Large commission. R. Givens, Corpus Christie Tex.

Hardware Store Wanted.

TO purchase a retail Hardware store with a moderate sized stock having a good location in a live, growing town. Must have a good trade, and doing a good business. Address JOHN R. SWARTZ, Hughesville, Pa.

For Sale.

FOR SALE—The stock, fixtures and good-will of a Hardware store and bicycle business in a Western city of 60,000 inhabitants Capital required, $20,000 to $25,000. All or part of the business will be sold. Address W. B., care HARDWARE, No. 143 Chambers Street, New York.

FOR SALE—In one of the best manufacturing towns in Ohio, a stock of Shelf and Builders Hardware, Paints, Oils, and Agricultural Implements; stock will invoice $17,000 to $19,000; clean and in good shape. Store does a business of $40,000 per annum. Apply to T. B. Rayl Co., Detroit, Mich.

A FOUR-HORSE Power Gas Engine, in good running order; now in use by us at our stores. Edward Darby & Sons, 233 Arch Street, Philadelphia, Pa.

For Sale or Rent.

A NEW, large manufacturing plant, hitherto used in manufacturing reapers and mowers, but well adapted to other uses; thoroughly equipped with machinery, tools and appliances of best modern make, all ready to steam up and run; at St. Louis Park, just outside of Minneapolis, Minn., with street car connections; the property being situated alongside of the Minneapolis & St. Louis, and Chicago, Milwaukee & St. Paul railroads with switch connections. For particulars address Geo. C. Squires, St. Paul, Minn.; C. F. Forster, 638 Rookery, Chicago, Ill., or John Little, Xenia, Ohio.

To Let.

A FIRST-CLASS modern style Mercantile Building, just finished, on Superior Street, Cleveland, Ohio; centrally located; suitable for Dry Goods, Furniture, Crockery, Hardware or other merchandise, specially adapted for a large Department Store. Also so arranged as to be subdivided and leased to two or three tenants. Building is 67x150 feet to another street; 8 stories above a high and well finished basement; floor space about 78,000 square feet; passenger and freight elevators; steam heating; electric lighting. For further information apply to J. G. W. COWLES, No 140 The Arcade, Cleveland, Ohio.

A DESIRABLE office to rent with the Wilmot & Hobbs Mfg. Co., No. 2 Murray Street, New York. Steam, heat, electric light and telephone.

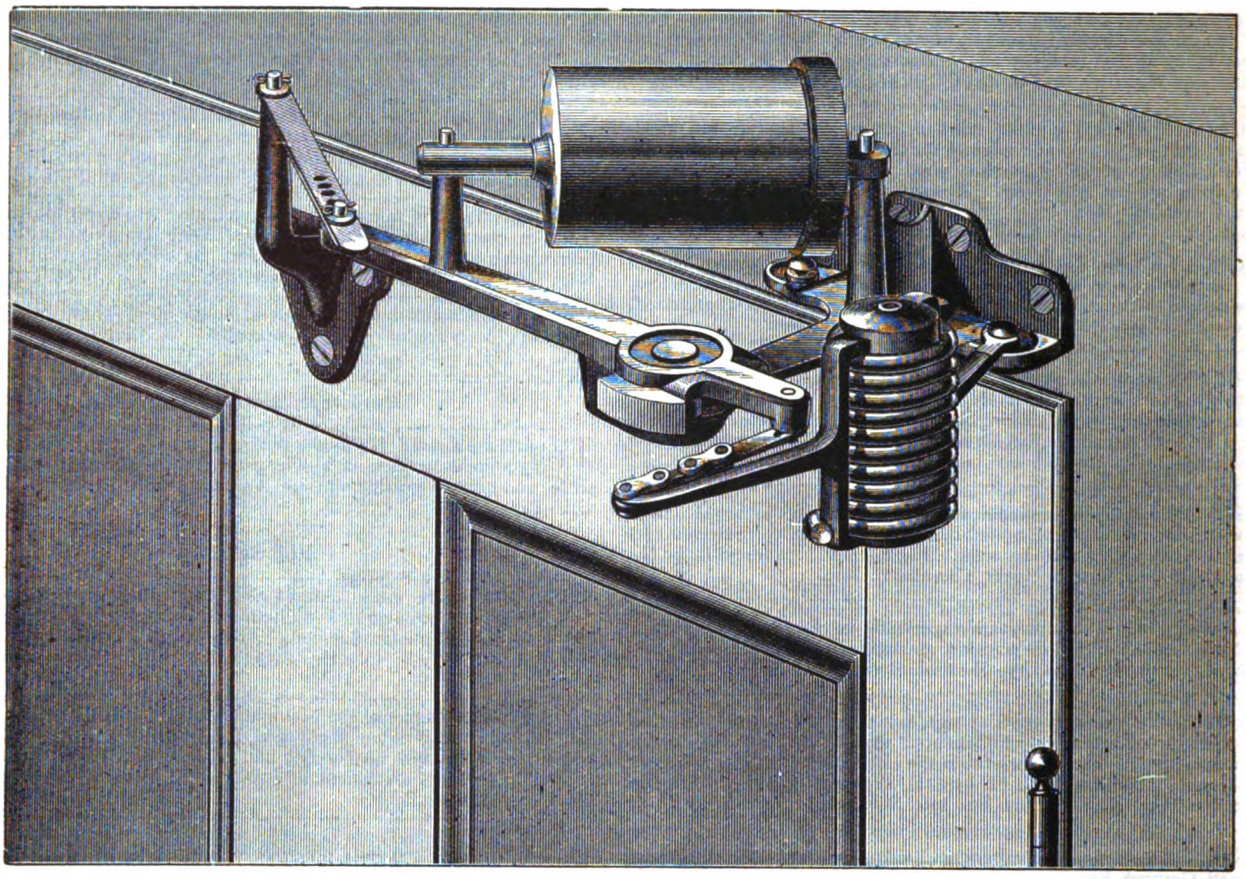
A DESIRABLE office to let with the Van Wagoner & Williams Hardware Co., No. 14 Warren Street, New York City.

Attention! Hardware Travelers!

HARDWARE and other traveling salesmen who wish to increase their incomes, will be placed in a position to do so by sending their name and address to the HARDWARE Publishing Co., No. 143 Chambers Street New York.

To Manufacturers.

A HOUSE of nearly sixty years' standing, having travelers well covering the States, would be pleased to open correspondence with manufacturers of specialties suitable for the Hardware trade, with a view of coming to some mutual arrangement for marketing the same. Address F. S. S., P. O. Box 2522, New York City.



Quotations Wanted.

WE GUARANTEE

A CIRCULATION FOR ALL THE NEWS. HARDWARE HARDWARE EXCLUSIVELY. OF NOT LESS THAN

ONE HUNDRED AND TWENTY THOUSAND

FOR

1896.

There is but one way, outside of the word of the publishers, to settle definitely the circulation of any newspaper, and that is to **publish the receipts from the post office** for the matter that is mailed. During 1896 we shall adopt this system, and will, each issue, publish the receipts for the preceding issue as obtained from the mailing department of the New York post office, and this will settle, once and for all, the truth of our assertions.

If it can be shown that we fall below 120,000 in the year we **will donate $1,000** to any charity named by the president of the New York Hardware Club.

THE DOUBLE CINCH
HOSE BAND AND MENDER.

In Mending one Band does the work of two of any other make.
Bands unequalled for attaching Couplers, Nozzles and other Hose Fixtures.
Simplest and Best in the Market.
Water-tight, Durable, Light, Strong and easily put on—a knife and screw-driver being all the tools needed to mend a hose with this device.
The Mender Tube is seamless brass, easy to insert, gives a full opening, and does not rust.
Can be removed and replaced as many times as desired. The screw is never set by rust; it opens and closes the band, and is never detached or lost.

Providence, R. I., U. S. A.

The above illustration is taken direct from a photograph, and shows the construction of an Iron Truss Roof designed and built by us for The Coe Brass Mfg. Co., at Torrington, Conn., over their Tube Mill. The building is 100 feet in width by 200 feet in length, the roof trusses not only being designed to carry shafting, but also are built of sufficient strength to move heavy machinery about the room.

ESTABLISHED 1818.

THE OLDEST AND LEADING MANUFACTURERS OF GALVANIZED WIRE GOODS IN AMERICA.

Patented Aug. 7th, 1894.

SOMETHING NEW

"Enterprise" Electric Light and Lamp Guards

WE are now ready to supply the trade with the **Enterprise Patent Electric Light and Lamp Guard**, of which we are the sole owners and manufacturers.

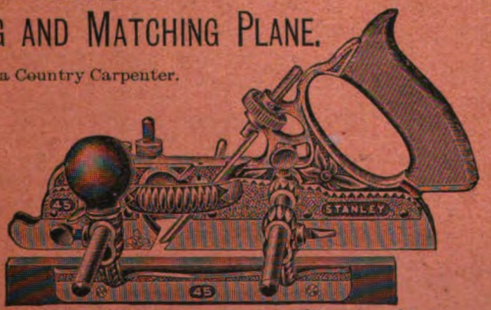
This guard is a great improvement over the old style guards, being more easily attached around the socket, and requiring no brass ring for that purpose. It is made of steel wire twisted, afterwards tinned, soldering all the twists together, and made with a hinge and clasp in the middle so that you can get at the glass globe to clean or to put a new one in without detaching the guard from around the socket, which has to be done in the old style guards that have a brass ring attachment. We have seen and know by experience that the screws in the brass rings on the old style guards drop out from the vibration of buildings and the globe works out of the socket, falls to the floor and breaks. This is impossible with our guard. It is stronger than any guard in the market and very neat in appearance and has given better satisfaction to firms, that have put them in use, than any other guard they have tried.

The price of this guard is lower than any of the old styles which have been used by some of our factories, steamships, etc.

It will pay you to write for a sample guard and our price before purchasing elsewhere.

Sole Manufacturers, **Edward Darby & Sons,**

Pennsylvania Iron Works. **233 and 235 Arch St., Philadelphia.**



When ordering guards please state socket.

ORANGE SPORTING POWDER, MANUFACTURED BY LAFLIN & RAND POWDER CO.

ORANGE RIFLE EXTRA, ORANGE SPECIAL, ORANGE DUCKING, ORANGE LIGHTNING.

The attention of TRAP AND FIELD SHOOTERS, RIFLEMEN AND DEALERS IN GUNPOWDER, is called to the new ORANGE SPORTING POWDER, patented April 17th, 1888, and branded ORANGE RIFLE EXTRA.

This Powder is quick and strong, and burns with such perfect combustion that the only residum left in the barrel after shooting is a dark oily substance easily removed While this Powder is not exactly SMOKELESS, it gives only a light bluish smoke, which is almost instantly dissipated, and interferes but little with the shooting of the second barrel, taking the place of the so-called smokeless powders in this respect.

This brand of powder sells at the same price as any other brand of Rifle Powder and is superior to any made. No person who shoots can afford not to give it a trial, as after once trying it he will never use any other Powder when he can obtain the ORANGE EXTRA. Weight and quality guaranteed.

MILITARY, MINING AND BLASTING POWDER.

"THEY TAKE THEM ON SIGHT."

That's how a large Hardware dealer describes the appreciation of his customers in regard to our **Gate Hinges** and **Latches, Blind** and **Shutter Hinges,** and **Frame Pulleys** of the "**Original**" **Clark** and other patterns formerly sold by the **Shepard Hardware Co.,** of Buffalo, N. Y., whose business in these lines we have acquired by purchase.

☞We are the SOLE Manufacturers.

THE WRIGHTSVILLE HARDWARE CO., - - WRIGHTSVILLE, PA.

HALL'S IMPROVED PIPE WRENCH.

DO YOU SAY that this wrench will crush or cut the pipe? IT WILL NOT if you know how to use it. The principal cause of Pipe Wrenches crushing or cutting the pipe is because the GRIPPING POINTS ARE DULL. You can sharpen THIS WRENCH IN A FEW MINUTES on a

grindstone or emery wheel WITHOUT TAKING IT APART.

THIS WRENCH if kept sharp will grip high on the pipe, and you can screw a pipe so tight that it will open a malleable fitting, and strip the thread, WITHOUT CRUSHING OR CUTTING THE PIPE.

It is impossible to LOCK OR WEDGE THIS WRENCH on the pipe.

It will COST LESS FOR REPAIRS than any other Pipe Wrench.

IT IS THE BEST SCREW WRENCH, as it is stronger than any other, and by pulling the reverse way it will grip a nut or fitting and WILL NOT SLIP.

It is DROP-FORGED from TOOL STEEL.

Sam'l Hall's Son,
229 West 10th St., New York.

SURE ...TO PAN OUT.

IT TAKES A PULL

to separate the plies of our rubber belting. A yoke of oxen can do it, but hard service won't, so strong is the friction. Our belting is uniform in width and thickness, consequently more of its surface comes in contact with a pulley. That means

NO WASTE OF POWER.

Rubber belting is never injured by water, hence it is best for out-door use, for wet localities, and for mills where the atmosphere is surcharged with moisture or steam, as in paper mills, tanneries, etc. Buy the durable kind, branded 1846-Para, Double Diamond or Carbon, made for 50 years by the

OUR STAR HACK SAWS

Are used in nearly all of the Iron Working Shops in this country and Europe. Now we wish to introduce them to the Farmers and Householders generally. They will cut Iron, Steel, and Wood equally well. One blade which costs five cents, will cut off an inch-square bar of iron 100 times without filing. They will do most of the work of a file at one-tenth of the cost All of our best blades are rounded at the ends and stamped with a star.

As a sample, we will send one Steel Frame and Six Blades by mail, prepaid, on receipt of $1.00. Or they can be had of all the best Hardware Dealers, who usually keep a good line of our high-class tools.

Toledo Wheelbarrow Works, Toledo, O.

The AMERICAN WICK is made on scientific principles. The gum inherent in the natural cotton is taken out, and no expense is spared to produce a wick that will give THE GREATEST ILLUMINATION.

THE
AMERICAN WICK
Made by the
WICK DEPARTMENT
Of the STANDARD OIL CO. of NEW YORK.

Oil drawn up through the AMERICAN WICK burns with a large, clear, white light and the flame does not drop off in size as it does when a poor wick is used. When the cotton is clogged with its natural dust and gum the full illuminating power of the oil is not obtained and the complaint is heard that the light DROPS.

Do You Desire

an article that every family would buy if they simply had their attention called to its merits? If you do, put in a stock of P & A's Banner Oil Stoves. See Cut.

No. 971. Heater Complete. Height, 27 inches.

Banner Oil Heater

SIMPLE, NOVEL and PRACTICAL.

Requires less care than the ordinary Lamp.

Will burn 8 to 10 hours and heat comfortably a room 15 to 20 feet square.

NO SMOKE! NO ODOR! PERFECT COMBUSTION.

POINTS:

The Oil Fount is brass, handsomely embossed and highly nickeled. It holds one gallon of oil. As each fount is tested under steam pressure before leaving factory, there is no danger of leaking.

No Chimney. The drum of the **BANNER** in its construction acts as a chimney, saving the expense incident to the renewal of glass chimneys of other makes.

The Fount Frame is artistically made of wrought iron, making a solid base for the stove.

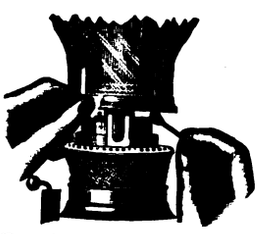
The Burner is the best made, and ONLY ONE with feeder wick, allowing all the oil to be consumed.

The Indicator shows at all times how much oil there is in fount.

The Flame is regulated with our ratchet wick movement, which allows the wick to be raised or lowered with nicety and exactness.

Lighting. It is not necessary to remove any part of the stove to light it. The sliding door in the drum is made for this purpose.

Draft. The round openings in the drum create great suction of cold air in addition to the regular draft. Double the radiating force of the ordinary stove is thus secured.



Get one for your Bed, Bath or Smoking Room, Library, Nursery, Office or Conservatory.

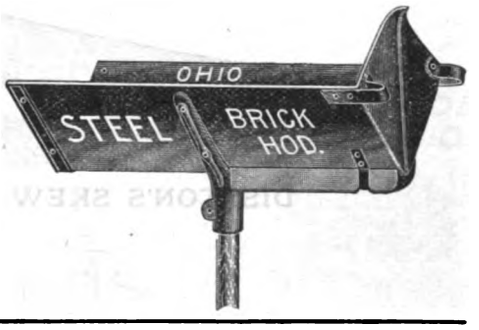
OHIO "WATER TIGHT"

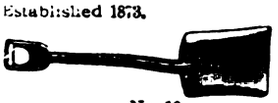


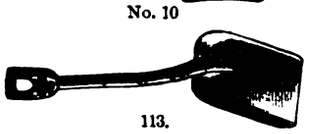
STEEL MORTAR and BRICK HODS

OHIO "Water Tight" Steel Hods are from 25 to 50 per cent. lighter when in use than the common wooden Hod.

Ohio "Water Tight' Steel Hod bodies are positively Water Tight. These bodies are the only ones made, folded from a single piece of sheet steel without cutting the metal, are reinforced on the edges and at the dumping point. By our special devised machinery we are enabled to furnish the strongest, lightest, most durable and only double end mortar and brick hods offered to the trade.

Our improved Malleable Iron Fork and Wooden Shoulder Saddle make it easier for the user to carry, or to attach a piece of cloth, should he so desire, to the under side of the saddle than the old style.





With our improved one piece Malleable Iron Fork and socket for holding the hardwood handle and taking up the shrinkage, a broken handle can be readily replaced, and hods shipped knocked down.

Hardwaremen Do Handle Bicycles.

Some five years ago an earnest endeavor was made on the part of HARDWARE to convince its readers—the retail and wholesale Hardwaremen of America—that bicycles were a good line to carry. The idea at that time was practically a new one, and we must confess that our efforts were not at first crowned with the success that had been desired. In illustration of this fact, we may call attention to the other fact that five years ago we had but one small bicycle advertisement, that of the Pope Mfg. Co.'s Columbia, located down in the corner of page 3—and, by the way, it has been there ever since. In our issue of January 10, 1896, we will have at least 20 pages devoted to informing the Hardware dealers where the best wheels are made, and how an agency for the same can be obtained.

This enormous growth speaks for itself, and is particularly gratifying to the publishers of this journal. Beside the ever-present and natural monentary consideration, it shows that we prophesied truly, and that results have been carried forward exactly on the lines then laid down. We stated, as a matter of absolute faith, that the Hardware trade would eventually become one of the main avenues for the distribution of the product of the bicycle manufactories. That this is true, we may cite the fact that perhaps over three million dollars' worth of wheels were marketed by the trade we have the honor of representing, during 1895.

For the coming year a handsome advance over these figures is confidently predicted.

Why shouldn't the Hardwareman get his share of the plums that are so constantly falling from the tree of bicycle culture? From his environment, he is the very best possible agent. He can add wheels to his stock with the payment of no more rent, while but little extra help is required to handle the same. It is a fact that the profit from one high-grade wheel equals that on one-hundred kegs of nails, and thus one sale equals the benefit to be received from many in the regular Hardware line.

The bicycle manufacturers of the country have shown their confidence in the Hardwareman as a bicycle agent, by the efforts they are making to induce him to accept an agency. There is good reason for this. The selling of a wheel is not all there is to the bicycle trade. Payment must be prompt and sure, and many manufacturers have found to their sorrow that their quick sales to irresponsible agents, often mean early and permanent charges to the profit and loss account as well.

The Hardwareman is a known quantity. The agency books all have his name and rating, and if his order should be slow and cautious, he is quick and reliable when the date of settlement comes. The Hardwareman is also generally equipped with a sufficiency of this world's goods to permit his carrying instalment purchasers independent of the manufacturer. Oftentimes the makers of wheels prefer the agent who can sell ten wheels and carry the purchasers, rather than one who buys ninety, and has the manufacturer do the book-keeping.

There is no avoiding the fact that the Hardware dealer is the sought-for man. Let every enterprising Hardwareman in the country therefore fall into line as early as possible, secure the agency from some of our many advertisers, and make the money that is his by right, and is simply waiting the effort he shall put forth to secure it.

The holly and the mistletoe may not make their visible appearance in many of the Hardware stores—although we do not see why they should not be used as ornaments there as elsewhere—but we are certain that the sentiments they represent will be found in thankful abundance everywhere, in this Christmas season. The year that lies between the last Christmas and this, has bridged over many difficulties apparent then, and the American merchant and manufacturer have many

Digitized by Google

reasons to be thankful, as they look over the record of the twelve months past. Prosperity has come in abundance, and so slowly, and with such cautious strides, as to prove that it is real; that the general advance is no spasmodic effort to do that which the conditions do not warrant. The promise of the future is good, and although the annual stock-taking may not show the profits of former years, it will demonstrate that affairs are on the bed-rock, and that better things lie over the way. In this hope, HARDWARE takes occasion to wish all its friends—those of the last year, and those new ones of the year to come—all that happiness and true joy which are so essential a part of this holiday season.

With the close of the year, HARDWARE has been compelled to increase its capacity, to keep up with the demands of those enterprising manufacturers and merchants who wish to let the great Hardware public know what they are now doing, and intend to do during the coming year. This number of one hundred pages is a result of natural growth, and is not only an evidence of generous patronage upon part of our friends, but of that which is even better—the growing and assured prosperity of the country at large.

Skates Selling Themselves.

A representative of HARDWARE who dropped into the headquarters of the Union Hardware Co., Tower & Lyon, a few days since, saw a remarkable sight. Every man in the establishment, from the manager down, was in the warerooms with coat off, working for dear life, getting out skates to fill the stack of orders to which additions were made by each mail. Not only that, but several near-by merchants who could not wait for the express or even telegraph, had come in and were back among the shelves helping themselves, and literally picking out goods for the filling of their own orders. "That's the way it has gone on for days past," said Mr. Tower. "Over a week ago we had sold ten per cent. more skates than we did all last season, and it keeps us very busy to keep up with the demands." The factories of the Union Hardware Co. at Torrington are running night and day, and there bids to be a famine even with this. Stocks have been cleaned out everywhere, and those who had a chance to give their orders early in the season and did not, are now lamenting that they did not realize the situation and live up to it.

The Hardware Club.

The following gentlemen have been elected to membership in the Hardware Club since our last report:

Geo. Kneuper, No. 263 Broadway.
Chas. M. Palmer, No. 162 Nassau Street.
Henry G. Atha, Newark, N. J.
Wm. E. Fulton, Waterbury, Conn.
Wm. M. St. John, No. 256 Broadway.
M. J. Mulqueen, No. 253 Broadway.
F. W. Bruggerhof, No. 15 John Street.
W. B. Fox, No. 97 Chambers Street.
Frank S. Gray, Tribune Building.
H. E. Converse, Boston, Mass.
Walter H. Knight, No. 44 Broad Street.
J. B. Underwood, No. 24 Park Place.

W. C. Heller & Co., Montclair, N. J., are sending their friends a fetching leaflet that sounds the praise of the Grip Wire Stretchers in no uncertain voice. The good points of this little but sure article are pointed out, and dealers are asked to write to the manufacturers for prices and discounts.

"What's in a Name?"

Bicycles have names and names. Some people choose a wheel from its known qualities and some fall in love with a name. The ignorance of the general public as regards the names of bicycles is surprising. A gentleman recently spoke of a wheel, quite well known, to a friend. The friend announced, "from the name I should judge that it is an imported wheel." The truth was that it was a domestic wheel with a high-sounding name.

We give below the names of a number of wheels, which illustrate the wide variety of these:

Road King,	Road Queen,	Duke,
Duchess.	Prince,	Princess,
Middy,	Midget,	Rambler,
Tribune,	Liberty,	Syracuse,

Thomas A. Parke.

It is with sincere sorrow that we announce the death of Thomas A. Parke, general manager of the Hardware jobbing firm of Logan, Gregg & Co., Pittsburg, Pa. Mr. Parke passed away on December 5th. Those who attended the meeting of the National Hardware Association have especial cause to mourn the loss of the kind and genial gentleman. On the occasion of the banquet tendered the delegates of the National Hardware Association, by the Pittsburg manufacturers, at the Monongahela House, Mr. Parke contracted a bad cold. He was confined to his bed, but his physician did not consider his condition serious, but an attack of heart trouble caused his sudden death. He was born in Washington, Pa., on April 14, 1849, and when very young moved with his parents to Wellsburg, W. Va. At about the age of 14 he went to Pittsburg, where he entered the employ of his uncle, Edward Gregg, who was then in the Hardware business on Wood Street. His strict sense of business at once established the young man in his uncle's confidence, and from one promotion to another he at last entered the firm in the eighties. When Mr. Gregg died, about six years ago, the extra duties devolving on the remaining partners made it necessary for Mr. Parke to assume control as general manager, while Mr. Logan looked after the financial affairs.

THOMAS A. PARKE.

Mr. Parke married a daughter of the late Rev. Dr. Howard, of the Second Presbyterian church, and is survived by his wife and one son, Howard, who is about 19 years of age. He was a Republican by choice, and made his influence felt in various ways. Since occupying the position as chairman of the Common Council, Allegheny, he had shown himself of great fairness in the domain of politics, and his decisions and suggestions were always listened to with confidence by his associates.

Mr. Parke was president of the Board of Trustees of the Presbyterian Hospital, Allegheny, a director in the Allegheny Insurance Co., the Allegheny Heating Co., the Peoples' Natural Gas Co. and the Peoples' Savings Bank of Allegheny.

The employees of Logan, Gregg & Co., and the Select and Common Councils, of Allegheny, adopted appropriate resolutions. The Hardware Jobbers Association of Pittsburg and Wheeling at the December 6th meeting adopted the following resolutions:

Inasmuch as it has pleased an all-wise Providence to remove from among us our late friend and associate, Thomas A. Parke, and inasmuch as he always took an active part in the affairs of this body, and had its welfare much at heart, it is hereby

Resolved, That in the death of Mr. Parke this association loses a valuable member, a wise counselor, a man of superior judgment, strong in his convictions and a credit to our trade, and we deeply deplore his loss; it is further

Resolved, That we extend to his family our sincere sympathy and condolence in this, their hour of bereavement.

Resolved, That these resolutions be spread upon the minutes of the association and a copy sent to the family of our deceased friend.

The Hulbert Bros. & Co. Are Ready.

Hulbert Bros. & Co. report that within a few days their new Majestic bicycle for 1896 will be ready to be put on the market. The policy pursued by this house, has been not to delay the production of their wheels by wasting valuable time in building a few hand-made wheels to be used as samples by their travelers. There can be no doubt that a dealer would rather see the actual wheel when placing his order. Now that every tool is working, and that a large number of all component parts of the Majestic have been finished, the assembling will not be delayed, and Hulbert Bros. & Co. will be able to accumulate such a large stock before the deliveries of their spring orders begin, that the annoying delay in getting their early shipments, so frequently experienced by dealers, will be avoided.

The well established line of trade which the Majestic enjoys, enabled Hulbert Bros. & Co. to keep from showing samples sooner, as with few exceptions all their former agents have placed their sample wheel order with them now.

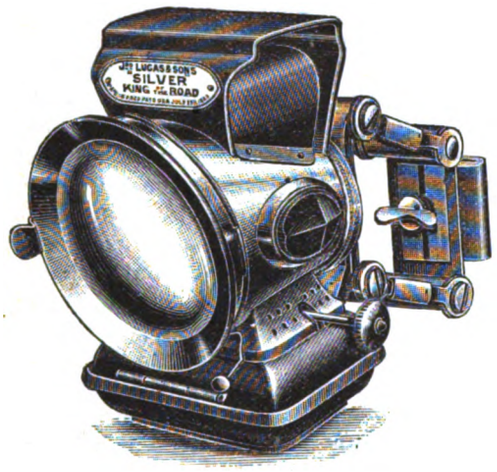
At present Hulbert Bros. & Co. are making every effort possible to keep up with their orders for Mesinger Saddles, which are pouring in from all parts, not only of the United States, but of Europe and other quarters of the globe. New machinery is constantly being added to this branch of their manufacturing business, and though the sale of the Mesinger Saddle has gone far ahead of their most optimistic calculations, they fully intend to keep up with it by continuing to add to their capacity.

Relay Mfg. Co.

The Relay Mfg. Co., Reading, Pa., are sending out a novel announcement for their line for 1896 in the form of prettily dressed paper dolls which they style "Relay color barometer." The following lines explain the use of the dolls:

This little doll in blue appears
For weather dry and fair;
Puts on a pink when storm it fears,
And violet for a change will wear.

The company will have the following models on the market during the coming season: Relay Special, weight about 20 pounds, price $100; Relay Special Flyer, weight about 21 pounds, price $100; Relay Model A, weight about 23 pounds, price $85; Relay Model B, weight about 25 pounds, price $75; Relay Model C, weight about 27 pounds, price $65; Relay Ladies', weight about 23 pounds, price $90; Relay Tandem, weight about 38 pounds, price $150.



At the recent annual election of the Grand Rapids Wheelbarrow Co., the following were elected officers: William Hake, president; Adolph Leitelt, Jr., vice-president; Frank P. McGraw, secretary, treasurer and general manager. Board of directors: William Hake, Charles W. Hake, Cornelius Clark, Adolph Leitelt, Jr., and F. P. McGraw.

The United States now controls the world's iron trade, producing about 11,000,000 tons annually. England, the former mistress of the trade, produces only 6,709,000 tons.

New Departure Sundries.

The New Departure Bell Co., Bristol, Conn., for whom John H. Graham & Co., No. 113 Chambers Street, New York, are general selling agents, make the following announcement for the season of 1896: "We take pleasure in submitting for your consideration for the season of '96, the most complete and perfect line of bells ever attempted by any maker. Our old popular line of six bells we have extended to sixteen, and have endeavored in the most complete manner to meet every possible requirement of the rider, in size, weight, price, and utility. We continue the same patterns as last year, and while they have given universal satisfaction, we have still further improved them for next season. Our cheaper grades which are new with us, we offer as the result of the most careful experiments, and we confidently recommend them to the trade as the finest goods that can be produced in their respective classes. All bells are put up under our trade mark, and are all finished in the same thorough manner, whether at the top or at the bottom of the list. We have fitted up for their manufacture the most complete bell plant in existence and in doing so, have effected a saving in cost which we propose to give the trade the full benefit of. Our new cyclometer, like all New Departure goods, is a radical departure from all existing types, and is a model of simplicity, effectiveness, and

beauty. Registers to 1200 miles, and repeats or can be quickly set back to zero at any time without opening case. Another important feature, is arrangement by which the same instrument can be used on either side of wheel, and is reversible from one side to the other at pleasure. Regarding Lucas' lamps, for which we still hold the sole agency for the United States, we are pleased to say that we are now in better position to serve our customers than ever before. The Lucas lamps are so well known by the trade that we shall not attempt a general description, except of the 'Silver King of the Road,' which is an entirely new pattern. The general outline is very pleasing. It is finished in the most thorough manner, is an excellent light giver, and we believe it to be the best lamp in every way on the market, while the price will compare favorably with any other high grade lamp. The manner for opening for cleaning, which is only partially shown in illustration, is so thorough and complete that all parts are instantly accessible and easily cleaned. A novel feature of this lamp is, that the reflector is covered and protected by a double convex lens in a nickeled screw mount, which serves the double purpose of improving the light, and keeping the reflector clean. Thus, in order to keep the reflector bright, it is only necessary to wipe off its glass protector, which is a great advantage in time and labor. We recommend this lamp highly and guarantee it in every way. The New Departure trouser guard for next year has been greatly improved in appearance. It is also lighter in weight and more desirable in every way. Our goods are so well known that when we make the further announcement that all prices are reduced for next season, we know that you will agree with us, that it a very desirable line to handle." The illustration herewith shows the Silver King Lamp. The lamps manufactured by the company include their Silver King, Kinglet 00, Toura, Pathfinder, Midget, Lucent, and Planet.

Polar Star Freezer Co.

The Polar Star Freezer Co., No. 235 Levant Street, Philadelphia, are offering the Polar Star Instant Freezer. The makers state that it is "built on entirely new principles," and that it requires only a few minutes to pack the machine with ice and salt, prepare the mixture and turn out the finished ice cream, nicely moulded and ready to serve. They further state that it is perfectly noiseless in operation having no gearing to rattle; has no galvanized iron dasher to poison the cream; "has no iron scraper to scrape off the tin with the cream to poison it, and that a revolving wooden screw conveyer made of hard maple, simply takes the liquid from the reservoir, carrying it through a tin tube, spreads it out in a thin layer in contact with the freezing surface of the tube and as the cream commences to congeal, pulls it like taffy, mixes it, smooths it and forces it through the tube into the mould all in one operation." The following claims for superiority are made for this Freezer: "It is simple to operate; has no gearing to get out of order; a child can operate it; it is continuous; its capacity unlimited and it takes only 30 seconds to make one plate of cream; it saves 60 per cent. of ice and salt; freezes everything in its natural state; and takes only one minute after material is put in the freezer until it is frozen. Also that several different kinds of cream, sherbets, ices, etc., can be frozen in succession in a few minutes, and no dirt, or water leaking on the floor, as all are confined within the reservoir."

Iver Johnson's Big Three.

Iver Johnson's Arms & Cycle Works, Fitchburg, Mass., have just closed a deal which will give them three of the largest concerns in the country for distributing agents for Iver Johnson cycles. John Wood, Jr., No. 76 Washington Street, Boston, has taken Suffolk and Essex counties and will handle the Iver Johnson and Fitchburg cycles. This is one of the best known bicycle houses in Boston. With this concern for this part of Massachusetts, the Simmons Hardware Co., of St. Louis, as Western agents, and Charles J. Godfrey, of No. 11 Warren Street, New York, who has New York, New Jersey and Pennsylvania, the Iver Johnson's Arms & Cycle Works have a trio of agents that cannot be beaten. Things are progressing rapidly at the Fitchburg factory. E. H. Wilcox, one of the best known men in the trade, has just accepted the position of superintendent of agencies for the company and will devote all his time and energy to making the Iver Johnson agencies among the best in the country. Advance circulars will be ready for mailing in a few days and will be forwarded to any part of the country on application. This concern is also doing an immense business in firearms for the Christmas holidays. Iver Johnson's firearms have a world-wide reputation, and that dealers in all parts of the country recognize this is shown by the large number of orders sent in.

The *American Artisan*, Chicago, has published a volume handsomely bound in red cloth, entitled "Workshop Manual." It is compiled by John J. Davies, and is intended as a guide for sheet metal workers, mechanics of all kinds, business men and manufacturers, etc. The information contained in this volume is of a valuable character.

A mile of copper telegraph wire weighs about a hundred pounds.

PRACTICAL TALKS TO HARDWAREMEN.

HARDWARE NAMES.

So accustomed does the Hardwareman, long in the business, become to the names of his wares, that he is not much given to speculation upon their derivation.

If the question should arise in his mind, it is dismissed with the reason, that it was so named when made, possibly hundreds of years ago—just as he was named John when he was born.

This does not satisfy the younger aspirants for Hardware lore. "If," say they, "you were named John—why John?"

To satisfy this demand the following "Whys" have been collected:

A knife was a knife in colonial times. The Pilgrim fathers had knives. Across the water the English had knives as far back as Chaucer's time, as the Sheffield Whittle testifies.

For the *name*, however, we must cross the English channel to France. In the Thirteenth Century knives were known as "Mensaculæ" and "Artari," a little later by the word "Kenivet." From which is evidently derived "Canif," or knife.

In this connection it may be said, that two prong forks are mentioned for the first time in an inventory of Charles V. in 1379. The table upon which food was placed was surrounded with benches or *bances*, whence "Banquet."

To know why a two faced rim lock is called a "Janus" faced lock, we must go from the realism of the Twentieth Century to the ideal symbolism of ancient Greece. There, in a Temple whose doors were never closed during war, Janus, the God with two faces, was enshrined.

In the Hardware Store "Janus" becomes a fitting name, indicating in the lock that it is the same on both sides, and in the store the alertness necessary to success in these days of commercial warfare.

In the Sixteenth Century *Pistoles* and *Pistolets* were so called, it is said, because they were invented at "Pistola." But on this subject etymologists differ, some preferring the suggestion that they were called Pistols from the fact that the bore was of equal diameter with the "Pistola," a coin of the time.

In the names Anvil, Stirrup and Hammer we find a very curious thing—that the position is reversed and that these articles give their names to what was made long before their use was known. The three pretty little bones of the inner ear are called "Hammer, Anvil and Stirrup."

THE DELIVERY OF A SET OF CURTAIN STRETCHERS.

One day a woman from the country came to the store to buy a set of curtain stretchers. After selecting the ones she wanted she agreed to take them, providing the clerk would deliver them for her; as it was to "Pool's Hotel only across the street," he readily assented.

When they came to the hotel they were told that the wagon yard was on another street, just around the corner. So the clerk carrying the stretcher led the way, the woman following. They found a yard "around the corner," "but," said the stable boss, "this is the city yard, the country yard is two blocks east." Arriving at the "country yard" no wagon answering the woman's description could be found. While discussing what move to make next, the woman, noticing a two-horse wagon on the car track, piled full of empty crates, exclaimed: "There's my man now."

"All right," said the clerk, "you stay here and I'll stop him." Leaving the stretchers against a building he ran after the farmer's wagon.

"Hello, there," he shouted, "Stop your team." After the usual "whoaing" and grinding of the wagon brake, the team came to a halt.

"There's your wife over there," said the clerk, pointing to the woman who had picked up the stretcher, and, much to his surprise, was shaking her head and wildly waving her free hand. The farmer looked at the woman, then at the clerk, and, as he reached for his blacksnake, said: "See here, Smarty, you can't take me in, you tell me again that there walkin' lumber yard is my wife and I'll smash your face in." Saying which he brandished the heavy whip while the clerk backed away and crossed the street to the woman. Around her quite a crowd had gathered, as she, in her excitement, had knocked over a basket of bananas which an Italian was carrying on his shoulder. When the clerk arrived the woman was explaining—the Italian swearing, and the crowd laughing. The clerk was looked upon by the crowd as the cause of the excitement. His desire to present the affair in a proper light caused a diversion in the woman's favor.

Slipping away unnoticed she had gone a half-block or so before the crowd thought of her. Then all they could see was a woman, darting in and out among the people on the sidewalk, with her curtain stretcher charging the passers by, fighting, like Joan of Arc, "for Country and for Home."

SHOP TALK.

"See that man with Mr. G—?" enquired the book-keeper of the new clerk, indicating a man conspicuous for his homeliness.

"Ten years ago," he continued, "he came to work where I was employed. He was a smart chap, but the laziest, apparently, ever created. He was so ugly and awkward that he became the butt of all our second-hand jokes. Our head clerk was quite a handsome fellow and very much given to society and, consequently, late hours. One day he was worrying 'Poxey,' as our lazy man was called, taunting him in a very mean way about his looks, when 'Poxey,' thoroughly aroused, said: 'Look here Sam! I may be ugly, and not such a masher as you are, but—in five years I'll show you I'm a better business man.'"

From that time we noticed a change in "Poxey." He got permission to take the catalogues home. He would stay at night witn the proprietor when all the clerks had gone, helping him with the plans for builders' Hardware. At first he was only a live paper-weight and kept the plans unrolled, but gradually becoming more and more useful, until he was entrusted with the entire work of taking off the Hardware and making estimates of cost. Sam was still head clerk, but "Poxey" was drawing the best pay.

Then came one of those crises in business life which broke up our establishment.

"Poxey" accepted a position with a firm in the same city, as manager of the builders' Hardware department, and then came, as I have many a time heard him say, the triumph of his life. Sam came to him for a position.

He was weak enough, he said, to remind Sam of the day he had taunted him. But, after giving vent to his feelings, he thanked Sam for the taunt, saying it was that, more than the prospect of advancement and higher wages, that had spurred him to every effort.

He then used his influence and Sam was given a position.

"I know a man," remarked the Tool-Man, who had been listening, "who was something like your 'Poxey.' He worked well enough, but aimlessly. Once he went to see about a position but the proprietor, a large, dignified man, said: 'You will not suit the position, I want a man to rep-

Digitized by Google

resent me.' With that my friend set to work and his whole incentive was to show that he could not only represent a proprietor, but that he could become one in his own person."

SHOP MAN.

The Liberty Cycle Co.

The Liberty Cycle Co., No. 4 Warren Street, New York, are making an extensive bid for the patronage of Hardware dealers this year. The company state that they will, in 1896, have one of the finest lines of bicycles that has ever been seen on the market, and dealers contemplating handling this popular line of goods next year could not get a more popular or a better line than the "Liberty." They further say that they will have ten models out next year. Their choice wheels will be the Models 26 and 30—the former being their gentleman special and the latter their woman's wheel. The weights, descriptions and prices of the wheels for 1896 will be as follows:

	Head, inch.	Frame.	Wheel base.	Weight, lbs	List Price.
Model 25, Men's Road Wheel.	8	22	43½	21½	$100.00
Model 26. " " "	10	24	43½	22	100.00
Model 27, " " "	12	26	43½	22½	100.00
Model 28, " " "	14	28	43½	23	100.00
Model 29, " Track Racer	10	24	43½	18	100.00
Model 30, Ladies' Road Wheel .. .	8	20	43½	22	100.00
Model 31. " " " ...	10	22	43½	23	100.00
Model 32, " " "	10	24	43½	24	100.00
Model 33, Diamond Frame Tandem					150.00
Model 34, Combination Tandem.....					150.00

The company state that the special 1896 features will comprise: "Five styles of handle-bars; a ram's horn, medium drop, up curve, extreme up curve and adjustable. The Liberty hub will be supplied in regular patterns, as heretofore, or in barrel pattern, as desired. The Liberty hollow fork crown, which proved so highly satisfactory in 1895, will be retained. The Liberty detachable sprocket will again be used. This sprocket has given the most gratifying results, and is the most simple and effective detachable sprocket on the market. A new pedal is offered for 1896, both in men's and ladies' patterns; a neat and attractive device, possessing great strength combined with minimum weight. The chain adjustment for 1896 wheels will remain the same as in 1895. We feel that no improvement can be made in this part of our cycles. The bearings will be constructed on our famous dust-proof principle, and have our famous 'glass cutting' cups and cones. We shall again use our Liberty detachable tire as the only detachable tire on Liberty cycles. We have had three full years' experience with this tire, and know it to be the best example of a detachable tire ever offered the public."

Scranton & Co.

Scranton & Co., No. 356 Congress Avenue, New Haven, Conn., say: "We find trade much improved, especially in such of our lines as pertain to forging machinery, power hammers, etc. A large demand for forgings of all kinds, particularly those used in the manufacture of bicycles, has stimulated business in this line. We have in the last year sold a great many of our power hammers, having given particular attention to perfecting these hammers for that class of work, and we now have orders sufficient to keep us moving lively in this department for some time. If nothing unlooked for arises, we anticipate a prosperous 1896."

Royal Cycle Works Exhibit.

The time is fast approaching when cycle manufacturers must get their exhibits for the Chicago and New York shows in shape. The Royal Cycle Works, Marshall, Mich., announce that their exhibit at both shows will be as follows:

"1 Royal Limited, in colors, to show their high class finish. 1 Royal Limited, standard pattern, as offered for sale. 1 Royal Lady, in colors, to prove that they can satisfy the most exacting critic. 1 Royal Lady, standard pattern and finish. 1 Royal Jester, a diamond frame wheel, made expressly for ladies or small gentlemen, has 22-inch frame, 26-inch wheels, and weighs only 20 pounds. 1 Royal Tandem B, for a lady and gentleman. 1 Royal Tandem A, hickory frame; special attention is invited to this wheel. 1 Royal Red Head, the personification of an up-to-date racing wheel. They will also show a full line of parts, demonstrating that their wheels are made exactly as represented. Cones will be shown on bars of steel, their new detachable sprocket wheel will be shown in all its different stages, proofs will be submitted to prove that all joints are reinforced; in fact, they will be prepared to prove any assertion they make as to the high quality of their goods." S. H. Gorham, president, and Harry Chapman, manager will look after their interests at both shows.

The Royal Cycle Works will occupy spaces Nos. 116 and 117 at the Chicago show and Nos. 97 and 98 at the New York show.

Western Electric Co.

The Western Electric Co., which is one of the largest concerns of the kind in the world, have begun running an advertisement in this issue of HARDWARE which will prove particularly interesting to retail dealers at this time. Owing to the wide and growing demand for electrical house goods the retail trade is working rapidly into this line, and no progressive merchant should fail to avail himself of the opportunity to obtain free of charge a copy of the very handsome catalogue just issued by the company. The book is a quarto of over three hundred pages, profusely illustrated, bound in art linen, and beside being a complete reference-book and price list of electrical specialties of every description, contains much other interesting matter, including a telegraph code for the use of customers and a very full bibliography of the literature of electricity. It has four indices, one covering the various departments, one devoted to material, one to code words and one to catalogue numbers.

In addition to push-buttons, batteries, electric bells, wire electrical tools and other novelties adapted to the trade, the Western Electric Co. make a specialty of electric-bell outfits of various kinds, packed in light boxes which will be found very convenient for the shelves of a Hardware store.

Equal to the Emergency.

A Hardware salesman recently attempted to get up a flirtation with a diningroom girl at the Morton House. She paid no attention to him until he called her to his side and said:

"You remind me of my sister."

"Yes?" said she. "Now, isn't it funny? You seem to remind me so much of my brother."

"Indeed?" said the young man, and winked at the other salesmen around the table. "In what way?"

"Why, he never could mind his own business."—*Michigan Tradesman.*

The Allen Mfg. Co., Michigan City, Ind., manufacturers of bicycles and specialties, elsewhere announce in this issue of HARDWARE: "A well equipped bicycle factory would like to find some article of manufacture with which to utilize its surplus machinery during summer months, Allen Mfg. Co., Michigan City, Ind."

The Berlin Iron Bridge Co., East Berlin, Conn., have just completed for the Standard Oil Co., at Constable Hook, N. J., a compounding building 120 feet wide by 130 feet long. The roof trusses are composed of steel, with steel purlins and covered with galvanized, corrugated iron.

Aluminum has been adopted in the construction of racing skates. The use of the metal gives strength with lightness as well as handsome appearance.

AMERICAN TRADE IN ASIA.

Hon. John Barrett, United States Minister to Siam, has written a letter of exceeding interest to the New York Chamber of Commerce, from which the following is taken:

"Asia in general; or Japan, China, Siam, Corea, Java, the Philippines, Formosa, in particular, seem to the average American to be unknown lands, distant abodes of heathen races, countries where primitive conditions still absolutely prevail, and where there is little opportunity for modern enterprises. Perhaps the war has brightened the horizon of their knowledge a little, but still the ignorance is so great that ninety-five out of every group of a hundred could give no adequate description of the wealth, resources, extent, development, present conditions and future possibilities of this wonderful coast line which winds in and out from the Arctic circle to the Equator, and is the only outlet of 500,000,000 of human beings. I do not exaggerate when I say that our Atlantic seaboard cannot surpass it in the number of good harbors and prosperous ports, while our whole Pacific Coast does not see as many steamers, not to mention ships, in one year, as pass through the inland sea of Japan in four months. Kobe, Japan, often has more steamers in port in one day than San Francisco in three. More vessels sail to and from Shanghai in ten days than in and out of Puget Sound in a month. As many steamers stop at Singapore during a year as at Boston, or Baltimore, or New Orleans. But above all ranks Hong Kong, which is classed as the second port of the world in the number of ships which sail in and out of its capacious harbor, and is the New York of the China coast. If any merchant in America supposes, however, that these ports are mere Asiatic cities with Asiatic conditions prevailing he is greatly in error. Few ports in America present so prepossessing an appearance in their water fronts or possess better facilities for commercial exchange. Kobe, Shanghai, Hong Kong, Singapore and Batavia are notable in this respect, while Yokohama, Nagasaki, Chefoo, Chinkiang, Foochow, Amoy, Canton, Saigon and Manilla are their competitors. The stranger who makes the journey from Yokohama to Kobe; thence through the inland sea to Nagasaki; across then to Shanghai; from there to Chemulpo; to Tien Tsin, Chefoo, or up the mighty Yangtze Kiang to Hankow past Chianking and Nanking; then down the coast to Foochow, Amoy; arrives at Hong Kong; from there goes to Canton; across to Manilla, or south to Saigon; then around to Bangkok; thence to Singapore, and finally from there to Batavia in Java, visits a portion of the world which surprises him at every stage of the journey with its present development of commerce and its immeasurable possibilities.

I once traveled over a part of this route with an eminent American manufacturer, whose remarks relative to the opportunities for our commerce I shall not soon forget. He said in brief: "Why have I not appreciated this before? Why has not some one described this field to me and compelled me to understand it?" And instead of devoting a year or two to pleasure touring he returned immediately to America to prepare his firm to enter these Oriental markets. Perhaps I may be excused for endeavoring in humble and general terms to "compel" American exporters "to understand it."

With all these ports European merchants are carrying on an extensive commerce, while that of American merchants in comparison is slight. If our trade is large, it is made so by our imports, not our exports, and hence the balance is heavily against us. Shall we, then, divide this export trade with Europe and place the balance to our credit? Our exporters must answer this.

Tangible evidence of the value of this commercial field is the presence of English traders and English ships everywhere, with Hong Kong and Singapore as unrivalled headquarters of their enterprise. In Yokohama, directly opposite San Francisco, but 15,000 miles from London by steamer route, the English outnumber the American merchants. Go up the Yangtze Kiang until the water is yellow enough to make paint and you find the English trader with his massive warehouses. In Saigon, the Paris of the Orient, the English merchant is to be found. In Siam most of the largest houses are under English control, while in Bangkok, on the Menam River, ten steamers floating the British flag can often be counted in one day. I am neither an Anglomaniac nor an Anglophobe. I believe in giving England credit for what she has done and is doing as an example of what the United States may do; but I also believe that the merchants of the United States should do all in their power as a matter of legitimate competition to take that trade away from England. Next to the English come the Germans. They are apparently making a successful contest to capture a fair portion of the Oriental trade, but should not be allowed to outstrip us. Other European nationalities are also represented, but their efforts are usually confined to their colonies or to particular sections.

I will now mention additional plain facts which will both show why Americans fail to do business in the markets of the Orient compared to Europeans, and how, on the other hand, their trade can be built up. These following statements are summarized from abundant corroborative data in my hands:

First. European firms will give practically the same terms of credit to the purchasing merchants in Japan, China, Siam, etc., as they will to customers at home. The American firm so seldom consents to like terms that Oriental buyers mention it as a hindrance to trade.

Second. European firms, through banking agencies or other means, know the financial standing of the principal importers, and upon receipt of order by telegraph or letter can act at once. The American firm, before forwarding an order, must go through the red tape of requiring proof of reliability, which usually means the deposit of a certified check, equal to the purchase price, in some bank, the loss of the use of money for many months, and a prolonged delay.

Third. The European firm wishing to create a market for its wares, will often send out a large consignment, at its own risk, to a responsible merchant, to sell under most favorable terms. This custom is popular and gaining ground. American firms usually deem this too great a risk.

Fourth. With the present low rate of exchange, the European firm will usually give the merchant time in payment to take advantage of advance in exchange. Numerous Eastern firms are authority for the statement that American exporters do not appreciate these conditions and will not make such terms.

Fifth. In packing and shipping goods to the Orient, in view of the distance and the exposure to peculiar climatic conditions, European firms are extremely careful. There are continual complaints that the average American firm does not use the great care necessary.

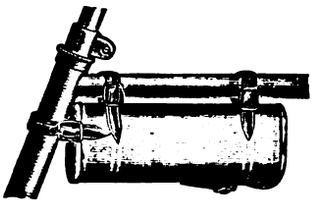
Sixth. European firms send their cleverest men to the Orient to study the conditions and needs of different localities, and men who are not discouraged by the hard work required to develop a market. Only a few American firms have special first-class men in the Orient, while too often some of those that do come have a "know it all" manner

Digitized by Google

that does more harm than good, and who lack persistency mingled with tact. I am glad to record, however, that where there are worthy representatives, excellent results usually follow.

Seventh. American exporters, in developing this field, must realize who are their competitors, must meet them on the lines the latter have established, and with their own tactics, and must not give up because the results are not especially remunerative from the start. German exporters are now sharing the trade with their English competitors, because they persisted under conditions at first adverse and profitless.

Eighth. Many leading European firms, in addition to selling direct to the Oriental merchants from the home establishment, have their own houses in the leading ports up and down the whole coast, which do a large and increasing business. There are so few real American houses on the Asiatic coast, that they can be counted on one's fingers. In Japan, there are a few prosperous firms, but in China the number is very small. Yet, in both countries, there is room for numerous well managed branch or individual firms.



Ninth. Chambers of Commerce, Boards of Trade, Banks and Banking Agencies at home, should make a special effort to obtain full and reliable data in regard to the Oriental trade possibilities and conditions. At present, even many of the largest houses and manufacturing firms in the United States seem to be entirely at sea about this part of the world, and no approved system of securing or obtaining information has been adopted. It is most difficult for the Consular representatives of the United States to answer every letter of inquiry in detail, and tell each firm what prospects it may have to develop its individual trade, but they can and do gladly give full and reliable data, through the Department of State, in Consular and other reports. Were consuls to answer every letter specifically, or attempt to do all that is often requested, they would be obliged to employ more clerks than the Government would sanction, and to convert their Consulates into commission houses. As it is, however, I believe that they give all the information possible and will willingly make extended reports on subjects outlined by Chambers of Commerce, or requested through the State Department, and not covered by the regular reports just mentioned.

Tenth. Shipping conditions need improvement, in order that the American exporter will not be handicapped by excessive rates. The European merchant can usually find numerous steamers ready to take his shipments to the Orient at low rates. There are, however, lines running direct from all the chief ports of Europe, which have regular connections with New York, and which probably afford the cheapest rates from any points east of the Rocky Mountains, but every influence should be brought to bear upon steamship lines running from the Pacific coast ports to offer inducements to American exporters, while railway co-operation is necessary to get goods from interior points to the seaboard. Favorable rates from both steamship and railway lines, as well as the establishment of new navigation companies, will tend to increase American exports, and not only benefit the shipper but the carrier. This point is sufficiently important to deserve extended discussion and agitation alone, but the conditions I have enumerated prior to it do not absolutely depend upon it.

Eleventh. The excuse of greater cost of production that may be advanced to explain the non-competition of American products in the Orient, I do not regard as logical, first, because American products are cheaper to-day than ever before; second, they are finding a market in South America and even in Europe, and can here as well; third, there would be a distinct demand for such products were the hindrances, heretofore recapitulated, obviated; and fourth, this excuse cannot be accepted until a fair and persisteut effort has been made to develop and maintain a market for American products. Some American firms are already making a gallant fight for a part of the Asiatic trade. To them great credit is due, and, if I am rightly informed, they are realizing results that should encourage others.

A Demand Supplied.

Since the advent of lady cyclists there has been a call for a special tool bag to meet the requirements of the drop frame. The Hunt Mfg. Co., of Westboro, Mass., is the first concern to place upon the market a bag furnishing this requisite. The above cut shows the bag strapped for gentlemen's use. For ladies' use it has a strap in the centre instead of at the end, so that it may be attached to

the handle-bar of the machine, the centre strap passing around the upright tube thereto to prevent swaying. This bag, which is their No. 41, presents a most handsome appearance, having both ends finished in superb nickel-plate, while the leather is the finest obtainable. Besides furnishing a very dainty appearance the metal ends tend to preserve the shape of the bag. "Lady cyclists having their own interests at heart will certainly insist on having these bags furnished with their wheels."

Luminous Paint.

The most recent, and, it is claimed, practical method described for the production of luminous paint is as follows: Oyster shells are cleaned with warm water, then put into the fire for half an hour, at the end of which time they are taken out and allowed to cool; when quite cold, they are pounded to a fine state, all gray portions discarded, and the powder placed in a crucible, in alternate layers, with flour of sulphur. The lid is put on and cemented with sand made into a stiff paste with beer, and, when dry, is baked in the fire for the space of an hour. When quite cold the lid is opened, and, as the product should be white, all gray parts are to be separated, as they are non-luminous. A sifter is then made by taking a pot, putting a piece of very fine muslin loosely around, tying about with a string, and the powder is put in at the top and raked about until only the coarse powder remains. On opening the pot, a very fine powder is found, and this is to be mixed into a thin paint with gum water, two thin applications being better than one thick one. This is said to be a luminous paint that will show luminously far into the night, provided it is exposed to the light during the day.

At the old and well-known headquarters, Nos. 126–128 Chambers Street, New York City, will be found the prosperous, reliable and enterprising firm of C. M. Moseman & Bro. The fact that they have secured the '96 agency for the popular Fenton Bicycles is significant of continued success.

The New York Stove Co., Glen Elder, Kan., has filed charter, changing its place of business to Downs. The directors are W. T. Lutz, J. A. Stivson, E. D. Horn and others. Capital stock, $20,000.

The McLagon Foundry Co., New Haven, Conn., will erect large addition to the plant of the Frisbie Elevator & Mfg. Co., which property they have recently purchased.

The Iron nail works at Brilliant, Ohio, will resume work.

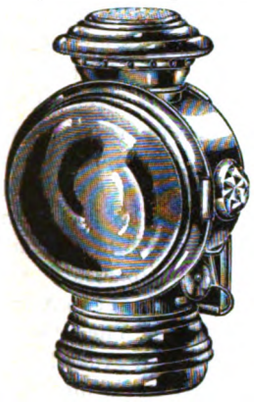
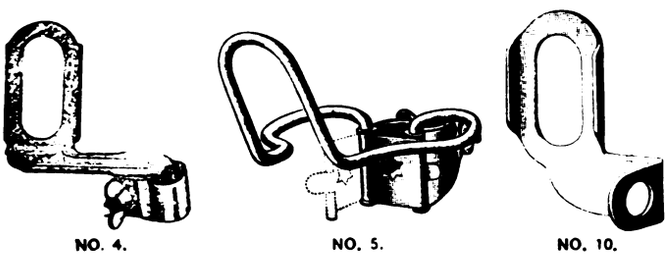
ILLUSTRATED BICYCLE NOVELTIES.



MANUFACTURERS and DEALERS are invited to make FREQUENT USE of these columns.

Anything NEW in BICYCLES or BICYCLE NOVELTIES should be sent us immediately. NO CHARGE, direct or indirect, is made, as our interest lies in SHOWING THE HARDWAREMAN what is going on in THE BICYCLING WORLD.

When your NOVELTY is ready, send us an Electrotype and descriptive matter, which will appear immediately.



Aladdin's Lamp.

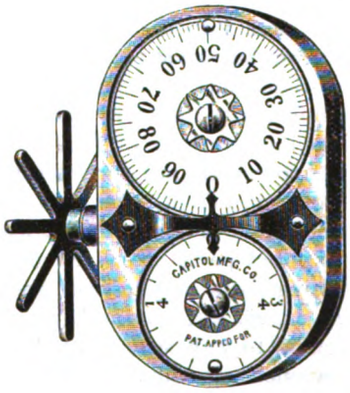
The Aladdin Lamp Co., No. 120 Market Street, Newark, N. J., as sole agents, are offering a Bicycle Lamp as herewith illustrated. It is finished in nickel, and no solder is used in the body, consequently, it is pointed out, there is nothing to melt. The lamp is referred to as being light in weight, simple in construction, as burning eleven hours without refilling and as throwing light fifty feet ahead of the wheel. The point is made that it lights the way of the rider and that it is more than a signal. The lamp is designed to burn good bicycle oil and to have the wick turned high enough to produce the necessary flame without smoking.

Improved Star Lantern Brackets.

Herewith we give illustrations and descriptions of the 1896 Star Lantern Brackets, which were in large demand last season. The Bridgeport Gun Implement Co. state that they have modified the bending of the steel wire loops, so that there is no fear of their breaking at the bending points. They also wish to call special attention to their new Brake Bracket, which can be attached to the head of a bicycle without removing brake. The Fork Bracket is constructed from one piece of stamped steel, held at the fork by adjustabie thumb-screw in a band of spring steel, and has a new style of curved lips on the holder, which prevents the lamp from being jolted off or out of position. They are made for either right or left side of fork. There are a great many styles of axle brackets on the market, and the Bridgeport Gun Implement Co. claim to have introduced the first axle bracket that will hold a lamp securely. This company must also claim credit for introducing the first lantern bracket to be lined with chamois, thus preventing the marring of the frame of a bicycle. Manufacturers and dealers can secure prices by addressing the Bridgeport Gun Implement Co., 313 and 315 Broadway, New York.

NO. 4. NO. 5. NO. 10.

The Beebe Tire.

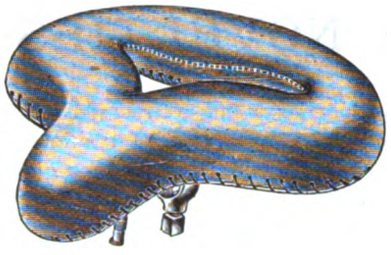


The Beebe Tire Mfg. Co., Sandusky, Ohio, are manufacturing a tire as here shown. It is constructed on the general principles of a hose tire, but incorporating into its formation a zigzag spring that is used in the same relative position that fabric is interwoven in hose, making, when complete, a section of hose reinforced with a spring, designed to give, when used as a tire on a wheel, practically the same easy riding qualities possessed by one using air for its cushion properties. These tires, it is explained, can be manufactured with any degree of resiliency desired, simply by increasing or decreasing the wrappings of the zigzag spring, as would be done in a three-ply, four-ply or five-ply hose. The wire spring used in the construction of the tires is made from a light extra drawn piano wire having,

it is stated, a tensile strength of 250 pounds to the inch. The wire is imbedded in the raw rubber, which is cured by a vulcanizing process, so that it is matted solid in the walls of the tube; it being almost impossible, it is remarked, to separate the springs from the rubber with a sharp knife. The tire, it is claimed, is free from all annoyances incident to puncture that an easier riding tire is, the only noticeable difference with or without air in the tire, and that they may be used without any air whatever in them, or with as little or as much as desired. The company state that a wheel has recently been examined, having on one of their tires that has been run nearly 2,500 miles this season, and that the tire is good for as many more miles of riding. In this case the valve and valve stem were cut off before putting the tire on the wheel, thus leaving it entirely dependent upon the spring properties. It is stated that if not informed, anyone using the tire would not know but that they were riding on a superior grade of pneumatic tire. The tires are designed for use on bicycles, invalids' chairs, sulkies, vehicles, etc.

The Climax Cyclometer.

The Capitol Mfg. Co., Chicago, Ill., are offering the Climax Cyclometer as here shown. It registers up to 10,000 miles, and the figures are said to be plain, enabling the rider to read them easily. It is remarked that the trip dial can be set back at any time, while the total recorder on back of instrument, under glass cover, keeps a true and

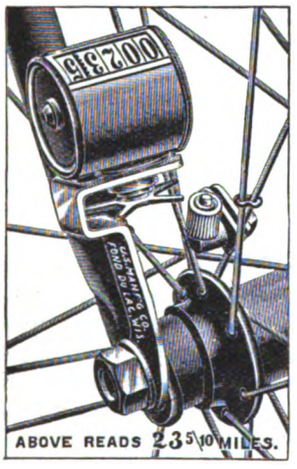


absolutely correct record up to 10,000 miles, and cannot be tampered with, but can be set back whenever the rider desires to do so.

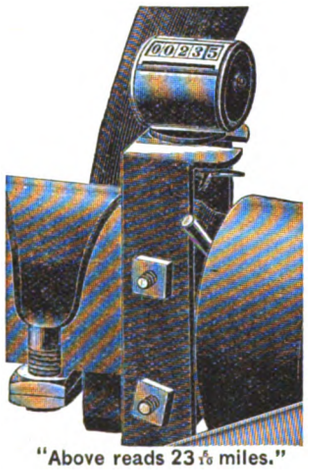
The Cutting Pneumatic Saddle.

Cutting & Kaestner, Chicago, Ill., are offering the Cutting Pneumatic Saddle as shown here. Its principle is very much like an inner tube tire—there is an inner tube of a fine grade of rubber which is surrounded by an outer covering of soft leather. It is remarked that the saddle can

Digitized by Google



be inflated so that almost every bit of the jar can be taken from the wheel, and in connection with the pneumatic tire,



makes riding fifty per cent. easier. The same style is made for ladies and gentlemen.

The U. S. Cyclometer.

U. S. Mfg. Co., Fond du Lac, Wis., are offering the U. S. Cyclometer as herewith illustrated. It is one inch long, ⅞ inch in diameter, and weighs one ounce. It registers 10,000 miles and repeats or may be set back at any time. It attaches on right, allowing the lamp to be carried on left side. It is said to have an entirely new register action, a train of positive gears taking place of the pawl system used in '95 model. The clamp is curved, throwing the meter up and close to fork, out of the way, and safe from accident. The meter is adjustable on clamp for proper distance of spokes. It is remarked that the meter is as nearly dust and water proof as is practical to make it, and that should a little dust work in, it will settle to the bottom and do no harm. Also that water in any quantity cannot injure it, as all parts are made of non-corrosive materials. To clean the meter, remove the end of the case. The working parts attached to the end piece may be cleaned and oiled a little with clock oil; the register may be slipped out to remove any dust

"Above reads 23 ⅝ miles."

that may have worked into case, and the register wheels may be wiped clean, but must not be oiled. It is pointed out that the workmanship is the most careful, and to insure perfect action, every meter is run at least 400 miles on a testing machine, at rate of fifty to sixty miles per hour. Fifty to 100 meters are run at same time on one machine, and several meters have been run 3700 to 4300 miles, and actions have not shown the least wear. The case and all exposed parts are of nickel silver and the springs and wearing parts of phosphor bronze. They are made for 20, 22, 24, 26, 27¼, 28 and 30 inch wheels, and are interchangeable to any size, and will be changed free of charge. A wrench accompanies each meter, the ends fitting clamp nut and spoke stud.

Attention is called to the advertisement of H. O. Canfield, Bridgeport, Conn., the well-known manufacturer of mechanical rubber goods, whose products have the reputation of containing an extra good quality of rubber, and produced by skilled workmen. He is prepared to make any special article at shortest notice, and will be pleased to quote low prices and guarantee satisfaction in every particular.

The F. & N. Lawn Mower Co.

Attention is called to the advertisement of the F. & N. Lawn Mower Co., of Richmond, Ind., successors to the F. & N. Mfg. Co. Erroneous reports have been circulated to the effect that this concern had wound up its business, and that the excellent line of Lawn Mowers manufactured by it would not be again made and offered to the trade. These reports do this enterprising company a great injustice, as the business was simply reorganized with a slight change in the name. It has a paid-up capital of $40,000, and among its stockholders are several wealthy and leading manufacturers.

The excellent line of Lawn Mowers made by this company last year will again be placed on the market, and in addition the company has now to offer the "F. & N. High Grass" to meet the increasing demand for a high wheel mower. This machine is sent out with an absolute guaranty, and is warranted first-class in every respect. The wheels are ten inches in diameter, and the reel seven inches in diameter with four spiral knives. This mower is fitted with the "Micrometer Adjustment," patented by this company, and which is a distinguishing feature of all their lawn mowers. The cutter-bar is of solid tool steel, tempered in oil. The reel knives are made of highest grade crucible steel. The ratchet is the "patent noiseless," and is so "housed up" that dirt and grass cannot get to it and disturb the perfect action of the machine. The "F. & N." still retains its position as a standard high grade Lawn Mower. The "New Delight" is offered as a medium-priced machine. The "Razor Blade" is the lowest-priced machine which the company have to offer, but it is guaranteed to do satisfactory work. In short, the company represent that nothing is used but first-class material, that only first-class workmen are employed, and that every machine is carefully inspected betore leaving the factory, and is put out with an absolute guarantee that it will give perfect satisfaction.

Johnston's Window and Door-Frame Attachment.

J. D. Johnston, No. 70 Pelham Street, Newport, R. I., is successfully manufacturing a Window aud Door-Frame Attachment, for securing storm sashes, storm shutters and the like. The new device consists of a light socket-plate, let into the edge of the outside casing, and flush with the same; a narrow vertical slot recess being formed in the plate; a thin latch-plate or tongue pivotally mounted in recess, and adapted to be swung or turned outward when occasion demands. "The tongue is provided with a countersunk perforation adapted to receive a screw, which is passed into the storm sash or shutter from the inside of the room. It will be understood that the device just described is to be used in series, two or more being used on either side. These socket-plates are designed to be permanently set; and in seasons when it is desirable to place screens, storm sashes or shutters, the tongues are turned out of the recesses and a screw is passed through each into the wood frame. The job is at once perfectly neat and secure." These sell at twenty-five cents each. Further mention of them, with illustration, can be found on page 54 of this issue.

The United States Foundry Co., No. 11 South William Street, New York, inform a representative of HARDWARE that while not many months ago they held a stock of 3,400 tons of Sash Weights at their various foundries, they now do not have one-tenth of this quantity on hand. No stronger evidence of the revival in the building trades could be found than in this fact.

American agricultural implements and barb wire are in great demand in South Africa.

International Rolling Wire Window Screen.

The International Rolling Screen Co., No. 113 Devonshire Street, Boston, Mass, are introducing a Rolling Wire Window Screen, as shown herewith. Guide racks made in combination of hard rolled brass and enameled steel plate are screwed to the sides of the window frame, inside the sash. The cylinder casing within which the screen is wound is of steel, tinned and enameled to prevent corrosion. Within the cyclinder is an iron tube of terne plate upon which the

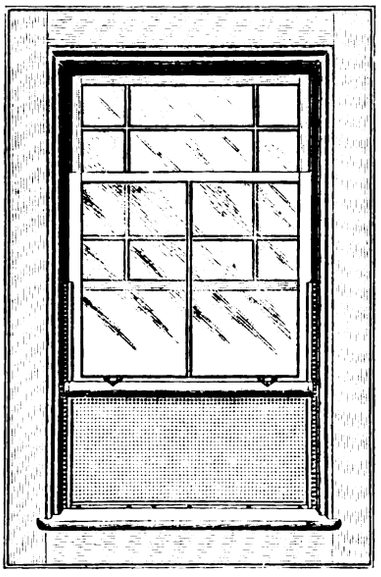

FIG. 1.

screen winds. A shaft of steel, coppered, runs entirely through the cyclinder, on the outer ends of which hard rolled lacquered brass pinions are keyed and riveted. The tension spring is of steel, hard rolled and tempered. The bearing caps are of hard rolled brass, lacquered, and the foot piece, which is fastened above the window sill, is enameled steel. When not in use the screen rolls up in the cylinder casing at the base of the window, on the inside, as shown in Fig. 2, and when rolled up occupies a space of 1¼ inches in diameter. The screen is raised or

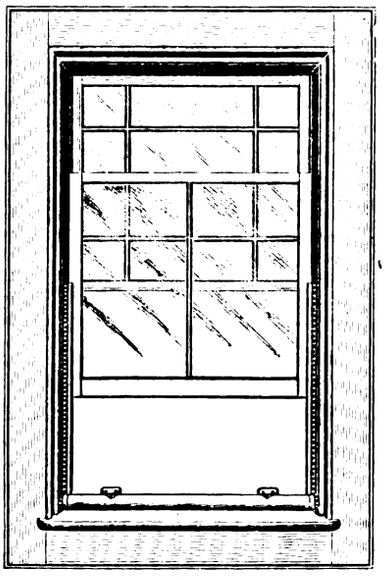

FIG. 2.

lowered similar to a window shade, and is wholly independent of the sash. The cyclinder may be raised to any height on the lower sash desired, raising and leaving the bottom of the lower sash the same height as the cyclinder. A weather strip is placed on the bottom of the upper sash, so that the rubber just clears the glass of the lower sash. This is to prevent flies from crawling between the sash, and also serves as a weather strip in the winter. The racks and foot piece are provided with felt strips to make the lower sash perfectly weather stripped when closed. The screens are furnished in colors to match the window sash, in ivory, white, cherry and oak. The point is made that the rolling screen casings and fittings will wear many years, and that they may be painted over whenever painting the window sash; also that the copper bronze wire cloth will probably be the only part requiring renewal, and that the cloth is likely to wear 12 or 15 years. It is stated that a competent carpenter can put in from 20 to 35 window screens per day. The following points of excellence are brought out by the manufacturers: When the screen is not raised it is thoroughly protected from the weather by being rolled up in the case; the screen can be used at any height of the lower sash, and does not leave wire cloth behind or in front of the glass to look through; the screen operates freely and continues to do so, as it is not subjected to the swelling and shrinking of the wood-work as outside sliding screens are; that it does not require removing from the window casing the year round, but it can be conveniently taken out if desired; the screen is entirely out of the way when washing the windows or when the blinds need adjusting. The screens as a whole are ornamental, and are guaranteed by the makers for five years. The company state that they have just been awarded a silver medal at the Mechanics' Fair, in Boston, which is the highest prize ever awarded for screens.

The Chicago Cycle Show.

It seems to be an assured fact that the Chicago Cycle Show, which will be held at Tattersall's under the direction of the Board of Trade of Cycle Manufacturers, January 4th to 11th, will be productive of great good, both in direct returns to the exhibitors and in the education of the agents and others attending. The list of exhibitors numbers 105 and has already appeared in HARDWARE.

If it were possible to get the use of a building with double the floor space of Tattersall's, which is located at the corner of Sixteenth and Clark Streets, every inch of it would be occupied by those establishments which have already been allotted space at the Show as well as by those who were late in making application for space, and so are denied the opportunity of exhibiting their goods. Even at this date, with the Show yet six weeks away, there are almost a score of establishments which have been denied admittance to the Show owing to want of room within the building. Originally it was planned to hold the exhibition in the Coliseum Building, which huge structure collapsed as it was being erected. The Coliseum will be available for the next Chicago Cycle Show, for the building is now being reconstructed, and will be ready for occupancy by next summer.

The Show will open on Saturday evening, January 4th, and close the following Saturday. That the representation will be of the widest character is patent to anyone who will carefully examine the list of exhibitors. Agents and attendants at the Show will again be entitled to the same reduction in railroad fare which was obtained for them on the occasion of the last Chicago Show. A rate of a fare and a third for the round trip will be issued.

Tattersall's Building is not more than ten minutes' walk from the centre of the business district. The appearance of the Show will be much superior to that seen at the last exhibition. The exhibits are mixed, and not as they were last January, in departments.

Every effort is being made to bring agents up to Chicago for the purpose of inspecting the new models, and from assurances now in hand and the education which these agents who attended the last Show received, it is expected that at least 5000 dealers will be recorded upon the trade visitors' book.

The United States has already exported $3,442,468 worth of Hardware during 1895.

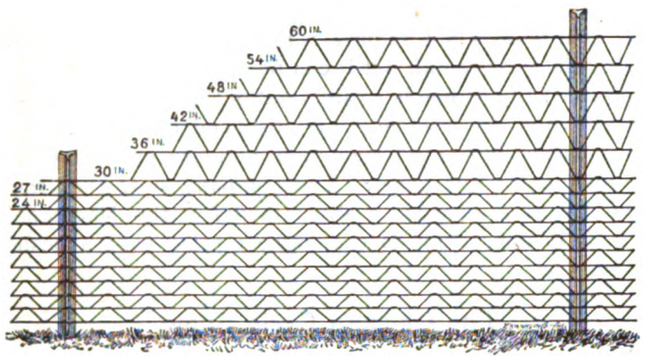
NEW GOODS IN THE MARKET.

If you have anything NEW, let the world know it by illustrating it in these columns.



NO CHARGE WHATEVER is made, direct or indirect, as our interest lies in showing the readers of "HARDWARE" where the LIVE manufacturers and wholesalers are, and what they are doing.

When your NOVELTY or SPECIALTY is ready, send us an Electrotype and descriptive matter, which will appear immediately.

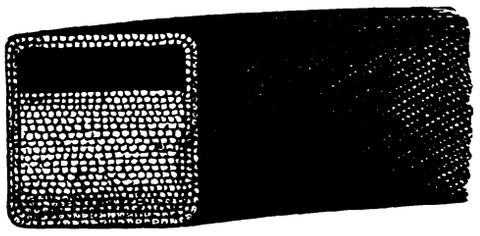
The Hardwaremen everywhere read this department; it is to your interest to make prompt use of it.

The Hartman Stockade Fence.

The Hartman Mfg. Co., Ellwood City, Pa., are offering a Woven Wire Fence, as shown here. It is constructed of

galvanized steel wire, No. 13, and is designed to stand climatic changes in temperature. The bottom strands have a three inch mesh close enough, it is remarked, to turn the smallest pigs or fowls. The top strands have six inch meshes, thus economizing material to the best advantage. The makers state that this fence is easily put up, and it weighs 20 to 25 per cent. more per rod than other styles of woven fencing, and that an ordinary wire stretcher will do the work. It can be used for sheep, pigs, poultry or as a protection against rabbits. The above illustration shows the different heights of the stockade fence. It is put up in standard rolls of twenty rods each, or in special lengths when ordered.

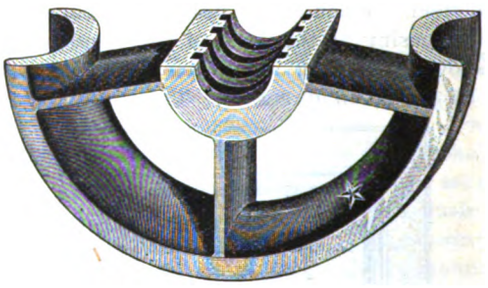
White City Combination Puzzle Safe.



Nicol & Co., Nos. 55 and 57 West Washington Street, Chicago, Ill., manufacturers of Hardware Specialties, have brought out a line of Toy Banks, one of which is herewith shown. They are of gray iron, highly nickel plated and so constructed that the money cannot be shaken out. The

problem of opening the bank cannot be solved without first being shown. Directions and solution of the puzzle are packed with each one. They are so constructed that they will not get out of order. Pictures of the World's Fair Buildings and of the Ferris Wheel are engraved on them. The line covers several sizes of safes of the regulation pattern, as shown in the cut, also a representation of a barrel of money and a pail of money, all of them being puzzle banks.

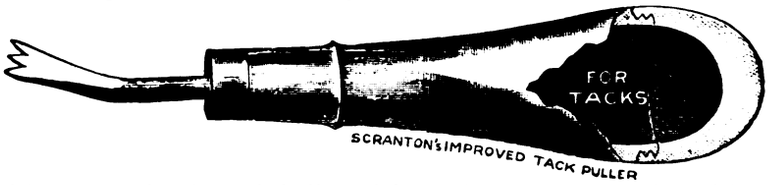
Garlock High Pressure Packing.



The Garlock Packing Co., Palmyra, N. Y., are placing on the market a High Pressure Packing, as here

illustrated. It is made of selected fibre and metal, in combination with the Garlock Packing Compound. This packing is described as being especially adapted to high pressure work and is so constructed as to ensure long service. It is made in 16th and 8th sizes from one-quarter inch to two inches square.

Self Lubricating Bushing In Block Sheaves.

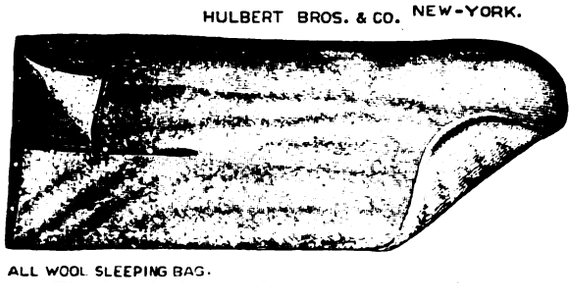


The accompanying illustration represents Ford's Bushing, which came by purchase into the hands of the Boston & Lockport Block Co., Boston, Mass., who are now placing it on the market. It consists of the combination of a self lubricating composition with the iron in the hub of the sheave, to produce a wearing surface that will run continuously without oil and a great reduction of friction, thus avoiding heating and squeaking. All sheaves with the

Ford's bushing will have a bronzed groove and will be known to the trade as Gilt Edge Brand. The company state that actual tests have proven that blocks with Ford's Patent Self Lubricating Bushing will last three times as long as those with plain or common bushings; that their cost is but a small percentage above that of the regular common bushing blocks, and that they are prepared to furnish the goods from either their Boston or Lockport factories, or from their stores in New York, Chicago and St. Louis.

A New Tack Puller.

Scranton & Co., New Haven, Conn., are placing on the market the Tack Puller represented in the accompanying illustration. The jaw has three points, is made of tempered steel, and firmly set in the handle. The handle is

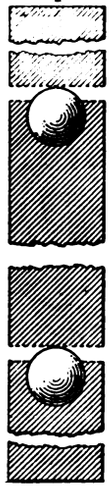


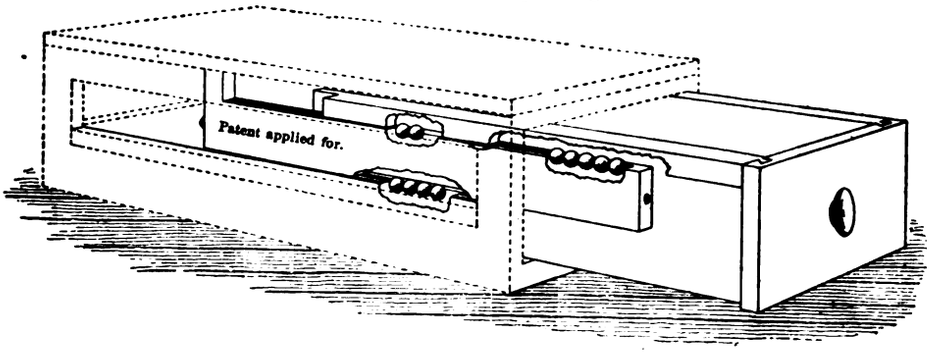
made of wood, hollowed for a place to store tacks, with a top which screws on. The manufacturers state that it is adapted for household use, being light and convenient to handle.

Digitized by Google

The Hulbert Sleeping Bag.

Hulbert Bros. & Co., No. 26 West Twenty-third Street, New York, have perfected a Sleeping Bag as here shown. It is a heavy, all-wool blanket closely fitted, with a soft nap inside to make it comfortable, it is claimed, even in zero weather, designed for use of all kinds of sportsmen and people whose occupation necessitates their sleeping out of





ALL WOOL SLEEPING BAG.

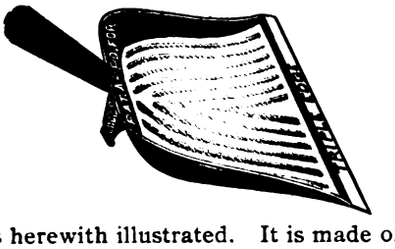
doors. The bag is fastened by patent snap fasteners, such as are used on gloves, but much larger in size. The top of the bag is so made that it comes well up around the neck and fastens down the front, making an absolute protection for the entire body. The back is sixty-four inches wide and six feet long, to give freedom to the movements of the legs and arms. This is preferable, it is pointed out, to being bound up almost immovable, as in the case when rolled up in an ordinary blanket. It is remarked that it is the work of but a few moments to get out of the bag, which can be done more quickly than with square shaped covers; also, that as the bag is closed at the bottom and sides it is not necessary that another wrap the occupant up, and that it is impossible to kick the feet out and thus catch cold. The shape of the bag, also, makes it valuable as a knapsack for carrying clothes. The bags come in three weights, the extra heavy being particularly suitable for the Northwest; and in red, gray and dark colors.

Kimball's Ball-Bearing, Anti-Friction Drawer Running Device.

Kimball & Palfray, No. 45 Kilby Street, Boston, Mass., have introduced a Ball-Bearing, Anti-Friction Drawer Running Device, as herewith illustrated. The makers state "that operating as it does on the ball-bearing principle, on steel balls which will not get displaced, and moving so easily that a slight touch of the hand will close a drawer, it is particularly desirable for office desks, bank drawers and stores using drawers for heavy merchandise." It is further said that it can be applied to any size drawer, on old or new furniture, by an ordinary mechanic, and is so constructed that when applied to a drawer, operating as it does on ball bearings, it overcomes the difficulty which so often arises from swelling and binding, and can be opened or closed with one hand from either end. It also allows the drawer to be opened its full length, greatly facilitating its

use in the stowage and removal of goods. The drawer can be removed for dusting, etc., and replaced without difficulty. The device is manufactured in three sizes, 16, 22 and 28 inches long, which can be reduced to fit any size drawer. Prices are as follows: 90 cents for 16-inch size; $1 for 22-inch size; $1.10 for 28-inch size. Special sizes made to order at short notice. Discount to the trade.

Rotary Shackle Automatic Padlock No 942.



The Slaymaker-Barry Co., Lancaster, Pa., John H. Graham & Co., No. 113 Chambers Street, New York, agents, are putting the padlock shown in the illustration on the

market. It is described as being high grade, all parts of cast bronze metal, with three tumblers, phosphor-bronze springs, depressed background finished in dead-black enamel, while the rest of the lock is polished and lacquered. Two rolled steel keys, nickel plated, accompany each lock, with no two alike in a dozen. To unlock, the key is turned in the usual manner, drawing the shackle into the case, where it is held automatically by the trigger shown in the opening of the case, thereby releasing the object locked. To lock, the staple or eye bolt is touched on the trigger, thus releasing the shackle, which automatically rotates and locks the lock. The point is made that the trigger, being near the top of the lock, will permit contact with the staple, no matter how short it may be, and the consequent operation of the lock. The manufacturers state that the action of the lock is positive and smooth, and that the mechanism is so arranged that the operation of the lock by the key is very smoothly and easily accomplished.

Triple Edge Never Slip Dust Pans.

The Seavey Mfg. Co., No. 119 North Street, Boston, Mass., are offering the trade the Triple Edge Never Slip

Dust Pan, as herewith illustrated. It is made of steel and wired with triple edges, so constructed, it is explained, as to make a pocket to retain the sweepings. Another feature, it is pointed out, is the "Neverslip," which is a rubber foot under the pan to prevent it slipping when placed on the carpet or the floor.

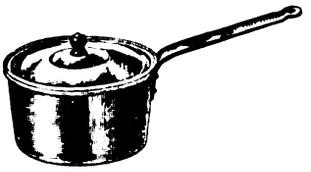
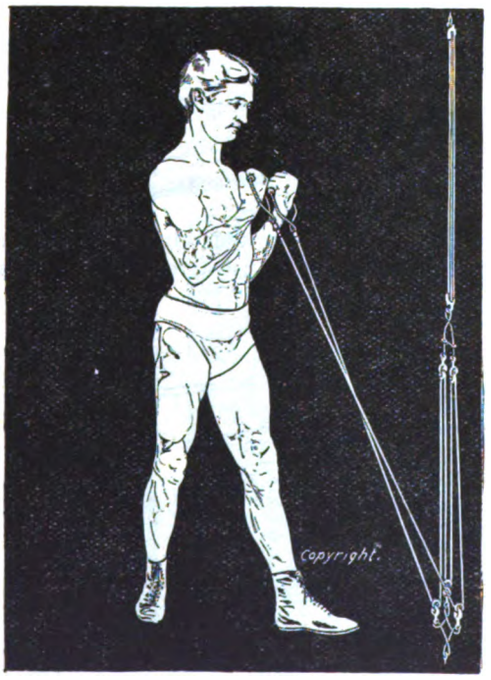
Chicago Copper Utensils.



The Illinois Stamping Co., Chicago, Ill., have begun the manufacture of the Chicago line of Copper Cooking Utensils. It is believed that they are the first to produce stamped ware of this character from copper. We illustrate herewith a Lipped Preserving Kettle, Deep Cooking Pot,

Lipped Saucepan and Stewpan. These sufficiently represent the company's line, which at present covers saucepans, preserving kettles, cooking pots and stew pans, but will soon include tea and coffee pots, and be rapidly extended to other specialties. They are all tinned on the inside, so that they are perfectly wholesome and free from any suspicion of unhealthful action on the contents. The general manner in which these goods are finished is indicated by the following description of the lipped preserving kettle:



The material is heavy copper, tinned on the inside; the lip is deeper than in the ordinary lipped kettle; the ear is so made that the handle cannot rest upon the vessel to get heated or to mar the edges of the vessel itself; the exterior finish is as attractive as possible. The company's trademark is into the metal, and is not put on in the form of a paster or label. The price is moderate when the excellence of the goods is considered.

Universal Exercising Machine.

Hulbert Bros. & Co., No. 26 West Twenty-third Street, New York, have placed on the market a home Exercising Machine as illustrated herewith. The machine is described as being changeable in resistance from one to forty pounds, so as to regulate it to suit any strength, from that of a child to that of a man. The machine can easily be put up anywhere without tools, and weighs less than two pounds.

It is referred to as absolutely noiseless, and is warranted by the manufacturers for two years. With each apparatus is given an illustrated book of instructions, containing fifty half-tone photographs taken from life, together with a complete treatise on McFadden's system of physical training. The machine is packed in a pasteboard box six inches square and two inches deep.

Universal Swivel Bench Vise.

Greene, Tweed & Co., No. 83 Chambers Street, New York, are offering the Universal Adjustable and Swivel Bench

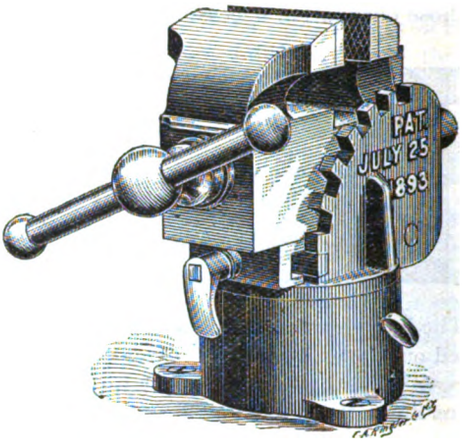


FIG. 1.

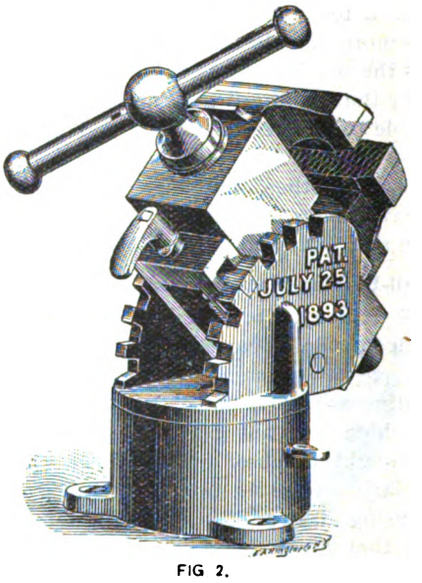
Vise here shown. Figs. 1, 2 and 3 represent the vise in a variety of positions, which, by means of the finger piece seen in front, used in conjunction with two coil springs,



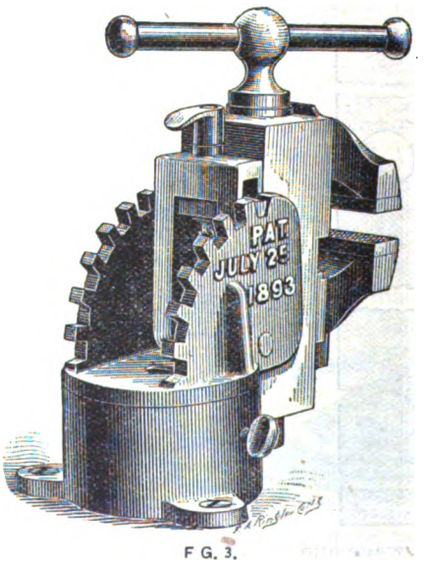


FIG 2.

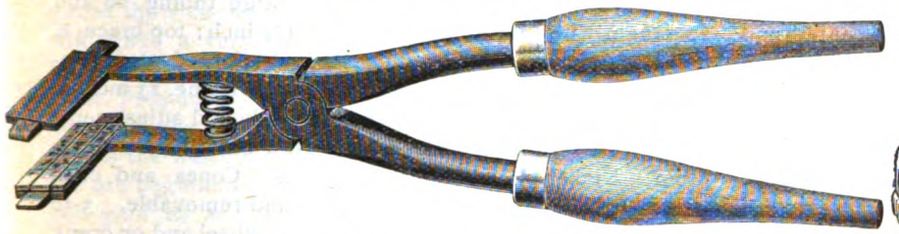
permit the work to be held in any position most convenient in an arc covering 180 degrees. In addition the entire upper portion revolves horizontally, making it possible to hold

F G. 3.

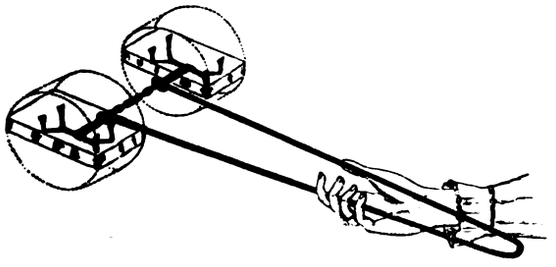


materials at any angle, the small thumb at the right holding the swivel at any desired point. The jaws are steel faced, lever and screw wrought iron and body of vise cast

Digitized by Google

iron. So far the sizes manufactured are Nos. 2 and 4, having widths of jaw three and five inches respectively. The vises are made by the Lewis & Laurie Mfg. Co., No. 142 Duane Street, New York.

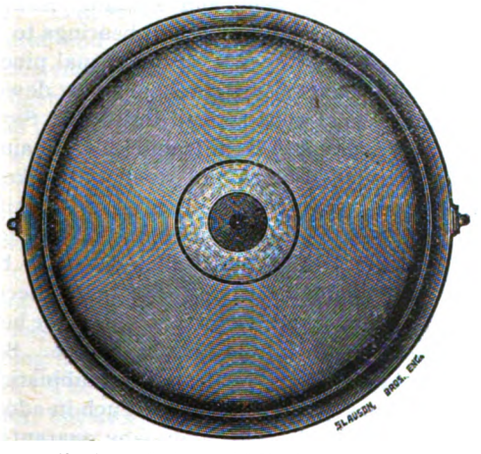
Alpha Dish Tongs.



The Elizabeth Mfg. Co., No. 2 Irvington Place, Elizabeth, N. J., are introducing Dish Tongs, as illustrated. They are made of malleable iron, japan finished, with polished wood handles and nickel ferrules. The tongs are designed for use when washing the dishes in scalding water, to avoid the necessity of putting the hands in the water. The makers state that the tongs are shaped to adapt themselves to

any form to pick up plates, platters, saucers, cups, spoons, bowls, etc., and that the jaws are ingeniously covered in a manner that insures a firm grip. The point is made that dishes washed in scalding water cleanse perfectly and dry instantly, and that in connection with a dish mop the tongs remove the most disagreeable features of dish washing, to say nothing of the extra cleansing and drying.

Revolving Bread Toaster.



The accompanying illustration represents a Rèvolviag Bread Toaster, placed on the market by the Cincinnati Mfg.

Co., Cincinnati, Ohio. The bread is placed on the prongs, and, by pressure of the hand, revolves over or in front of the fire. It is explained that the bread is toasted uniformly on both sides and at the ends, and that the device protects the hands and face of the operator from the heat.

New Cronk Griddle.

The Cronk Hanger Co., Elmira, N. Y., are introducing a new Griddle as illustrated herewith. The makers explain

that the peculiarity of the griddle is that the heat is evenly distributed over the whole upper surface, these results being obtained by means of a deflecting centre composed of asbestos and galvanized iron in the form of a pad, which is secured to the under side of griddle, for the purpose of intercepting and turning away a portion of the heat that would otherwise pass through this central portion to the upper surface. The griddle is said to brown the cakes evenly and free the kitchen from smoke.

Another Akron Novelty.

When Solomon declared there was nothing new under the sun, he had not yet paid a visit to Akron, Ohio. Hardly

FIG. 1.

FIG 2

a day passes that the Enterprise Mfg. Co. of that enterprising city does not turn out some novelty in disproof of this assertion. Among the latest efforts in that direction may be counted Pflueger's patented Lamp Stove and Curling Iron Heater, which is described as "just the thing for family use and outing parties." In Fig. 1 is shown the Heater as it appears on the chimney; in Fig. 2 one of its uses in the kitchen, the nursery or the sick room. The especial points made in its favor are: Will fit any size chimney; will accommodate any size or style of curling iron; curling iron can be adjusted as close to the flame as desired; Heater will positively not smoke up the chimney; has no equal for utility, neatness and durability; will hold a small kettle or other receptacle, and requires but a few moments to heat contents; a great convenience in case of emergencies during the night; will hold two or more irons at one time. It is made entirely of heavy spring brass, and fiuely plated nickel silver. Packed one in a box and one dozen boxes in a carton.

The Enterprise Mfg. Co. make this special offer to retail Hardwaremen. They will send one dozen Heaters put up in cartons, to any address on receipt of sixty cents, by mail or express, prepaid. This is the price sold to the jobber, the regular retail price being $9 per gross, but they feel that samples at five cents each would interest the trade, and furnish a test of the selling qualities of the article. Give them a trial.

Crimson Rim Record.

On December 4th, John Green and C. S. Erswell, both of Cheyenne, Wyo., broke the world's records for the mile straightaway unpaced flying start and the mile straightaway unpaced standing start. Both riders were mounted on Syracuse wheels. The new records established were as follows: 1-mile straightaway unpaced flying—John Green, ½-mile, :41 2-5; 1-mile, 1:25. 1-mile straightaway unpaced standing—C. S. Erswell, ½-mile, :51 2-5; 1-mile, 1:40 1-5. These performances were timed and witnessed by the proper officials of the L. A. W. and C. R. C. The Syracuse Cycle Co. state that they are "in possession of affidavits substantiating the authenticity of these records given by judges, timers and others appointed by chief consul of the State."

BICYCLE ANNOUNCEMENTS FOR 1896.

ROYAL CYCLE WORKS.

The Royal Cycle Works, Marshall, Mich., will offer six wheels for the season of 1896. The detailed description of four of the models follows. Royal Limited: Actual weight 22½ pounds, 24 inch frame, large tubing, reinforced joints, drop forgings throughout, solid forged fork crown, with nickeled head; 28 inch wheels, barrel hubs, best piano wire swaged spokes, detachable and reversible sprockets, ¼ inch Humber pattern tool steel chain, with hardened centers and hardened rivets; oval forged cranks tempered in oil, 1 inch handle bars, tapered at end to ⅞ inch; Brandenburg pedals, Garford, Sager or Gilliam saddles, any gear from 60 inch to 76 inch, Morgan & Wright, Palmer or detachable Dunlop tires; 5-16 inch balls in crank axle, ¼ balls in both wheels, tool steel bearings, 5 inch head, standard finish, black, with nickeled parts on copper. Royal Tandem: Actual weight 37 pounds, 24 inch frame, large tubing, reinforced joints, drop forgings throughout, solid forged fork crown, 28 inch wheels, barrel hubs, best piano wire swaged spokes, Humber pattern tool steel chains, 76 inch gear, 16 tooth auxiliary sprockets, additional flying sprocket to take up stretch in chain, oval cranks, rear crank tread 5½ inches, front crank tread 4¾ inches, 1 inch handle bar, tapered at ends to ⅞ inch, Brandenburg pedals, Garford, Sager or Gilliam saddles, Morgan & Wright, Dunlop or Palmer tires, large ball bearing, double steering. Specially designed for gentlemen riders. Royal Red Head: Actual weight 18 pounds, standard height of frame 24 inches, large tubing, reinforced joints, large fork sides and solid forged crown, with head nickeled; 28 inch wheels, barrel hubs, best piano wire swaged spokes, detachable and reversible sprocket, 3-16 inch Perry-Humber chains, oval forged cranks tempered in oil, rams' horn handle bar, racing pedals, Sager saddle, with direct or forward head post, standard gear, 72 inches, Palmer tires, large balls, tool steel bearings, 4¾ inch tread, nickeled parts, standard finish, green with red head. Lady Royal: Actual weight 23 pounds, 21 inch frame, large tubing, reinforced joints, drop forgings throughout, solid forged crown with nickeled head, 28 inch wheels, barrel hubs, best piano wire swaged spokes, detachable and reversible sprocket, ¼ inch Humber pattern tool steel chain, with hardened centers and hardened rivets: oval forged cranks tempered in oil, 1 inch handle bar, tapered at ends to ⅞ inch; Brandenburg pedals, large new ladies' saddle, 63 inch gear, Morgan & Wright, Palmer or Dunlop tires, 5-16 inch balls in crank axle, ¼ inch balls in both wheels, tool steel bearings, 5¼ inch tread, standard finish, black, nickeled parts on copper, and fitted with improved dress and chain guards.

S. A. HAINES CO.

The S. A. Haines Co., No. 44 North Pennsylvania Street, Indianapolis, Ind., will have eight models on the market during the season of 1896. We describe two of the principal wheels; The Nonpareil: Frame of large tubing, 20 and 22 gauge. Lower and upright tube, 1⅛ inch; rear forks and stays, ¾ inch; forged steel connections; wheel base, 43 inches; 10 inch head; two heights of frame, 23 and 25 inches, respectively, both having a horizontal top bar. Barrel crank hanger. New rear fork adjustment. Raleigh pattern front fork crown. New barrel hubs, dust proof. Nickel-plated tangent spokes. Flush oil cups. Cones and cups turned from solid bar steel, and removable. 3-16 inch balls in front wheel, ¼ inch in rear wheel and to crank axle. Removable front and rear sprockets. 5¾ inch tread. 6½ inch cranks. Fine ¼ inch new chain. Geared regularly to 66½ inches, or otherwise, as desired. Four new styles of handle bars. Cork grips, with hard-rubber caps. New handle-bar clamp, attaching without threading upper fork column. Fine black enamel. New L seat post and special pattern Hunt saddle. Fine wrench, oiler and pump in oval tool bag. Nonpareil, Model A, 23 inch frame, 28 inch wheels, wood rims, M. & W. quick repair tires, $75. Nonpareil, Model B, 25 inch frame, 28 inch wheels, wood rims, M. & W. quick repair tires, $75.

The Belle, ladies' wheel: Frame of large tubing, 20 and 22 gauge. Lower and upright tube, 1⅛ inch; top brace, ⅞ inch; rear forks and back stays, ¾ inch; forged steel connections; wheel base, 43 inches; height of frame, 23 inches. Barrel crank hanger. New rear fork ends and adjustment. Raleigh pattern front fork crown. New barrel hubs, dust-proof. Nickel-plated tangent spokes. Cones and cups turned from solid bar steel, hardened and removable. 3-16 inch balls in front wheel, ¼ inch in rear wheel and on crank axle. Removable front and rear sprockets. 6 inch tread. Fine new ¼ inch chain. Geared regularly to 63 inches, or otherwise, as desired. Cork grips, with hard rubber caps. New style handle bar. New handle bar clamp attaching without threading upper column of fork. Fine black enamel. Wood, mud and chain guards. Brake furnished when desired. New L seat post. New pattern Hunt saddle. Usual tools in oval leather tool bag. 28 inch wheels, wood rims, M. & W. quick repair tires. $75.

FENTON METALLIC MFG. CO.

The Fenton Metallic Mfg. Co., Jamestown, N. Y., will have the following models on the market for 1896: Model 26, track racer. Model 27, 22 inch and 24 inch frame (parallel bearings). Model 28, 24 inch and 26 inch frame (crank hanger dropped 1½ inches). Model 29, the Lady Fenton.

Described as follows: Weights, from 18 to 23 pounds. Frame, Fenton diamond, drop forgings and swallow-tail reinforcements at all connections. Tubing, head, 1½ inches; main tubes, 1¼ inches; rear bottom forks, ⅞ inch tapered to ¾ inch; rear upright forks, ¾ inch. Tread, 4¾ inches. Spokes, 36 rear, 32 front, double swaged. Hubs, cold drawn seamless steel tubing, mandril finishing, giving increased strength as compared with hubs turned from the bar. Bearings, triplex or three point in construction. Ball-retaining cases in all bearings; ⅜ inch balls in crank hanger, 5-16 inch rear hub, ¼ inch front hub. Rims, best laminated or built-up wood, mahogany finish. Handle bar "Fenton adjustable," same as used in 1893, 1894 and 1895; ⅞ inch tubing; three choices of bend and spread. Handle bar tightener, a new device, containing ball bearings to obtain a firm fastening without the use of the usual pinch-bind split ring and bolt. Seat post tightener, a new device, doing away with the usual split socket and bolt. Simple in construction, and removable from frame tube. Chain, special pattern with hardened block and rivet. Sprockets, detachable, front and rear. Chain adjustment, positive and accurate. Crank, triangular hole. Binds on the whole surface of crank axle. Parallel bolt which does not bind on axle. Easily detachable. Driving the pin unnecessary. Tires, we shall endeavor to give our customers the best tires of their class, both double tube and hose pipe. Saddles, any standard make. Pedals, rat-trap or combination rubber. Wrenches, we supply a spanner wrench in addition to regular type of wrench." The company guarantee their wheels for one year.

The Berlin Iron Bridge Co., East Berlin, Conn., have just completed for the United States Projectile Co., at South Brooklyn, N. Y., the steel framework for a new annealing room. The building is 100 feet wide and 150 feet long, and is designed to be a fireproof structure.

NEW ENGLAND HARDWARE DINNER.

The third anniversary of the New England Hardware Dealers' Association was held at the United States Hotel, Boston, on the evening of December 11th. This being Ladies' Night, the banquet was preceded by a reception.

After the banquet, the president, Hiram G. Janvrin, with a few remarks called the members to order for a short business session, as he said, to show the ladies how the business of the Association was conducted. He then introduced the vice-president, Samuel H. Thompson, of Lowell, who gave a very interesting address of welcome to the ladies, as follows:

Mr. President, Ladies and Fellow Merchants: To me is assigned the delectable task of extending to our lady guests the welcome which we know they feel is sincere. We are beginning to realize the full measure of pleasure you give us at these banquets. And whereas the first ladies' night was an experiment, the third is an experience which we often hope to repeat.

I suppose I am expected to talk on some subject in which woman is a conspicuous figure, and I suppose I might take up the subject of marriage, as this is a subject in which woman figures very conspicuously, and whether man is willing to admit it afterward or not, she is a more important factor in the case than he is, and he is willing then to acknowledge her superiority. I believe under the era which exists, in marriage ceremonies woman is not obliged to "promise to obey." To tell you the truth, in my own case I couldn't say just what the minister did say, and I am not sure that he didn't reverse the old order of things and exact the promise from me, for Mrs. Thompson solemnly avows she never "promised to obey." But conditions are changing, and why shouldn't woman change also? Perhaps I might, with profit to both sexes, touch upon the much talked of subject, the New Woman.

Whether man is willing to admit it or not, there is coming to the front a new type of womanhood which is making its claims for greater advantages, freedom of thought and of action, and a place nearer the level of man than has been hers in the past.

Man is a selfish being, and for centuries has made and based his claim of superiority on the fancy of his brain and the bulk of his body (exceptions to the contrary once in a while.) It has been an interesting study to me to know how and where and on what grounds his claims of superiority were made, and I have arrived at only one conclusion, namely: That when God made Adam and Eve, he made Adam first, and on the "squatter claims" basis of priority of existence, man has set up his sign of authority and he has been walking up and down the world ever since to establish it; but the brain power of woman is leveling the height which man has raised, and she is nearer the design of the Creator than ever before. Man has seen this evolution going on, but has failed to comprehend it, and so to the bewildered senses of some men they have taken on fantastic shapes and ways, and so he has attempted through the cowardly role of ridicule, to picture the "new woman" as a "masculineated female" who desires to appropriate everything in the same measure as he himself has done in the past. The picture he draws is a reflection of his own character, but he knows it not.

It has been truly said, that the greatness of a nation depends upon the estimate it places on woman, and we know that is true in our own country, for where, in all this wide world, is woman on such a level with man as here in our own country? The cause for the new woman is the need of the new man.

The American business man is a surprise and a marvel to the world. No scheme is too large for him to comprehend or master; but through it all runs the query, how has it been brought about? Conditions make the man, why not the woman? The great and urgent demand to-day in all the complexity of business life, is the "new man:" let him evolve from the shadowy form into a strong, realistic manhood, such as stirred the souls of our Christian forefathers, and the cry of the "new woman" will not be heard. The new woman is a creation, and not an invention, as many of our papers of the present day seem to think, she is a creation made to meet conditions into which she has been forced. The American home life has been forced out of its natural elements by extreme social demands, which create an unnatural appetite for fast living, and to meet the expense entailed men are not able to supply, oftentimes, means to carry on the sham and show, and women are forced into the maelstrom of the business world to get what she must have if appearances are kept up. This, of course, applies to only one phase or type of the new woman.

The other type, and the true type, is found in the educational processes which are transforming body and soul, giving her a right to think and speak as her judgment dictates, and, with a brain equal in every way to man's, who can claim she shall not assert it? The mothers of the future will not be the same as those of the past; they will be better. The woman of the future will not be a type of the past, but better. No new thing or great change of old customs ever took place without ridicule and scorn. These are the fires in which character is refined. Triumph is only secured by superiority, and that woman will triumph is as sure as the stars that stud the firmament above, and she will become the stars that stud this world of ours.

Again we welcome you, and can only say in closing, that your pleasure has been ours.

An entertainment programme was presented by the Adelina Women's Orchestra, D. W. Howard, manager, assisted by Elizabeth A. Hawkins, soprano, and Maxwell Bingham, humorist.

Among those present were: President Hiram G. Janvrin and wife, Boston; Vice-President Samuel H. Thompson and wife, Lowell; Treasurer James L. Work and wife, Boston; Secretary James A. Farless and wife, Boston; Mr. and Mrs. W. H. Warren, Boston; Mr. and Mrs. A. S. Morss, Boston; A. M. Gardner, Boston; Mr. and Mrs. T. H. Baldwin, Boston; Mrs. M. E. Austin, Lawrence; Mr. and Mrs. E. M. Sanborn, Lawrence; Mr. and Mrs. W. D. Carlin, Natick; Ida B. Adams, Lowell; C. E. Adams, Lowell; J. H. Sayward, Haverhill; Frank M. Smith, Boston; Mr. and Mrs. E. L. Richards, Boston; Mr. and Mrs. E. J. Neale, Lowell; Mr. and Mrs. E. M. Richardson, Waltham; Mrs. C. W. Thompson, Lowell; Mr. and Mrs. W. E. Plumer, Somerville; Mr. and Mrs. S. C. "Niagara Falls Did It."

Sidney Shepard & Co., No. 145 to 149 Seneca Street, Buffalo, N. Y., under the caption of "Niagara Falls Did It," call attention to their aluminum ware. "The mighty cataract which has long been the stupendous wonder of the age, has at last been harnessed, and made to lend its gigantic strength to the service of man. The first practical application of this power to be made, is in the production of aluminum; electricity is the important factor, and it is here obtained in enormous quantities at a comparatively low cost. Thus, with the help of Niagara's magnificent strength, a result is obtained otherwise unobtainable, and this lovely metal, 'Beautiful as Silver, Pure as Gold,' is brought within the reach of all. Aluminum being now nearly as cheap as copper, no one, to whom the consideration of purity, cleanliness, durability and the other peculiar qualities of aluminum ware properly appeal, will use anything else."

The company manufacture tumblers, straight seamless or "Buffalo" cups, funnels, measures, liquor mixers, beer trays and servers. The following is an extract from "A Simple Luncheon" prepared by Miss Caldwell, the celebrated teacher of cooking, in her own kitchen: "No, this is not a silver fry pan. It is much better. It is aluminum. They told me such a funny thing about it when this was bought; they said it would not brown, but when you look at this beautiful golden brown rice cake, you will see that they were very much mistaken. These aluminum kitchen utensils are delightful to work with; they are so light and retain the heat remarkably; they are easily cleaned, and if the hard water stains them, a little sapolio and elbow grease readily removes it. This fry pan has been used for some time and nothing has been burned, although everything has browned well. There are some wares that burn if you look away from them. It is a difficult matter to burn anything in aluminum, and then, too, aluminum is absolutely pure. One is in no danger of verdigris or salts of tin in using it. It is much preferable to granite or agate ware, as there is no enamel to chip off. It does not rust. Fruit acids, such as vinegar, etc., have no effect on it; hence it is especially desirable for preserving. Pies may stand on aluminum pie plates without 'tasting of the tin.' Tea and coffee do not turn the inside of the pot black. I have a beautiful aluminum coffee pot in which I prepare the coffee on the stove and take it right to the table where it is almost as beautiful as silver. Coffee should be served in the pot it is cooked in;—but if I talk much on the subject of aluminum I will get too enthusiastic."

New York is to have an Electrical Exposition during the first week in May.

The New York Central a Record Breaker.

While President Cleveland is making it pleasant for England over the Monroe doctrine, the New York Central Railroad company is promulgating a new doctrine, that is smashing the records not only of England, but of the world. That famous Empire State Express has once more reduced the record, having on December 4th wiped out all previous records, by making the run between Buffalo and New York City on the schedule time of 53⅓ miles an hour, and arriving at the Grand Central station in Buffalo five minutes ahead of time. The trip was made under favorable conditions as far as Batavia, where the train encountered a snow storm. Fearing that this might delay her again, the engineer let out a few more notches of the throttle. He had eighteen minutes in which to make the ten and sixty-seven one-hundredth miles between Grimesville and Buffalo, and he made it in thirteen minutes, arriving in Buffalo at 4:40 o'clock, five minutes ahead of time. Reports of the engineers indicate that they experienced no difficulty in holding the train to the 53⅓ miles an hour average. The fastest time, the eighty-one miles between Syracuse and Rochester, was made in eighty minutes, or over a mile a minute.

The Empire State Express now holds the world's record as the fastest regular passenger train. The speed of the best trains of foreign nations is: England, 51.75 miles per hour; Germany, 51.25; France, 49.88; Belgium, 45.04; Holland, 44.73; Italy, 42.34; Austria-Hungary, 41.75. America now heads the list with 53.33 miles per hour to the credit of the Empire State Express.

For more than four years this train has made its daily run of 440 miles in 520 minutes, which is at the rate of 51 miles an hour, including four stops and twenty-eight slowdowns. Its new time of 495 minutes is not that of an experimental run, but is scheduled for daily service between New York and Buffalo until a further reduction becomes practicable.

What can be said of the character and condition of a road upon which this stupendous feat of modern rapid transit is possible? And the beauty of it is that the safeguards are such, and railroading is so reduced to a science upon this line, that this high rate of speed is made with the same degree of safety as the slower trains. The route lies through one of the most attractive sections of America, the service is equal to that of a first-class hotel, and the trip between New York and the West is entirely robbed of the terrors of old-time, or even recent travel. The New York Central has broken several records, beside that of swiftly-running trains.

The Bissell Co. Triumphant.

The final decision in the long legal contest between the Bissell Carpet Sweeper Co. and the Goshen Carpet Sweeper Co. has been announced in the United States Circuit Court of Appeals, at Cincinnati. The decree was in favor of the Bissell Co., affirming the decision of Judge Brown and also the decision of Judge Severens. By this decision the Goshen Co. is restrained from equipping carpet sweepers with the Bissell patent or device by which the brush of the sweeper can be pressed to the floor, making a broom motion. It also orders an accounting by which the Goshen Sweeper Co. are compelled to pay to the Bissell Co. all damages received during the period of infringement—now almost four years.

The catalogue and price list of the Henry Seymour Cutlery Co., for whom Wiebusch & Hilger, Nos. 84 and 86 Chambers Street, New York, are agents, has come to hand. It fully describes and illustrates the large line of shears, scissors and sheep shears manufactured by the company.

The William H. Williams Memorial.

The memorial resolutions adopted by the New York Hardware Club in memory of William H. Williams, its late president, have been embodied in a handsome volume that is artistic in the highest degree.

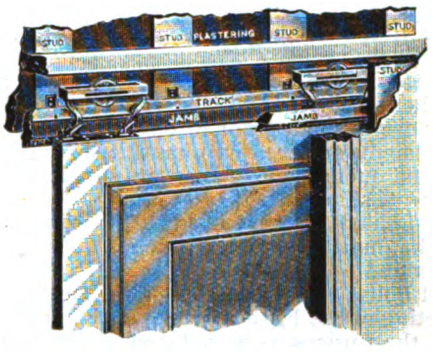
In the volume are seven pages of richly illuminated design, each illustrating the traditions and development of Gothic decorative art from the twelfth to the fifteenth centuries; the "golden age" of Gothic illumination and architecture.

The opening preamble is surrounded by a graceful design of the Gothic renaissance, consisting of floral traceries in acanthus foliage tinted in purples, greys and sepias, shaded with deeper tonings of the local tints on black groundings, which are chased with burnished silver filigree.

The seal of the Hardware Club and a medallion of Tubal Cain, the patron of all artifice in the metals, appropriately embellish the design. A neat border of pearls, symbol of tears and worth, encircles the drawing between burnished silver rods. The succeeding page is devoted to a striking miniature of Mr. Williams, painted on vellum. It is set en-passe-par-tout in a bed of forget-me-not flowering, whose meaning is unmistakable. Sprays of oak in fruit, type of strength, and of ivy, signifying remembrance, entwine gracefully on rustic traceries, the whole appearing on a pearl-gray grounding placed inside a richly burnished filigree band of silver. A pediment at base of the drawing contains those ancient symbols of palms, laurels and love-knots supporting an inverted torch.

Immediately following, the text of the memorial appears, introduced by one of those wonderful initial letters modeled on the work of Genolio Clovio, the contemporary of the famed Flemish illuminator, Memling. Its foliate richness is further enriched by a diapered silver grounding, whose markings agreeably blend with the geometric precision lining the initial. The name, William Hilton Williams, displayed in Gothic texting on a buff band is also embellished with rich initials.

The succeeding design is exceedingly delicate and chaste of design, and shows the perfection of the florid fourteenth century style. The acanthus is the theme and the keynote violet, with its complementaries of terre-de-verte madders and buffs placed on backgrounds of handsomely chased silver. The passion-flower, convenitonally treated, illustrates with what acute sensibility to beautiful composition the mediaeval artist wedded truth to beauty and conserved both to decoration.



Turning from this tender color-scheme we meet in succession one of a more severe and possibly less ornate character, and very properly so, for this is the oak in fruit intermingling with acanthus sprays, and both typify vigor and strength, and here the ornamental motive seems inspired by the text, which pays tribute to the warmth of friendly attachment and whole souledness, characterizing the lately deceased president. Sepia here dominates, blended with and contrasted by answering tones of neutral reds, greens, purples and buffs. A vignette on a gray tinting, emblematic of friendship, occupies centre base, and the text is introduced by a beautiful initial fac-similed from the celebrated Psalter of Nuremburg, whose artist is, unfortunately, not known, but whose work the author of this volume has carefully and truthfully perpetuated. The original is in the British museum. The style of this design is the twelfth century, while the succeeding page is rich and exceedingly graceful in the periods existing at the close of the fifteenth century. In its solidity of foliage it preserves the tradition of the German school, while its tonal treatment is distinctly Romanesque, a combination of styles which added unequalled dignity to illumination at this acme of perfection in color and design. A pretty grouping of immortelles and ivy sprays speaks eloquently of everlasting remembrance.

The seventh page is graceful in arabesque conventionalisms of natural forms, the peculiarity of the styles dominating the Teutonic and Latin schools of the thirteenth and early fourteenth century periods. The design is quite ornate yet extremely delicate in treatment. The volume is brought to a fitting close by the signatures of the Board of Governors of the Hardware Club.

The wording of the memorial, engrossed in the Albrecht Durer black letter, and the illuminated design, are worked out in water colors on pearl gray tablets matted with passe-par-tout of similar tone, mounted, guarded and bound in full black seal, interlined and gilded edges. It is the work of John G. Lee, a young American artist of this city, and is one of the first perfected specimens of the entire era of mediaeval illumination ever produced in America.

Stearns' Parlor Door Hanger.

We are permitted to illustrate in this connection a single track Parlor Door Hanger, being successfully placed upon the market by E. C. Stearns & Co., Syracuse, N. Y. They call special attention to the point that the Hanger is single track and of the anti-friction type; the single track being hung to one line of studding, so that the Hangers can be put up complete in a very small space of time. They add that in designing their Hanger they have striven for absolute simplicity, both in the construction of the Hanger and rail, and in the method of putting up. "The wheels run on

a single steel track; the track be ng secured to one partition instead of two as in the case of the common double wood tracks, is therefore not subject to derangement from unequal settling of the said partitions. The center of the wheels of this Hanger are made of vulcanized fibre, the edge of which forms a rolling surface. This fibre centre forms a solid disc extending to the axle and is firmly held between plates by means of rivets passing through both plates as well as through the fibre. The axle is made of steel and the bearings are turned perfectly true, making it practically noiseless. Each Hanger may be adjusted independent of the other by the use of a screw driver and without the derangement of any part. The principal parts of the Hanger are made of the best quality of steel. The base plates are attached to the top of the door without cutting or mortising. The adjusting screws are 2½x5-16 inches, specially made, and possess great strength. They are placed at the upper corner of the doors where they can be most conveniently adjusted. The threaded hole in the Hanger is countersunk so as to insure an easy entrance of the adjusting screw." Details as to prices, etc., can be had on application.

The Alexander Smith & Sons Carpet Co., of Yonkers, N. Y., have placed the contract for their new dye house building with the Berlin Iron Bridge Co., East Berlin, Conn. The building is 60 feet wide and 172 feet long, the steel roof trusses being arranged to carry cars on the lower chord for moving material about the building.

Florida supplies first-class cedar in the manufacture of lead pencils, and large quantities are yearly exported to European counties.

Review of the Markets.

Trade at this period of the year is generally expected to be dull, except in the lines which the holiday season calls for, such as Skates, Sleds, etc. Dealers in general are preparing to take stock, and instruct their salesmen for the coming season—this acts to some extent as a drag on business. Business for the year shows an improvement over 1894, which is considered the worst year of the depression. After a panic, business improves gradually, and conservative thinkers do not expect the market to reach its normal condition before 1897. The year's trade in structural iron in the East has been one of unusual activity, but in the West trade in this line has not improved greatly. The prime cause of this condition of affairs is the low price of Wheat and Corn. Farmers, rather than sell at the low prices ruling, are feeding and cribbing their Corn and holding their Wheat as long as possible, the result being that they have not been able to pay their bills, and the railroads have been kept out of the big business that would be caused by the moving of these vast crops. The dispute with England over the Venezuela boundary has affected business unduly, and business men in general condemn President Cleveland's message as untimely and uncalled for. If trouble of this kind is avoided, the prospects for trade revival in 1896 are most flattering. Manufacturers are firm in their intention to maintain prices.

The Russell & Erwin Mfg. Co., New York and New Britain, make the following announcement under date of December 20th: "Until changed by us, our discounts and terms for Wood Screws will be as follows, from our revised list prices of January 1, 1891:

Flat Head Iron	85%
Round Head Iron	75%
Flat Head Brass	85%
Round Head Brass	75%
Flat Head Bronze Metal	80%
Round Head Bronze Metal	75%

"Flat Head Iron Screws, Blued, 5 per cent. advance on net. We hereby withdraw and cancel all discounts and terms on Screws made prior to date of this circular. Unusual assortments or excessive quantities of single sizes subject to special quotations. All orders subject to our ruling rates at date of shipment."

Skates: Dealers in these goods have been pushed to fill orders. The mild weather, however, has checked the near-by demand.

Nuts and Bolts: On December 18th the manufacturers held a meeting at the Fifth Avenue Hotel, New York, with the result that prices were reduced about five per cent. This action was deemed advisable owing to the recent slide in iron. Another meeting will be held in January and prices may change again, but whether the move will be up or down cannot be stated with safety. Business from now on till February or March is not expected to be very brisk.

At a meeting of the Chisel and Drawing Knife Manufacturers, held in this city on December 12th, the price on socket firmer, socket framing, corner chisels, slicks and drawing knives was fixed at 75–10–10 per cent. The following manufacturers were present and signed the agreement as to price. The Peck, Stow & Wilcox Co.: Messrs. G. I. Mix & Co., Winsted Edge Tool Co., Ohio Tool Co., Mr. James Swan, the Sag Harbor Tool Co. and the Jennings & Griffin Mfg. Co.

Linseed Oil: New York quotations remain unchanged, and are as follows: Raw, 42 cents per gallon; boiled, 45 cents per gallon, and Calcutta raw, 48 cents per gallon.

White Lead, Red Lead and Litharge: The quotations made by the National Lead Co. are as follows: In lots of less than 500 pounds, 6 cents net; in lots of 500 pounds and over, 5½ cents; Red Lead and Litharge in barrels and half-barrels, ¼ cent per pound less than price in kegs.

Putty: Quotations are as follows: $1.40@$2.25 as to brand, quantity and style of packing.

Wire Nails: Trade just at present is dull, but if anything, is better than in November. Business for the year shows an increase over 1894, and if trouble with England over the Venezuela boundary is settled amicably, as all earnestly hope, the prospects for the coming season are indeed bright. There are no changes in prices to report, and manufacturers say that those ruling will be maintained. We quote: Carload lots, $2.25, base, per keg, f. o. b., Pittsburg; less than carload lots, $2.35, base, Pittsburg. Carload lots on dock, New York, $2.43; small lots from store, $2.53.

Cut Nails: The condition of the market is similar to that of Wire Nails. Pittsburg prices are $2 per keg, base, f. o. b. New York quotations are: Carload lots on dock, $2.18; small lots on dock, $2.28, and small lots out of store, $2.30.

Clapp & Co., bankers and brokers, New York, in their weekly letter, say: "The trading stocks of Colorado mining exchanges have many of them advanced 300 per cent. to 500 per cent. during the past year. Lake iron ore shipments for 1895 are estimated over 10,270,000 tons, breaking records. Eight Southern states have 92,059,906 unemployed or unimproved acres of land waiting for occupation. Argentine has an area of 1,180,000 square miles and population of only 5,000,000 people, 240,000,000 acres being adapted to cereals, 10,000,000 acres to vineyards, 4,000,000 acres to sugar cane and other sub-tropical products. They have 25,000,000 cattle, 6,000,000 horses, 100,000,000 sheep and 3,500,000 goats. European and North American agricultural and manufacturing people can find as much room south of the Equator as there was west of the Mississippi in 1840. Any great disturbance in foreign countries might transfer many men and much wealth to North American soil."

THE PITTSBURG TRADE.

Trade has been in moderate volume the first half of the month, skates in especial demand, and cutlery in very fair demand. We are getting ready for stock-taking, which by modern methods is now accomplished within as many days as it formerly occupied weeks. Prices in the iron and steel market are not holding up well, so that we can hardly look for much change in general Hardware until these raw materials take a stronger position. We, however, expect an average good year in 1896. LOGAN, GREGG & CO.

THE CHARLESTON TRADE.

We have the same gratifying report to make about business, and the close of the year finds us far in advance of others that we can recall that were deemed fully average ones.

Prices by us have been maintained and few concessions made. We have had no urgent demands for reductions, save in a few of the leading and staple iron products, and those could be made without entailing loss, though it shaded a hoped-for profit.

From reports received from our travellers, who are dropping in daily for the Christmas holidays, the outlook for spring business is remarkably good, and we anticipate a very active season.

The crops have all been harvested, and the result of the year's business known by the farming community. That it has been satisfactory is evidenced by payment of current expenses and in many sections balances of the last and previous years.

We are already in receipt of enquiries for the largest improved agricultural implements, and the desire of all seems to have the best that the market offers and their means permit them to get. With abundance of provisions, the prospect of a largely increased cotton area was almost a certainty and may still be the rule rather than the exception.

Dependent as is the Southern producer upon a foreign market, the faintest probability of a war with any foreign power fills him with dismay and makes his future one of gloom and not entirely unfounded dread.

He realizes that what he has to buy will in no way be cheapened, but will, in all probability, be enhanced in value; what he has to sell, for want of foreign competition, be subject entirely to the value placed by a home market, and as his past experience shows lower prices will prevail.

That the American people were startled from their dream of peace and continued prosperity by the President's message is too apparent a fact to be questioned, and although only a few days have passed since its issuance, its effects are already felt and disastrous results the consequence. Values that were deemed extremely reasonable, if not low, have suddenly fallen and the calm surface of commercial confidence violently disturbed, and all indications of a coming financial storm apparent.

That wise counsel will be enlisted, and sober, thoughtful consideration of so momentous a subject will, we have no doubt, be the course of those in authority, and the dignity and honor of our country be maintained without sacrifice of its prosperity or a cloud upon its happiness.

Were it not for this temporary, we use the word hopefully, disturbing feature, we could resign ourselves to all the enjoyments of a well earned holiday, forgetting the unprofitable past, appreciating the prosperous present, and looking forward to a future that bids fair to be the brightest that the last decade has furnished, but as it is we cannot but feel anxious and await with doubtful resignation the final decision that will either continue us in the pursuit of health, happiness and wealth, or call for a sacrifice of self that our country has the right to receive and the instincts

Digitized by Google

and education of its citizens feel alike a duty and a privilege to offer. MARSHALL, WESCOAT & CO.

THE MINNEAPOLIS TRADE.

Holiday trade about the same as usual, more useful goods being purchased as a rule rather than fancy articles of no particular value. General Hardware business for 1895 has been fairly satisfactory with Minneapolis dealers; perhaps all that could be expected. We hope for better returns for 1896, and believe that our expectations in this direction will be realized. Prices fairly well maintained, but some cutting done on staple goods. The weather has been delightful; no snow, and not cold for Minnesota. As a consequence building operations have gone right along, considerable out-door work being finished up, that otherwise might have been left over until spring. All will be busy soon taking inventory, then comes a month or so of mid-winter dullness before spring trade opens up. With the compliments of the season, W. K. MORISON & CO.

THE PHILADELPHIA TRADE.

The end of the year finds every jobber in the usual turmoil of taking and pricing stock, overhauling samples, preparing salesmen for the new year, and winding up the business of 1895. Of course this represents an enormous amount of work, but it is hoped it will reveal some profit as a result. In the meantime holiday orders are coming in with considerable frequency, and Skates, Sleds, Cutlery and Plated Goods, etc., are in great demand. The call for Skates has been unprecedented. Not only are the jobbers' stocks exhausted, but factories write that they are simply overwhelmed with orders and with correspondence relating to orders, and that it will be impossible for them to catch up or even ship an assortment, as they have none on hand and cannot make them with sufficient rapidity.

The cold spell of last week contributed to this result. For over two weeks the demand has been so steady that dealers who have deferred laying in an early stock will find it to their disadvantage. This is very far, however, from being a calamity, and next March, when dealers find their shelves bare of Skates, they will be more inclined to place orders for Hoes, Forks, Rakes, Wire Netting, Window Screens and all manner of spring goods. Seasonable weather always benefits trade, and we are all glad when we have a white Christmas.

Prices are in a waiting mood and manufacturers and dealers alike are at sea in reference to the future. Many manufacturers and dealers had stocks of raw material and of goods which would carry them until the end of the year, but the 31st of December will probably find them bare of both, and the question arises: Will this new demand be so heavy as to cause further advances in prices, or is the production of raw material so great that prices cannot go any higher?

It must be remembered that the great mass of Hardware has not advanced in price, and that most of the heavy advances have been limited to heavy and bulky goods, so there seems to be ample room for further advances. There is a strong probability that the new year's demand will cause a stiffening up in many lines.

Railroads as yet have not commenced to buy, except in the most cautious way, and if these large buyers enter the market the situation will undoubtedly be stronger. Wishing all our readers and the editors of HARDWARE as well a Merry Christmas and a happy and prosperous New Year, we are, BIDDLE HARDWARE CO.

THE CLEVELAND TRADE.

We are now approaching the time of holiday dullness, and are looking forward to the pleasures of inventory work, to determine how the last year has treated us. It is well that all business men have a breathing spell at this time, to look back over the occurrences of the past year, so that they may remedy, if they exist, and strengthen weak places; in fact, we believe it is a wise thing for all men to take time at least once a month for just such an occupation, as it would probably result in evils being corrected sooner than would be the case if they postponed it for an entire year.

Looking backwards, then, we contemplate a season of varied conditions. Quite early in the year everything was depressed, and it looked as though nothing good was going to come out of the year's work, but a little later everything picked up, and we had what might be called a boom. This has about spent its course, and we are now again on the down grade. The question that is agitating the minds of everybody in looking towards the future, is how long this down grade will continue and what are to be the results for 1896? We cannot aspire to the ability of prophets, but we believe that in 1896 we shall see a very much better business than has ruled in 1895. Values are becoming settled to about where they should be, and we can see no reason why the consumptive demand should not be sufficient to provide for at least a very large share of the production of our manufacturers. We, therefore, feel very much encouraged in looking forward to 1896 as a season of quiet prosperity. We do not feel disturbed by the war cloud that has been hovering over us, as we believe that no actual encounter will come out of it.

In the Hardware trade in these days the Bicycle is cutting a very large figure, and indications from trade already found is to the effect that in 1896 it will be larger than ever before. Many new factories have sprung into existence, and many of them will have to learn lessons that have already been learned by the older ones, that the experimental stage is a very costly one. Prices are reaching a level where there is not very much money left for experimenting, and we fear that some of these new concerns may not have as rosy a career as they now picture.

Wishing yourselves and your readers a Merry Christmas and a Happy New Year, we remain,

THE MCINTOSH-HUNTINGTON CO.

THE BOSTON TRADE.

This is the time of year when there is naturally a falling off in the volume of business. The season closes, however, with a satisfactory amount of trade, the demand during the past few weeks having been a decided improvement over the preceding weeks in November. The weather conditions have been favorable for seasonable goods, and stocks of skates, sleds, axes, etc., have vanished to that extent that jobbers have no cause to regret that their purchases in these lines have been larger than last year.

It is a most unfortunate occurrence that at this time when business was just beginning to recover from the depression of the past two years, we should be confronted with so serious a question as has been brought before us in our National affairs.

The war of words which has been raging for the past few days, and which in all probability is the only war we shall encounter, will, if encouraged, have a serious effect upon the business interests, not only of Boston, but of the whole country; and at the present rate it will take but a short time to launch upon us a panic for which there seems to be no possible excuse.

Already the Stock Exchange, which is the pulse of the whole business community, has felt the effect of this wholesale sensationalism, and it is hoped by every cool-headed man in the business world that there will be an immediate cessation of this thoughtless jingoism which just now characterizes three-fourths of the press throughout our country. FRYE, PHIPPS & CO.

THE ROCHESTER TRADE.

We have nothing new to report for this issue. Holiday trade is on, and seasonable goods are in good demand. Wholesale trade in staples for '96 are buying very carefully and seem to be afraid of the market. Think the year will close up with better results than for '95.

WEAVER, PALMER & RICHMOND.

THE DAVENPORT TRADE.

This has been an eventful year in the Hardware trade—at times full of bright hopes, followed by dismal disappointments. On the whole the results have been about an average of recent years. The barb fence fight is still on, and it looks now as if it would be fought to a finish. May the fittest survive! The much needed rain has at last arrived, but it happens to prolong its visit alarmingly close to Christmas, and, while we are thankful for its appearance, it may result in serious loss to the holiday trade. Robert Sickels, of Sickels, Sweet & Lyon, New York, and our worthy president, has been with us for a few days. General trade is dull and collections continue slow. SICKELS, PRESTON & NUTTING CO.

THE COLUMBUS TRADE.

You ask for our opinion on the business for the year 1895, also as to what we think of the outlook for 1896. Trade during this year has been satisfactory in most lines, and still we cannot say that our expectations have been fully realized. As far as volume of business is concerned, it is, in our case, considerably more than 1894. Profits will also average better, and if our daily record is a safe indicator (and we think it is) our balance sheet will look very much better than it has for the three years previous. It would have been still better had we been able to get manufactur-

Digitized by Google

ers' prices for goods, but some jobbers are so clever that they don't put the advance on promptly, and then perhaps not the full advance. These same parties are sometimes just as slow to reduce their prices, when a decline is made by manufacturers. There is only one *right way* to sell goods, and that is to sell them at all times at the market price. Manufacturers are the ones to make prices, as they know what it costs to produce the articles; and when they make an advance, jobbers and retailers should adopt it promptly and maintain it. And when a decline is made, we should be just as prompt to adopt the reduced price. We are compelled to meet the reduced price very soon even if it hurts, and the only salve we can get to heal the wound is the occasional advance. If we fail to avail ourselves of the benefit of these advances, the wound will get to be a running sore, and the patient is liable to get weak in the knees or pocketbook.

Collections are not good, and we cannot see anything encouraging in the near future. In fact, not before another crop is harvested and on the market. If it is a good one things will be much improved; if a failure, then we will have serious trouble. Farmers are in short rows, no hay or wheat to sell, and corn at a very low price. Horses any prices from thirty cents up to what they can get. We know of an instance where a fairly good twelve-year-old horse was sold at public sale for thirty cents. Hogs and sheep are both low in price. With all these drawbacks, the farmer is not paying his debts, and dealers who depend on their trade from the agricultural districts are not able to meet their obligations. The trouble in some of the mining districts seems to hang on the year around. As soon as one trouble is settled another one breaks out. There surely is some just basis on which these troubles could be adjusted, and it should be discovered in the interest of the operator, miner and the general public.

As for 1896, we think the outlook is not any too bright. It is bound to be dull in the agricultural districts for the next six months, unless merchants want to extend credit beyond what they should. This is what gets so many in trouble. The farmer gets an idea that his dealer can wait until he shears his hogs and husks his pumpkins, and the retail dealer says to the jobber: "I can't collect from the farmer and you must wait." Some retail dealers think a jobber can get unlimited time from the manufacturer, but there is where they are mistaken. Manufacturers want and expect their money when a bill is due.

We regret to see that some goods are dropping back in the old rut of low prices. Screw and Strap Hinges and Rope are getting back to low water mark, while Tacks, Wire Cloth and Screen Doors are commanding chromos. We hope prices will not be reduced to a point that will force manufacturers to shut down or reduce wages. Good wages and fair prices for goods always make good trade; low prices and low wages are sure signs of poor trade. A number of large buildings are projected for 1896 in our city.

THE SMITH BROS. HARDWARE CO.

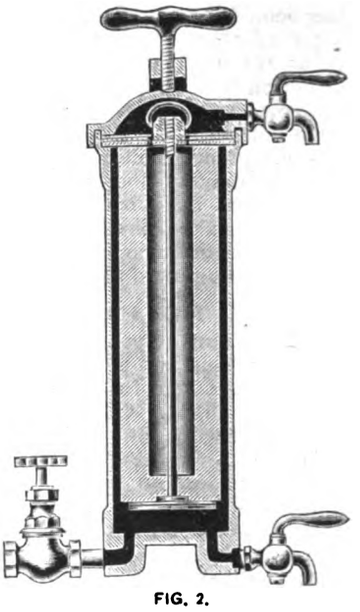
THE TOLEDO TRADE.

Trade this month has been fair. Viewing the trade for the whole year, we can say it has been quite satisfactory. The only drawback there is at present is the weakening tendency of the markets in general. We presume it is only one of the evils of "either having a feast or famine." The extreme open weather that prevailed in this section for the last two weeks has done a great deal to retard business, making the country roads almost impassible, and thereby preventing the farming community marketing goods that they have to offer, neither are they able to haul logs to the mills.

Market at present time is very much demoralized, especially in Wire Cloth, Plain and Barbed Wire, Tacks and a number of other staple articles, showing that the capacity for the manufacturers to manufacture is far greater than consumption of manufactured articles, which inclines us to believe that we need not expect to see any high prices for the coming spring.

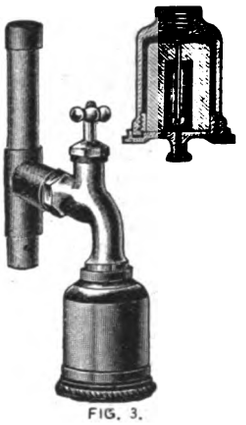
As we are very busy at present time in taking our stock we will not enter into this subject any further. Wishing you the compliments of the season and a prosperous year, we remain,

STOLLBERG & CLAPP CO.



Good stationery is a paying investment. A handsome and substantial looking letter-head and envelope carry a lot of weight with them, and sloppy, cheap stationery carries a strong inference that the man who uses it is cheap and unreliable. Stinginess in stationery is almost as poor policy as stinginess in advertising, and that's saying a good deal. —*Michigan Tradesman.*

The Champion Filter.



The Champion Safety Lock Co., of Cleveland, O., are placing the Filter shown in the accompanying illustration (Fig. 1) on the market. "A peculiar property of the filtering tube is that it excludes all filth and disease germs,

FIG. 1.

FIG. 2.

allowing them to go no further than the surface from which they can be quickly removed by brushing. This also removes an imperceptible amount of the surface of the tube, thus keeping the pores open and the surface fresh for filtration, producing pure and sparkling water. The Filter is very simple in construction. By unscrewing the screw at the top of the Filter all parts are made accessible, as the one screw secures all joints. After removing the cap to which the upper faucet is attached, the stone can be taken out for cleansing. The stone is fastened to the upper plate by a rod which passes through it giving it strength and stability. The stone is 9x2½ inches, giving the Filter a very large capacity." This company also manufacture a Faucet Filter, as illustrated in Fig. 3, which is meeting with ready sale and giving universal satisfaction. The filtering medium is natural stone, producing water which is chemically pure. Prices will be furnished on application. They want an energetic dealer in every town to handle these filters.

FIG. 3.

"War Paint."

It is well worth one's time to look at the Christmas number of *War Paint*, the weekly spokesman published by the Syracuse Cycle Co., Syracuse, N. Y. The design of the cover is exquisite and the coloring vivid. An Indian in colored head-dress is represented painting the rim of a blonde German's bicycle a gorgeous crimson. The back cover shows the scalps taken by the Syracuse riders. This little publication abounds in brilliant ideas, and the company promise that the circulation will reach 50,000 copies.

There are plenty of bright men who never get on in this world simply because they cannot be content to stick to one thing. You may have all the brains of Solomon, but without concentration you are worse off than the plodder. Remember Chauncey M. Depew's remark, "Stick, dig and save," and don't postpone the digging until to-morrow; commence to-day. Every moment counts; time goes on whether you advance with it or not.

MORGAN & WRIGHT TIRES ARE GOOD TIRES

MORGAN & WRIGHT TIRES ARE GOOD TIRES

AN UNIQUE JOURNEY.

A ROSE'S fragrance; the sweet melody of a daintily fingered piano; the sight of delicate festoons of smilax, and the usual interior luxuries of a private railway car—by such seductive means the firm which manufactures the largest number of pneumatic tires used in the United States is endeavoring to diminish the "trade" flavor of an expedition which started at Chicago November 18th, and which ends in the same city the day before Christmas.

It is said that the art of advertising is still in its infancy. This latest demonstration of the art is certainly a novel and delightful advance. It is doing excellent business service while pleasing the artistic senses of those whom it is desired to interest.

The expedition in question is composed of a force of experienced travelers in the employ of Morgan & Wright, of Chicago, and its purpose is to acquaint the bicycle riders and dealers in about fifty of the principal cities with the Morgan & Wright quick-repair tire. The Wagner car "Wanderer" carries the party, which will arrive in Terre Haute to-morrow morning. The party is thoroughly organized, having a captain, first lieutenant, financial secretary and complete office force of stenographers and typewriter operators. Upon arrival the members will scatter through the city, visiting the local dealers. As the car progresses from city to city, engraved invitations are forwarded in advance to local clubs and dealers, from the home office, requesting the recipients to attend an informal reception on board the car in the evening.

Before the Morgan & Wright corps has finished the six o'clock dinner provided by three stewards, the visitors begin to arrive with their ladies. To each lady is given a red, red rose, and in the smoking room gentlemen are invited to try a peculiarly seductive cigar. Meantime an accomplished pianist pleases the ear. In the course of the evening, but in a very unostentatious manner, the merits of the quick-repair tire may be shown. The visitors are sent away with pleasant impressions in their minds, and the car proceeds during the night to the next city.

A 6000-mile journey was scheduled for the car, which has been as far east as Boston and south along the Atlantic coast to Washington. Turning west via Pittsburg, Louisville and intervening places, its route includes St. Louis, Kansas City and cities northward as far as Duluth; thence home to Chicago via Milwaukee.

The Morgan & Wright quick-repair tire is itself a novel departure, it appears. Its makers have an acknowledged reputation for being conservative (the saying, "Morgan & Wright tires are good tires," is a common one), and when they say that a puncture in this tire can be readily mended at the roadside within two minutes without hurry or worry, the statement deserves credence. Newspaper men and cyclists generally have been extended a cordial invitation to visit the car "Wanderer" to inspect the new device.—*Terre Haute Evening Times.*

Missouri Valley Hardware Jobbers.

The Missouri Valley Hardware Jobbers Association recently held a meeting a Millard, Neb. Among those present from other points were: A. J. Harris, Atchison; J. A. Warner, St. Joseph; George B. Richards, H. M. Evans and J. S. Hetherington, Kansas City. Omaha parties who took dinner with the visitors at the Millard were: W. M. Glass, E. M. Andreson, C. H. Carter, E. P. Berryman, J. C. Coit and A. T. Rector.

The meeting was to discuss mutual business interests. J. F. Richards of Kansas City was elected president and W. S. Wright of Omaha, secretary and treasurer.

Foster's Patent Door Springs.

W. W. Pryor Hardware Mfg. Co., successors to the business of M. Einwachter, Newark, N. J., are placing on the market the well-known and celebrated Foster Door Spring. This spring is constructed of tempered steel wires well japanned, and made in four sizes. The fastenings are strong and the adjustment very simple and effective. This spring can be applied to iron gates, owing to the method used in the end connections. A full line of these springs is constantly carried at the New York office, No. 81 Chambers Street.

Another Syracuse Record.

On December 16th, Messrs. Green and Erswell, of Syracuse fame, rode a mile straightaway unpaced flying start in the phenomenal time of 1.17 1-5. The performance took place at Cheyenne, Wyo., over the same track on which they recently made their marvelous records. They were mounted on a 36 pound Crimson Rim Syracuse Tandem, fitted with Palmer tires. This is claimed to be the fastest mile ever ridden on a bicycle.

The Smith & Egge Mfg. Co., Bridgeport, Conn., have for twenty years ranked high as manufacturers of sash chains, locks, general Hardware and metallic novelties. They are now placing on the market a line of self-setting Rat and Mouse Traps, known as the "Superior" and "Yankee" (see their advertisement on page 18), and they assure us that a large number of tests made by them prove conclusively that these traps are remarkably successful in catching vermin. The traps are well and strongly made, and thoroughly galvanized. The company state that it is their intention that the traps shall become as well and favorably known to the trade as are their "Giant" Sash Chain and "Giant" Padlocks. They will be handled by all the large wholesale trade and jobbers.

A cooking stove has recently been patented for use in duckboats. The heat is supplied from a single burner oil stove, and when ready for use it cannot be blown out by the wind nor injured by rain. The fixtures to the stove fold up into a space twelve inches long by two inches in height, taking up little or no space in the boat when not in use.

The Koeller & Schmitz Cutlery Co., No. 92 Reade Street, New York, will add Hardware specialties and sporting goods to their line for 1896 and invite manufacturers not yet represented in New York City to correspond.

An alloy of aluminum and bronze, called "Golden Steel," is attracting the attention of Sheffield cutlers. The new metal is said to be very handsome and durable.

The Lufkin Rule Co., Saginaw, Mich., are now occupying the addition to their factory, and report a larger business than ever for the close of the year.

The well established reputation for excellence in manufacture, which has been earned by Iver Johnson's Arms & Cycle Works, is bearing fruit not only at home but abroad. The most recent foreign shipments noted are six machines shipped to the Hawaiian Islands; 12 machines, including some track racers, to Sydney and Melbourne, Australia, and a number of wheels in Russia. It is a very pleasant thing to note that representatives bicycle houses are rapidly gaining trade abroad. This should put to rest the ridiculous rumors which every now and again receive more or less attention, regarding importations of cheap cycles from some foreign part. For instance, the widespread reports that Japan is about to compete in the cycle market, with $12 bicycles,—a matter which should receive no attention whatever,—but which is seized upon by interested parties as a handle upon which to hang gloomy forebodings.

The National Saw Co. are sending their friends a handsome calendar for 1896. The scene represented is of a realistic nature, showing two sturdy lumbermen at work on a huge tree, with one of the company's justly celebrated cross-cut saws. At one side of the picture is shown a collection of the saws manufactured by the company, including circular, cross-cut and ice saws. The company operate the plant of the Wheeler, Madden & Clemson Mfg. Co., Woodrough & McParlin, Richardson Bros. and Harvey W. Peace Co. The general office of the company is at Newark, N. J.

Waverly, Mo.— John H. Leach, Hardware, sold out business to Leach & Strong.

Webb City, Mo.—Hendrickson & Magruder, Hardware, are closing out business, with the intention of retiring.

Woodland, Cal.—The Hardware firm of T. B. Gibson & Co. has been dissolved. Thos. Prior has retired and T. B. Gibson is now the proprietor of the business.

Improvements and Removals.

Lawrence, Mass. — Frederick W. Kidd, Hardware dealer, for a number of years located at the corner of Cross Street and Broadway Avenue, has removed his business to No. 400 Broadway.

Riverside, Cal.—The Trowbridge Hardware Co. have moved to the store formerly occupied by J. C. Hardman; they have fitted up the store in very handsome and convenient style.

West Palm Beach, Fla. — O. W. Weybrecht, the Hardwareman, has completed large two-story store building on Clematis Avenue, which will be occupied by himself.

Business Embarrassements.

Independence, Mo. — The Oak Grove Hardware Co. have made an assignment. The assets are said to be $2700, with liabilities amounting to $3300.

Maitland, Mo. — G. W. Randall & Co., Hardware and implements, have made an assignment.

Newberry, S. C.—Goggins & Plant, dealers in Hardware, etc., reported to have made an assignment.

Burglaries in Hardware Stores.

Charleston, W. Va.—Goshorn & Co., $50.

Pawtucket, R. I.—Dawson & Co., $70.

Madison, Wis.—Sumner & Morris, $235.

Snow Hill, Md.—Hargrove & Coolidge, $300.

South Bend, Ind.—Zeither Bros., revolvers and cutlery.

Tempe, Ariz.—H. W. Ryder, cutlery and shotguns.

Fires in Hardware Stores.

Cincinnati, Ohio. — Jacob Pfau's Hardware store was recently damaged by fire to the extent of $1000.

Elizabeth, W. Va.—The Hardware store of E. W. Harris & Co. was destroyed by fire.

Indianapolis, Ind.—Hildebrand Hardware Co., stock destroyed by fire.

LaRue, Ohio. — The Hardware store of Miles Longshore destroyed by fire. Loss, $1000; fully covered by insurance.

Mt. Washington, Pa.— The Hardware store of Henry Meyer on Boggs Avenue was completely destroyed by fire.

St. Paul, Minn.—The Hardware store of Charles L. Horst, No. 500 St. Peter Street was badly damaged by fire. The damage will reach about $3000 on building and stock.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Companies, Etc.

Baltimore, Md.—The W. E. Beveridge Mfg. Co., incorporated by Winfield E. Beveridge, John R. Gould, Jr., Joseph W. Whiteford, Howard Bryant and John S. Fardy; for making steam cookers and household specialties. Capital stock, $20,000.

Cleveland, Ohio.—The Colwell & Collins Bolt Co., organized, being the reorganization of an old firm. The business of making nuts and bolts will be continued. Capital stock is $35,000, and the incorporators are A. L. Colwell, C. E. Collins, H. R. Collins, H. A. Garfield and E. C. Collins.

Clinton, Iowa.—The Schneider Permutation Lock Co., incorporated, with a capital stock of $10,000.

Dover, N. J. — Richardson & Boynton Co., incorporated by Henry T. Richardson, Dwight S. Richardson and Frederick B. Richardson, of Brooklyn, N. Y., and John Anness, of Jersey City; to manufacture furnaces, ranges, heaters, etc. Capital stock, $150,000.

Fort Wayne, Ind.—The Perfection Mfg. Co., incorporated, with a capital stock of $12,000. The company will manufacture button fastening devices and button staples.

Fultonville, N. Y.—Articles of incorporation have been filed with the Secretary of State by the National Fencing Co. It proposes to manufacture wire of various sizes, and to manufacture and sell wire fencing, gratings, guards, etc. The amount of capital stock is placed at $100,000, and the directors are Robert Wemple and L. A. Starin, of Fultonville, and J. D. Wendell and F. E. Bakeman, of Fort Plain.

Indianapolis, Ind. — The Indianapolis Wrench & Stamping Co. was incorporated recently. The purpose for which it was formed is to manufacture wrenches and metallic novelties. The capital stock is $10,000, and the directors are Charles Meggenhoffen, Harry E. Reeves, Charles M. Bundy, Albert S. Courtright and James W. Neal.

Kansas City, Mo.—The National Pump Co. recently filed articles of incorporation. The incorporators are Michael Delaney, Thomas H. Keys, Charles H. Hallett, A. Shuman, Mary Keemle, Margaret D. Shuman, John Colman and W. M. Morgan. The capital stock is $10,000. The company purpose the manufacture and sale of pumps of all descriptions.

Kansas City, Mo.—The Kansas City Stove Works Co., incorporated, with a capital stock of $40,000.

Kingston, N. Y.—The American Tinfoil & Bottle Cap Co., incorporated by E. C. Hawkins, H. H. Hawkins and C. S. Maschall. Capital stock, $25,000.

Macomb, Ill.—The Macomb Plumbing & Heating Co., incorporated by A. M. Keith, John M. Keefer, John M. Fellhamer and Seward Best; for general plumbing. Capital stock, $2500.

Mansfield, Ohio.—The Barnes Mfg. Co. has been incorporated. The company will manufacture a full line of brass and iron pumps, etc. Work will soon be commenced on buildings for the plant. The machine shop will be two stories, 65 by 200 feet; the foundry will be 100 by 110 feet, and there will be a separate building for engine room and rattling and grinding department.

Marietta, Ohio.—On account of increasing business, the Leidecker Tool Co. will open branch works at Waverly. This is made necessary on account of the company being several weeks behind with their work.

New Kensington, Pa.—The Cold-Rolled Steel Works, which have been shut down for two years or more, have been sold to B. H. Woodson Co., of Massachusetts, and it is the intention of the concern to convert it into the tack factory. The machinery in the old steel works will be utilized in rolling out the tack sheets. It is proposed to place about eighty-five machines, making it one of the largest plants of the kind in the country. The factory will give employment to about four hundred men.

New York, N. Y.—The A. H. Petereit Brass Turning Co., incorporated by A. H. Petereit, J. H. Walther, Abraham Cooper and Dr. Felix Cohn, of New York, Capital stock, $15,000.

New York, N. Y.—The Aluminum Plumber Supply Co., incorporated by T. Millot, Constant Deerdon, Milton Schanier and X. Herme, of New York City; to manufacture plumbers' supplies of aluminum. Capital stock, $10,000.

New York, N. Y.—The Alexander Nut Lock Mfg. Co., incorporated by M. H. Alexander, John W. Johnston and R. R. Brown, of New York City. Capital stock, $20,000.

Shelton, Conn.—The Shelton Cutlery Co. are to erect a two-story brick factory, to be occupied by the Derby Razor Co., a new concern recently organized, for the manufacture of razors and similar articles.

Springfield, Mass. — The Hough Cash Register Co., which has a capital stock of $30,000, will establish its plant in Indian Orchard. The company will start on a small scale, employing only about twenty hands at first.

Springfield, Mo.—The Springfield Stove Works Co., incorporated by W. W. Baldwin, M. B. Clark, W. D. Sheppard, Benjamin U. Massey and others. Capital stock, $100,000.

St. Louis, Mo. — The American Brass Mfg. Co. Capital, $10,000. Incorporators —J. M. Dieterle, E. W. Dieterle and Charles Messner.

Trenton, N. J.—Articles of incorporation of the Porter Screen Mfg. Co. have been filed. The capital stock of the company is $100,000. The stockholders are Frank O. Briggs, F. W. Roebling, C. G. Roebling, A. T. Way and H. A. Way. The factory will be located at Colchester, Vt. It will be devoted to the making of adjustable window and door screens, wire cloth and other wire novelties.

Spring City, Pa.—It is reported that the American Wood Pulp Co.'s mills will be turned into a shovel factory, and that 500 hands will be employed. Samuel Egolf purchased the property recently.

Troy, N. Y.—The Columbia Novelty Co., incorporated by Leroy Vermilyea and James S. Clute, of Cohoes, and Frank B. Sheldon and Lewis Stevens, of West Troy; to manufacture and sell oil cans, etc. Capital stock, $25,000.

Utica, N. Y.—The Utica Drop Forge & Tool Co., incorporated by William M. White, C. C. Kellogg, T. R. Proctor, H. L. White and John P. Campbell, of Utica. Capital stock, $50,000.

Wilkes-Barre, Pa.—A company has been organized for the manufacture and sale of a patent flour sifter. The article resembles an ordinary ice cooler, and is so made that it can be placed in the kitchen against wainscoting or woodwork. No flour can be taken out unless it is thoroughly sieved, which means a great saving in flour and a better quality of baking. The company at present will do business in Pennsylvania only, but expects to extend its territory to other States. The officers are: C. E. Stegmaier, president; A. O. Lemeris, secretary; H. G. Leim, treasurer.

Woonsocket, R. I.—The Woonsocket Napping Co. is building a wooden mill, 125 feet long by 26 feet wide and a story and a half high, on land off Providence Street. The building will be used in the manufacture of a new patented sheathing apparatus to be used in woolen mills.

Changes and Removals.

Columbus, Ohio.—The Thomas L. Wayne Mfg. Co., Hardware dealers, has changed its name to the National Brass Mfg. Co. The stockholders are W. D. Henry, Franklin F. Lawson, William Goodale, F. M. Lawson, C. F. Nuezei and V. D. Cram.

New Buildings and Improvements.

Cincinnati, Ohio.—The Lodge & Davis Machine Tool Co. have added nearly $50,000 worth of machinery to their plant during the past ninety days.

Wilkes-Barre, Pa.—Two additional buildings will be added to the Hazard Wire Rope Works. One addition will be 63 feet wide and 89 feet long, two stories in height, while the other will be 110 feet long, 25 feet wide and two stories in height.

Recent Fires.

Grand Rapids, Mich.—The dowel factory of Ald. C. B. Clark was destroyed by fire. Clark's loss is $4000.

Salem, Ohio.—The stove works and foundry of J. Woodruff & Sons were burned. Loss, $30,000; fully insured.

Sedalia, Mo.—A large manufacturing concern at Polo, Ill., are making arrangements with parties in Sedalia, looking to the removal of their plant to that city. This mammoth concern is equipped with machinery for manufacturing harrows, agricultural implements, etc.

Springfield, Mass.— The mop manufactory of Church & Richards in this city was burned out, causing a damage of about $5000. A large quantity of waste was burned and the machinery was all damaged. The cause is unknown.

WE GUARANTEE

A CIRCULATION FOR ALL THE NEWS. HARDWARE HARDWARE EXCLUSIVELY. OF NOT LESS THAN

ONE HUNDRED AND TWENTY THOUSAND

FOR

1896.

There is but one way, outside of the word of the publishers, to settle definitely the circulation of any newspaper, and that is to **publish the receipts from the post office** for the matter that is mailed. During 1896 we shall adopt this system, and will, each issue, publish the receipts for the preceding issue as obtained from the mailing department of the New York post office, and this will settle, once and for all, the truth of our assertions.

If it can be shown that we fall below 120,000 in the year we **will donate $1,000** to any charity named by the president of the New York Hardware Club.

HARDWARE PUBLISHING CO.,

Price, $85.00

Is one of the very best High Grade Wheels in the market. It is strictly high grade in every particular, and contains more points of excellence than any other wheel offered to the trade. Our Patent Detachable Crank Shaft is by far the best thing out and will sell on sight. You will make the mistake of your life if you fail to investigate the merits of the WHEELER before placing your order for '96 wheels. Our Catalogue will soon be out and we would like to mail you one.

Building Bicycles

requires only a slight mechanical knowledge, but building strictly high grade Bicycles requires great knowledge wisely applied. . . . . .

Remington Bicycles . .

Are the finest experience can produce, that money can purchase. These are facts recognized and appreciated by experienced riders and progressive agents. . . . . .

Agencies arranged in unoccupied territory.

REMINGTON ARMS COMPANY,

Factories: Ilion, N. Y. 313-315 Broadway, New York City.

Experienced AND Progressive Dealers

are looking for a wheel for the **present and future.** Not a bicycle of the **past.** Because a wheel was popular when riders were satisfied with a **forty pound roadster** it does not follow that it is up to the mark **to-day.**

The DAYTON

Is a Modern Wheel,

right in line with the ideas and demands of **up-to-date dealers** and riders, one which attracts attention, favorable comment and **trade** wherever shown.

REMEMBER! 1 1-4 inch tubing not swaged.

ROCHESTER, N. Y.

THE CHICAGO CYCLE SHOW

AT TATTERSALL'S

under the auspices and sanction of The Board of Trade of Cycle Manufacturers.

January 4 to 11, 1896.

Enormous Auditorium.... Over 300 Exhibition Spaces.

Treatment of Visitors.

All visiting bicycle agents and dealers, and those in kindred lines, visiting the show are entitled to free admission to the morning sessions—which are reserved exclusively for the trade—and to half price admissions during afternoons and evenings. To secure these concessions visitors should present business card or otherwise identify themselves. Otherwise no concessions will be granted.

Reduced Railroad Rates.

A rate of one fare and one-third for the round trip to Chicago will be made on all railroads in the Central Traffic Association, Trunk Line Passenger Association and Boston Passenger Committee Territory, Chicago and Ohio River Traffic Association Territory, Western Passenger Association Territory, Southern States Passenger Association Territory—142 different railroads.

In buying tickets, the full fare must be paid to Chicago and a certificate taken from the ticket agent. This, when countersigned by an officer of the National Cycle Exhibition Co., appointed for the purpose, will entitle the holder to a return ticket for one-third fare.

Tickets going to Chicago may be purchased at any time between January 1 and 11. Tickets for the return journey any time between January 4 and 15. Tickets are good only for continuous passage.

BEST AND CHEAPEST
STONE WATER FILTER
ON THE MARKET.
Tripoli Stone Block System.

Set up ready for use. There are two crocks, each of four gallons capacity—an upper one holding the Filter Block, and the lower one, which can be used as a water cooler if desired. This Block is four inches in diameter by the same in height, and is hollowed out on inside. This fits on a metal tube, which fastens by means of a nut to bottom of Filter Jar. Block can be lifted off tube, cleaned and replaced in two minutes, and with no trouble at all. Water passes from outside of block, through the walls, into the hollow chamber, and from thence, by the means of the Drip Tube, into the lower receptacle.

The Finest Piece of Salt Glazed Stoneware Ever Offered the Public.

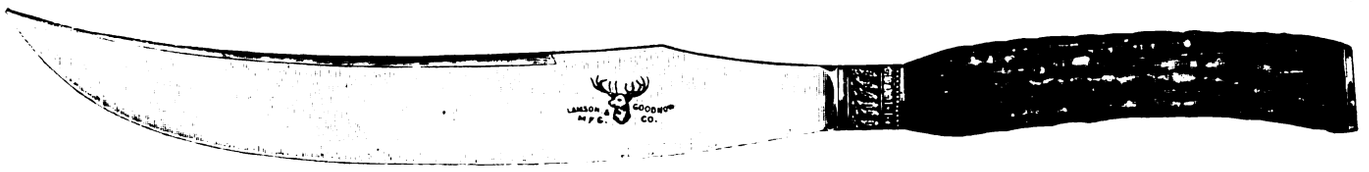
ONE REASON WHY

Our business has grown out of all proportion to any other manufacturer of

CUTLERY IN THE U. S.

Is that while our goods are unsurpassed in finish and general appearance our special aim has been to adapt them to the purpose for which they are to be used.



In the matter of Carvers, your customer wants a Knife to cut with as well as to look at. All our Carver blades are made from carefully tested Butcher Knife Steel. They take and hold a fine cutting edge.

We also make Table Knives, Butcher Knives, Shoe Knives in great variety. All fully Warranted.

BY a young man with nine years' experience in the Hardware trade in New York City, desires position as store or outside salesman; best reference. A. J. H., No. 1039 Madison Street, Brooklyn.

WANTED—By man 33 years of age, some stock to buy in an established wholesale Hardware business, and by so doing secure position in same. Has been successful in the retail business. Can give best of reference. Address S. B. F., care HARDWARE, No. 143 Chambers Street, New York City, or Lock Box 396, New Cumberland, W. Va.

EXPORT: A responsible, experienced man, speaking Spanish, French and German, having extensive acquaintance among exporters here and practical knowledge of the requirements of foreign markets, desires position as manager of export department of large manufacturing concern. Address "Export," care HARDWARE, No. 143 Chambers Street, New York.

WANTED—Any manufacturer wishing to be represented in Ohio, Indiana and Michigan, will do well to correspond with me. Address J. T. H., care HARDWARE, No. 143 Chambers Street, New York.

Side Line Wanted.

I WANT a line of tinware, table cutlery or house-furnishing Hardware, in connection with present line, for Ohio, Indiana and Michigan. Address "TRAVELER," care Avery Stamping Co., Cleveland, Ohio.

TRAVELING salesman, twelve years with present house, wants line table cutlery, house-furnishing goods, tinware, or A1 specialties, in connection with old line, for Michigan, Indiana and Ohio. Address M. I. & O., care HARDWARE, No. 143 Chambers Street, New York.

TRAVELING salesman of ten years' experience wants side line of pocket cutlery, scissors or any light Hardware. Will cover Virginia and West Virginia. Now represent lubricating oil and filter house. Best of reference if required. Address W. S. BUCHANAN, Oakland P. O., Louisa County, Va.

GOOD selling specialties wanted to handle in western New England. F. E. WHEELER, No. 476 Main Street, Springfield, Mass.

WANTED by traveling salesman for a large Hardware house, a side line of pocket cutlery, scissors, etc., visiting New York towns and cities. Address L. K. Wadsworth, South Butler, Wayne County, N. Y.

Side Line Offered.

SALESMEN wanted on commission to handle as side line or otherwise a line of leather cup valves, cylinder and plunger valves for pumps, etc. Address GEORGE OBERNE & Co., No. 383-401 North Halsted Street, Chicago, Ill.

SALESMEN wanted to sell an article weighing two ounces to the Hardware, grocery, coal and other trades. Used in every house. Commission on each sale $2.50 and up. R. K. TELLER, Unadilla, N. Y.

WANTED—Profitable side line. Salesmen calling on Hardware trade can make big money for next two months. A strictly holiday specialty. Address QUADRUPED NOVELTY Co., Canton, Ohio.

SALESMAN for paying side line, flatware, etc., selling to Hardware and general store trade. Commission. Address L. L., Room 55, No. 221 Fifth Avenue, Chicago.

SALESMEN in every State wanted to take as a side line a patented article on commission. Goods sold at sight and are demanded by all classes. For particulars, address T. MFG. Co., Box 7, Malden, Mass.

SALESMEN, to sell a patented staple specialty which is as great a success as it is a seller. Good commission. A splendid side line for the Hardware, household and kindred trades. Season now on. Address Gibbs Mfg. Co, Canton, Ohio.

WE want traveling salesmen to carry as side line direct to retail trade, on commission basis, our line of Wire Hangers for garments. Commission liberal. Further particulars by addressing Barber-Koenig Mfg. Co., No. 115 North Vine Street, Hazleton, Pa.

SALESMEN wanted to sell patented staple specialty to the Hardware and grocery trade. Large commission. R. Givens, Corpus Christie Tex.

Hardware Store Wanted.

TO purchase a retail Hardware store with a moderate sized stock, having a good location in a live, growing town. Must have a good trade, and doing a good business. Address JOHN R. SWARTZ, Hughesville, Pa.

For Sale.

FOR SALE—The stock, fixtures and good-will of a Hardware store and bicycle business in a Western city of 60,000 inhabitants. Capital required, $20,000 to $25,000. All or part of the business will be sold. Address W. B., care HARDWARE, No. 143 Chambers Street, New York.

FOR SALE—In one of the best manufacturing towns in Ohio, a stock of Shelf and Builders Hardware, Paints, Oils, and Agricultural Implements; stock will invoice $17,000 to $19,000; clean and in good shape. Store does a business of $40,000 per annum. Apply to T. B. Rayl Co., Detroit, Mich.

For Sale or Rent.

A NEW, large manufacturing plant, hitherto used in manufacturing reapers and mowers, but well adapted to other uses; thoroughly equipped wtth machinery, tools and appliances of best modern make, all ready to steam up and run; at St. Louis Park, just outside of Minneapolis, Minn., with street car connections; the property being situated alongside of the Minneapolis & St. Louis, and Chicago, Milwaukee & St. Paul railroads with switch connections. For particulars address Geo. C. Squires, St. Paul, Minn.; C. F. Forster, 638 Rookery, Chicago, Ill., or John Little, Xenia, Ohio.

To Let.

A FIRST-CLASS modern style Mercantile Building, just finished, on Superior Street, Cleveland, Ohio; centrally located; suitable for Dry Goods, Furniture, Crockery, Hardware or other merchandise, specially adapted for a large Department Store. Also so arranged as to be subdivided and leased to two or three tenants. Building is 67x150 feet to another street; 8 stories above a high and well finished basement; floor space about 78,000 square feet; passenger and freight elevators; steam heating; electric lighting. For further information apply to J. G. W. COWLES, No. 140 The Arcade, Cleveland, Ohio.

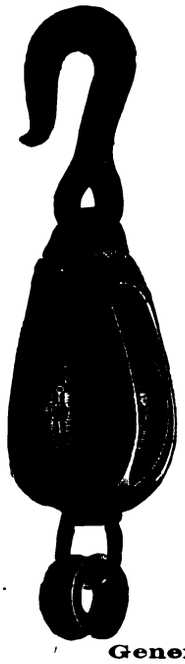
A DESIRABLE office to rent with the Wilmot & Hobbs Mfg. Co., No. 2 Murray Street, New York. Steam, heat, electric light and telephone.

A DESIRABLE office to let with the Van Wagoner & Williams Hardware Co., No. 14 Warren Street, New York City.

Attention! Hardware Travelers!

HARDWARE and other traveling salesmen who wish to increase their incomes, will be placed in a position to do so by sending their name and address to the HARDWARE Publishing Co., No. 143 Chambers Street New York.

To Manufacturers.



A HOUSE of nearly sixty years' standing, having travelers well covering the States, would be pleased to open correspondence with manufacturers of specialties suitable for the Hardware trade, with a view of coming to some mutual arrangement for marketing the same. Address F. S. S., P. O. Box 2522, New York City.

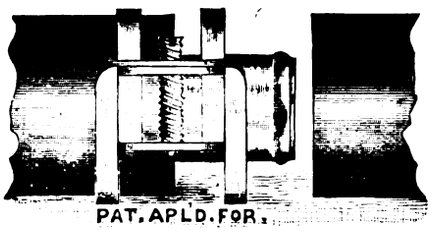
Polar Star Instant Ice Cream Freezer.

A Marvel to all who behold it in operation.

Size, 21x7x7. Retail Price $3.50. Capacity unlimited.

It makes perfectly smooth ice cream with all milk. Cream added makes it somewhat richer, but not smoother. It makes very superior, smooth water ices, frozen fruits, frozen custards, sherbets, etc., and is a very simple, convenient and economical freezer.

No Gearing, cogs or fixings to get out of order.



Noiseless in operation. A child can operate it. Makes a plate of ice cream in 30 seconds or a quart in 5 minutes. All other quick freezers merely SCRAPE it off a TIN CYLINDER, but do not BEAT IT or WORK IT.

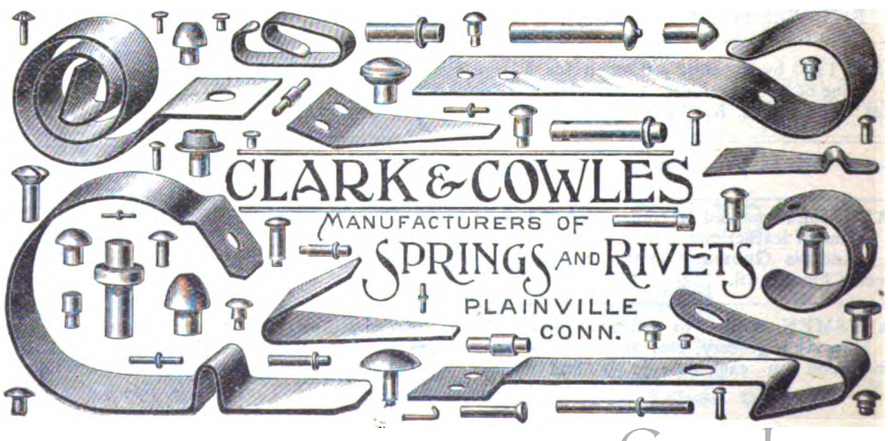
Our Freezer **Mixes, Mashes, Pulls, Grinds** and **Whips** the cream more in **30 seconds** than any paddle freezer does in **30 minutes.** Dealers will do well to investigate this promptly. Correspondence solicited.

Manufactured solely by Polar Star Freezer Co.,

Send for particulars and discount. 235 LEVANT ST., PHILADELPHIA, PA.

THE DOUBLE CINCH
HOSE BAND AND MENDER.

In Mending one Band does the work of two of any other make.



Bands unequalled for attaching Couplers, Nozzles and other Hose Fixtures.

Simplest and Best in the Market.

Water-tight, Durable, Light, Strong and easily put on—a knife and screw-driver being all the tools needed to mend a hose with this device.

The Mender Tube is seamless brass, easy to insert, gives a full opening, and does not rust.

Can be removed and replaced as many times as desired. The screw is never set by rust; it opens and closes the band, and is never detached or lost.

A Cylinder Lock-Set.

This set is our No. 802 D. It is made up of our celebrated Easy Spring Lock No. 6841 P—a lock of the highest grade which will last a lifetime. The Knob and Escutcheon are in the popular trim, at a moderate cost, known as our D Design; we can furnish the Hardware for the whole house in this design. We also put up this Lock in sets with other patterns of our Artistic Design Knobs and Escutcheons.

IF ANY OF OUR CHECKS AND SPRINGS GET OUT OF ORDER, REPAIRS CAN BE EASILY MADE WITHOUT RETURNING THEM TO THE FACTORY. PARTS FOR REPAIRS ARE SHOWN IN OUR CATALOGUE—THEY CAN BE FURNISHED PROMPTLY. IT IS NOT ONLY DURING THE COLD WEATHER THAT THE

Eclipse Check and Spring

IS USEFUL. AT ALL SEASONS OF THE YEAR THERE IS USE FOR A DOOR-CLOSING AND SLAM-PREVENTING DEVICE ON DOORS THROUGHOUT THE HOUSE. TO KEEP THE ODORS OF COOKING FROM THE LIVING ROOMS, THE ECLIPSE SHOULD BE USED ON THE KITCHEN DOOR.

DO YOU SELL THE ECLIPSE?

MERK CHRISTMAS TREE HOLDER.

BUY THE BEST.

Christmas Comes But Once a Year.

If you want to make your home pleasant and cheerful during the holidays **Buy a Merk Christmas Tree Holder,** made of iron, neatly finished in gold bronze. By an ingenious contrivance the tree is held secure by strong arms which extend upward from the main body of the receptacle in which it is placed. The tree can be revolved. Sample tree holders sent by express prepaid upon receipt of $1. Packed in quarter and half dozen crates for shipment. Manufactured and sold only by the

Allentown Hardware Works, Allentown, Pa.

Brass Bronze Composition and Light Gray Iron Castings. Manufacture a full line of general **Builders' Hardware.**

Hardware dealers and others are requested to write for descriptive circulars and wholesale prices. Also manufacturers of **Refrigerator Locks and Trimmings,** of new, beautiful design, finish and of the latest pattern.

ESTABLISHED 1818.

THE OLDEST AND LEADING MANUFACTURERS OF GALVANIZED WIRE GOODS IN AMERICA.

Patented Aug. 7th, 1894.

SOMETHING NEW

"Enterprise" Electric Light and Lamp Guards

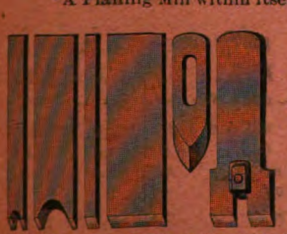
WE are now ready to supply the trade with the Enterprise Patent Electric Light and Lamp Guard, of which we are the sole owners and manufacturers.

This guard is a great improvement over the old style guards, being more easily attached around the socket, and requiring no brass ring for that purpose. It is made of steel wire twisted, afterwards tinned, soldering all the twists together, and made with a hinge and clasp in the middle so that you can get at the glass globe to clean or to put a new one in without detaching the guard from around the socket, which has to be done in the old style guards that have a brass ring attachment. We have seen and know by experience that the screws in the brass rings on the old style guards drop out from the vibration of buildings and the globe works out of the socket, falls to the floor and breaks. This is impossible with our guard. It is stronger than any guard in the market and very neat in appearance and has given better satisfaction to firms, that have put them in use, than any other guard they have tried.

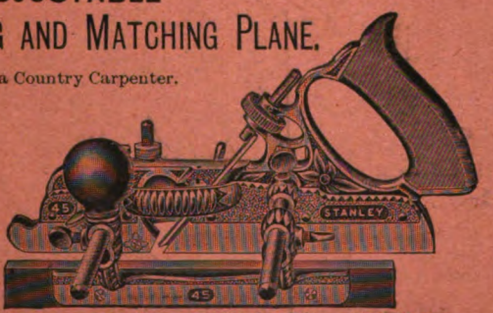
The price of this guard is lower than any of the old styles which have been used by some of our factories, steamships, etc.

It will pay you to write for a sample guard and our price before purchasing elsewhere.

Sole Manufacturers, **Edward Darby & Sons,**



Pennsylvania Iron Works. **233 and 235 Arch St., Philadelphia.**



When ordering guards please state socket.

Tempered Rules.

IN addition to the lines of RULES we have made for a number of years, we have recently introduced a line of Tempered Rules. We long had under consideration the making of these Rules, but were not satisfied with methods that had previously been in use, as the results were not sufficiently accurate. After an extended series of experiments, however, we have perfected machines which enable us to furnish Tempered Rules as accurately graduated as Soft Rules.

Special Circular may be obtained of any leading Hardware Dealer, or upon application to us.

The prices are the same as for the soft rules, which, it will be noted, by reference to our atest catalogue, have been recently reduced.

All Leading Hardware Dealers carry a full line of our Tools.

ORANGE SPORTING POWDER, MANUFACTURED BY LAFLIN & RAND POWDER CO

ORANGE RIFLE EXTRA, ORANGE SPECIAL, ORANGE DUCKING, ORANGE LIGHTNING.

The attention of TRAP AND FIELD SHOOTERS, RIFLEMEN AND DEALERS IN GUNPOWDER, is called to the new ORANGE SPORTING POWDER, patented April 17th, 1888, and branded ORANGE RIFLE EXTRA.

This Powder is quick and strong, and burns with such perfect combustion that the only residum left in the barrel after shooting is a dark oily substance easily removed While this Powder is not exactly SMOKELESS, it gives only a light bluish smoke, which is almost instantly dissipated, and interferes but little with the shooting of the second barrel, taking the place of the so-called smokeless powders in this respect.

This brand of powder sells at the same price as any other brand of Rifle Powder and is superior to any made. No person who shoots can afford not to give it a trial, as after once trying it he will never use any other Powder when he can obtain the ORANGE EXTRA. Weight and quality guaranteed.

MILITARY, MINING AND BLASTING POWDER.

LAFLIN & RAND POWDER CO., 99 Cedar Street, New York City.

IT TAKES A PULL

to separate the plies of our rubber belting. A yoke of oxen can do it, but hard service won't, so strong is the friction. Our belting is uniform in width and thickness, consequently more of its surface comes in contact with a pulley. That means

NO WASTE OF POWER.

Rubber belting is never injured by water, hence it is best for out-door use, for wet localities, and for mills where the atmosphere is surcharged with moisture or steam, as in paper mills, tanneries, etc. Buy the durable kind, branded 1846-Para, Double Diamond or Carbon, made for 50 years by the

Toledo Wheelbarrow Works. Toledo. O.

The AMERICAN WICK is made on scientific principles. The gum inherent in the natural cotton is taken out, and no expense is spared to produce a wick that will give THE GREATEST ILLUMINATION.

THE

AMERICAN WICK

Made by the
WICK DEPARTMENT
Of the STANDARD OIL CO. of NEW YORK.

Oil drawn up through the AMERICAN WICK burns with a large, clear, white light and the flame does not drop off in size as it does when a poor wick is used. When the cotton is clogged with its natural dust and gum the full illuminating power of the oil is not obtained and the complaint is heard that the light DROPS.

Do You Desire

an article that every family would buy if they simply had their attention called to its merits! If you do, put in a stock of P & A's Banner Oil Stoves. See Cut.

Banner Oil Heater

SIMPLE, NOVEL and PRACTICAL.

Requires less care than the ordinary Lamp.

Will burn 8 to 10 hours and heat comfortably a room 15 to 20 feet square.

NO SMOKE! NO ODOR!
PERFECT COMBUSTION.

POINTS:

The Oil Fount is brass, handsomely embossed and highly nickeled. It holds one gallon of oil. As each fount is tested under steam pressure before leaving factory, there is no danger of leaking.

No Chimney. The drum of the **BANNER** in its construction acts as a chimney, saving the expense incident to the renewal of glass chimneys of other makes.

The Fount Frame is artistically made of wrought iron, making a solid base for the stove.

The Burner is the best made, and ONLY ONE with feeder wick, allowing all the oil to be consumed.

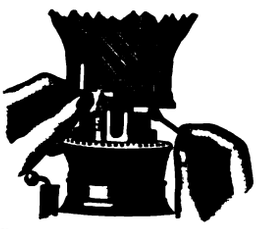
The Indicator shows at all times how much oil there is in fount.

The Flame is regulated with our ratchet wick movement, which allows the wick to be raised or lowered with nicety and exactness.

Lighting. It is not necessary to remove any part of the stove to light it. The sliding door in the drum is made for this purpose.

Draft. The round openings in the drum create great suction of cold air in addition to the regular draft. Double the radiating force of the ordinary stove is thus secured.

Get one for your Bed, Bath or Smoking Room, Library, Nursery, Office or Conservatory.



No. 971, Heater Complete. Height, 27 inches.

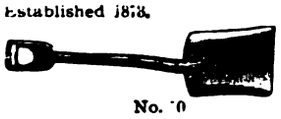
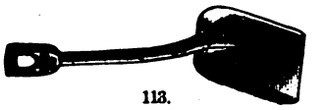
THE Ohio Stove Pipe is the only practicable, durable Smoke Proof Knock-Down Stove Pipe made that needs no directions for putting it together. The Ohio Stove Pipe's peculiar construction enables any person to easily put it together or take it apart. A number of the Ohio Stove Pipe Joints put together will make a continuous line (46 ft. long if desired) of perfectly firm, smoke-tight pipe that will not collapse.

The Ohio Stove Pipe is always shipped in crates of 25 joints of the following sizse:



4 in....per crate. 5 in....per crate. 6 in....per crate. 7 in....per crate.
4½ in.... " 5½ in.... " 6½ in ... "



Ask your jobber for this stove pipe; if he does not keep the Ohio, write us.

WE GUARANTEE THAT THE CIRCULATION OF "HARDWARE" DURING 1896 WILL EXCEED

ONE HUNDRED AND TWENTY THOUSAND

AND THE SAME WILL BE PROVEN BY THE PUBLICATION IN THIS COLUMN, IN EACH ISSUE, OF THE POST OFFICE RECEIPTS FOR COPIES MAILED THE PRECEDING ISSUE.

In accordance with the above proposition, we will publish in this column, in our issue of January 25, 1896, a *fac simile* of the post office receipts for the copies mailed of this our issue of January 10th, 1896. These receipts will hereafter appear in each number during the year, settling the QUESTION OF OUR GREAT CIRCULATION beyond cavil or doubt.

Business Men and War.

There will be no war with England. Those patriotic Hardwaremen of America who began to get out the old muskets of 1865, and take down the swords which their grandfathers used at Bunker Hill, can peacefully lay the same away for future emergencies. It is a gratifying and remarkable fact that the business men of America have spoken upon this question, in a tone which leaves no possibility of misunderstanding as to their views and position. The great trade organizations, and manufacturers and merchants of the country, do not yield one jot or tittle to any living class of men when it comes to a matter of actual patriotism. But as a class they are not disposed to plunge the country on a downward road to disaster for mere buncombe. They are prepared to stand by President Cleveland and Congress in maintaining not only the rights of our country as against foreign aggression, but also in endorsing the Monroe doctrine to its fullest extent; but they do not believe that the proper way to live peaceably with a neighbor is to poise a needless chip upon the shoulder, and march around asking some body to knock it off.

The recent action of the New York Chamber of Commerce, to our mind, defines the position of the business men of America in exact language. They are prepared to stand by President Cleveland just so far as their duty to their country demands, but they do not believe in awakening needless antagonisms, nor in inviting a quarrel which the most plain principles of common sense and good judgment show to be entirely needless. The suggestion of the Chamber of Commerce that the matter be investigated and passed upon by representatives of the business element of the country is a good one, inasmuch as it indicates the trend of public opinion on this question, although of course a tribunal of that character would carry weight only in a moral sense. We believe that England and the United States will live together side by side a great many years without war, and that the same good sense which has come to the rescue of the American people at a critical period will also prevail in a like manner upon the other side of the sea.

The annual dinner of the New York Hardware Club has been set for the evening of February 20th, 1896, at the Hotel Savoy. The dinner committee, led by that chief among committeemen, Alfred D. Clinch, are busily engaged in preparing for a gathering which, in all its features, shall fully equal those so successfully inaugurated some years ago. The formal notices are being sent to the trade, and it is to be hoped that the response will be early and generous, as these gatherings cannot be allowed, in the very nature of things, to fall into a state of innocuous desuetude. We are certain that the Hardwaremen of this section will respond with that generous and patriotic alacrity which has always characterized them in the past. The committee promise an unusually interesting and attractive programme in the way of speechmaking, etc.

HARDWARE takes pleasure in extending to its friends everywhere a Happy New Year's greeting. Things look very bright just ahead for the business interests of the country, and we are satisfied that when the flurry which the recent foreign discussion has caused shall have passed away into the limbo of discarded and for-

Digitized by Google

gotten things, that general business will take on a new strength, and that the Hardware trade especially will feel the good effects and reviving influences of larger sales and of better profits than has been experienced for some years past.

Annual Dinner of Sickels, Sweet & Lyon.

It is the pleasant and kindly custom of Sickels, Sweet & Lyon, the well-known Hardware jobbing firm of No. 35 Barclay Street, New York, to give their employes an annual banquet. The Hardware Club was on the evening of December 30th the scene of the sixth of these enjoyable occasions. The guests gathered at about 6 o'clock, and after spending nearly an hour in pleasant social intercourse, were ushered into the ladies' dining room, where the tables were spread. The following lady members of the hosts' families graced the occasion with their presence: Mrs. Robert Sickels, Mrs. E. S. Sweet, Mrs. Fred Simpson, Mrs. Charles D. Mills, Miss Sweet and Miss Lyon. The following gentlemen were present: Robert Sickels, E. S. Sweet, H. M. Lyon, Peter McCartee, President of the Hardware Club; R. R. Williams, *Iron Age;* E. H. Darville, *Iron Age;* Robert H. Spurgeon, *Hardware;* Ed Tolman, Otto Dederer, A. F. Spratlin, E. Bernard, H. Fuller, E. C. Hamilton, Elbert Nevins, D. C. Crocheron, J. K. Eldridge, J. Wesley Earl, Charles W. Sniffen, Allan P. Chichester, Joseph Ingoldsby, Ph. Schmidt, George W. Brown, F. Wheeler, Edward R. Hilton, A. Wilkins, John J. Canovan, Conrad Flannery, Paul Held, George O'Keefe, John Sommer, William S. Miller, B. E. Randolph, J. R. Lodar, Smith Nostrand, James Kane, W. Copeland, G. W. Whiting, Leander Wood, Thomas Burrowes, Jr., F. I. Simpson, J. G. Edwards, A. S. Gould.

The tables were arranged on three sides of a square, with a small table in the centre for the ladies, and were decorated with greens and flowers. At each plate was a tasty menu card in blue and gold and a flower for the buttonhole. The menu is here given:

OYSTERS.

Cream of celery — Consomme

Olives — Radishes — Celery

Fried smelts, tartar sauce

Mousse of jambon a l'imperial, Puree of spinach

Lamb chops, provencale

Potatoes parisiennes — French peas

SHERBET AU KIRSCH

Roast squab sur canape. Escarole salad

Savarin au rhum

Fancy ice cream — Faveurs — Mendiants

Assorted cakes

Cafe — Cigars

December 30, 1895. — Hardware Club.

During the dinner the genial hosts circulated among the company, having a kindly word for all, thus making all feel perfectly at ease. At the end of the sumptuous repast Mr. Sickels introduced Mr. McCartee, who, in a telling style, entertained an appreciative audience with his early experiences in the Hardware trade forty years ago. He said he had begun business with Wetmore & Co., at Washington and Vesey Streets, at a salary of $_.o for the first year. The close attention paid to Mr. McCartee's remarks showed that there was matter of interest and instruction in them. Mr. McCartee said that his motto in life had been "honesty integrity, hard work and ambition." He remarked that with these principles in mind any young man will succeed. He was followed in an able manner by R. R. Williams. The company then adjourned to the library and listened to songs and instrumental music, which closed an evening of great enjoyment.

Bruce & Cook's "Happy New Year."

A great many people in all parts of the country have come to look forward with pleased anticipation to the annual "New Year" greeting that Bruce & Cook, New York, have for a long time past sent forth. It has come this year, with their annual calendar and tin-plate sheet, and is full of good things as usual. "The year 1895," they say, "opened with very low prices in all kinds of metals, especially in iron and steel and their products. During the early spring there was a sharp upward turn in price of iron and steel. Nearly all goods made from them also advanced in the same proportion, excepting tin-plates. While steel billets, from which tin-plates are made, advanced from about $14.50 per ton to about $22 or $22.50 per ton, the advance in tin-plates was not over $1 to $3 per ton. The reaction in billets set in early in the autumn, and while they are to-day $2 to $3 higher than a year ago, tin-plates are somewhat lower, and are at the lowest price ever known in the history of the trade. The enormous consumption of steel in this country for building frame work, and for tin-plates, is an outlet to which we have not been accustomed, and it is not surprising that this added consumption should have stiffened the prices. Should the rates of consumption for this year increase, as may be expected with the gradual return of prosperity from the panic influences of 1893 and 1894, it would not be surprising if early in the season there should be an advance in nearly all values which have steel as a basis. The American makers of tin-plates are learning by experience how to turn out plates more like the Welsh grades, to which the consumers and dealers are accustomed, and for this reason their product is more marketable than in previous years. The capacity for production here is large, especially in the ordinary grades of coke tin and roofing, and this, added to the capacity of the Welsh works, which is equal to the world's capacity of consumption, will no doubt work to keep the prices for these goods at very low figures for some time to come. Metals: Tin, copper, lead and spelter all advanced in price during the early part of the year, but receded to figures that may fairly be called a safe basis. Our stock includes a full assortment of both American and imported tin and terne-plates and a large variety of kindred goods, such as sheet iron, zinc, solder, metals of all kinds, together with the manufactured goods used by tinners, which we shall be pleased to have orders for at the current market rates. To buy from a manufacturer you can easily get only one thing, and are often tempted to buy more than is actually needed, while from the jobber you have a large variety to choose from, can obtain as a rule just what you want, when you want it, and at prices as low as the manufacturer will sell."

1896 Bank Statement.

The following is the statement of the Importers and Traders' National Bank of New York, on January 2, 1896:

THE REAL AND THE UNREAL BUSINESS PAPER.

BY NATH'L C. FOWLER, JR., DOCTOR OF PUBLICITY.

Imitation is the order of the day.

Imitators are everywhere.

The real and the unreal live side by side.

The good and the bad are neighbors.

There are trade papers which are trade papers.

There are trade papers which trade on the trade, and have nothing to trade with.

The profitable trade paper is very profitable.

First-class trade papers make money.

All first-class men are successful.

All honest men succeed.

Dishonest men try to, and sometimes do.

There are papers masquerading under the names of legitimate publications which are nothing more nor less than advertisements bound together in pamphlet form.

There are so-called trade papers which have no circulation, and which cannot get any circulation.

There are trade papers run by men who know nothing about the trade they represent.

The popular impression that all trade papers are successful, has thrown upon the market numerous illegitimate publications which attempt to float on the water which has passed, and to sail by the wind of others.

A trade paper can be three-quarters advertising, and yet be a good trade paper.

A trade paper can be half clippings, and yet be a real trade paper.

The trade paper which is a trade paper, is the paper which contains part advertising, part original matter, part clippings, and is of interest and benefit to its readers, and such a trade paper is obliged to have a circulation.

There is many a trade paper with half its circulation in the form of sample copies, but that does not seriously handicap its advertising value, for each sample copy is sent out as a means to obtain a new subscriber, and each sample copy reaches people of its trade, because it would not pay to send sample copies to folks of any other class.

The trade paper which is all sample copies is illegitimate—it has no right of existence.

The trade paper which is all clippings is not a real publication.

The trade paper which is all advertising cannot be classed in the first-class.

The trade paper which contains nothing but puffs is not worthy of consideration.

The trade paper paper which has all of its reading columns for sale, and which sells nearly all of its reading matter space, is worthless as an advertising medium.

The trade paper has a perfect right to print a paid notice. Every publication, excepting a few of the magazines, do that.

The trade paper can legitimately speak well of its advertisers—it ought to do that—the advertisers expect it.

The trade paper which speaks illy of those who do not advertise in its columns is a trade paper which has no standing, and which is worth little.

There are trade papers in the country which are nothing more or less than blackmailing sheets, which the Government ought not to transmit through the mails, and which are a detriment to the trade they represent, and to the honesty of the craft.

The legitimate trade paper, the trade paper of character, and the trade paper which pays the advertiser, is the trade paper which carries a large amount of advertising, for such advertising is as valuable to the reader as the reading columns themselves, for these pages of advertisements present pictures of progress, and tell the buyers what to buy as well as where to buy.

The legitimate trade paper contains a reasonable amount of reading matter, part of it original, and part of it copied.

The legitimate trade paper balances its advertising with its reading matter, and its reading matter with its advertising.

It prints legitimate reading notices.

It speaks well of its advertisers, but it is not a paper of puffs—it is a paper of news and comment, simply the right combination of all that which makes up a first-class publication.

Beware of the trade paper which has a different rate for every advertiser.

Look out for the trade paper which has a "Seeing-it's-you" concession for everybody.

Look out for the trade paper which does not stand on its own dignity and say to the advertiser: "My space is merchandise. If you want it, you must buy it as you buy your clothes or your shoes."

Look out for the trade paper that puffs everybody indiscriminately.

The trade paper can be known by the quality of its representatives.

First-class advertising men work for first-class papers.

Second-class advertising men work for second-class papers.

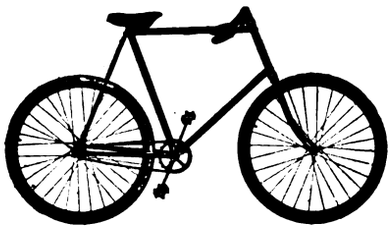
The representative of the legitimate trade paper is a gentleman—a man worthy of your confidence—when he calls he is entitled to your consideration, and should be given an audience.

It is your business to discourage the illegitimate trade paper.

It is your business to encourage, with your money and your interest, the trade paper of character, for such a paper is as much a part of your business, and is as necessary to your business, as your desks and your counters.

Copyright, 1895, by Nath'l C. Fowler Jr.

The Slate Industry.



James L. Foote, manager of the Slatington-Bangor Slate Syndicate when interviewed recently, said: "The black board trade has been good throughout the season, but does not exceed that of former years. Better prices have prevailed and this branch of the slate industry has been generally prosperous and satisfactory. The school slate business has been brisk and the margin of profit greater to the producer and manufacturer than for many years. There is ground for the belief that trade in all branches will improve, and in none more than the slate industry. Already large quantities of roofing slate have been exported to Great Britain, and our manufacturers have recently received orders amounting to 5000 squares for export during the winter months with prospects of orders for several thousand squares more. This will materially help the market and create more demand and higher prices by next spring. The indications are that most of our quarries will work all winter."

H. A. Graef and George W. Hess, members of the firm of Graef & Hess, Hardware manufacturers' agents, Nos. 179–181 Lake Street, Chicago, have been among the recent visitors in New York. They came down to call upon the trade generally, and to make an especial holiday visit to the several large companies they represent in the West.

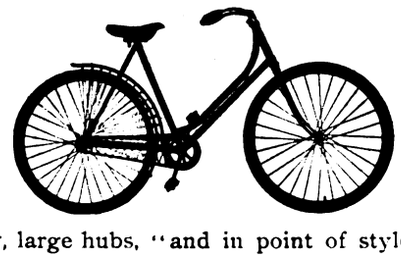
McIntosh-Huntington Wheels for '96.

The McIntosh-Huntington Co., Cleveland, Ohio, report that their line of bicycles for 1896 will be made up as follows: Sunol, Hercules, Stella, American King and Queen of Scorchers; and will also control the Crawford line in the states of Ohio, Indiana, western New York, western Penn-



sylvania and western West Virginia; and the Belvidere line exclusively in the State of Ohio.

The Sunol Line: The Sunol Line, as in the past, will be their leading high grade machine, and will be modern and strictly up-to-date and will list at $100. They will be made in two models for men and one for ladies. Each model will be furnished in two weights; the light roadster weighing from 21½ to 23 pounds; and the roadster from 23½ to 25 pounds, according to equipment.

The Hercules and Stella Line: The Hercules and Stella will be an excellent line of wheels for '96 at moderate price. They will be made up on the very latest lines, from 1⅛ inch tubing, barrel hubs, and will be modern in every respect. They will be made with 24, 26 and 28 inch wheels, in both diamond and drop frames, and will list at $40, $50 and $60 respectively.

American King and Queen of Scorchers: The American King and Queen of Scorchers will also be an excellent machine at a moderate price, and will be made up from 1⅛-

inch tubing, large hubs, "and in point of style and finish will be equal to a great many '96 pattern high grade machines." These machines will be furnished with 28-inch wheels for both ladies and gentlemen and will list at $60.

The Crawford Line: The Crawford Line for '96 has been greatly improved, and is bound to be more popular than ever, and the list will vary according to size and quality, from $40 to $100.

The Belvidere Line: They have arranged for the exclusive control of this line of wheels for the coming season in Ohio. They say: "For those that are not familiar with it, we beg to say that this make of wheels is strictly high grade in every particular—made up from large tubing, large hubs, and is bound to be a very popular machine."

Their advance Bicycle catalogue and regular Bicycle catalogue, showing a full line of bicycles carried by them, also a complete line of sundries, will be ready for distribution in about thirty days.

In this connection we show illustrations of their ladies' and gentlemen's bicycle, of the model for 1896.

New Handles to Mrs. Potts' Irons.

From the introduction of the popular Mrs. Potts' Irons, of which the Enterprise Mfg. Co. of Pa., are the original manufacturers, they have never spared pains or expense to add to their utility and durability. After twenty years experience it has been demonstrated that the life of a set of Irons is in the handle, the stretcher or iron part of which has heretofore been made of cast iron, and if dropped, accidentally or otherwise, would invariably break. The

expense and inconvenience of this can readily be appreciated. While the handles heretofore manufactured by them have been of a superior quality, they desire herewith to call attention to the new handle which they brand "The Best." It is made of the best selected walnut, has a tinned forged iron stretcher which will not break and will last a lifetime. They consider that the handles to a set of Mrs. Potts' Irons cannot be made too good, and the price no object, when there is corresponding merit and value.

As is well known, the great competition on Potts' Irons has reduced the price so there is little or no profit to the manufacturer, and, as is usual in such cases, the tendency has been for the quality of the goods to deteriorate. They have decided, however, in no wise to detract from the quality of their "Mrs. Potts'" Irons, but, on the contrary, to make them better, and are therefore supplying all sets with "The Best" handles.

Charles E. Adams, Lowell, Mass., president of the Massachusetts State Board of Trade, was in the city several days since, a guest at the dinner given at Delmonico's on the evening of January 3rd, by the Empire State Society of the Sons of the American Revolution.

Making Mesinger Saddles.

The accompanying cut represents the building where the now well-known Mesinger saddles are manufactured. Starting a little over a year ago to make a few saddles by hand, the demand for these has grown to such proportions, that a large and constantly increasing force assisted by the best modern machinery, can hardly keep the output in line with the requirements of the trade. To see the evolution of the raw material to the finished article, as it is shipped to all parts of the globe, is interesting as well as instructive, and although too complicated a process to go into all its details, we shall try to give a general idea how this is accomplished.

The mode of constructing these saddles can be divided into four different and separate departments, namely, the woodwork, leather and felt work, rattan work, and the assembling and packing. In the first department the cantles are cut out of selected straight grain second-growth hickory, and after having been steamed and bent to the curve required by the shape of the saddle, they are carefully shaved down to their ultimate form. After having been drilled to receive the strands of cane, they are ready for the rattan department, where they form the frame for the rattan braiding which constitutes the main part of the saddle and is its leading feature. Great care is taken in selecting the cane strand so as to avoid imperfections, which might cause annoyance to the rider, although fully covered by the guarantee on the saddle. In the leather and felt department, large rolls of ⅛-inch felt are cut out to the shape of the different styles of saddles, and large sides of both russet and black leather are likewise prepared for the power press, which gives it the shape following that of the cane bottom. The felt and leather tops having been joined and moistened before being put under the press, they are then laid on long trays and inserted in a hot air chest, having a capacity of many hundred per hour, to dry. From there the tops are transferred to another branch of this department to have the centre piece cut out, to be stitched, edged and made ready to be fastened on the rattan seat. After the metal work has been adjusted, the spring set in with the press and other minor, but none the less important, operations have been completed, the saddle is carefully inspected before being packed up and labeled.

As in any well regulated piece of machinery, one cog wheel works upon the other with the utmost accuracy and precision; so do all operations on these saddles follow each other in systematic order, all tending jointly or separately to the same end: the assembling room, where the finishing touches are put on and the saddle is sent forth on its career. All these departments are under the personal supervision of the original patentees, Messrs. Mesinger Bros., who are proud to see their invention of this saddle crowned by such astounding success.

Still Mounting That Ladder.

The Bicycle Step Ladder Co., Chicago, Ill., are still receiving encomiums from all parts of the country for their Bicycle Ladder. Some of the later ones we are permitted to quote, as follows: C. Bentford & Son, Hardware, Circleville, Ohio: "The ladders are a perfect success." The Cash Hardware store, Lewiston, Idaho: "We have the two ladders up and they work to our entire satisfaction." Taylor & Sedberry, Commerce, Tex.: "Our ladders are the talk of the town and nearer perfect than we have ever seen. They are worth several times the cost." Dr. R. W. Culver, druggist and apothecary, South Haven, Mich.: "The ladder is a perfect success in every respect. I would not do without it for three times the price." Isaac W. Buchanan, Lebanon, Tenn.: "The ladder has been set up and thoroughly tested. I think it is one of the few things that are advertised that is just what it is represented to be."

Metals Made From Alloys.

Bath Metal is made from tin and copper.

Bell Metal results from zinc and copper.

Bronze is the product of copper and tin.

Britannia Ware is made from copper, bismuth and antimony.

Cannon Metal is formed of copper and tin.

Dutch Gold is made from copper and zinc.

German Silver is composed of zinc, nickel, copper and a small portion of iron.

Standard Gold is made from gold and copper.

Copper and tin from gun metal.

Mosaic Gold is a combination of copper and zinc.

Pewter is made from lead and tin.

Sheet Metal is composed of lead and a small quantity of arsenic.

Standard Silver is made from silver and copper.

Solder from tin and lead.

Type Metal the combination of antimony and lead.

White Copper is made of copper and arsenic.

The Liberty Cycle Co. will distribute their new catalogues at the Chicago Cycle Show. This catalogue will be one of the handsomest pieces of work that will be seen on the bicycle catalogues this season, which, by the way, will be handsomer than ever. The Liberty catalogue will be in a new size to fit the top coat pocket, and will be emblematic of the American girl and the American flag—"the two things we love the best." The Chicago show spaces will be 211, 212 and 213.

The Hunt Mfg. Co., Westboro, Mass., are offering a valuable present to any of our readers who will send them a two-cent stamp and mention HARDWARE. This is no hoax, but a desirable article well worth the trouble of writing for.

HARDWARE costs only One Dollar a year.

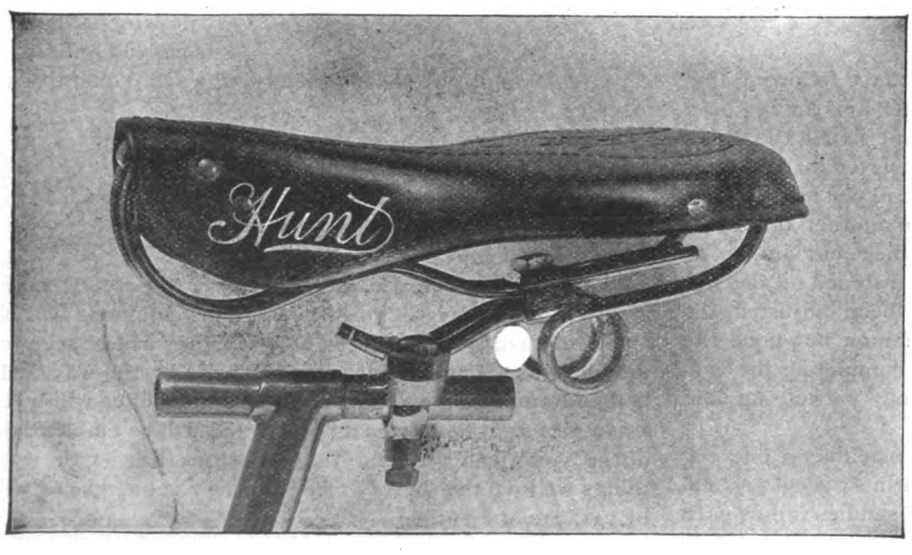
The Sherman Cycle Co.'s High Grade Wheels.



The Sherman Cycle Co. have recently moved to their new factory at Nos. 133–139 South Clinton Street, Chicago. The factory is equipped with the latest improved machinery, and with increased facilities will turn out 2000 strictly high grade wheels. The company started last May under the name of Church & Co. to make wheels in a small way,

and by using the very best make of material in connection with good workmanship, with a high finish to their wheels, made quite a hit with the trade they supplied, and especially with the riders. The '96 models of this company are just out, and include a 22-pound roadster, 22-pound lady's wheel and a double top bar tandem—very rigid, and yet weighing 37 pounds, with single chain and single steering bar. Large tubing will be used, 1¼-inch head, 1⅛-inch in frame, with ¾-inch rear stays and inch fork sides. One of the principal features of its '96 wheel will be a barrel hub with ¼-inch balls in front hub, which is turned from solid bar steel with tool steel cones and cups, has a little tube to carry the oil directly to the bearings and is dust-proof throughout. Every part of the wheel is constructed of the best material obtainable. The Sherman Cycle Co. state that it is the highest grade wheel ever offered for $75, and as good as any, regardless of price. The tandem is listed at $125.

The Hunt Ladies' Saddle.

The Hunt Mfg. Co., Westboro, Mass., have gotten out for the coming season a decided novelty in the Lady's Saddle, illustrated herewith. They announce that they "are the first concern to produce a saddle especially designed for ladies use and not adapted to men's use." As will readily be seen from the illustration it possesses ample spring to satisfy the most fastidious, and being proportionately very wide for its length, the seating capacity is unusually great. The length is 8¼ inches, the width 7½. It is recommended by the makers and "acknowledged by all who have seen it to be the Finest Ladies' Saddle in the world."

The Iroquois Cycle Mfg. Co.

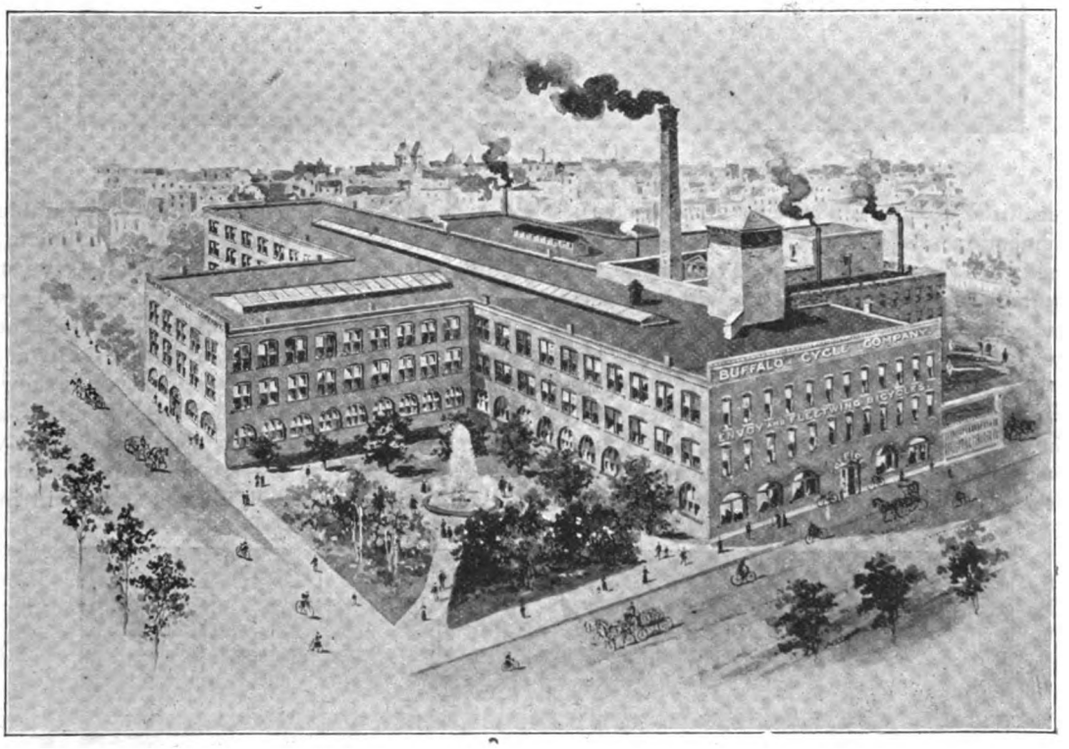
The Iroquois Cycle Mfg. Co., Buffalo, N. Y., organized during the month of October of the past year. The company intend manufacturing a thoroughly high grade, first class, up-to-date machine, which they call the "Cayuga." The secretary and general manager of the concern is M. F. Dirnberger, of Buffalo, N. Y., better known as "King Michael." He has had, as all are aware, a varied experience in the bicycle business, as racing man, as travelling salesman, and also in a practical way. Not being content with his knowledge of the practical part of the business, he has associated with him R. C. Wright, of the same city, who is one of the best known mechanics in that section of the country. The factory is now running full force, and they expect to turn out in the neighborhood of 2,000 bicycles the first year. Several new and interesting features are embodied in their machine, and they have completed an interesting advance circular which they would be pleased to send to any address upon receipt of an application for the same.

Mr. Flanders of Africa.

John W. Flanders, the representative of the Lansing, Mich., Wheelbarrow Works at Johannsburg, South Africa, and who also represents ten other American manufacturing houses, is a young man, full of energy and business. Although born in Boston he has spent most of his life in South Africa, his father having been first American consul to the Cape. He is fully conversant with African commercial affairs, and naturally takes a keen interest in the business relations existing between this country and the developed part of the dark continent. Mr. Flanders, in a recent talk with a Lansing reporter, showed himself very enthusiastic over the progress of improved American implements of all kinds. He says that American made goods are fast taking the lead in South Africa, hitherto almost an exclusive market for English goods.

Charles Close, of Danbury, Conn., has discovered a new use for the bicycle. He is a musician and has the ability not only to play but make almost any sort of musical instrument. A short time ago he made an instrument that plays ten popular airs better than any hand organ heard here. Still the Danbury Yankee was not satisfied. He found that before he had wound or ground out half the tunes of his wonderful music-box he had to stop to rest his aching arm. To overcome that unpleasant feature he constructed a bicycle with a driving wheel in the place of the usual rear wheel. The m achine was made stationary by placing it in a framework and elevating the fly-wheel from the floor. A fly-wheel on the organ, connecting with the bicycle by a broad belt, did the rest. A day or two ago Mr. Close and his wife celebrated the fifteenth anniversary of their marriage, and on that occasion Mr. Close entertained his guests by mounting the seat of bicycle and playing the whole repertoire of music in his unique machine. The guests got away alive.

An improved Gatling gun operated by an electric motor and capable of firing 1800 shots in a minute has made its appearance.



The Congressional Library possesses at present 725,000 volumes.

Works of the Buffalo Cycle Co.

There is herewith presented a representation of the home of the "Envoy" and "Fleetwing," the new factory of the Buffalo Cycle Co., Buffalo, N. Y. It will be readily seen that this factory is calculated to hold its own with the finest and largest in the country. It is not only an exceedingly imposing structure, but has been constructed with the greatest care for the special purposes for which it is intended. The building proper, *i.e.*, the main building, has an aggregate floor space of 53,000 feet, filled with automatic machinery and lighted by electricity generated by the company's own plant. If the construction of the building is an indication of the faith which Messrs. Atherton & Funnell (the proprietors) have in the future of the bicycle business, its massive walls and the air of permanence which pervades the whole place speak volumes for future successes.

The progress of the Buffalo Cycle Co. has been truly phenomenal. Some years since they were well and favorably known under the style or title of the "Buffalo Tricycle Co.," inventors and manufacturers of the celebrated

"Gem" tricycle, upon which a trade was built up covering the whole of the States, and many important markets outside. Recognizing that the bicycle would ultimately drive the more cumbrous tricycle out of the market, they commenced the manufacture of bicycles, and immediately took a stand which was dictated, not by experience, but by judgment, the soundness of which has been amply demonstrated, and of which the present mammoth business and factory is the best evidence.

Even when the bicycle business was infinitesimal, the Buffalo Cycle Co. saw that the best chance of success lay along the line of high grade and medium prices, with a very large output as a compensating balance for the diminution in profit. The "Envoy" and "Fleetwing" now command a ready market throughout the whole of the western continent, and have invaded the principal foreign markets of the world.

To return to the building, the subject of this sketch. The sub-divisions into which the building is divided are so arranged that there is no waste of power or labor, from the reception of the raw material through to the ample quarters of the shipping clerks; labor-saving has been the principal study; no power is wasted in the useless handling of parts. The tool rooms, blacksmith shops, enameling, nickel-plating, filing, buffing, polishing and draughting rooms are all specially adapted and fitted for the particular work to be done, with the least possible waste of power or time.

With the greater facilities which the Buffalo Cycle Co. now possess, it is safe to predict that the "Envoy" and "Fleetwing" will not only hold the position they now occupy, but will take an even higher position among America's high grade bicycles.

They Endorse the Seat.

The Automatic Cycle Seat Co., Grand Rapids, Mich., still receive many endorsements as to the benefits derived from the Automatic Seat, several of which we are permitted to quote, as follows: F. M. Vrooman, Buffalo, N. Y.: "I have tried your cycle seat on my wheel and had several of my friends try it also, and they all join in saying it is the best seat they have ever tried. I think there will be a great demand for it in the early spring and think I can give you some nice orders this fall." W. G. Caffery, Reno, Nevada: "Seat to hand and must say I like it very much. Am waiting for electro-plates. Enclosed please find draft. Express six more at once. Every one sold to a doctor. Common saddle not in it yet." Fay Bros., Clinton, Iowa: "The two bicycle seats received O. K. We are very much pleased with them. As an improvement as regards bicycle seats it is a success and should prove a rapid seller wherever introduced." The Wesson-Nivison Mfg. Co., Cortland, N. Y.: "Enclosed please find check for sample seat received several days since. After experimenting two or three days we finally learned how to sit upon it, and came to the conclusion that it is a good thing."

An ingenious Frenchman has invented a contrivance to do away with the bicycle chain. It consists of a flexible steel band brazed together at the ends so as to be continuous like a band saw. Holes are punched in this at intervals to receive the teeth of the sprocket, as the chain does now. It is claimed that the new device needs but little cleaning and oiling.

The Berlin Iron Bridge Co., East Berlin, Conn., have just completed for the H. W. Johns Mfg. Co., at Brooklyn, N. Y., a new dryer house, which is built entirely of steel.

The "Perfect" Shelf Boxes.

The attention of Hardwaremen everywhere is called to a line of goods that is being successfully used by the trade in all parts of the country. These are the "Perfect" Shelf Boxes, manufactured by C. P. Moore, Ravenswood, W. Va. We are permitted to present several illustrations of them in this connection. Figs. 1 and 2 show a section of shelving furnished with these boxes, adapted to general and saddlery Hardware. In Fig. 3 is found one with compartments for augers, chisels, etc. This style will accommodate several sizes of goods in the same box, and at the same time keep each size separate, and thus utilizing the entire depth of shelves, which is a great saving of space. Mr. Moore makes the boxes any size desired, to fit shelving now in use, and finishes them either in hardwood or with painted fronts. He informs us that during the past two years he has introduced and sold them in thirty-five States, and exported some, and that they have given universal satisfaction. He published an illustrated catalogue and price list, that he will be pleased to send to any one on application. In a brief description of these articles he says: "The Perfect Shelf Box solved the problem of how to keep a full stock of shelf goods in small space, and at same time display them in most attractive manner. The steel bodies take least possible amount of shelf room, and are indestructible. The lids, being steel, do not swell or shrink, but fit just right, and being fastened by simple and durable hinge they are always in order and not displaced; they fit closely, excluding all dirt, dust and moisture, and keep stock in first-class condition. The price card fastened on inside of lid is in full view when box is open, the wood ends admit of handsome finish, and samples can be easily and firmly attached. The sample holder enables you to show most goods without opening or removing box from shelf, and can be replaced without inconvenience. The largely increased sales from display of goods, and the reduction of over half the work in keeping stock in good order will in a very few months repay the comparatively small outlay in the purchase of a set of Perfect Shelf Boxes, which will transform the old-time 'ironmonger shop' into the best arranged, most attractive and interesting store in the city; one in which trade will find constant interest in seeing the multitude of

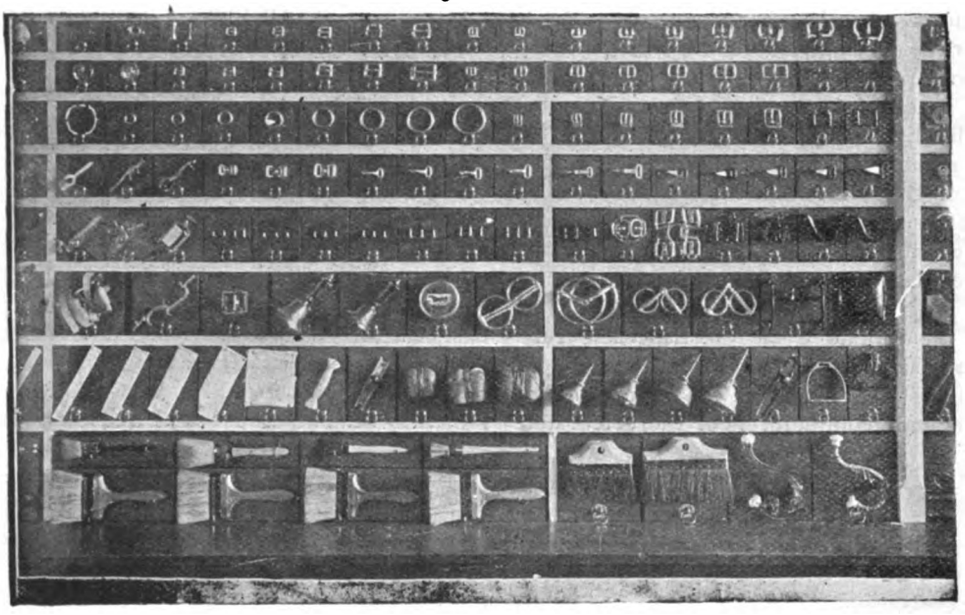

FIG. 1.

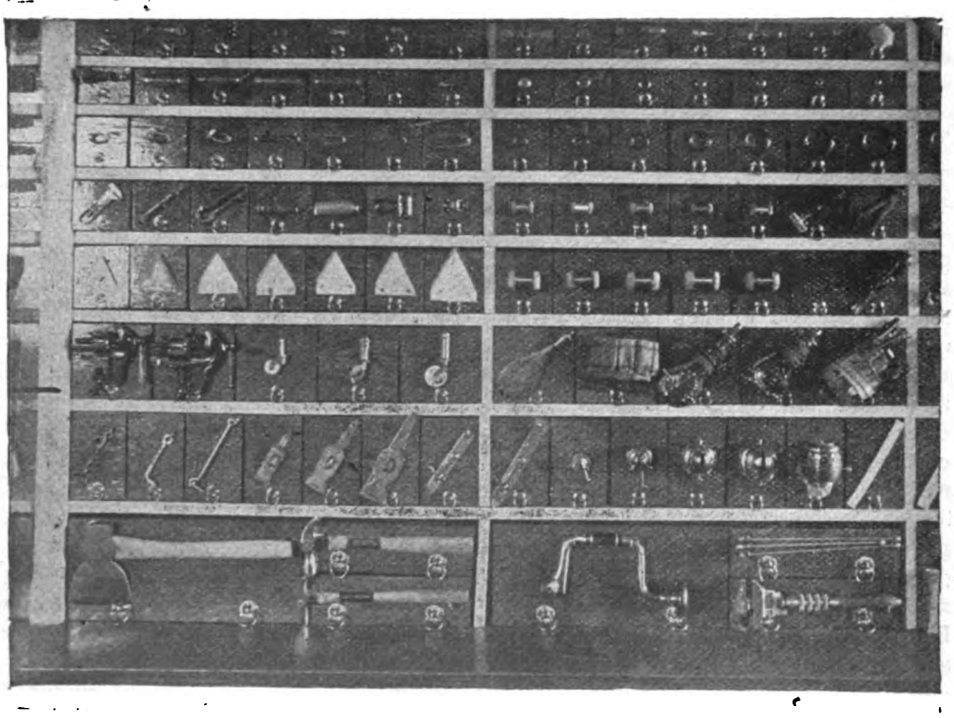

FIG. 2.

Digitized by Google

(to them) novel and useful articles you have in stock, will cause widespread comment and then more thoroughly advertise you than any method you can adopt."

The Covert Mfg. Co.

The Covert Mfg. Co., West Troy, N. Y., are again obliged to extend their works and increase their already very large manufacturing facilities. They have just built a brick stack or chimney 180 feet high, and are putting in another immense steam boiler in order to run their powerful engines to their full capacity. This was rendered necessary, as they have recently placed in position new and improved machinery. They anticipate placing on the market several new specialties, but at present are overdriven on their regular line of goods. Their goods have become standard throughout the whole United States, and their foreign trade has rapidly increased until their goods are now shipped to every civilized country on the globe. All the goods they manufacture are made from the highest grade of materials, and are guaranteed first-class in every respect. This is one of the main reasons why their goods have become standard with the trade and are in such great demand.

The Monarch Can Opener.

The Monarch Mfg. Co., Meriden, Conn., are introducing the Monarch Can Opener. The blades are of tempered steel, nickel plated, and they work either right or left handed, cutting the top off or out of any size or shaped can. They come packed one dozen in a neat box for counter display, as shown herewith.

An Old Pair of Shears.

Edward Boss, of Troy, N. Y., has a pair of shears known to be 132 years old, and it is believed their history extends back 200 years. Mr. Boss has owned the shears since 1862, when they were given to him by Levi Hemingway, a farmer living between Hinsdale and Dalton, Mass. The shears were presented to Mr. Hemingway by another farmer in that vicinity. It is known that a cutlery shop, where such articles were made, once existed in the vicinity of Dalton and Hinsdale, and it is supposed the articles were manufactured there. Mr. Boss's attention was drawn to an article in the New York *Sun*, stating that an old pair of shears was found in an oat field near Williamstown, Mass. The shears were said to be 200 years old. The description tallied almost exactly with that of the pair owned by Mr. Boss. The shears are not unlike the present article, except being rougher in appearance. The handle was made by drawing the metal out and twisting it into loops. It is believed that the shears are such as were used 200 or 300 years ago by tailors in cutting cloth. The shears are strong, being evidently hand forged and beaten into shape. The pair owned by Mr. Boss will cut tin or wet paper.

ILLUSTRATED BICYCLE NOVELTIES.

MANUFACTURERS and DEALERS are invited to make FREQUENT USE of these columns.

Anything NEW in BICYCLES or BICYCLE NOVELTIES should be sent us immediately. NO CHARGE, direct or indirect, is made, as our interest lies in SHOWING THE HARDWAREMAN what is going on in THE BICYCLING WORLD.

When your NOVELTY is ready, send us an Electrotype and descriptive matter, which will appear immediately.

Empress Saddle for Ladies.

Butler & Ward, Nos. 226–228 Halsey Street, Newark, N. J., are placing on the market the Empress Saddle for ladies

as shown herewith. It is short, being 7½ inches in length, with a width of eleven inches. It is provided with a wood cantle and steel springs. A set screw provides a means of taking up any sag in the leather resulting from use. The company state that the construction of the saddle is such that it meets all requirements for the free and easy action of the limbs, eliminating the evils of the present style of saddle for ladies' use, and contributing to the support of the rider as well.

Heath's Combination Tool-Case Pump.

The Cycle Manufacturers' Supply Co., No. 21 Park Row, New York, are placing on the market Heath's Combination Tool-Case Pump as here illustrated. Fig. 1 shows the case used as a pump. It is 8½x1¾ inches and weighs with the tools fourteen ounces and upward. As a pump it is said to have twenty times the capacity of a small hand pump. It is described as light, compact and ornamental, being fully nickel-plated. Fig. 2 shows the tools in the case. The makers state that as a tool-case it has ample room for all necessary tools, including wrench, oiler, repair kit, cleaning cloth, tube for connecting pump to tire, etc. It is

FIG. 1.

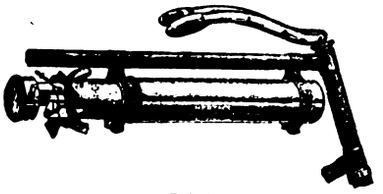

FIG. 2.

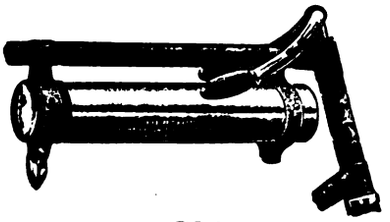

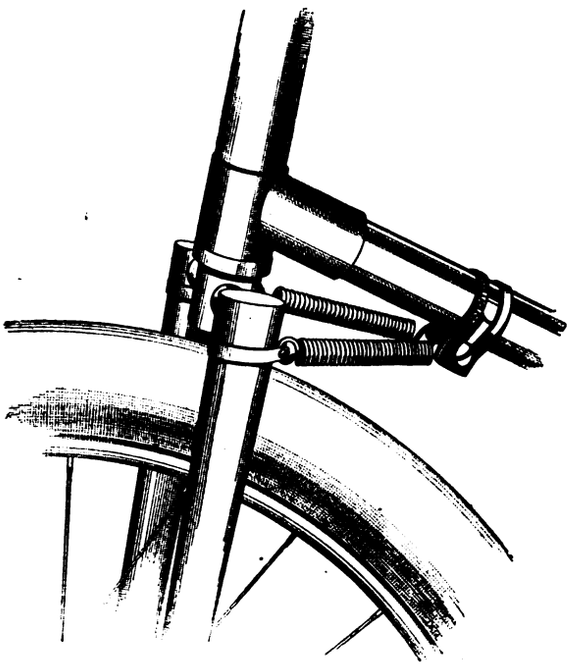

FIG. 3.

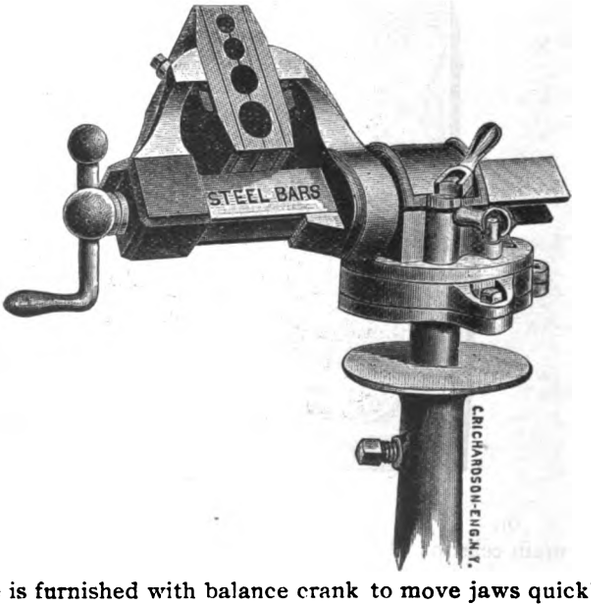
pointed out that the tools do not have to be removed when used as a pump, but that their weight adds greatly to its power, and that there is no rattle. Fig. 3 shows the case locked to the machine, which makes it thief-proof.

Automatic Bicycle Balance.



The Bicycle Chain Lightning Co., Nos. 29–33 West Forty-second Street, New York, are placing on the market an Automatic Bicycle Balance as shown in the accompanying cut. It is nickel-plated, weighing two ounces, and is adjustable to any bicycle. It is attached to the upper bar of the frame, as shown in the illustration, and is designed to balance a wheel perfectly. The manufacturers say that the balance prevents accidents, as it keeps the wheel straight ahead; that it increases the pleasure of riding, es-

pecially on rough roads; that corners and circles can be turned steadily and safely; that it gives riders confidence in their wheels, and that it makes it easy to ride with hands off the grips.

Patent Bicycle Vise.

The Lewis Tool Co., No. 44 Barclay Street, New York, are introducing the Bicycle Vise as here illustrated. The manufacturers state that the vise is made especially for holding bicycle frames, but is equally good as an assembling vise for sewing machines, gun and pistol work, and for many other purposes. It has a patent swivel bottom. The jaws are made to revolve, and be firmly held at any desired position. The slide bars are of wrought steel. The jaws are four inches wide and open 5½ inches. The

vise is furnished with balance crank to move jaws quickly, or with the usual lever as ordered. The clamp is firmly held on vise jaws, as shown in above cut. The grooves in the wood part of the clamp are made ⅝, ¾, 1 inch and 1⅛ inch in diameter, but they can be bored to any required size, and as the woods are screwed on, they can be easily

Digitized by Google

renewed. The iron post for holding vise is made adjustable to any required height to suit workman, from 30 to 38 inches. The vise weighs 56 pounds.

Bicycle Sprocket Locks.

The Slaymaker-Barry Co., Lancaster, Pa., John H. Graham & Co., No. 113 Chambers Street, New York, agents, are introducing a line of new Bicycle Sprocket Locks as

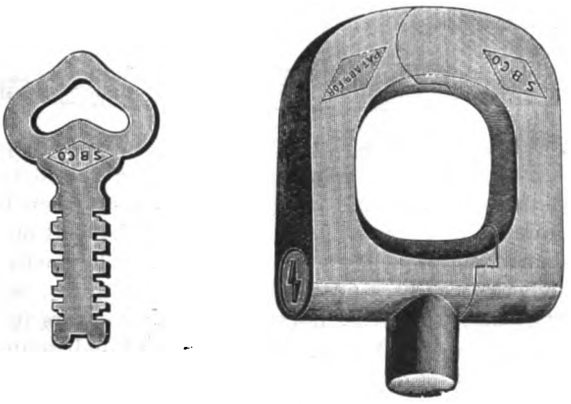


FIG. 1.

represented in the accompanying illustrations. The parts of the lock shown in Fig. 1 are accurately machine-fitted, with spring self-locking, spring opening mechanism; rolled bronze metal rod bolts formed and milled, phosphor bronze indestructible springs, with two nickel-plated steel keys, two hundred available changes, and with the exterior of

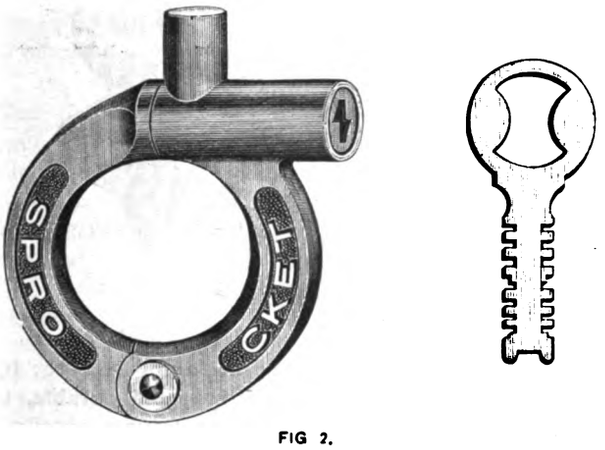

FIG 2.

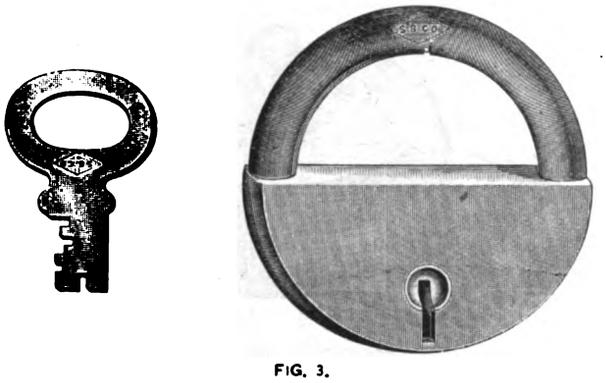
the lock polished and lacquered. The manufacturers refer to the high grade of the lock as capable of resisting great strains without injury to the mechanism; also to its convenient shape for carrying. The lock shown in Fig. 2 has the same mechanism as the one already described, is high grade, with two hundred available changes, but somewhat



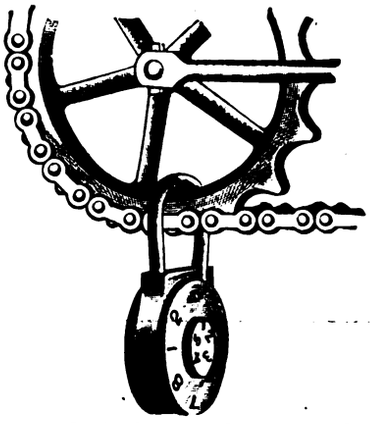


FIG. 3.

lighter. The lock shown in Fig. 3 is described as having rolled steel wire shackle, strong solid bolts, and is said to be an excellent lock for cheaper trade. The locks described are, the manufacturers remark, but three of about twenty different designs of bicycle locks made by them, including various kinds of high grades for locking machines in any way or by any part.

Combination Bicycle Lock.

The Hoffman-Packer-Carter Co., Nos. 38–39 India Wharf, Boston, Mass., are introducing the Combination Bicycle Lock here shown. It is intended to be placed on the bicycle, over the chain and sprocket, and once in place it

cannot be removed, it is stated, except by the person knowing the combination. It is further explained that it may also be used in every case where an ordinary padlock could be applied, being much safer and more trustworthy. Every lock has a different combination. The design is attractive, and it is pointed out that there is no key or chain to cause trouble. They are finished in nickel, are very light and sell for fifty cents.

The Rankin Toe Clip.

The Rankin Toe Clip Co., No. 124 Mathewson Street, Providence, R. I., are offering a new style Toe Clip as shown here. It is made of tempered steel wire, having three pieces that go over the toe, and can be adjusted to fit any style of shoe, by pressing the two outside wires together. It is adapted to either rat-trap or rubber pedals,

RANKIN TOE CLIP, NO. 5

and is said to be strong and light, weighing but two ounces to the pair. The company state that they make a ladies' toe clip in this style which they believe to be the first ladies' toe clip on the market. They come packed half dozen pairs in a box and sell for fifty cents a pair.

The Trenton Cyclometers.

The Trenton Watch Co., Trenton, N. J., announce that in 1896 they will manufacture three models of cyclometers, which will be known as models A, B and C. Model A will register 1000 miles and repeat, will weigh 2¼ ounces, and will be similar to the cyclometers made during the past year. Model B will be similar to model A, with the exception that it will register 10,000 miles and repeat. Model C will be a very small and light instrument, will weigh about 1¼ ounces, and be about 1½ inches in diameter. It will also register 10,000 miles and repeat. These instruments will be made of aluminum, will be water-proof, and very handsome in appearance. Their instruments in 1895 gave universal satisfaction wherever tried, and there is no doubt that these will make as good a record in all possible respects.

NEW GOODS IN THE MARKET.

If you have anything NEW, let the world know it by illustrating it in these columns.

NO CHARGE WHATEVER is made, direct or indirect, as our interest lies in showing the readers of "HARDWARE" where the LIVE manufacturers and wholesalers are, and what they are doing.

When your NOVELTY or SPECIALTY is ready, send us an Electrotype and descriptive matter, which will appear immediately.

The Hardwaremen everywhere read this department; it is to your interest to make prompt use of it.

Three New Nail Boxes

The A. J. Phillips Co., Fenton, Mich., are offering the trade three New Nail Boxes as shown in the accompanying

FIG. 1.

cuts. Fig. 1 shows the "Repair," which has thirteen kinds of tacks, brads and nails such as would be most useful for household repairs. The kinds are all separate and in removable trays and the trays are in a neat box having brass hinges and brass hook. Fig. 2 represents the "Generous," which contains six compartments with six of the most useful kinds of household nails and tacks. This box has sliding covers. Fig. 3 illustrates the "Cheerful," which contains three kinds of tacks and nails in separate compartments, the box having sliding cover. They are all

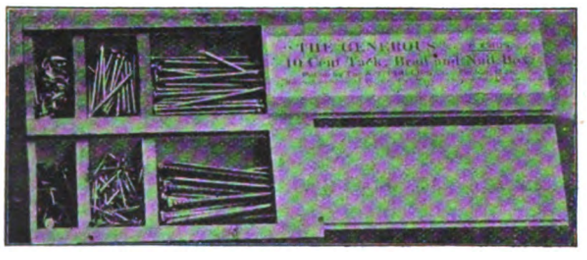

FIG. 2.

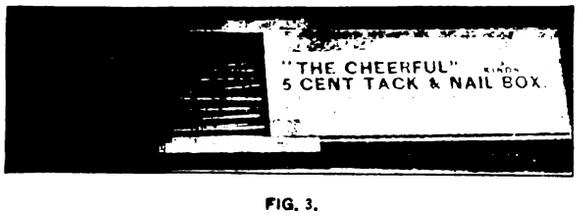

FIG. 3.

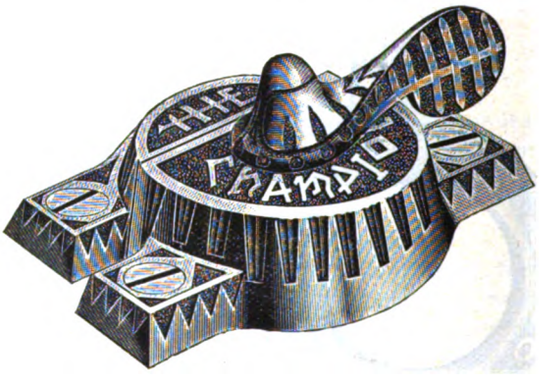
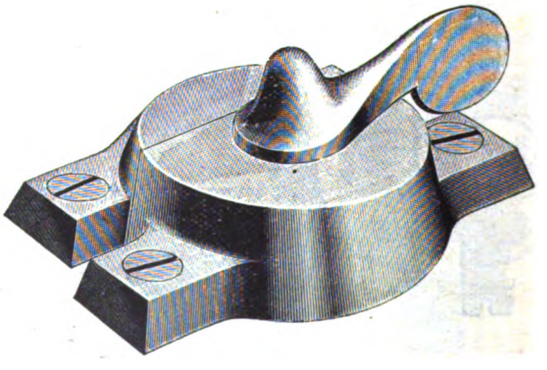
packed and labelled in shape for the trade. The manufacturers anticipate that the attractive package, the convenient assortment and popular prices will make these goods great sellers. The prices are twenty-five cents, ten cents and five cents, in the order named.

Non-Clog Rasp.



The Hoffman-Packer-Carter Co., Nos. 38-39 India Wharf, Boston, Mass., are putting on the market Non-Clog rasps as herewith shown. They are hand cut, of a fine grade of



steel, the tool used for cutting being similar to a prick punch, resulting in circular depressions and raised teeth. The makers claim that the rasps will not clog when filing aluminum, brass, copper, lead, babbit and other soft metals, or when filing bone, wood, hoofs, etc. The rasps are adapted to the use of plumbers, coppersmiths, wheelwrights, pattern makers, horseshoers and workers in soft metals. Rasps are furnished both flat and half round, in 6, 8, 10, 12 and 14 inch sizes; also in 14 inch tanged horse rasps.

Champion Improved Locks.

The Champion Safety Lock Co., of Cleveland, O., are placing the Champion Improved Meetingrail lock upon the market. This lock combines new points of merit with the essential features of the "Champion" which they have been successfully manufacturing for the past eight years. Some

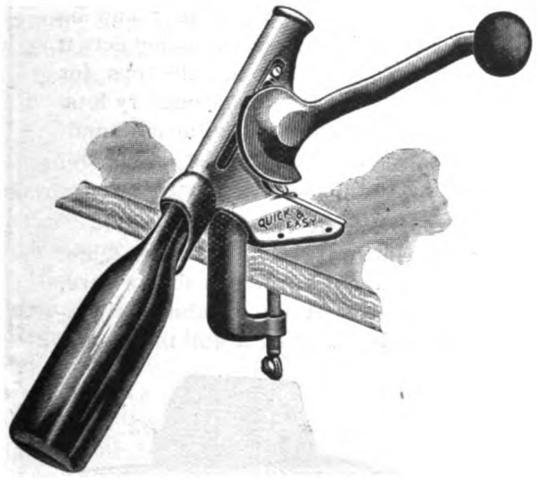
of the points of merit of the Champion Improved are: It is simple, having but five parts. Strong and durable, the working parts being of malleable iron. Operates easily, as it adjusts the sash and draws them together successively. Locks securely, as it locks the window and locks itself automatically. A special feature of the Champion Improved is that the knob is the highest point of the lock, thus preventing damage to the upper casing when the window is thrown up. These locks are made in three sizes, all popular fin-

ishes and any special finish desired. Catalogue for 1896 will be furnished upon application to the Champion Safety Lock Co., Cleveland, O.

Garlock's Water-Proof Hydraulic Packings.

The constant demand for a packing for the plungers and pistons of pumps, pumping and hydraulic machinery induced the Garlock Packing Co. to produce a packing which would meet all requirements. After many years of experiments and at a considerable expense they have, they

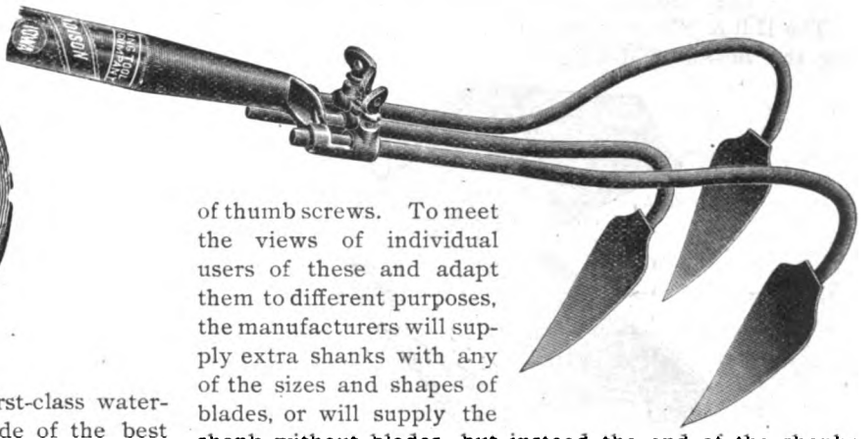
Digitized by Google



state, succeeded in producing a water-proof hydraulic packing which will answer all purposes. This packing is the outcome of numerous experiments and practical tests in the water ends of pumps, plungers, pump pistons, hydraulic elevators and hydraulic machinery. The manufac-

turers state that they have produced a first-class water-proof packing for light or heavy duty, made of the best flax and thoroughly lubricated with a water-proof compound which is strictly free from acid. This packing is made in all sizes up to two inches. They further state that heretofore the best rawhide hydraulic packing answered its purpose well for a time, but soon became water-soaked and soft from the use of oils, losing its strength, and piston plungers were sure to leak badly, requiring constant repacking. This packing is intended to resist excessive pressure and retains its solidity. One of their principal claims for this packing is that it is absolutely water-proof and oil-proof.

Walker's Quick and Easy Cork Puller.



The Erie Specialty Co., Nos. 345-351 West Twelfth Street, Erie, Pa., are offering their Quick and Easy Cork Puller in an improved form, as here shown. The extension of the mouth of the machine is designed to make a centering and gripping device to hold the bottle in line with the screw and to thus prevent all possibility of breakage of the bottle or screw by coming in contact with each other. One movement of the lever forward draws the cork and the reverse movement throws the cork off and places the lever back in position. It is explained that owing to the angle of the base only a slight pressure is required to hold the bottle in place while the cork is being drawn. It is provided with a crown and seal lifter attachment conveniently placed at

one side of the puller, this feature being referred to as a valuable addition. The machine is finely finished in nickel, and the manufacturers state that it is strongly constructed in every part; that each screw is subjected to a severe test, and that the nut in which the screw works is made of a superior composition, giving lasting and wearing qualities.

The Victor Garden Cultivator.

The accompanying illustration shows the "Victor" Garden Cultivator, put on the market by the Iowa Farming Tool Co., Fort Madison, Iowa. This is an adjustable cultivator, which the manufacturers say is graceful in lines, mechanically true in proportions, fit and workmanship. The socket head is of malleable iron, the shanks and blades are steel and can be adjusted to suit the operator by means

of thumb screws. To meet the views of individual users of these and adapt them to different purposes, the manufacturers will supply extra shanks with any of the sizes and shapes of blades, or will supply the shank without blades, but instead the end of the shanks flattened and painted in similar but smaller shapes and sizes.

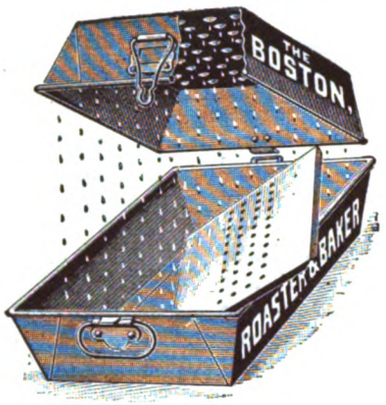
"Quick as a Wink" Hose Coupling.

W. J. Clark & Co., Salem, Ohio, are putting on the market the Hose Coupling, illustrations of which appear here. The makers state that the coupling itself is simple in construction, no delicate parts to get out of order, and will stand rough usage and severe strain. It has now been in actual use, not only by fire departments, but in private use on lawn hose for more than a year and has been subjected to the most severe tests without any indication of failure. Fig, 1 shows the coupling all ready to connect. To effect a connection the two parts are brought together and the head of that on the left will force the clamping jaws outward in opposite directions against the tension of the spring. The moment the grooved portion is opposite the outer ends of the jaws they will close around the head, and the inwardly projecting edges of the outer ends of the jaws will engage with the shoulder groove and it will be securely

FIG. 1.

FIG. 2.

FIG. 3.



coupled. The connection is made water-tight by means of the rubber tube shown inside of the jaws attached to the portion on the right. Fig. 2 shows the coupling connected. The coupling is disconnected by inserting a flat key in the slot between the two jaws. In regard to garden hose, it is so simple that it has been well said that it is only child's

Digitized by Google

play to hitch on the water supply or to put on nozzle or sprinkler. It is remarked that there is no trouble about leaky joints with this arrangement, and anyone can couple or uncouple hose by this method in a moment.

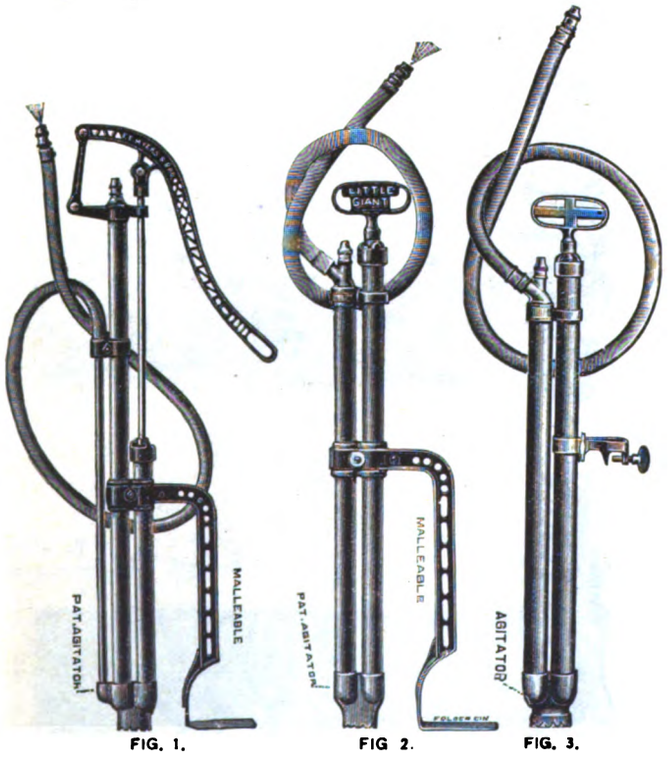
The "Boston" Baking and Roasting Pans.

The Hill & Whitney Mfg. Co., Boston, Mass., are offering the Boston Self-Baking and Roasting Pans as shown

by the accompanying cut. The superiority of the pan is claimed to be in the theory that anything cooked in a utensil where the steam is kept in as much as possible, is much sweeter and more nutritious than when cooked in any other way. The makers state that the indentations in the top of the pan as seen in the cut make self-baking positive. It is also said to possess all the advantages of other pans, that its simplicity of construction enables the user to adjust and handle it readily, and that it is durable and easily cleaned.

Myers' Bucket Spray Pumps.

F. E. Myers & Bro., Ashland, Ohio, are offering the trade the Bucket Spray Pumps shown in the accompanying illustrations. Fig. 1 shows a bucket spray pump made of brass with ball valves, and the handle and foot-rest of malleable iron. It is pointed out that all the work is done with the down stroke of the handle, that it can be operated with great power, that it has more air chambers than is



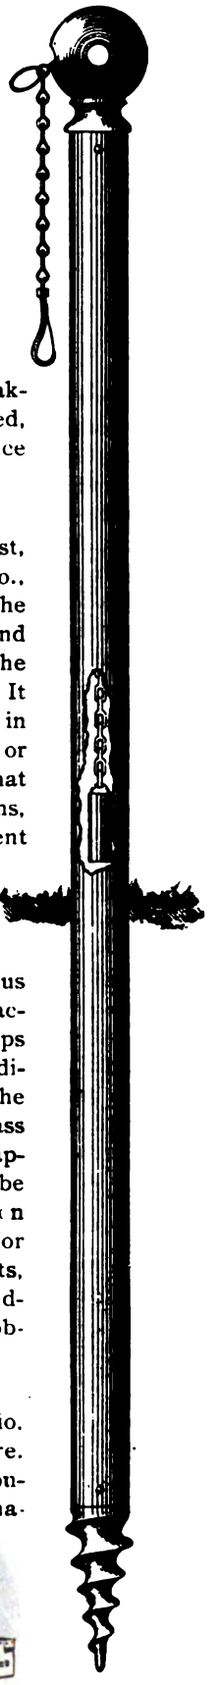


FIG. 1. FIG 2. FIG. 3.

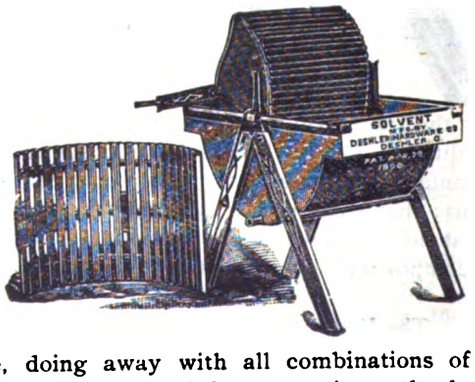
usual in bucket pumps, and that it has all the advantages of the barrel and bucket pump combined, while it is sold at a moderate price. The pumps shown in Figs. 2 and 3 are similar, excepting that Fig. 2 is provided with a malleable iron foot-rest and Fig. 3 has a clamp which attaches to the top of the bucket or tub. The pumps are constructed entirely of brass and are so arranged, it is explained, that the labor of pumping is done on the down stroke and nothing on the up stroke; that they are provided with large air chambers and have ball valves at the bottom between the cylinder and air chamber, whereby the pressure is held uniformly in the air chamber and on the hose, so that the nozzle throws a continuous spray and may not be affected by the movement of the plunger. All the above described pumps are arranged to discharge a fine jet in the bottom of the bucket, to keep the solution thoroughly mixed and agitated, a feature, it is stated, peculiar only to the pumps manufactured by the firm. The pumps are provided with sprinkler for flowers, and with the Myers centrifugal nozzle, which will throw a fog spray. The pumps can also be equipped with the latest improved Vermorel or Bordeaux nozzles, and an eight-foot pipe extension can be attached to the pumps when desired. The makers state that they have been thoroughly tested, that they are neat and attractive in appearance and are highly finished.

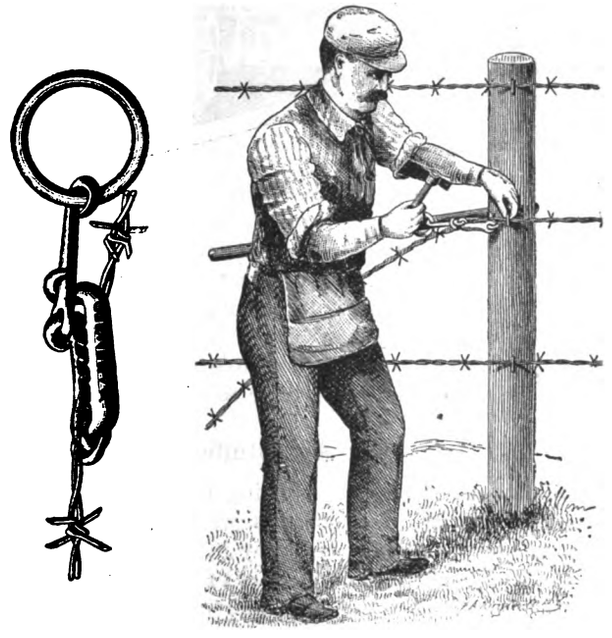


The Ohio Hitching Post.

We show herewith the Ohio Hitching Post, manufactured by the Ohio Hitching Post Co., Norwalk, Ohio. The cut shows very clearly the clean cut, handsome appearance of he post, and also the ingenious construction by which the slack in the chain is taken up automatically. It is pointed out that no tie strap is necessary in hitching a horse to this post, yet the halter or strap may be used if desired. It is stated that it is very durable, all parts, including the chains, being treated by a special process to prevent corrosion. As can be seen by the cut, it is ready for driving into the ground, thus avoiding the digging of a post-hole for its reception. These posts are made singly and also in groups of two and three with cross bars, thus comprising hitching post and guard rail for placing in front of stores, churches, etc. The tops of all the posts (they are made in different diameters) are proportionate to the body, and the part above ground is painted a good glossy grass green, and is said to be neat and tasteful in appearance. The company's No. 1 post can be used, omitting the hitching chain, in connection with a long chain strung through the tops for enclosing parks, public grounds, cemetery lots, etc., and makes an exceedingly useful and handsome fence. Circulars and price list can be obtained by writing to the address given above.

The Solvent Washer.

The Deshler Hardware Co., Deshler, Ohio, are offering the Solvent Washer as shown here. The makers remark that the machine is constructed on new lines, being a full metal ma-



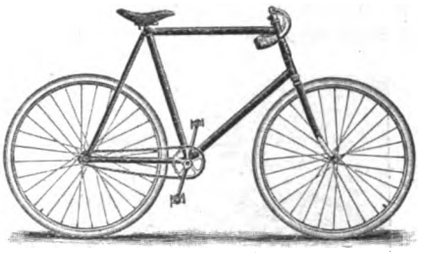
chine, doing away with all combinations of wood and metal. "This alone," they say, "is worth what other ma-

Digitized by Google

chines cost as we obviate the difficulty of wood decaying in the bottom of the machine by holding dampness from one wash day to another. It is recommended for neatness, durability and faculty for cleaning clothes." It is pointed out that the mode of removing the bottom from the machine makes it very easy to clean, leaving it free from endless complications, and free from bad smell arising from decaying soap suds clogging behind the slats or bottom. This, in itself, is valuable to one desiring a machine suitable to the use of laces and fine fabrics, going far to remove the dread of wash day. It is further stated that any wringer will fit the machine; that they cannot swell or get loose and leak, are easily worked and will wash clean, and are easily handled, only weighing forty-five pounds.

The Grip Wire Stretchers.

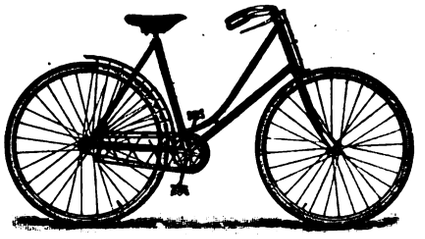
W. C. Heller & Co., Montclair, N. J., are placing the Grip Wire Stretcher upon the market with great success, and from its reception at the hands of the trade feel justified in speaking of it in high terms. They explain that it is made of malleable iron, is strong, will not slip, and will hold any kind of fence wire. "The harder you pull," they say, "the tighter it holds." They also point out the fact that it will



stretch poultry netting. It is sold at $3 per dozen, with a discount which they will be pleased to quote to the trade. We show herewith the article itself, and also its method of use.

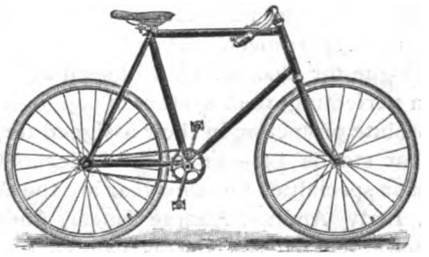
J. Leonard Varick, of the Union Nut Co., and secretary of the Hardware Club, salled for Southampton, Eng., on the American Line steamer *St. Louis*, on December 31st. Mr. Varick was accompanied by his wife. After reaching England, they will spend a couple of days in London and then ship on the steamer *Nile* for Buenos Ayres in the Argentine Republic, where Mr. Varick expects to remain for some time. The trip from England to Buenos Ayres will consume about three weeks. The steamer touches at Cherbourg, France, Vigo, Lisbon, Portugal, Pernambuco and Rio de Janeiro, Brazil and Montevideo, Uruguay. Mr. and Mrs. Varick hope to be back within six months.

The American Clock Co., Nos. 14 and 15 Tremont Row, Boston, elsewhere call the attention of bicycle manufacturers and Hardware dealers who handle bicycle scorchers, to the American Cyclometer, which is manufactured only by Wilson Bros., the famous jewelers of Boston. They show that it is easily read from the saddle, does not get out of order if run backward, and can be depended on. They will willingly supply further information upon application.



A. M. Scheffey & Co.

A. M. Scheffey & Co., No. 92 Reade Street, New York, are now sending out their 1896 catalogues, and also sam-



WYNNEWOOD, "M."

ples of their 1896 bicycles. The catalogue describes in detail all the points of the machines, which are materially

WYNNEWOOD, "L."

improved, while prices remain practically the same as last year. Only one model lists at $100—Model R—but this is

WYNNEWOOD, "B."

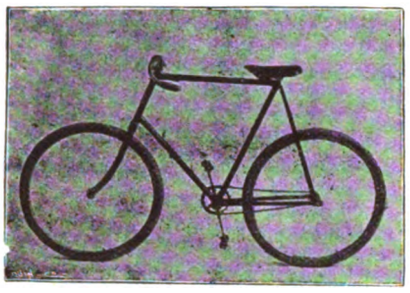
a beauty, elegantly finished and weighing about twenty-one pounds. Either M. & W. Quick Repair or the Hart-

WYNNEWOOD, "C."

ford Single Tube Tire is used. There is a choice of handle bar and gearing. Other models are here shown, and are:

Wynnewood M, weight 22 pounds. Price $75.
Wynnewood L, weight 24 pounds. Price $75.
Wynnewood B, weight 24 pounds. Price $60.
Wynnewood C, weight 25 pounds. Price $60.

Scheffey & Co. are booking large orders for Miller's Bicycle Lamps, for which they are sole United States agents. They have just accepted the sole United States agency for Brampton's English Saddles.



Ryan & Neefus, No. 75 Chambers Street, New York, have been appointed general agents for domestic and export markets for the sale of Peck's celebrated Axes, Hatchets, Mattocks, Adzes, etc. They will keep a full line of these goods in stock, and all orders will be filled promptly.

Rice Lewis & Son, Ltd., Toronto, Canada, have secured the sole control for Canada, of the United States Cyclometer, United States Odometer and the United States Detachable Lamp Bracket, manufactured by the United States Mfg. Co., of Fond du Lac, Wis.

The Andrae Cycle Works.

The Julius Andrae & Sons Co., makers of the Andrae cycles, with office at No. 225 West Water Street, Milwaukee, and works at the corner of Clinton and Florida Streets, are making a special push this year upon their line

of well-known and successful goods. We are permitted in this connection to present a cut of their great factory at Milwaukee, and illustration of one of their wheels. This company have grown rapidly, and been compelled to seek larger quarters because of the extension of business. They have recently moved into their new works, as herewith shown. This new factory has been arranged to suit their ideas, and to give room for all branches of building bicycles, on a much larger and more satisfactory basis. Large additions have been made to their equipment, and the best mechanics obtainable been engaged, and they feel that their facilities for the manufacture of Andrae cycles are first-class in every respect. They have prepared a handsome catalogue for 1896, which will soon be issued. They have been perfecting their system of agencies, and assure agents absolute protection in their assigned territory. They exhibited at stands 251–252 in the Chicago Cycle Show. Among their specialties for this year are the Andrae Light Roadster, Lady Andrae, Andrae Racer, Andrae Tandem combination frame and the Andrae Tandem diamond frame, some of which have been already described in these columns. In their preliminary announcement concerning their intentions for 1896 they speak as follows: "Ever pressing forward and maintaining a course of intelligent advancement, we are enabled to present an outline of what the '96 Andrae line will be like. As ever, there is but one grade of Andrae Bicycles. When you get that, you get the best that can be made. There is no substitute for it. There are no subaltern grades to bait the fancy of some

buyer who can't be quite convinced of the wisdom of the old saying, 'the best is the cheapest.' It is simply inviting disaster to deprive yourself of that which it is a real economy to possess. A bicycle cannot be cheap unless it is good. In making our announcement for 1896 it is with a great degree of satisfaction that we confess to you that we have exerted ourselves to the utmost and are ready to place before you specimens of cycle constructon which bear evidence of the high mechanical ingenuity, painstaking care and thought, that is liberally spent upon them."

For Family Use.

The Family Cobbler is an article that naturally interests the Hardware trade, as it is one that will come handy in any family that can be persuaded to make a trial of its use. This is a complete outfit of tools and materials for general family shoe repairing, and we are assured by the manufacturers, Brandenburg & Co., Chicago, that they have met with very great success in the introduction of this article; that during the past season, which was their first, they sold very freely all through the United States and also in Great Britain. They add that their principal distributers are "the jobbing Hardware houses; that those who took hold of them early in the season were frequent buyers during the entire remainder of the time; that even during the dry season orders have continued to come in far beyond their most sanguine expectations. They are confident that the general demand during the coming season will many times exceed that of the past, and that the jobbers generally acknowledging this probability, are making ample pro-

vision to promptly meet this increasing demand which is sure to result from their introduction thus far, and from the liberal advertising, they will continue, as in the past, to do."

They are also sole proprietors of the Bonanza Half Soles, which are especially adapted to the country merchant's trade. These, too, are being handled principally by the Hardware trade and with great success. Further particulars will be found on page 66 of this issue.

Six Art Studies.

The Sickels, Preston & Nutting Co., Davenport, Iowa, are remembering their friends with a handsome holiday present, and HARDWARE is happy in finding itself on that list. It is a handsome collection of pictures upon heavy paper, bound by a silken cord, and bearing the title "Six Art Studies in copper etchings, from recent paintings." The subjects are from the finest work that has been recently produced, and the work is artistic and attractive in the highest degree.

A. N. Lightfoot, dealer in wholesale Hardware, Opelika, Ala., died on December 24th. The business was established in 1870, and under Mr. Lightfoot's efficient management, has been carried on with no small degree of success. It will be continued as before.

M. C. Nicholson, who has been Southern agent for Landers, Frary & Clark for the last ten years, has accepted the Southern agency for Alfred Field & Co., No. 93 Chambers Street, New York, to travel especially in the interest of the Joseph Rodgers & Sons' goods.

The Detroit Stove Works, manufacturers of the Jewel stoves and ranges, with offices in Detroit, Chicago and Buffalo, are sending their friends a neat little pocket memorandum book for 1896, which is bound in morocco, and is a very convenient and handy article for the purpose named.

HARDWARE'S "Prices Current" are reliable.

Printed sheets, for insertion in the Catalogue, will be furnished upon application.

The Yost "Falcons" for 1896.

The four wheels shown in the accompanying illustrations are from the factory of the Yost Mfg. Co., Toledo, Ohio, and comprise their line of models for 1896. Model No. 9 is constructed of 1⅛ inch tubing, 20 and 22 gauge; the

head is 1¼ inches in diameter. Drop forge frame fittings, barrel hubs and barrel yoke are used. The tread is 4⅞ inches. The yoke is so arranged as to be dust proof, both in the inside and outside; the shaft being encircled with a tube which forms an oil well for lubricating the axle bearings. The hubs are fitted with recessed self-closing oilers, another distinctively Falcon improvement. The cranks and head bushings are finished with an 18-karat gold plate.

Model No. 12, the mate to No. 9, is constructed of 1⅛-inch tubing, has narrow tread, and, with the exception of the bowed frame, is practically the same as its companion. The mud and chain guards being finished in natural wood

color and laced in gold, give the wheel a very distinctive appearance.

Model No. 11, a medium-grade machine, has practically the same improvements as the other models, except that it is built of 1-inch tubing, and has a tread which is ¼ inch wider. The cranks and head bushings of this wheel are finished in nickel.

Model No. 10 is the companion wheel of No. 11; has a straight drop frame and is otherwise constructed in practically the same manner.

Big ball bearings (originated by the Yost Co.) are used throughout on their '96 line. The company does its own

drop forging, bending, machining and screwmaking, and, with the exception of saddles, tires, grips and balls, manufactures the wheels complete. Their machinery is of the latest improved patterns, much of it automatic, especially that which does the drilling of the drop forgings.

The special features which are being extensively advertised for the '96 trade are the new Falcon pedal, which is constructed in a neat yet simple manner, and is practically dust proof; the Falcon adjustable handle bar, which resembles the pedals in simplicity of construction, and is called the Micrometer, because of the fine adjustment which can be made upon it; the interchangeable sprockets, which are

attached by screwing on the crank and fastened with a lock nut on the inside.

All of these models, with their latest improvements, were exhibited at the Chicago Show, and will also be at the New York Show. These exhibits are in charge of J. A. Black. Messrs. I. M. Howk, G. W. Madison, F. W. Dewey and J. L. Yost will be in attendance, and they announce that they expect their customers to make their space, Nos. 1 and 2, at New York, headquarters.

The names Sunol, Hercules and Stella should have appeared in the list of names of bicycles under the caption of "What's In a Name?" in our last preceding issue. They are made by the McIntosh-Huntington Co., Cleveland, O.

Recent Trade Publications.

The Yale & Towne Mfg. Co. are issuing a handsome new descriptive catalogue of Chain Blocks, which contains, perhaps, more information on this subject than has yet appeared in print. It is illustrated by a series of cuts which show the various blocks manufactured by them, giving an immense amount of technical information in a manner that can be understood at a glance. A special page illustration is found on page 2, where there is an illustration of the relative efficiency of blocks, showing the relative workings of the rope tackle block, the Yale-Weston differential block, the Yale duplex convertible screw block and the Yale-Weston triplex spur gear block. In connection with these different blocks we quote from the publication as follows: "The Differential Block obtains its power through a differential sheave, and is the simplest and cheapest chain block in the world. It may be used under the worst conditions of dirt and exposure, and will always operate. The Duplex Block obtains its power through a worm wheel and screw, and its action is very smooth and easy. It requires good lubrication, but, as its mechanism is enclosed in an oil-tight box, it may be used under any ordinary conditions. It is especially adapted to foundry use. The Triplex Block obtains its power through a train of spur gearing, and hence has a higher mechanical efficiency than any other similar device ever invented. A man can do more work with it than with any other block, and do it more easily. Where the use is frequent and the conditions reasonable, this is the best, and ultimately the most economical, of all portable hoists." There are also a great many tables showing capacity in tons, prices, net weight in pounds, etc. Illustration and description is also given of the Yale-Weston double lift hoist. A number of pages are also devoted to sectional illustration of these blocks and other pages to the illustration of the various parts that enter into the construction thereof. Other matter of exceptional interest is found in this little work, and the company will be pleased to send the same to any one who may make application.

F. E. Myers & Bro., Ashland, Ohio, are sending out a novel calendar for 1896. The scene represented at the top is that of a brownie school. The master is hearing the lesson on the superiority of glass valves, as used in the Myers Pumps, and the children's slates are shown covered with drawings of pumps. The following is hung on the school-room wall: "How shall we get Pure Water and Sweet Hay?" Answer: "Use Myer's Pumps and Hay Tools, Cylinders, etc." Through the open window a pastoral scene is shown, in which a farm hand is filling a trough, with one of Myers' Pumps, for the cattle to drink from. The lower part of the calendar is filled with illustrations of the immense line of pumps, hay tools, cylinders etc., manufactured by the company.

"Our Silent Salesman." Under this caption Robert H. Ingersoll & Bro., No. 65 Cortlandt Street, New York, are sending out their fall announcement. The company say: "To our customers, past, present and prospective: It is with feelings of pleasure and satisfaction that we send you this book of specialties, and we think that it is worthy of your undivided attention. We therefore ask you to look it through carefully. We make but one claim regarding it and that claim is, that it represents the brightest, most unique and easiest selling collection of goods that this market has ever known. It is a matter of considerable pride with us, that, starting in business experience, we have gone steadily up the scale in both manufacturing and commercial lines until both our goods and our record are popularly known throughout this entire country as well as portions of the other nations of the world. We operate our manufacturing interests on the principle of either improving the quality or reducing the cost. An illustration of the success of our methods in this line may be seen, for instance, in Ingersoll's guaranteed American watches, of which our product for the past two years has been an average of over 1000 watches per day. We make a specialty of handling not only the most popular selling lines of goods, but selecting the leaders from these lines, and buying very heavy quantities thereby getting special prices which enable us in turn to give special prices." The catalogue illustrates a host of articles manufactured and handled by the firm, which include harness snaps, key chains, dog chains and collars, sporting goods, call bells, pocket knives, shears, watches, banks, match safes, microscopes, watches, drawing instruments, clocks, table ware, household specialties, ticket punchers, plyers, electric motors, etc., etc.

"Hints on What we Manufacture in Graphite," is the title of a handsome little monograph just received from the Joseph Dixon Crucible Co., Jersey City, N. J. The front cover is illustrated with a medallion of Joseph Dixon, the founder of these great works, and a specimen of the American graphite pencils, etc., while the back leaf gives a bird's-eye view of their works and general offices in Jersey City. Among the articles enumerated and described in this little leaflet are graphite, stove polish, lead pencils, graphite paint, lubricating graphite, graphite grease, graphite cup grease, graphite axle grease, graphite pipe-joint grease, Dixon's plumbago or black lead crucibles, India silver lead or plumbago facings, Dixon's ingot-mold wash, lumber and metal crayons, electrotypers' graphite and graphite for electrical use. Anyone interested in any of these lines will do well to send for this little pamphlet, in which will be found a great deal of valuable information.

The Syracuse Cycle Co., Syracuse, N. Y., are distributing among friends and patrons, with the compliments of the season, a handsome and useful calendar for 1896. In the centre is represented the wheel of a bicycle, provided with a pneumatic tire, and showing the famous "Crimson Rim." The wires are broken away and in the middle of the wheel appear the mammoth works of the company at Syracuse. In opposite corners are a fair cyclist and wheelman, both provided with Syracuse wheels. They are shown saluting each other with handkerchief and cap, the fact that they both ride Sycamores being a sufficient excuse for scraping an acquaintance. The Syracuse "Spin to Win." The dates appear on a yellow background.

We have recently received the 1895–'96 catalogue of the Star Mfg. Co., Canton, Ohio. The company say: "In order to convey to the trade a correct idea of the variety of goods manufactured by us, we have carefully illustrated this pamphlet with exact cuts of our patented specialties from which orders can be given understandingly. In order to meet the increasing demand for our goods, we have been obliged to gradually enlarge our plant to its present capacity, and are now in position to fill all orders without delay. In addition to the articles herein catalogued, we are prepared to estimate on and manufacture specialties to any extent and variety." The articles manufactured by the company include oil cans, force pumps, kitchen knives, bread knives, pruning knives, post-hole diggers, etc., etc.

Patterson, Gottfried & Hunter, Nos. 146–150 Center Street, New York, are sending their friends a little leaflet that has a practical value to the receiver, as it contains a paper of pins, and a package of court plaster with which to bind up the financial wounds of the past year: also a reminder that the firm handle blowers, forges, brass goods, twist drills, etc.

The Sweatt Mfg. Co., Minneapolis, Minn., have issued a neat and artistic catalogue of their wheelbarrows, washing machines, barrel carts, factory trucks, hose reels, mortar hods, brick hods and Hubbard's patent steel wheel.

THE NEW YORK CYCLE SHOW.

The Third Annual Exhibition of Cycles, Cycle Accessories and Sundries, held under the auspices of the National Board of Trade of Cycle Manufacturers at Madison Square Garden, will open on January 18th and continue till January 25th. As the time is rapidly drawing near, it is fitting that we should give a brief synopsis of the same.

The trade have engaged space at the Garden when it was possible, and at hotels near by when they could not be accommodated. Most of the concerns have been getting their exhibits in time to make the New York Show the finest of its kind ever held, and it is expected that many novelties and improvements will be sprung on an anxiously waiting public. It is thought that as many as 200 firms will be represented in the Garden, and many others in the nearby hotels. We predict a unparallelled success for the show.

MANUFACTURERS & MERCHANTS WAREHOUSE CO.

The Manufacturers & Merchants Warehouse Co., Chicago, will be at space No. 286, and show a limited line of chains, pedals, saddles, tubing, forksides, wood rims, dress guards, forgings machined and rough, castings machined and rough, stampings of various descriptions; and a more complete line will be carried in some hotel near by.

KENWOOD BICYCLE MFG. CO.

The Kenwood Bicycle Mfg. Co., Chicago, have secured space No. 24, and will have on exhibition seven patterns of Kenwood wheels—one light racer; one road machine, black; one road machine, maroon; one racer, with silver finish; one ladies' wheel, white, with gold trimmings; one ladies' drop frame, maroon, and one ladies' curved frame, black. The exhibit will be in charge of Mr. Isaac Reynolds, president of the company, and Mr. C. G. Jones.

HARTFORD RUBBER WORKS.

The Hartford Rubber Works, Hartford, Conn., will occupy spaces Nos. 223 and 224, and will exhibit a full line of the Hartford single tube tires, which are as follows: No. 80, the standard fast road tire; No. 77, the tire for all around use; No. 70, the tire for rough service; No. 75, standard racing tire. The exhibit will be in charge of Lewis D. Parker, treasurer of the company, assisted by E. H. Brandt, manager at the New York office at No. 100 Chambers Street.

AMES & FROST.

The Ames & Frost Co., Chicago, will be at space No. 104, and will exhibit a full line of Imperials, consisting of four models: Gentlemen's road wheel and ladies' road wheel, listing at $100; gentlemen's light road wheel and racer, listing at $110.

ROGER B. MCMULLEN & CO.

Roger B. McMullen & Co., Chicago and New York, will exhibit samples of the goods of the Union Drop Forge Co., Garford Mfg. Co., Indianapolis Chain & Stamping Co., C. J. Smith & Sons Co., Hunt Mfg. Co., and the Diamond Rubber Co., for whom they are general United States sales agents.

JOHN P. LOVELL ARMS CO.

The John P. Lovell Arms Co., Boston, Mass., spaces Nos. 157 to 159, will show their line of wheels as follows: Lovell Diamond, light roadster; Lovell Diamond, ladies'; Lovell Diamond, frame tandem; Lovell Special, men's; Lovell Special, ladies'; Lovell Excel, men's; Lovell Excel, ladies'. These wheels are up to date, and have the latest improvements, such as barrel hubs, large tubing, black enamel, weights 18½ to 26 lbs., Fairbank's laminated wood rims and Old's single piece rims. They will also show the new Lovell adjustable handle bar. Owing to its construction, it can be adjusted to any height desired by the rider, and, at the same time, keep the grips in a natural position. The Lovell company will give, as a souvenir, a small diamond-shaped pin, which is very attractive. The exhibit will be in charge of D. R. Harvey. Col. Benj. S. Lovell and Mr. J. C. Speirs will be on hand during the show.

FOX MACHINE CO.

The Fox Machine Co., Grand Rapids, Mich., will exhibit four models of men's wheels, two of ladies' wheels, beside their exhibit of special machinery for bicycle makers. In the model "E" top grade machine, the Fox tapering seat post mast is one of the striking features. All of the Fox wheels will be fitted with the Fox patent tubular hubs and with the Fox patent track plate nipple washers, which prevent the spokes from settling into the rim, throwing the wheel out of true after being in use a few days. The other machines will have these improvements, each one being different from the other models in minor details. An interesting part of the exhibit will be the special bicycle machinery. The Fox tube cutter, rim drill, Fox brazing forge, ball cup press, washer press and several smaller tools will be especially attractive.

EXCELSIOR SUPPLY CO.

The Excelsior Supply Co., Chicago, Ill., will show: 2 Thistle, regular roadster, weight 21½ lbs.; 1 Thistle, light roadster, weight 19 lbs.; 1 Thistle, racer, weight 15½ lbs.; 2 Thistle, ladies', weight 21½ lbs.; 1 each, full gentlemen's, and ladies' and gentlemen's tandems. Also full lists of parts, etc.

WHITEHEAD & HOAG CO.

The Whitehead & Hoag Co., Newark, N. J., will be at space No. 273, and will exhibit celluloid bicycle name plates, advertising buttons and novelties, race meet badges and souvenirs, and badges, banners and flags etc.

CUSHMAN & DENISON.

Cushman & Denison, No. 172 Ninth Avenue, New York, will be at Space No. 229. Their space will be handsomely lined with crimson plush which will make an attractive background for the nickeled sundries they manufacture.

They will make a special feature or their '96 model of the "Perfect" Pocket Oiler which is well known to riders. This firm make a specialty of oilers and are counted the largest manufacturers in that line in the world. Their "Perfect" Pocket Oiler is made for high grade wheels, while their "Star" Oiler is designed for use with medium grade or cheaper wheels. The company own a patent for a new bicycle wrench, acting, they remark, on a different principle from any now in the market. This wrench will be a real novelty and will be shown at the Cycle Show provided they can be manufactured in time. Mr. Joseph W. Cushman and Mr. Robert G. Grunert will be in charge.

ANGLO-AMERICAN CYCLE FITTINGS CO.

The Anglo-American Cycle Fittings Co., Nos. 105-107 Chambers Street, New York, with works at Waterbury, Conn., will exhibit at the New York Cycle Show, at stands Nos. 239 and 240, an absolutely complete line of parts and fittings used in cycle construction of highest grade and new models presenting some extremely novel features. These goods will be shown in both finished and unfinished condition, and will embrace a novelty in the line of barrel hubs, turned from the solid bar on automatic machinery, being absolutely dust proof, ¼ balls, 3 point bearings. New model ball steering heads, dust proof barrel bottom brackets with detachable sprocket wheels and "inflexible" cranks; rear forkends, seat lugs, "Ideal" adjustable han-

Digitized by Google

dle bars. "Anglo" single piece and Boston laminated wood rims. A complete line of sundries, such as bells, lamp brackets, trouser guards, toe clips, the product of Bevin Bros. Mfg. Co., for whom this company are agents. The well-known "Goodstuff" cements for cementing tires to rims as well as for tire repairs. Novel "Corkene" grips with multi-colored ferrules, composition, as well as celluloid. New pattern lubricators for barrel hubs and bottom brackets. Weldless and brazed forksides. Morgan & Wright tires. Brookes' and American saddles. "Anglo" seamless barrel oilers. Pumps, oilets, etc. Furthermore, there will be exhibited 1896 model frames built up from the foregoing parts, complete enameled and plated, as well as new model tandem frames, both Double Diamond and Combination pattern. The exhibit will be in charge of Messrs. J. Friedenstein, C. Murray Rice, Walter M. Towne, A. G. Ceely and G. Hees. There will also be in attendance Messrs. Geo. D. Boles and G. Haines of the Boston office, and Mr. R. C. Stevens of the Philadelphia office.

HUNTER ARMS CO.

The Hunter Arms Co., Fulton, N. Y., will be seen at spaces Nos. 50 and 51, where they will show 2 models A, 2 models B, 2 models C, 1 model D, and 1 tandem. The frames of their wheels are made of Crown steel tubing.

ARNOLD SWINN & CO.

Arnold Swinn & Co., Chicago, will display fourteen machines of seven models highly finished. These wheels are made with inside connections and flush joints.

ALLERTON LUBRICANT CO.

The Allerton Lubricant Co., No. 710 Old Colony B'ld'g., Chicago, Ill., will display the Allerton chain compound. The merits of this preparation are well known. It is a high grade lubricant and it is said to keep the chain bright as well as lubricated; that it will not soil the hands, and will not collect dust and dirt. There will be no special features but simply a display showing the goods. The company will make an effort to continue their acquaintance with the trade.

TIE CO.

The Tie Co., Unadilla, N. Y., will be at space No. 244, and will show a line of their novelties, including Holdfast luggage carriers, trouser guards, bicycle hangers, and cyclists road machines, etc.

INDIANA BICYCLE CO.

The Indiana Bicycle Co., Indianapolis, Ind., will display a full line of Waverley bicycles and parts, including their '96 line, which will consist of five machines, viz.: Three scorchers with 23, 25 and 27 inch frames respectively, and the Waverley Belle with 21 inch wheels and 23 inch frame. The list price of all of these is $85. In addition to those mentioned, the Waverley Belle with 26 inch wheels and 21 inch frame at $75 will be shown.

ZENITH CYCLE CO.

The Zenith Cycle Co., Nos. 36 to 42 Commercial Avenue, Binghamton, N. Y., will be located at space No. 30, and will show the Zenith models, 22, 24, 26, ladies' drop frame, ladies' rational, Zenith tandem and Zenith racer. These wheels have tool steel dust proof bearings, easy detachable cranks, large barrel hubs and large balls, reversible handle bar, which can be changed from a high to a low drop readily.

CRAWFORD MFG. CO.

The Crawford Mfg. Co., Hagerstown, Md., will be found at space Nos. 44, 45 and 46, and will exhibit models Nos. 23, 24, 25, 26, 27, 28, 29 and 30.

ST. LOUIS REFRIGERATOR & WOODEN GUTTER CO.

The St. Louis Refrigerator & Wooden Gutter Co., St. Louis, Mo., will show one of their standard pattern 23, 25 and 27 inch framed gentlemen's Lu-Mi-Num, one 21 inch diamond frame ladies' Lu-Mi-Num, one drop frame ladies' Lu-Mi-Num, one each men's and ladies' Lu-Mi-Num, as made for the European market, together with a comprehensible display of specimen parts and fittings illustrated to show the special and peculiar process of manufacture.

GORMULLY & JEFFERY MFG. CO.

The Gormully & Jeffery Mfg. Co., Chicago, Ill., will exhibit Rambler's models No. 15, 16, 17, 18, F. G. & H. Also combination tenders No. 2, men's tandem No. 2, and racing tandem No. 2.

INDIANA NOVELTY MFG. CO.

The Indiana Novelty Mfg. Co., Plymouth, Ind., will exhibit samples of the various styles of wood rims made by them. Also samples of wood mud guards and chain guards, which are drilled and eyeleted for lacing. They may also have some novelties pertaining to the cycle trade to bring out at that time.

WHITE SEWING MACHINE CO.

The White Sewing Machine Co., Nos. 124 to 126 Euclid Avenue, Cleveland, Ohio, will show a line of samples consisting of four wheels. The inability of the company to secure sufficient space will necessarily curtail the size of the exhibit.

QUEEN CITY CYCLE CO.

The Queen City Cycle Co., Buffalo, N. Y., will exhibit their '96 style of wheels, and will show three or four wheels in regular stock finish. J. H. Isham, president of the company, will be in charge.

ARLINGTON U. BETTS & CO.

Arlington U. Betts & Co., Toledo, Ohio, will occupy space No. 263, and will have on hand a complete line of Red Cross cements and sundries.

NEW DEPARTURE BELL CO.

The New Departure Bell Co., Bristol, Conn., for whom John H. Graham & Co., No. 113 Chambers Street, New York, are sole selling agents, will be found at spaces Nos. 246 and 247, and will exhibit in many different ways sixteen different styles of bells, new cyclometer and corrugated cycle guards, which are new for the season of '96. They will also show a full line of Lucas lamps, for which the company are the United States agents. The trimmings for the exhibit are in three colors: white, yellow and green. At the back of exhibit is to hang a large sign made out of bell gongs and fastened to background, covered with green velvet. This sign with drapings of yellow and white and white satin ribbon will make a most attractive stand. In the center of exhibit will be shown a large stand made of bell metal, bronze finish, which will consist of a bicycle fork and wheel and two handle bars. On the bicycle wheel will be two cyclometers placed, one on each side of the wheel, in such a manner, that the observer will note the advantage of New Departure Clyclometers, inasmuch as they will register correctly if placed on either side of the wheel. On the two handle bars a full line of bells will be exhibited. The company have had special rods made to attach to the railing which surrounds the exhibit, and on these rods will also exhibit bells. They will have on hand a number of show stands which will be distributed to the trade the coming season. The remainder of the show will consist of a large stock of bells, lamps, cyclometers and other things, to give the space a pretty as well as business-like appearance.

ELASTIC TIP CO.

The Elastic Tip Co., Boston, Mass., will exhibit at spaces Nos. 236, 237 and 238 a full line of bicycle material, Hardware and sundries, including goods of the following concerns, for whom the company are agents: Indianapolis Chain & Stamping Co., cycle chains; Snell Cycle Fittings Co., drop forgings, frames, forksides machined bicycle parts, lamps, etc.; Indiana Novelty Mfg. Co., wood rims and wood guards; Shelby Steel Tube Co., weldless steel tube; Butler & Ward, saddles and parts; Morgan & Wright, tubes, tires, and parts; Hartford Rubber Works Co., hose-

Digitized by Google

pipe tires and kits: Barnes Tool Co., wrenches; W. S. Card Mfg. Co., taps and dies; Lavigne & Scott Mfg. Co., wrenches; Scovill Mfg. Co., brass goods; Bonsilate Box Co., corkaline handles; Andrew Morton, cork grips; Excelsior Needle Co., spokes and nipples. They will also exhibit goods of their own manufacture, as repair kits of every description, cements, etc.

WINTON BICYCLE CO.

The Winton Bicycle Co., Cleveland, Ohio, will exhibit at space No. 38. The display will consist of the following 1896 models: 1 model 17-24 inch frame, road wheel, in black: 1 model 17-24 inch frame, road wheel, in wine color with gold striping; 1 model 17-26 inch frame, road wheel, in black; 1 model 18-24 inch frame, racer, in black; 1 model 19-20 frame, ladies', in black; 1 model 20 inch men's tandem, in red, and 1 model 21 inch combination tandem, in black.

DAVIS & STEVENS MFG. CO.

The Davis & Stevens Mfg. Co., Seneca Falls, N. Y., will be found at space No. 227, and will show a complete assortment of their well-known Cyclone and Tornado pneumatic pumps. The exhibit will be under the charge of F. N. Stevens, treasurer of the company, assisted by traveling salesmen.

BUTLER & WARD.

Butler & Ward, Nos. 226 and 228 Halsey Street, Newark, N. J., will occupy space No 189, and will exhibit 24 models, including clips, direct posts and saddles. Among the saddles will be seen the Empress and ladies reform saddle. Eugene Ward and G. F. Anderson will be in attendance during the show.

TRENTON WATCH CO.

The Trenton Watch Co., Trenton, N. J., will be located at space No. 191, and will exhibit three models of aluminum cyclometers. These cyclometers have been expressly prepared for the '96 trade. Model A will register 1,000 miles and repeat, weighs 2¼ oz. Model B is similar except that it will register 10,000 miles and repeat. Model C is very small and light, weighs about 1¼ oz., and registers 10,000 miles and repeats.

W. W. WHITTEN CYCLE MFG. CO.

The W. W. Whitten Cycle Mfg. Co., Nos. 148 to 156 South Main Street, Providence, R. I., will be located at space No. 31, and will exhibit four models of Whitten bicycles. A full roadster weighing 23 lbs., and listed at $75, a light roadster weighing 22 lbs., and listed at $100, a racer weighing 18 lbs., also listed at $100, and the Whitten tandem, a road machine weighing about 40 lbs. All these models will be of the highest grade, embracing all new and up to date improvements. Will also exhibit component parts of these bicycles, which the company supply to the general trade, including Barrel hubs, heads, brackets and machined forgings. Will also exhibit Lord wood rims and Vulcan chain, which the company manufacture and supply to the trade.

J. J. WARREN CO.

J. J. Warren Co., Worcester, Mass., will occupy space No. 216, and will display a complete line of bicyle tool bags, saddle leathers, patent luggage carriers, bicycle belts and such goods. The exhibit will be under the care of Wm. H. Hayden and B. Elliott.

KEATING WHEEL CO.

The Keating Wheel Co., Holyoke, Mass., will be found at spaces Nos. 205 and 206, and will show a line of gent's high grade machines as follows: Model "22," 22½ inch frame, weight 19 lbs., price $100; Model "24," 24½ inch frame, weight 19 lbs., price $100; Model "26," 26 inch frame, weight 19 lbs., price $100; Model "21," ladies' machine, weight 20 lbs., price $100. The decoration of the stand will be as follows: On the rear wall, upper portion, an electric sign will be placed the whole length of spaces, "Keating Wheel Co." Below this sign an immense handsome gilt frame 7 feet in length, and 4 feet in width, will be hung, in which is shown an enameled and nickeled Keating bicycle backed with dark colored plush, and lighted with electric lamps. On each side of the large frame smaller frames are to be fitted up after the same pattern, showing the various parts of the Keating machines. The whole booth will be handsomely decorated with potted plants of various kinds, palms and trailing vines.

WALTHAM MFG. CO.

The Waltham Mfg. Co., No. 240 Broadway, New York, will occupy spaces Nos. 234 and 235, and will exhibit eight models of Orients and Saracens, ladies' and men's. The special features of these wheels will be as follows: Height of frames, men's 25 and 27 inches; gears, all sizes; features of hubs, barrel; length of cranks, 6½ and 6 inches; specialty of sprocket, detachable; rims, laminated; tread, 4¼; tire equipment, 4 leading tires; steering head, according to length; saddles, Sager and Gilliam; handle bar, universal of frame; finish standard; pedals adjustable to width of foot, standard pattern; weight, according to pattern. The decorations of the space occupied by the company will be in the Oriental style. J. S. Holmes, Jr., A. Stamforth, M. G. Peole, M. W. Evans, C. A. Allen and others will be in attendance during the show.

ECLIPSE BICYCLE CO.

The Eclipse Bicycle Co., Elmira, N. Y., will occupy spaces Nos. 6 and 7, and will show ten wheels and two tendems, together with an elaborate display of emerald green in signs, draperies, etc. The exhibit will be in charge of G. W. Houk, assisted by W. J. Walker and H. E. Walker. They will also show the Eclipse electric lamp, which is controlled by the Eclipse Bicycle Co.

PORTER & GILMOUR.

Porter & Gilmour, No. 16 Warren Street, New York, have engaged spaces Nos. 33, 34, 35, and will exhibit a full line of Sagamores, Vikings, and Halladays, three single bicycles and one tandem of each make. Will also show several novelties, and will distribute some of the handsomest souvenirs at the show.

E. K. TRYON, JR. & CO.

E. K. Tryon, Jr. & Co., Philadelphia, Pa. The company inform us that they have no space at the New York show, but hope to secure quarters near by in which they will show the Apollo wheel, a pioneer high grade wheel, at $75; also the Vesper in ladies' and gentlemen's, at $50 list. The company will also show a line of juvenile wheels, the Fairy girls' wheel, 24 and 26 inches, and Cycloe boys' in same sizes. List: 24 inch wheels, $45; 26 inch, $50.

REED & CURTIS MACHINE SCREW CO.

The Reed & Curtis Machine Screw Co., Worcester, Mass., will have their headquarters at space No. 192, and will display a full line of Curtis' pedals, a No. 1 oil extractor, and a large oil extractor of new design.

SNYDER & FISHER.

Snyder & Fisher, Little Falls, N. Y., will be at space No. 266, and will show three complete machines. One gentleman's finished in maroon, one gentleman's finished in regular jet black, and one lady's model also finished in black. The company's patent adjustable handle bar and anti-friction brake. They will also exhibit machine in parts complete, showing the rough material finished ready for putting together.

O. J. FAXON & CO.

O. J. Faxon & Co., Nos. 3, 5 and 7 Appleton Street, Boston, Mass., will be at space No. 99, and will show: Two men's Puritan wheels, racing wheel and road wheel; one lady's wheel, full nickeled with special extension rattan dress and chain guards; one each of two styles of tandems, combination and double diamond. Also two models of new medium grade light Hector, one lady's and one gentle-

Digitized by Google

man's. These last list at $75. The Puritan at $100. The exhibition will be in charge of G. H. Faxon, assisted by H. M. Gordon, G. C. Bartow, R. F. M. Andrews and Fred Coningsby.

BARNES CYCLE CO.

The Barnes Cycle Co., Syracuse, N. Y., will occupy spaces Nos. 8, 9 and 10. The decoration throughout will be white as nearly as possible, including white carpet and one-half dozen white bear skin rugs. Along the back of the exhibit will be a sign in white and gold, "The Barnes Cycle Co.," the length being 27 feet, and width 30 inches. In addition to this, in the center will be a circular electric sign with "Barnes Cycles" spelled out with 100 white globes, a bicycle wheel in the center, from the hub of which will revolve rapidly two rows of purple electric lights, making a colored border on either side of the main portion of the sign. The railings around the exhibit will be enameled white; the company will show six models, four of them being white enamel and two black, as follows: one tandem, one white flyer, one racer and special in white, also a special and ladies' Superba in black with white rims. Messrs. Arthur R. Peck, C. A. Benjamin, M. T. Faulkner, A. W. Scoville, F. S. Parmelee and W. R. Darrah will be in attendance during the show.

BLACK MFG. CO.

The Black Mfg. Co., Erie, Pa., will exhibit seven models as follows: Model 27, model 25, model 24; tandem, model 23; tandem, model 22; racer, model 21. Special features are as follows: Height of frames, 21½, 24 and 26½ inches; hubs, large diameter, made from bar steel; sprockets, all cut with cycloidal teeth; steering head, 9¾ inches in models 24 and 27, 12 inches in model 26; tread. 4⅞ inches; handle bars, adjustable by new method; can be set in any position by the rider without dismounting; pedals, special new pattern, made for Tribune wheels only, thoroughly dust proof; gears, standard 68 and 72, options from 60 to 80; length of cranks 6, 6½ and 7 inches; rims, one piece hickory or elm, highly finished in natural color; tires, standard M. & W. quick repair; options Hartford and Dunlop; saddles, Sager, finished in black; weights, standard road wheels 22½ to 23½, racer 19 lbs., tandems 40 lbs. The special feature of this exhibit will be a standard Tribune, model 27, highly decorated with pearl and gold. This machine was finished expressly for exhibition purposes, the pearl work being inlaid piece by piece by hand, taking several months time of a skilled decorator, and is considered one of the finest pieces of ornamental work that has been produced on a bicycle. This machine, as it stands, is valued at $1,000. L. B. Gaylor, vice president of the company, W. R. Black, and W. C. Beers will be in attendance.

YOST MFG. CO.

The exhibit to be made by the Yost Mfg. Co., Toledo, Ohio, will be found described and illustrated uuder another heading in this issue.

PEERLESS MFG. CO.

The Peerless Mfg. Co., Cleveland, Ohio, will occupy spaces Nos. 73, 74, 75 and 76. H. Lindley Crowther, H. Crowther, vice president and general manager, David J. Post, secretary, and Messrs. Turrell, Anderson and Ely will be in charge of the exhibits. The machines exhibited will be Peerless special, men's and ladies', a Peerless Bluebird racer, all listing at $125, and all built of nickel and Peerless special tubing, drawn especially for the Peerless Mfg. Co., Peerless roadster, light roadster and ladies', $100. The Peerless specials are in handsomely polished black, with rich carmine striping; the Peerless Bluebird racing wheels are in their well-known blue, richly striped, while the regular Peerless $100 line is plain polished black. The weights of the machines are: Men's special, 20 lbs.; ladies' special, 22 lbs.; racer, 18 lbs; light roadster, 21 lbs., and full roadster, 23 lbs. Three handsome tandems are shown, two of them the Peerless men's and ladies', and third the Triumph tandem. The company claim unusual easy running qualities for their wheels, and will illustrate this by a bicycle driven by a single thread, run by a small toy motor.

HULBERT BROS. & CO.

The New York exhibit of Hulbert Bros. & Co. will be unique in the extreme and will contain many novelties of interest. They are to show a full line of their '96 model Majestics. Men's designs in 22, 24 and 26-inch frames and women's designs in 22-inch loop frame and 22-inch diamond frame; all having 28-inch wheels. The feature of their Majestics, '96, are 1⅛-inch tubing and ¾ back stays, adjustable handle bars, large barrel hubs, detachable front and rear sprockets, front sprocket nickel-plated, reversible chain, double fork crown, six gears, very best material and highest possible finish. The Teutonic, Messrs. Hulbert Bros. & Co.'s Juvenile line of 24 and 26-inch wheels will also be shown by these samples. A 24-inch girl's frame, a 24-inch boy's frame, list $40 each, and a 26-inch girl's frame, list $50. These little wheels are veritable beauties, being made of large tubing, large hubs, ball bearing, and are made just as carefully as a high grade man's mount. They also show a pneumatic brake which is sure to have a large sale owing to the fact that it is light, the entire attachment weighing but one-half a pound, and it is very effective. As the bearing surface is rubber, it does not wear the tire, and the pressure can be absolutely regulated to an ounce by the rider. It is simple and neat in appearance. They will also show their Mesinger saddles mounted on home trainers, so that all can mount them and prove for themselves how hygienic, comfortable, cool and healthful this saddle is. The decorations are to be simple but effective. Four ordinary spaces are occupied, the floors of which are to be covered with Oriental rugs. Separating the back of their space from the adjoining space will be a partition four feet high covered with large American flags, the white stars of which are in keeping with the Star, the emblem they have always had for their Majestic bicycles. Three feet above this four-foot partition will be left open to comply with the regulations, and then comes a glass sign twenty feet long, illuminating from the front in glaring brilliancy the words "Majestic Bicycles, fitted with Mesinger Saddles, manufactured by Hulbert Bros. & Co., New York." On one side of this sign will be seen a Mesinger saddle three feet high, and on the other side a large name-plate of the Majestic three feet high. A continuous line of Mesinger saddles will surround the exhibit just inside the railing four feet from the ground. Desk, chairs, table and clothes trees are to be set around in convenient places.

JOHN MCCLAVE & SONS.

John McClave & Sons, Nos. 602 to 606 West Twenty-second Street, New York, will exhibit '96 Colonial models as follows: One combination tandem weighing 38 pounds, black enameled, with special patented lug, nickel-plated on copper, tread 5-inch, with chain guard and detachable brake. One gentlemen's tandem weighing 36 pounds, fitted with 2-inch Palmer tires. This will be a double steering regulation tandem, full nickeled front forks, reinforced by the company's process; wheel base 62 inches. One Colonial racer, 25-inch frame, full nickeled, fitted with Vim racing tires and best piano wire spokes; tread 4½ inches; 3-16-inch chain, rams-horn handle bar. One Colonial racer, 25-inch frame, black enameled and nickel-plated lugs, and fitted with rams-horn handle bar; weight 17 pounds. One gentlemen's full roadster, 21-inch, fitted with upraised handle bar and brake; weight 24 pounds. One gentlemen's 23-inch light roadster, full nickeled, weight 22 pounds. One Colonial Dame, 23-inch full roadster, fitted with brake, chain, mud guards and upraised handle bar and nickel-plated lugs; weight 24 pounds. One Colonial Dame, 20-inch light

Digitized by Google

roadster, without brake and mud guards, fully nickeled and fitted with 26-inch tires. One gentlemen's light roadster, 23-inch, black enameled, with nickel-plated lugs and without brakes; weight 22 pounds. One gentlemen's full roadster, fitted with upraised bar and brake; weight 24 pounds; finished black enameled, with nickel-plated lugs. One girls' wheel, fitted with 20-inch wheels, upraised handle bar and brake; and one boys' wheel, fitted with 20-inch wheels, upraired handle bar and brake.

REMINGTON ARMS CO.

The Remington Arms Co., Ilion, N. Y., will exhibit a full line of new models as follows: Model 20, Remington light roadster, frame heights 22, 24 and 26 inches; model 21, Remington ladies', frame heights 21 to 23 inches; model 22, Remington racer, frame heights 22 to 24 inches; model 23, Remington ladies' diamond frame; model 24, Remington tandem, diamond frame; model 25, Remington tandem, combination frame; model 26, the "Ilion" boys'; model 27, the "Ilion" girls'. They will also have a number of display parts, showing the simplicity and strength of construction of the wheels. The colors of the decoration of the booths will be pink and light green. A handsome oil painting by the celebrated New York artist, Mr. Wm. Merritt Post, will enrich the centre of the sign. The subject of the painting will be a cyclist racing a train, which is a reproduction of the company's well-known advertisement of "Remington to the front." The exhibit will be in charge of Manager F. J. Reville, who will be assisted by Wm. M. Haradon, and the following traveling men: W. A. Shepard, Jr., Walter B. Lewis, H. T. Dekker, Harry C. Smith, Walter H. Ellis.

WILLIAM READ & SONS.

William Read & Sons, No. 107 Washington Steet, Boston, Mass., will show at space No. 112 the "New Mail" high grade. The '96 pattern is mentioned as being unsurpassed by any high grade wheel in the market, having all the latest improvements and is an unusually handsome wheel. They also show a full line of medium grades in 28-inch, men's, ladies' and juveniles' sizes of the Featherstone make.

WILSON BROS.

The products of the American Clock Co. and the Rogers' saddles will be exhibited by Wilson Bros., Boston, Mass., who are the selling agents for the above named companies. The exhibit will be under the direction of Chas. W. Holden and George F. Patterson.

SCHLUETER CYCLE MFG. CO.

The Schlueter Cycle Mfg. Co., Cincinnati, Ohio, will exhibit a full line of Norwood bicycles, including Norwood roadster, racer, special light roadster, and lady's bicycle.

CENTRAL CYCLE MFG. CO.

The Central Cycle Mfg. Co., Indianapolis, Ind., will occupy spaces Nos. 147, 148 and 150, and will show four regular models, $85 and $100 wheels, and two tandems finished in black and dark green.

A. M. SCHEFFEY & CO.

Descriptions and illustrations of the bicycles manufactured by this company appear elsewhere in our columns.

AUTOMATIC CYCLE SEAT CO.

The Automatic Cycle Seat Co., Grand Rapids, Mich., will exhibit saddles built on the automatic principle that the company have patented. The automatic principle is too well known to need description here.

H. A. LOZIER & CO.

H. A. Lozier & Co., Cleveland, Ohio. The exhibit of this company shows a complete line of 1896 styles, eight in all, all of large tubing (1¼ and 1⅛-inch). The tandems are graceful and are shown in two styles, one for men and the other combination for gentlemen and ladies. The No. 22 swell special single wheel is of similar lines to that of 1895, large tube; the same can be said of the ladies' wheel, No. 23, and the racer, No. 24. The latter style is convertible into a light roadster by change of tires and handle bars. Among the features that are new in the Cleveland wheel are the wood handle bars. The new pedal on the Cleveland for 1896 is neat and high grade in every respect; great care has been taken in its construction. The center piece or barrel is turned out of bar steel and is free from joints. The sides are formed of one piece, which overlaps on the inner end of the pedal and is firmly fastened by two screws and the locking cone. There are also improvements in the bearings.

SEYFANG & PRENTISS.

Seyfang & Prentiss, Buffalo, N. Y., will show five models, Nos. 9, 10, 11, 12 and 13. The following are the specifications of model 9: Frame 26 inches high, 1⅛ tubing; head 10¼ inches high, 1¼ tubing; ¾ lower rear brace tapered to ⅝; ⅝ upper rear brace; drop forgings on all connections, hubs, barrel pattern with removable cases, ½ balls in front wheel, 5-16 in rear wheel and crank bracket: cranks 6½ inches, 5-inch tread, detachable front and rear sprocket; bearings turned from solid bar Tool-steel, carefully hardened and ground; wheels 28 inches; swaged tangent spokes 28 in front wheel, 36 in rear; patent laminated wood-rims; wheel base 44 inches. The Bisons models 9 and 10 will be fitted with the celebrated Perry Humber chains. Options: M. & W. inner tube, Vim or Hartford single tube tires; Brown or Sager saddle, Janney or Union pedals, T. or direct post; handle bars Nos. 1, 2, 3 or adjustable. The company are using new and improved cranks on models 9 and 10, both cranks and shaft being forged in one continuous piece, which does away with the ever annoying loose cranks and objectionable Cotter pins, and it is so constructed that it will pass through a solid forged bracket, and the cups and cones will pass over the cranks into their proper places. The cups will have ball retainers. Model No. 10 will have the same construction but with a lower frame. The ladies' wheel will be known as model No. 11. In it is embodied the many features necessary for a strictly high grade wheel, and within the reach of all at a reasonable price, and is a strong, easy running wheel. With the increased demand for a medium grade wheel the company have decided to build a strictly up-to-date wheel to list at $75, which has been named the Stag, models 12 and 13, and which will be manufactured in two models, a 24 and 25-inch diamond frame with 1⅛ tubing in frame, barrel hubs and large bracket and fitted with a new and improved keyless crank. Fitted with M. & W. or Vim tires, Snell saddle, and Indianapolis chain.

SCHOVERLING, DALY & GALES.

Schoverling, Daly & Gales, No. 302 Broadway, New York, will occupy stands Nos. 100 and 101 and will have on exhibition the Sterling bicycle, three models, and a tandem; Gales wheel roadster weighing 22 pounds, thoroughly up-to-date, positively high grade, which will list at $75. In addition to this in the Gales the company will have a ladies' wheel weighing about 23 pounds; Manhattan, 28-inch, 1⅛-inch tubing, barrel hubs, at $60; 26-inch, $50; 24-inch, $40. Gotham, 26-inch, $50; 24-inch, $40 list. These last are exceptionally fine juvenile wheels.

U. S. MFG. CO.

The United States Mfg. Co., Fon-du-Lac, Wis., will display a complete line of samples of U. S. cyclometers, U. S. odometers and U. S. detachable lamp brackets. The working of cyclometers will be shown on bicycles, and also on a tester, which will run at the rate of one hundred and twenty-five miles an hour. A. R. Keating and F. J. Lang will be in charge of the exhibit.

E. C. STEARNS & CO.

E. C. Stearns & Co., Syracuse, N. Y., will exhibit the following: Model "A," diamond frame gentlemen's bicycle $100; model "B," diamond frame gentlemen's bicycle $100;

Digitized by Google

model "C," drop frame ladies' bicycle, price $100; model "D," diamond frame ladies' bicycle, price $100; special, diamond frame gentlemen's bicycle, price $125; Stearns' racer for 1896, price $125; Stearns' diamond frame tandem, price $150; Stearns' combination tandem, price $150. All the models will be regularly finished in orange, save in the case of model "C," of which black will be the regular finish with the option of orange.

A Sad and Sudden Loss.

The friends of Eugene Bissell, of E. Bissell, Son & Co., New York, will deeply sympathize with him in the overwhelming loss that has befallen himself and his household. Less than three months ago we chronicled the happy marriage of his daughter, Florence Norton Bissell, to Edgar F. Luckenbach, of Brooklyn, and now comes the sad news of her sudden and untimely death. Mr. and Mrs. Luckenbach had but recently returned from their wedding tour, aad were looking forward to a long life of happiness, when a sudden illness attacked the wife on December 28th, commencing with a cold, which was followed by the grip, and on January 2nd she passed away. The funeral was held on January 6th, with the interment in Greenwood. In a loss like this, words are of little avail, and the sympathy they convey ot little aid; but to the afflicted parents, husband and other dear ones, the sympathy of all who knew them or the young wife who has been called away, will be sent forth in a deep and earnest manner.

Chicago Cycle Show.

From all reports received the opening of the Cycle Show in Chicago was attended with gratifying success, great crowds being in attendance. It behooves New Yorkers to look well to their laurels, if they do not wish to be outdone by their hustling Western brothers. The attendance on Monday, January 6th, was estimated at 9,000, probably twenty-five per cent of that number being dealers. There is a marked absence of the "freaks," or mechanically fallacious novelties, which have been seen at previous shows, and the general impression given by the new models in both wheel and sundries is that substantiality is being more sought after. The most novel ideas are being shown in tires, saddles, and lamps. It certainly looks as if these vexed problems are to be solved by some of the new inventions, if not by several of them. Elsewhere in this issue we devote considerable space to an advance description of the New York Show, and as nearly all the principal concerns will exhibit at both, and the main features of the display be similar, we do not think it necessary to give a detailed description of the Chicago Show, even though space would permit of it.

A "'96" Pointer.

Cushman & Denison, who make oil cans for the trade everywhere, are taxed to their utmost capacity. They report that their advance orders for oilers indicate that an even greater number of wheels will be made in '96 than is generally anticipated. This firm make both high and medium grade oilers, and every wheel is supplied with an oiler corresponding in quality. The number of high and medium grade oilers manufactured is therefore a fair indication of the number and quality of wheels turned out. Allowing for the oilers that will be used for wheels now in existence, the number already ordered for '96 shows an output of bicycles that will equal or exceed the ideas of the most sanguine.

The Berlin Iron Bridge Co., East Berlin, Conn., have just completed for the Windsor Co., North Adams, Mass., a new fireproof storehouse 70 feet wide and 125 feet long. The construction is composite, being iron and brick, the whole being fireproof, no woodwork being used. The floors are made of terra cotta.

Review of the Markets.

The beginning of the year finds but little movement in Hardware, with the exception of Skates and other seasonable goods. Stock-taking has been the absorbing topic of interest, and it has left little room for business. Those who have taken stock are patiently waiting for the others to complete the task.

Wire Nails: Business is better than last writing. The stocks in the hands of jobbers are very light and they must soon replenish; business will then improve. Prices are the same. We quote as follows: Carload lots, $2.25, base, per keg, f. o. b., Pittsburg; less than carload lots, $2.35, base, Pittsburg. Carload lots on dock, New York, $2.43; small lots from store, $2.53.

Cut Nails: The conditions governing the market show no changes. Quotations are as follows: $2 per keg, base, f. o. b., Pittsburg. New York quotations are: Carload lots on dock, $2.18; small lots on dock, $2.28, and small lots out of store, $2.30.

Linseed Oil: We quote New York prices as follows: Raw, 42 cents per gallon; boiled, 45 cents per gallon, and Calcutta raw, 50 cents per gallon, which is an advance of 2 cents on Calcutta.

The National Lead Co.'s prices for Lead in Oil continues unchanged, being as follows: In lots of less than 500 pounds, 6 cents net; in lots of 500 pounds and over, 5½ cents; Red Lead and Litharge in barrels and half barrels, ¼ cent per pound less than price in kegs.

Putty: The better grades are quoted at $1.40@$2.25, as to quantity and package.

Clapp & Co., bankers and brokers, New York, in their weekly letter, say: "The average of National bank earnings last three years appears about one-half those of previous three years. Fourteen Southern States have built nearly 700 miles of railway in 1895, Texas and Florida leading. Total construction United States about 1,428.4 miles, against 1760 last year. Equipment building was active. Pig iron production for 1895 (one month estimated) is 9,387,639 tons, against 6,657,388 the previous year, and 9,902,703 for the banner year of 1890. The treasury and banks hold about two-thirds of all the greenbacks outstanding. The people hold the silver certificates, which the United States treasurer says are payable only in silver. Almost one-fourth of our imports in 1895 were crude wool, sugar, coffee, silk, rubber and hides. Twenty-two per cent. imports came from the United Kingdom, nearly $50,000,000 worth being woolen goods. Great Britain bought 45 per cent. of all our exports, 70 per cent. of the exports being agricultural products. Production of American wool declined 10 per cent. and price 40 per cent. since 1892. Interstate Commerce Commission preliminary report for the year ending June 30, 1895, covers 650 roads, operating 164,529.38 miles, whose gross earnings were $1,003,022,853, and net earnings $325,355,218, including other income total was $358,412,461. Fixed charges, dividends, etc., were $389,487,491, leaving a deficit of $31,075,030."

THE CHARLESTON TRADE.

Business for December was the best for many years, and we began the month with advance orders far in excess of a reasonable expectation, and we were not able to complete those and others that were received during the month until its close.

The new year has opened equally favorable, and we will have not only an active but a pressing January. The disposition of farmers now is to cut the holiday season promptly after January 1st and begin preparation for another crop. Heretofore if labor in the agricultural district was fairly begun by the 10th, it was deemed only a reasonable time allowed all about the farm for enjoyment. As a consequence of this unwonted energy we have daily calls for necessary goods, and the drain upon our stock is seriously felt. Delay in reception of goods now most needed is causing us some inconvenience and requires explanatory letters to our trade which are not agreeable or understood by all.

Having placed orders early in the summer for December shipment, we were not prepared to have them unfilled in January, and can only account for the delinquency of manufacturers and their agents by supposing that later in the season they had contracts at better prices than were made in the summer, and devoted alike time and attention to those more profitable, leaving the earlier ones to be filled at convenience, if at all.

There is no redress on account of such failure, and we will only have to exercise such patience as we can command to meet alike the disappointment to ourselves and our trade. We regard the Hardware market as being a

Digitized by Google

steady one, and do not anticipate any serious breaks in prices. We see no reason why there should be, and intend acting on that supposition as far as our own prices are concerned.

The fall and winter, as far as advanced, have been ideal ones, and commend themselves to all as being the cause of climatic congratulation. The entire country has been favored with just the necessary elements to make for the special section an active business. We of the Southland hardly know by actual observation what a sleigh or pair of skates are, and read with wonder the unusual demand, over the frozen regions of the North, for these necessary adjuncts of necessity and pleasure. A moderately prosperous year with the farmer enabled him to indulge his favorite pastime of hunting, and sporting goods of all kinds have been more in demand than for many years.

Game of all kinds has been abundant and the pleasures of the field been enjoyed by many. The jobber reaped the unusual harvest and the retailer in the country was not devoid of profit in transferring his purchases to the sportsman. Thus in turn a benefit has been derived by all.

The flurry in the political world has, if not entirely disappeared, been dismissed from the minds of those most interested, and the assurance of continued peace has reassured many and decided them to proceed as though no dark cloud had ever arisen to dim the brightness of the present or cast its dark shadows over the future.

We expect from this time until the spring is well advanced to be kept busy during the entire day and ofttimes to prolong labor until the night is well advanced, and sincerely trust we will not be disappointed.

MARSHALL, WESCOAT & CO.

THE DAVENPORT TRADE.

Incident to the season, there has been more attention paid to counting stocks, striking annual inventory balances and making settlements, for the past fortnight, than has been given to either buying or selling Hardware.

The weather has been mild, soft and sloppy; country roads, much of the time, impassable for loaded wagons, and hence the last month of the year 1895 must go on record as a dull month, the dullest of the twelve.

We have heard of no failures, and while collections are

A DESIRABLE LINE OF

FIRST QUALITY PURITAN WARE.

Digitized by Google

not what they should be, dealers who cannot pay all of maturing bills are generally able to pay a part, adding expressions of gratitude for leniency and with promises to pay more soon, keep the jobber good natured, and taking all in all, there is very little real cause for complaint.

There is practically no business in nails or barb wire, and what little Hardware trade there is, is made up of a thousand and one items of a general character for present needs, which indicates that stocks in the hands of dealers are small indeed, and also that buyers are exceedingly cautious and conservative just now.

SICKELS, PRESTON & NUTTING CO.

THE PITTSBURG TRADE.

Jobbers of Hardware are now arranging their plans for the New Year's business. Traveling men are being posted up, and will take the road shortly. Prices of Wire have gone down to what seems to be hardpan, and the expectation is that there will be a recovery within the next thirty to sixty days. If the finances of the country can be wisely arranged, we think other conditions point to a steady improvement in business. LOGAN, GREGG & CO.

THE PHILADELPHIA TRADE.

The new year is still too young to know much about business, and while jobbers are very busy it is all, apparently, unprofitable work, such as pricing up salesmen, taking stock, commencing new books and preparing for trade. Business in the meantime is necessarily at a standstill, as neither jobbers nor retailers care to talk business at this season; but by the middle of the month, however, things will once more be in full swing, and prospects point to a fair trade.

Prices remain with very little change; nails are still firmly held at the top figures; barbed wire has undergone quite a reduction, owing to the dissolution of the association.

The weather is cold and sharp, and will probably prove a great benefit to all dealers who have stocks of winter goods. We are always glad to see a cold snap come at this time of the year, as it helps to clean out seasonable articles and to make room for forks, hoes, poultry netting, ice cream freezers, and all the bulky goods which go to make up spring stock. BIDDLE HARDWARE CO.

THE CLEVELAND TRADE.

The holidays and early January are always very dull and not productive of any features of general interest; therefore there is very little to be said in regard to the trade conditions at present. Everybody seems to be playing a waiting game, and conflicting opinions are held in regard to the future of the markets. Some are bold enough to state that there will certainly be advances as soon as the spring demand commences. It is certainly not unreasonable to expect that there will be a stiffening of prices at that time, but as for any marked advance, unless the demand is very much greater than now seems possible, it can hardly be looked for.

The Bicycle Show at Chicago is now in progress, and to the thinking man is a fair exposition of the enormous development and size of this country. When we think of the possibility of putting into the hands of the American people nearly 1,000,000 vehicles of this description which will probably be done during the year of 1896, it almost seems beyond belief.

We anticipate a brisk demand for seasonable goods very soon, and, in fact, have had up to date a better demand than is usual at this time of the year. The market on Wire Cloth has been unsettled, but seems to be regaining its normal tone. THE MCINTOSH-HUNTINGTON CO.

The Hardware Club.

The following gentlemen have been unanimously elected to membership in the New York Hardware Club since our last report:

Edward Ashforth, No. 1509 Broadway.
S. Fischer Miller, No. 39 Cortlandt Street.
W. W. Owens, Jr., No. 93 Nassau Street.
Winthrop Parker, No. 181 Broadway.
John B. Phillips, No. 93 Nassau Street.
Henry H. Spies, No. 115 Broadway.
Paul Wilcox, Temple Court.

Because of the absence of Secretary J. L. Varick in South America for several months, E. C. Van Glahn was unanimously elected to the office of secretary *pro tem.*

E. Bissell, Son & Co., No. 12 Murray Street, and No. 15 Park Place, New York, announce their opening sale of house-furnishing goods on January 16th and 17th, at 10 a. m., of each day. They will then dispose over six thousand cases of Peerless Enameled Ware, Crystal Steel Enameled Ware, and Blue and White Ware, on order of the Lalance & Grosjean Mfg. Co. A full list of these goods will be found on page 43 of this issue. A large assortment of Enameled Ware will also be sold in open lots; also Stamped Tinned Ware, Wringers, Puritan Ware, etc.

The Cleveland Twist Drill Co., Cleveland, Ohio, are distributing among their friends "The Daily Reminder." This little diary and calendar combined is intended to serve as a calendar, giving the day of the month, the day of the year, holidays, etc., but its especial use is to remind one of things to be done each day. In this form it becomes a pocket mentor, which, if regularly used and often consulted, soon proves itself a valued companion. At the end of the year the "Reminder" should be preserved as a valuable record of the engagements of the year.

Samuel Hall's Son, No. 229 West Tenth Street, New York, manufacturers of Hall's Improved Pipe Wrench, which has gained such a widespread popularity during the past year, state that any part of this wrench broken with fair usage, will be replaced without charge; also that Dunham, Carrigan & Hayden Co., of San Francisco, Cal., have been appointed distributing agents for the Pacific Coast.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc, will be gladly received, and promptly published.

New Companies, Etc.

Albany, Ind.—The Albany Mfg. Co., incorporated. The company is composed of local capitalists and the directors are C. F. Smith, A. B. Gates, Philip Goetz, J. T. Tedrowe and A. J. Beverage. The purpose of the company is to manufacture tubing, machinery and all appurtenances for the manufacture of bicycles, including all classes of machinery. Capital stock, $1,000,000.

Baltimore, Md. — The Deuber Co., for dealing in novelties and labor-saving devices, was incorporated recently by Charles C. Denison, Frederick I. Mosher, Daniel H. Emory, Jasper M. Berry and Jasper M. Berry, Jr. The capital stock is $5000.

Chicago, Ill.—The Butler Mfg. Co.; capital stock, $2500; to manufacture Hardware. Incorporators—M. E. Butler, E. L. Church and H. R. Niland.

Des Moines, Iowa.—The Musgrave Co., incorporated to manufacture wire fencing, etc. Capital stock, $100,000. The incorporators are E. C. Musgrave, J. S. Mangehmab, G. I. Huffman, L. M. Jackson and W. W. McCullough.

Hartford, Conn. — The Acme Machine Screw Co. has filed articles of incorporation with the State secretary. The capital is $10,000, divided into 100 shares.

Indianapolis, Ind. — The Indianapolis Wrench & Stamping Co., incorporated by Charles Meggenhoffen, Harry E. Reeves, Charles M. Bundy and others. Capital stock, $10,000.

Ironton, Ohio.—The Standard Tool Co. has been organized by Dr. E. C. Sloan and J. H. Salisbury. The castings will be made away from Ironton, but the tools will be finished up in the shop here by Mr. Salisbury. Dr. Sloan furnishes the financial backing for the firm.

Kansas City, Mo.— The Black Diamond Mining Tool Co. have filed articles of incorporation, with Jacob R. Cline and Robert L. Yeager, of Kansas City, and H. B. Green, of Lynn, Mass., as incorporators. The company will manufacture and deal in mining tools and machinery. Capital stock, $5000.

Muskegon, Mich.—A company to manufacture locks has been organized by G. J. Madison, C. H. Hackley, Thomas Hume, L. G. Mason, H. L. Delano, A. V. Mann and J. W. Moon. The upper stories of the Chemical Engine Co.'s factory will be utilized, and from fifty to seventy-five men will be employed. It is calculated that the new factory will have a capacity of 100 dozen locks daily. L. G. Mason is president of the company, and H. L. Delano, secretary. Mr. Mason will superintend the business.

New York, N. Y.—The Alexander Nut Lock Mfg. Co., incorporated by M. H. Alexander, John W. Johnston and R. R. Brown. Capital stock, $20,000.

Orange, N. J.—The American Trimmings Syndicate, to do a business in brass goods. The incorporators, who have a capital of $200,000, are Peter C. Argylo and Charles Campbell, of New York; Miltiades Cossenas and Joseph S. Ward, of Brooklyn, and Clarence E. Williams, of Orange.

Providence, R. I.—The Nelson Seamless Filed Wire Co., incorporated with a capital stock of $100,000. The company have secured the entire second floor of the building at Pine and Eddy Streets, formerly occupied by the Providence Steam & Gas Pipe Co., and will begin the manufacture of wire immediately.

Syracuse, N. Y.—The Henesy Mfg. Co., incorporated by John Dunfee, M. H. Henesy, John C. Keefe and May E. Henesy; to manufacture Hardware and plumbers' supplies. Capital stock, $10,000.

Syracuse, N. Y.— The H. H. Franklin Mfg. Co., incorporated by Robert R. Franklin, James Parr Gedder, G. H. Stillwell and others; to make and sell metal castings, etc. Capital stock, $100,000.

Verona, Pa.—The Dexter Spring & Gear Co., incorporated, with a capital stock of $50,000.

West Troy, N. Y.—The American Bolt & Rivet Co., incorporated. The officers are: George Mark, president; Charles L. Mather, secretary and treasurer; Frank Danks, general manager; J. J. Zimmerman, of Troy, and J. M. Brown, New York, with the other officers, compose the board of directors. The capacity of the factory will be about 90,000 bolts per day, and will give employment to forty men.

Changes and Removals.

Cincinnati, Ohio.—A syndicate composed of Thos. P. Egan, president of the J. A. Fay & Egan Co.; Chas. Davis, president of the Lodge & Davis Machine Tool Co.; Robert Laidlaw, president of the Laidlaw-Dunn-Gordon Co., and Thos. McDougall, have purchased the $240,000 worth of stock owned by the Lodge contingent in the Lodge & Davis Machine Tool Co.

New Buildings and Improvements.

Belfast, Me.—B. Kelley & Co. have recently added eight large grindstones to their axe factory.

Belleville, Ill.—The Crescent Nail Mills have recently put in two new boilers twenty-two feet in length and sixty inches in diameter. They are provided with twenty six-inch flues. The machinery at the mill has received a thorough overhauling during the holiday recess.

Canandaigua, N. Y.—The capacity of the Lisk Anti-Rust Tin Works in this village is to be enlarged by the addition of a twelve-ton drawing press, a tinning plant and a spinning lathe.

Cincinnati, Ohio. — The Lodge & Davis Tool Co. is putting a basement under the entire plant, which will enable it to increase its present force very perceptibly.

Taunton, Mass.—The Webster File Works are putting in a new grindstone, which stands six feet in height and weighs 4300 pounds.

Recent Fires.

Salem, Ohio.—J. Woodruff & Sons' foundry, destroyed by fire; insured for $13,500 on the foundry and $13,000 on the warehouse.

General.

Anderson, Ind. — The American Wire Nail Works, which have been shut down most of the time in the past two months, have resumed full operation. The working force is almost eight hundred, and all will be employed, including all-night forces. The company announce that the plant starts in with the new year for a full year's run.

Milwaukee, Wis.—The Eagle Brass Works have filed notice of dissolution.

Gasoline Stoves and Ranges.

The Schneider & Trenkamp Co., Cleveland and Chicago, are sending the trade a handsomely illustrated catalogue descriptive of the "Reliable" stoves and ranges which they are placing upon the market with such success. It is finely bound, printed upon heavy paper in colors, has an artistic heading upon each page, and thoroughly illustrated. When it takes seventy or more pages to show their full line, it will be seen to be rather difficult to attempt even a synopsis of the same, and the best thing that the enterprising Hardwareman can do is to send for a copy of this catalogue. Also send for their "Illustrated Puzzle and Circular of Reliable Gasoline Stoves and Ranges," both of which will be sent free on application. The "Puzzle" book is filled with good things. Of their catalogue, the manufacturers say: "To every dealer interested in the sale of Gasoline Stoves and Ranges, we offer this, our ninth annual catalogue, as representing the very best line of cooking devices that care and ability can produce. For the coming year we have added another line of high-class Junior Stoves. This new line will have extra large tops and large burners, producing the evaporating style flame. Our splendid facilities and long experience warrant the confidence that Reliable Stoves and Ranges will be better than any others for the season of 1896."

The semi-annual meeting of the Michigan Hardware Association will be held at Saginaw, Mich., commencing February 12th. All Hardware dealers of the State are invited to be present, as matters of great importance to the Hardware trade will be brought up. It does not matter whether a dealer is a member of the Association or not; he is earnestly requested, if possible, to be present.

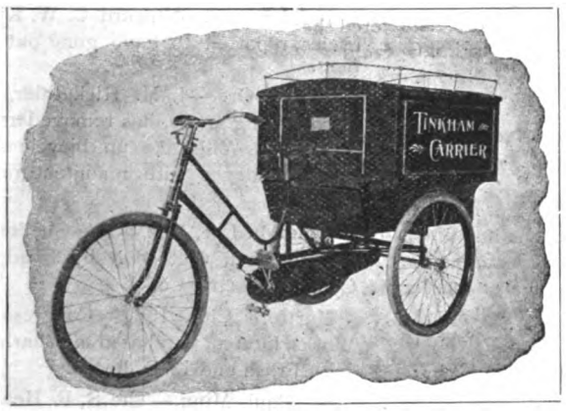
DEALERS.

Our new line of **Reliable Juniors** and step stoves with individual burner and **Process** flame, will surprise you. It is different from any other line of stoves both as to manner of construction and method of lighting.

IT IS A WINNER. Sample Stoves now ready.

On February 15, 1896, we will introduce a new departure in the Vapor Stove business by offering a GASOLINE STOVE that lights like gas. No Smoke. No Smell. Simplicity itself. A stove that will burn 63 naptha as well as 74 gasoline. . . . Place your order with us now for



Process, Single Generator and Junior Stoves.

If you have not received our 1896 Gasoline Stove Catalogue, write us.

Send for our Illustrated Puzzle.

BICYCLE TRADE RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Companies, Stores, Etc.

Ambia, Ind.—C. A. Garner, Hardware, etc., is preparing to take up bicycles, and invites correspondence with manufacturers of wheels and sundries.

Brinkley, Ark.—James P. Smith, Hardware, etc., is preparing to take up bicycles, and invites correspondence with manufacturers.

Butler, Ind.—The Butler Co., manufacturers of windmills, pumps and well machinery, have commenced the manufacture of bicycles, turning out wheels listed at $85 and $100.

Cantbridge, Vt.—E. A. Pope, Hardware, bicycles, etc., has opened new store.

Cicero, Ind.—George Anthony is preparing to take up bicycles, and invites proposi tions from manufacturers of wheels and sundries.

Cincinnati, Ohio.—C. O. Hall and others have organized a new company, with a capital stock of $200,000, to manufacture bicycle sundries. Mr. Hall is the president and treasurer. A new roller-bearing sprocket and bicycle chain will be made a specialty.

Cincinnati, Ohio.—J. A. Ferguson and others are reported to be organizing a $2,000,000 company, to manufacture bicycles, from Mr. Ferguson's patent, which claims to operate an entirely new pedal plan, the pedals moving vertically, instead of describing circles. A mile a minute is claimed for the new invention.

Cleveland, Ohio.—The Union Cycle Mfg. Co. will establish local agency.

Cleveland, Ohio.—The L. & B. Cycle Mfg. Co. has been incorporated by Isaac Lewis, Wm. N. Booth, Eleazer Lewis, Geo. H. Kimball and Paul S. Johnson; to manufacture bicycles. Capital stock, $50,000.

Clifton, Iowa.—Steps are being taken, looking to the establishment of a bicycle factory, and Seymour Davis, of Philadelphia, is engaged on plans for two-story factory building, 40x100 feet.

Clinton, Iowa.—The Kane-Pennington Motor Cycle Co. is being organized by local capitalists to manufacture motor cycles.

Henderson, Ky.—Morris, Lockett & White, Hardware, bicycles, etc., have recently commenced business.

Jacksonville, Fla.—William Marion, bicycles, will open salesroom on Grenada Street, handling the Waverley wheel, and will do a rental business.

Jacksonville, Fla.—Wheeler & Howett, bicycles, have opened salesroom in the Sanchez Block, handling the Eagle and the Middlesex, and doing a general repairing business, having machinery sufficient to construct an entire wheel.

Jacksonville, Fla.—E. T. Duffy, bicycles, has established a Spaulding agency on Cycle Row, and will do a general repairing business, also a rental business.

Kalamazoo, Mich.—The Celery City Cycle Co. has secured factory facilities, and has commenced the manufacture of bicycles.

Kent, Wash.—H. N. Ockford, sporting goods, bicycles, etc., has commenced business.

Medina, N. Y.—L. W. Hopper, Frank Houseman, W. Wilmarth and Warren M. Hommadieu are interested in the establishment of a bicycle factory. Erection of the necessary buildings has been commenced.

Murray, Ohio.—Castell & Harbaugh, Hardware, etc., are preparing to take up bicycles, and invite correspondence with manufacturers of wheels and sundries.

Muskegon, Mich.—H. K. and W. K. Firth and C. H. Shaffer have formed a stock company for the manufacture of bicycles. They have secured factory facilities, and are now in the market for the necessary machinery.

New Brighton, S. I.—The Staten Island Bicycle Co. has filed its certificate of incorporation. Capital stock, $100,000.

Newport, Ark.—G. W. Weast, Hardware, etc., is preparing to take up bicycles, and invites propositions from manufacturers.

New York, N. Y.—The Fowler Cycle Mfg. Co., of Chicago, have opened New York office on the street-floor of the Mutual Reserve Building, at No. 307 Broadway, with James H. Robley as resident manager.

New York, N. Y.—The Elmwood Cycle Mfg. Co. has been incorporated by Wilbur E. Goodwin, of Elmwood, Conn.; Frank S. Parmelee, Clarence B. Harter and Louis Brass, of New York City. Capital stock, $12,000.

New York, N. Y.—Cheever, Coit & Co.; to manufacture bicycles. Capital stock, $60,000. Directors: Victor E. Burke, Geo. W. Ihl and Lemuel Evans, of New York City.

Ottawa, Kan.—Durst Bros., Hardware, bicycles, etc., are preparing to open new store.

Owensboro, Ky.—J. G. Delker and others are preparing to commence the manufacture of bicycles, with B. B. Clark as manager.

Pensacola, Fla.—John Sherry has commenced the manufacture of bicycles.

Pittsfield, Mass.—Barker & Belden are preparing to establish a bicycle factory. A model wheel is now being built. The concern will buy parts and assemble them here.

San Francisco, Cal.—Holbrook, Merrill & Stetson, bicycles, have been given the Pacific Coast agency for the wheels manufactured by Geo. N. Pierce & Co., Buffalo, N. Y.

San Francisco, Cal.—Clarence E. Martling, bicycles, corner San Pablo Avenue and Fifteenth Street, Oakland, Cal., will soon establish branch house in San Francisco, having become the coast representative of the Syracuse Cycle Co.

Sheboygan, Wis.—The Jenkins Mfg. Co. announce their intention to commence the manufacture of bicycles. This company have large machine shops, which will be equipped immediately for their new departure.

Springfield, Mass.—Clarence A. Smith, of the National Cash Register Co., of Dayton, Ohio, is said to be at the head of a movement to organize a company to establish a bicycle factory.

Toledo, Ohio.—The Kirk-Young Mfg. Co., incorporated by H. J. Young, Ezra E. Kirk, E. Kirk, Arthur W. Kirk and W. H. Williams, to manufacture bicycles and bicycle supplies. Capital stock, $30,000. This corporation succeeds the H. J. Young Mfg. Co.

Toledo, Ohio.—The Yost Bicycle Co. is fitting up new store on Adams Street, and will conduct a riding academy and a repair shop.

Verona, Pa.—The Dexter Spring & Gear Co., incorporated, with a capital stock of $50,000.

Westville, Conn.—Jesse W. Starr, of New York, is at the head of a new company, which will establish a bicycle factory, employing one hundred hands, and which will occupy the old factory of the New Haven Nut Co. The company will manufacture a wheel to be known as the Elm City.

Zanesville, Ohio.—The Zanesville Cycle Co., in which T. M. Harsch and Fred C. Zinsmeister are interested, will begin business February 1st. These gentlemen have completed the purchases of supplies for their new factory.

Changes and Removals.

Anderson, Ind.—Carpenter & Miller, bicycles, reported dissolved. The business will be continued by Mr. Carpenter, and Mr. Miller will embark in a similar business for himself.

Boulder, Col.—Edward C. W. Kiefer, bicycles, reported to have gone out of business.

Colfax, Ore.—J. M. Hickethier, bicycles and sporting goods, has removed into larger quarters. Will take up bicycle sundries. Correspondence with manufacturers solicited.

Fond du Lac, Wis.—The Sneller Supply Co. has been succeeded by Fond du Lac Cycle & Electric Co.

Hartford City, Ind.—Congress Bicycle Works, interest purchased by Charles Frash John Frash and L. F. Beard.

St. Paul, Minn.—The S. F. Heath Cycle Co., at No. 324 Wabash Street, has been succeeded by the St. Paul Cycle Co. The business has been established since 1892.

Summit, N. J.—Ely & Henry, bicycles, will remove to larger quarters in the Risk Building, as soon as the latter is completed.

New Goods and Improvements.

Chicago, Ill.—The Griffin Wheel Co. has certified to an increase of its capital stock from $1,000,000 to $1,250,000.

Ilion, N. Y.—A company has been organized to manufacture the Powers, Pettingill Adjustable Handle-Bar.

Toledo, Ohio.—J. W. Hardin will commence the manufacture on Superior Street, between Jefferson and Monroe Streets, of a newly invented baby-carrier attachment for bicycles. He will have capacity for manufacturing 15,000 carriers for the '96 trade.

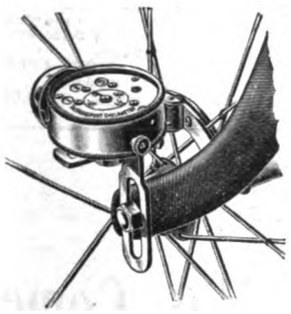
THE AMERICAN.

TEN THOUSAND MILES AND REPEATS.

The Best Seller on the Market.

Insist on receiving our Registered Guarantee with every American.

Easily read from the Saddle.



Requires No Care.

PRICE, $2.00.

The American Cyclometer, Model B, is not a dinkey toy, too small to be of any use; it does not get out of order if you run it backwards like others that are being put on the market. A cyclometer, though built like a watch, if too small cannot be depended on. The AMERICAN tells you the small fraction of a mile; others do not. **The American leads; let those who can follow.**

Cuts now ready for 1896 Catalogue.

We make four styles of ROLLING LADDERS to reach shelving of any height.

HALL'S IMPROVED PIPE WRENCH.

DO YOU SAY that this wrench will crush or cut the pipe? IT WILL NOT if you know how to use it. The principal cause of Pipe Wrenches crushing or cutting the Pipe is because the GRIPPING POINTS ARE DULL.

You can sharpen THIS WRENCH IN A FEW MINUTES on a

grindstone or emery wheel WITHOUT TAKING IT APART.

THIS WRENCH if kept sharp will grip high on the pipe, and you can screw a pipe so tight that it will open a malleable fitting, and strip the thread, WITHOUT CRUSHING OR CUTTING THE PIPE.

It is impossible to LOCK OR WEDGE THIS WRENCH on the pipe.

It will COST LESS FOR REPAIRS than any other Pipe Wrench.

IT IS THE BEST SCREW WRENCH, as it is stronger than any other, and by pulling the reverse way it will grip a nut or fitting and WILL NOT SLIP.

It is DROP-FORGED from TOOL STEEL.

Sam'l Hall's Son,

229 West 10th St., New York.

SUCCESS

is the daughter of good advertising. I can help you win her. My business is the preparation of trade-pulling advertisements—the kind progressive hardware dealers need. May I write some for you?

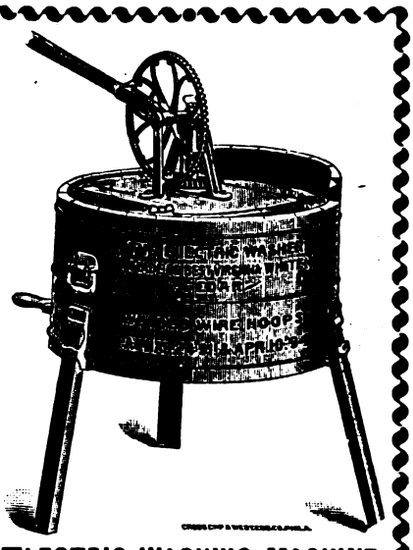
Polar Star Instant Ice Cream Freezer.

◉ **A Marvel to all who behold it in operation.** ◉

Size, 21x7x7. **Retail Price $3.75.** Capacity unlimited.

It makes perfectly smooth ice cream with all milk. Cream added makes it somewhat richer, but not smoother. It makes very superior, smooth water ices, frozen fruits, frozen custards, sherbets, etc., and is a very simple, convenient and economical freezer.

No Gearing, cogs or fixings to get out of order.



Noiseless in operation. A child can operate it. Makes a plate of ice cream in 30 seconds or a quart in 5 minutes. All other quick freezers merely SCRAPE it off a tin surface of some kind, but do not BEAT IT or WORK IT.

Our Freezer **Mixes, Mashes, Pulls, Grinds** and **Whips** the cream more in **30 seconds** than any paddle freezer does in **30 minutes.** Dealers will do well to investigate this promptly. Correspondence solicited.

Manufactured solely by **Polar Star Freezer Co.,**

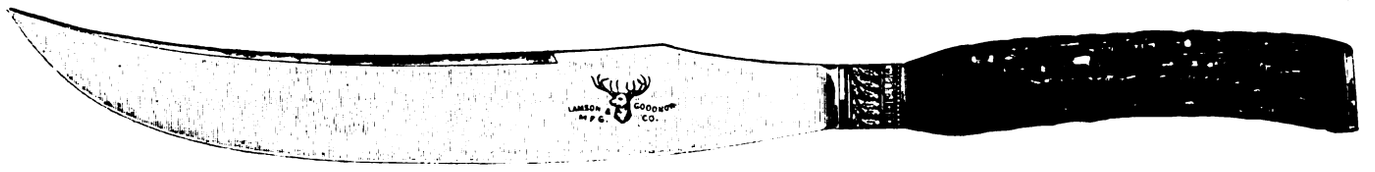
ONE REASON WHY

Our business has grown out of all proportion to any other manufacturer of

CUTLERY IN THE U. S.

Is that while our goods are unsurpassed in finish and general appearance our special aim has been to adapt them to the purpose for which they are to be used.



In the matter of Carvers, your customer wants a Knife to cut with as well as to look at. All our Carver blades are made from carefully tested Butcher Knife Steel. They take and hold a fine cutting edge.

We also make Table Knives, Butcher Knives, Shoe Knives in great variety. All fully Warranted.

A Mistaken Notion.

It is a mistaken notion that a fine store in an eligible location, surrounded by attractive signs, is a superior advertisement; for the experience of the most enterprising merchants is that it pays better to spend less in rent and more on advertising.

SALESMEN, to sell a patented staple specialty which is as great a success as it is a seller. Good commission. A splendid side line for the Hardware, household and kindred trades. Season now on. Address Gibbs Mfg. Co, Canton, Ohio.

WE want traveling salesmen to carry as side line direct to retail trade, on commission basis, our line of Wire Hangers for garments. Commission liberal. Further particulars by addressing Barber-Koenig Mfg. Co., No. 115 North Vine Street, Hazleton, Pa.

SALESMEN wanted to sell patented staple specialty to the Hardware and grocery trade. Large commission. R. Givens, Corpus Christie Tex.

Hardware Store Wanted.

TO purchase a retail Hardware store with a moderate sized stock, having a good location in a live, growing town. Must have a good trade, and doing a good business. Address JOHN R. SWARTZ, Hughesville, Pa.

For Sale.

FOR SALE—The stock, fixtures and good-will of a Hardware store and bicycle business in a Western city of 60,000 inhabitants. Capital required, $20,000 to $25,000. All or part of the business will be sold. Address W. B., care HARDWARE, No. 143 Chambers Street, New York.

To Let.

A FIRST-CLASS modern style Mercantile Building, just finished, on Superior Street, Cleveland, Ohio; centrally located; suitable for Dry Goods, Furniture, Crockery, Hardware or other merchandise, specially adapted for a large Department Store. Also so arranged as to be subdivided and leased to two or three tenants. Building is 67x150 feet to another street; 8 stories above a high and well finished basement; floor space about 78,000 square feet; passenger and freight elevators; steam heating; electric lighting. For further information apply to J. G. W. COWLES, No. 140 The Arcade, Cleveland, Ohio.

A DESIRABLE office to rent with the Wilmot & Hobbs Mfg. Co., No. 2 Murray Street, New York. Steam, heat, electric light and telephone.

A DESIRABLE office to let with the Van Wagoner & Williams Hardware Co., No. 14 Warren Street, New York City.

Attention! Hardware Travelers!

HARDWARE and other traveling salesmen who wish to increase their incomes, will be placed in a position to do so by sending their name and address to the HARDWARE Publishing Co., No. 143 Chambers Street New York.

To Manufacturers.

A HOUSE of nearly sixty years' standing, having travelers well covering the States, would be pleased to open correspondence with manufacturers of specialties suitable for the Hardware trade, with a view of coming to some mutual arrangement for marketing the same. Address F. S. S., P. O. Box 2522, New York City.

Quotations Wanted.

THE Mechanical Rubber Co. (successor to the Cleveland Rubber Co.) Cleveland, Ohio. wish quotations on Hose Fittings, Clamps, Bands Reels, Specialties, etc., for the 1896 trade.

ESTABLISHED 1818.

THE OLDEST AND LEADING MANUFACTURERS OF GALVANIZED WIRE GOODS IN AMERICA.

Patented Aug. 7th, 1894.

SOMETHING NEW

"Enterprise" Electric Light and Lamp Guards

WE are now ready to supply the trade with the **Enterprise Patent Electric Light and Lamp Guard**, of which we are the sole owners and manufacturers.

This guard is a great improvement over the old style guards, being more easily attached around the socket, and requiring no brass ring for that purpose. It is made of steel wire twisted, afterwards tinned, soldering all the twists together, and made with a hinge and clasp in the middle so that you can get at the glass globe to clean or to put a new one in without detaching the guard from around the socket, which has to be done in the old style guards that have a brass ring attachment. We have seen and know by experience that the screws in the brass rings on the old style guards drop out from the vibration of buildings and the globe works out of the socket, falls to the floor and breaks. This is impossible with our guard. It is stronger than any guard in the market and very neat in appearance and has given better satisfaction to firms, that have put them in use, than any other guard they have tried.

The price of this guard is lower than any of the old styles which have been used by some of our factories, steamships, etc.

It will pay you to write for a sample guard and our price before purchasing elsewhere.

Sole Manufacturers, **Edward Darby & Sons,**

Pennsylvania Iron Works. **233 and 235 Arch St., Philadelphia.**

When ordering guards please state socket.

STANLEY'S

UNIVERSAL PLANE.

INCLUDING:

BROWN & SHARPE MFG. CO., PROVIDENCE, R. I.

SMALL TOOLS FOR MACHINISTS' USE.

Darling, Brown & Sharpe,

Scales, Squares and Tools for Accurate Measurement.

EXPERIENCE has shown us that it is usually best for all concerned that we have the dealers for partners in the sale of Micrometers, Cutters, Rules, Gauges and other small tools. They exhibit the goods and carry them in stock, and usually they avoid delays and save postage and express charges. We accordingly protect them thoroughly, and adhere strictly to catalogue prices and terms.

We respectfully suggest that customers communicate with the dealers before ordering direct, and we are assured that a serious effort will be made by the dealers to demonstrate that it is advantageous to purchase through the trade.

ORANGE SPORTING POWDER, MANUFACTURED BY LAFLIN & RAND POWDER CO.

ORANGE RIFLE EXTRA, ORANGE SPECIAL, ORANGE DUCKING, ORANGE LIGHTNING.

The attention of TRAP AND FIELD SHOOTERS, RIFLEMEN AND DEALERS IN GUNPOWDER, is called to the new ORANGE SPORTING POWDER, patented April 17th, 1888, and branded ORANGE RIFLE EXTRA.

This Powder is quick and strong, and burns with such perfect combustion that the only residum left in the barrel after shooting is a dark oily substance easily removed While this Powder is not exactly SMOKELESS, it gives only a light bluish smoke, which is almost instantly dissipated, and interferes but little with the shooting of the second barrel, taking the place of the so called smokeless powders in this respect.

This brand of powder sells at the same price as any other brand of Rifle Powder and is superior to any made. No person who shoots can afford not to give it a trial, as after once trying it he will never use any other Powder when he can obtain the ORANGE EXTRA. Weight and quality guaranteed.

MILITARY, MINING AND BLASTING POWDER.

LAFLIN & RAND POWDER CO., - 99 Cedar Street, New York City.

IT TAKES A PULL

to separate the plies of our rubber belting. A yoke of oxen can do it, but hard service won't, so strong is the friction. Our belting is uniform in width and thickness, consequently more of its surface comes in contact with a pulley. That means

NO WASTE OF POWER.

Rubber belting is never injured by water, hence it is best for out-door use, for wet localities, and for mills where the atmosphere is surcharged with moisture or steam, as in paper mills, tanneries, etc. Buy the durable kind, branded 1846-Para, Double Diamond or Carbon, made for 50 years by the

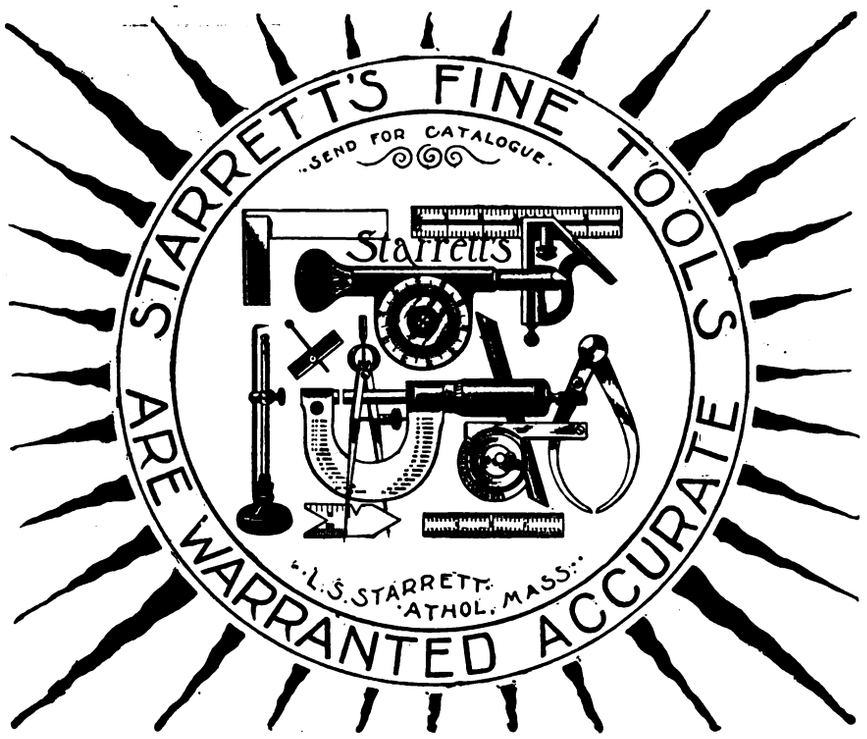
Derby Line, Vermont.



OUR STAR HACK SAWS

Are used in nearly all of the Iron Working Shops in this country and Europe. Now we wish to introduce them to the Farmers and Householders generally. They will cut Iron, Steel, and Wood equally well. One blade which costs five cents, will cut off an inch-square bar of iron 100 times without filing. They will do most of the work of a file at one-tenth of the cost. All of our best blades are rounded at the ends and stamped with a star.

As a sample, we will send one Steel Frame and Six Blades by mail, prepaid, on receipt of $1.00. Or they can be had of all the best Hardware Dealers, who usually keep a good line of our high-class tools.

Toledo Wheelbarrow Works, Toledo, O.

The AMERICAN WICK is made on scientific principles. The gum inherent in the natural cotton is taken out, and no expense is spared to produce a wick that will give THE GREATEST ILLUMINATION.

THE

AMERICAN WICK

Made by the
WICK DEPARTMENT
Of the STANDARD OIL CO. of NEW YORK.

Oil drawn up through the AMERICAN WICK burns with a large, clear, white light and the flame does not drop off in size as it does when a poor wick is used. When the cotton is clogged with its natural dust and gum the full illuminating power of the oil is not obtained and the complaint is heard that the light DROPS.

SPLENDID Drill

For light work in any machine shop.

Just the Tool

Do You Desire

an article that every family would buy if they simply had their attention called to its merits? If you do, put in a stock of P & A's Banner Oil Stoves. See Cut.

No. 971, Heater Complete. Height, 27 inches.

Banner Oil Heater

SIMPLE, NOVEL and PRACTICAL.

Requires less care than the ordinary Lamp.

Will burn 8 to 10 hours and heat comfortably a room 15 to 20 feet square.

NO SMOKE! NO ODOR!
PERFECT COMBUSTION.

POINTS:

The Oil Fount is brass, handsomely embossed and highly nickeled. It holds one gallon of oil. As each fount is tested under steam pressure before leaving factory, there is no danger of leaking.

No Chimney. The drum of the **BANNER** in its construction acts as a chimney, saving the expense incident to the renewal of glass chimneys of other makes.

The Fount Frame is artistically made of wrought iron, making a solid base for the stove.

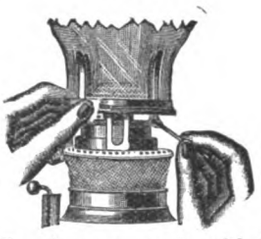
The Burner is the best made, and ONLY ONE with feeder wick, allowing all the oil to be consumed.

The Indicator shows at all times how much oil there is in fount.

The Flame is regulated with our ratchet wick movement, which allows the wick to be raised or lowered with nicety and exactness.

Lighting. It is not necessary to remove any part of the stove to light it. The sliding door in the drum is made for this purpose.

Draft. The round openings in the drum create great suction of cold air in addition to the regular draft. Double the radiating force of the ordinary stove is thus secured.



Get one for your Bed, Bath or Smoking Room, Library, Nursery, Office or Conservatory.

PUBLICATION ON THIS PAGE, IN EACH ISSUE,
OF THE POST OFFICE RECEIPTS FOR COPIES
MAILED THE PRECEDING ISSUE.

It Equals the Horse Show.

The Horse Show has found its competitor in the popular esteem and affection of the people. The bicycle has used its modern pneumatic tire with such good effect, that it has glided, silently but surely into the very front rank of popular attractions. The great Bicycle Show which has occupied the attention of the public in Madison Square Garden during the week past, has proven itself in possession of all those elements of popularity through which the Horse Show appeals to the interest and curiosity of the public. It is safe to say that no more remarkable exhibit in the mechanical line has ever been made in the world, in view of the fact that the bicycle has, as a matter of practical transportation, occupied the attention of the public for less than a half dozen years. The crowds which filled the Garden every afternoon and evening equaled those attracted to the Horse Show, comprising the intelligence, the social characteristics, and the wealth, which find admission to the other great exposition. The managers of this Bicycle Show should certainly be satisfied with this great exhibit of 1896, and find in the results of this year an incentive to make this Show a permanent feature.

5651 "Hardware's" in One Issue.

The following exact duplicate of a receipt from the New York post-office, carries its own moral:

NEW YORK POST OFFICE,
JAN 11 1896
....., 189....
Received from
Hardware
IN WEIGHT, AS FOLLOWS:

	TARE.	GROSS WEIGHT.
36 No. 1 Sack 3 lbs.		2923
No. 2 Sack 2 lbs. 5 oz.		108
Net weight		2815
Rate per pound		.01
Amount of postage		$28.15

Per Callahan
C. W. DAYTON, Postmaster.
Receiving Clerk.

This means that there were mailed 2815 pounds of *Hardwares* of our January 10th issue; and the following calculation completes the story:

2815 × 16—45,040
45,040 ÷ 9.1—4949
4949 + 702—5651

In other words, 2815 pounds equal 45,040 ounces. Each *Hardware* weighed 9 1-10 ounces; which makes a total of 4949 copies. Add to these 702 copies held for office use; sent out in this city by carrier, or prepaid by postage stamps; and we have a total of 5651 copies published on January 10th. Add to this the fact that this is but *one* of our *two* issues for January, and the advertiser gains exact knowledge as to the value of *Hardware* as an advertising medium.

Post-office receipts cannot be juggled with. Figures do not lie. Nothing in the above is left to the faith of the advertiser or to the picturesque imagination of the publisher.

Publicity's Potent Power.

"Weigh, measure or gauge everything you buy" is an axiom the value of which every successful manufacturer learns early in his career.

This applies with great force to a matter in which all

Digitized by Google

manufacturers are specially interested. In these closing years of the nineteenth century, when advertising is recognized by all as a matter of absolute necessity, it behooves the prudent business man to *know* what measure of value he is receiving in return for his hard-earned dollars. In other words, the publication which withholds its circulation from those who support it, or, worse yet, makes false statements concerning the same, or gives no other proof than the statement of the publisher, is liable to be charged with obtaining money under false pretenses, as much so as would the grocer who sands his sugar or the milk dealer who pours water into his milk.

As was announced some time since, *Hardware* has determined that none of its advertising patrons need for a moment doubt the exact value they are receiving in the way of circulation for the money which they are expending in *Hardware*. As is shown in the above, we have decided to publish in each issue a photographic reproduction of our post-office receipts for the preceding issue, which shows by a simple calculation that any child can work out, the exact circulation of *Hardware* for the issue named. We further guarantee that the circulation of *Hardware* for the year 1896 shall not fall less than 120,000 copies, which anyone acquainted with trade journals knows is very much above the average mark. In addition to this, we desire to say that our circulation goes into the hands of Hardwaremen and house-furnishing goods dealers in all parts of the country, and that anyone who wishes to reach that trade can best do so through these columns.

We repeat the advice with which the above opens: Weigh, measure or gauge everything you buy—especially in the line of advertising.

The Hardware Dinner.

This is the season of Hardware dinners, and reference to a number of gatherings of this character may be found elsewhere in these pages, especially an extended report of the annual dinner of the Philadelphia Hardwaremen, held on Thursday evening of this week. It is not necessary to apologize for the attention paid to these gatherings on the part of *Hardware*, as they form one of the most interesting and valuable features in connection with the cultivation of better business methods and fraternal relations in the trade. The arrangements for the great annual dinner of the New York Hardware Club are being pushed with intelligent energy. Responses so far have been such as to guarantee a certain success, and Mr. Clinch, the chairman of the committee, suggests that those who intend to be present, and have not yet made application for tickets, should put in their claims at the earliest possible moment, as there is a great likelihood that those who delay will be unable to secure seats. The prospects are good for the most successful and best dinner yet held by the trade of this city. Applications should be made to Mr. Clinch, either at No. 94 Chambers Street, New York, or at the Hardware Club.

Among the speakers already announced are Rev. M. W. Stryker, president of Hamilton College, and James H. Hoyt, Esq., of Cleveland.

On January 18th, the Clauss Shear Co., No. 100 Chambers Street, New York, removed to No. 119 Duane Street and No. 34 Thomas Street, where they will be pleased to receive their friends at all times.

Death of George Barnett.

George Barnett, known everywhere to the Hardware trade as the president of the G. & H. Barnett Co., Philadelphia, makers of the Black Diamond file, died at his residence in Germantown, Philadelphia, on January 7th. His illness had extended over a long period, but until November last he was able to attend to the details of business. Mr. Barnett was born in Nottingham, England, on January 16, 1833, and came to America and settled in Philadelphia at the age of fifteen. One year later he was apprenticed to J. Barton Smith, of Philadelphia, where he learned his trade as a file maker. He was foreman of the shop when nineteen years of age, which position he held until 1863, when he removed to Pittsburg, and in company with his brothers, William and Henry, commenced the manufacture of saws and files, under the name of Barnett Bros. They soon removed to Philadelphia, where George and Henry Barnett commenced the manufacture of files exclusively, under the name which the business has since borne. It increased in size, until at present the works for the manufacture of the Black Diamond file contain three and a half acres of floor space, in which 500 and more hands are employed. At the time of his death Mr. Barnett was president of the company, which had been incorporated in 1895. Mr. Barnett was connected with various interests in Philadelphia, and not only enjoyed the reputation of being a manufacturer of first-class files, but as combining in himself all of those elements of energy, industry and thoroughness which made him a model business man. He leaves a widow and three daughters, one of whom is the wife of Henry W. Scattergood, the secretary of the G. & H. Barnett Co. The deceased was interred in the South Laurel Hill Cemetery, Philadelphia, on January 10th.

Wilson Bros.' Line.

Wilson Bros., Nos. 14 and 15 Tremont Row, Boston, have been long and favorably known as jewelers, and they now come to the front with a number of bicycle accessories which attract no small degree of attention. They are selling agents for the cyclometers made by the American Clock Co., for the Rogers Bicycle Saddle and for Wilson's Rapid Transit Bicycles. The American Cyclometer is a well-known article, and has heretofore been described in these columns. The Rogers Bicycle Saddle is so arranged in two parts that it yields automatically to the movements of the body, and is described as economizing force and increasing comfort, speed and health. They have prepared a circular containing anatomical charts, and opinions from physicians and others in regard to the characteristics of this saddle, and will be pleased to send the same on application. They say that the Rogers will fit any saddle post, and samples of the same will be sent by mail when requested. They will be pleased to furnish information as to prices, details, etc., on application, in regard not only to the saddle, but the other lines of goods handled by them.

New York Hardware Club.

The following gentlemen were unanimously elected members of the New York Hardware Club. at a meeting of the board of governors held on January 22nd:

R. C. Jenkinson, Newark, N. J.
T. Foster Gaines, No. 45 Cedar Street.
A. R. Whitney, No. 29 Broadway.
Charles A. Fish, Postal Telegraph Building.
Anson G. McCook, No. 303 Broadway.
W. D. Boyce, Chicago, Ill.

At the annual meeting of the stockholders of the Allentown (Pa.) Hardware Works the following directors were elected: John Bowen, Andrew S. Keck, H. K. Hartzell, Joseph Ruhe, W. K. Ruhe, William Both and H. S. Shimer.

The Vapor Stove Industry.

To the Editor of Hardware: In reply to your request for a brief history of the origin and growth of the Vapor Stove industry, I am pleased to herewith hand you the facts which follow: In 1863 a patent was obtained by a Mr. Dopp, of western New York, on a device for using the product of petroleum called gasoline and naptha for cooking purposes. Owing to the crude construction and general make-up of the burner and stove, they did not meet with popular favor, although energetic efforts were made to bring them before the public.

During the next ten or twelve years, few, if any, further efforts were made to perfect a burner and stove, although two patents were taken out during that time, both of which were obtained by Cleveland inventors. From 1876 to 1880 considerable progress was made in the improvement and adaptability of this style of stove, and several important improvements were made in the burner by simplifying the vaporizing process and improving the general character of the frame of the stove, as up to that time all the frames were constructed of wood, and were very inconvenient, unreliable and really unsafe.

While it is true that the first burner was patented, and the first attempt to put it into practical use was in Buffalo (which proved a total failure and was soon abandoned), the credit of all later progress and the final success is due to the genius and energy of citizens of Cleveland, and has now become one of her leading industries, employing between two and three millions of capital, and giving employment to over two thousand mechanics and artisans, thus sustaining no less than ten thousand of Cleveland's population.

Up to 1879 there were not exceeding one thousand of these stoves in use, and confined almost to the Western Reserve. At that time the writer's attention was directed to this new industry, and he soon became satisfied that a stove and range could be so constructed that it would soon become a household necessity on account of its great labor-saving advantages over the ordinary coal and wood cook stoves. He soon found, however, that the gasoline for use in these stoves, while plentiful and cheap, would require a different process of refining and treating from that which had been used up to that time. To overcome this difficulty, the writer erected a large plant especially adapted for producing a pure, odorless gasoline.

To this improved gasoline and improved burners and construction, the rapid growth of the Vapor Stove interest is largely due, as other refiners soon got into the way of producing the proper gravity and purity of gasoline, although comparatively few of these stoves were in use up to 1880. There is no better evidence of the progress that has been made in fifteen years in this industry, than the fact that today over two million of these labor-saving devices are in use throughout the United States, and Cleveland continues to take the lead in this industry, although these stoves are now made in St. Louis, Chicago and Milwaukee.

D. A. Dangler

Hon. David A. Dangler.

David A. Dangler, the president of the Dangler Stove & Mfg. Co., whose portrait we herewith present, is certainly thoroughly competent to speak to Hardwaremen, as he has in the above article, in regard to the history of the Vapor Stove industry. In the first place, Mr. Dangler for a number of years was one of the leading Hardwaremen of Cleveland, and as such became well and thoroughly known throughout all that section of the country. His connection with the Vapor Stove industry commenced, we might say, before the beginning of that trade, if such Hibernianism is permitted, for certainly he was one of the originators of that line of industry, has been one of its most active exponents from the beginning, and at present stands in the forefront of the manufacturers of that line of stoves.

Mr. Dangler was born in Lebanon County, Pa., and at an early age moved with his parents to Stark County, Ohio, where he learned to use his hands, and acquired that rudimental education of manual industry so essential to the self-made man he was destined to become. He had an ambition to fit himself for better things, and accordingly the arduous labor of the farm was supplemented, as opportunity offered, by a zealous application to study. At the age of fifteen he entered the large general store of Isaac Harter, at Canton, Ohio, as a boy of general usefulness. His brightness, industry, and natural aptitude for business, soon won the confidence of his employer, and promotion came as a matter of course. In 1845 he located in

DAVID A. DANGLER.

Massillon, which at that time had become a great centre of trade, which offered him larger opportunities. In 1852, Mr. Dangler took an advance business step, and formed a copartnership with John Tennis, then of Massillon, for the purpose of engaging in the wholesale Hardware trade in Cleveland. The expectations of the partners were fully realized in the general success of their business, which assumed high rank among the wholesale establishments of Water Street. In 1868, Mr. Dangler withdrew, enabling Mr. Tennis to associate his two sons with himself.

From his first appearance among the business men of Cleveland, Mr. Dangler was recognized as a valuable addition to their ranks, and the respect and confidence in which he was held grew with each passing year. On the breaking out of the rebellion, he took a prominent part in organizing war committees for the securing of recruits, and providing for the needy families of soldiers. There naturally came a call that he should take some part in public life as soon as those about him came to recognize him as he was. In 1864 he was elected by the Republicans to the City Council. He took a leading part in the labor and debates from the beginning, and as chairman of the committee on schools, was an active and efficient force in the making of the Cleveland school system one of the great educational

Digitized by Google

actors of the middle West. As a member of the committee on finance, he did efficient work, which so commended itself to the people of Cleveland, that it was their general wish that he should be called to a higher field of labor. In 1865 he was elected a member of the Ohio House of Representatives. He at once took an important place in the labors of that body, and was made chairman of the committee on railroads and a member of the committee on finance and that on penitentiaries. His course was such in this position that in 1867, the close of his term, he was elected State Senator, and sent back to the upper House. He was a most efficient worker in that body, and had personal charge of a large number of measures which enabled Cleveland to successfully pass through the transition state of villagehood to a full grown city. He retired to private life at the close of his Senatorial term, by his own choice, and carried with him the respect of the entire community.

From that time forward Mr. Dangler gave his entire attention to the large business enterprises in which he was interested, and was, and still is, a hard working and busy man. He is best known as the president of the Dangler Stove & Mfg. Co., as president of the Vapor Stove Association of the United States; has also been president of the Domestic Mfg. Co. and the Crystal Carbon Co. All these business distinctions are the direct result of aggressive, methodical activities of a high order, complemented by a sterling character which throughout his whole record has commanded a faith in his integrity. He is a thorough gentleman in all his personal characteristics, cultured, pleasant and approachable, liberal with his means, public-spirited and ready to do any good that lies in his power. He has filled a large measure of usefulness in the world, and gains a widening circle of influence in every year that passes.

The Sportsmen's Exposition of '96.

Judging from the manner in which applications for space have been coming in since diagrams were sent out last month, space at the Second Annual Sportsmen's Exposition, to be held under the auspices of the Sportsmen's Association, at Madison Square Garden, March 16th to 21st next, will be at a premium long before the doors of the Garden open.

The Exposition of last May was largely in the nature of experiment. No exhibitor had a very clear idea of just what lines his own exhibit would assume when completed, and it is doubtful if any one of the thousands who visited the display during the week had formed the vaguest conception of what they beheld upon passing through the Madison Avenue entrance of the Garden. Notwithstanding the fact that it was a first Exposition, however, and that few, if any, of the exhibitors had ever before engaged in a like enterprise, the exhibit offered exceedingly few points for criticism either from an artistic or meritorious standpoint. The display of sportsmen's goods and appliances was a revelation to the uninitiated, and a source of great pleasure and satisfaction to the experienced sportsman; the spectacle was a grand one in its many and alluring representations of sport with the gun and rod; and the forty odd thousand people who looked upon the Exposition as the most altogether new and original, as well as one of the most attractive and interesting industrial and recreative exhibits they had ever inspected, gave the stamp of public approval to the First Sportsmen's Exposition in a most gratifying manner, both as to the standpoints of quality and numbers.

Under such circumstances it is not surprising that exhibitors, many of whom had gone into the Exposition with no little degree of apprehension as to the outcome, should have been gratified to an extent that resulted in their making inquiries as to space for the Second Exposition, almost before the first was well under way. The date for the opening of the Second Exposition is still more than two months distant, and not a manufacturer outside of New York City has been seen as yet by the Exposition Committee; a majority of the spaces have already been taken, however, applications and requests for reservation in every instance having come in by mail and without solicitation other than the receipt of a diagram and the price list of spaces. Many of the more prominent exhibitors of last year, such as the Winchester Arms Co., Parker Bros., Overman Wheel Co., A. G. Spalding & Bros., Hermann Boker & Co., Hazard Powder Co., Francis Bannerman and Iver Johnson's Arms & Cycle Works, have taken increased or more prominently located space, while such houses as the Laflin & Rand Powder Co., United States Net & Twine Co., H. H. Kiffe Co., Electric Boat Co. and others of equal importance in their respective lines, who were not in last year's exhibit, have taken liberal space for the exhibit of next March.

The creation of an Exposition Committee composed of Messrs. Dressel, Von Lengerke and Chasseaud, and which, together with Manager Sanger, will have entire charge of all details of arrangements and preparation for this year's exhibit, has been a step in the right direction. The members of the committee, working in perfect harmony with Manager Sanger, have quickly eliminated the faulty features of last year's show, and have provided substitutes which can scarcely fail to give additional attractiveness to the exhibit of '96.

Last year the efforts of the Sportsmen's Association and of the Exposition management were centered in but one direction, that of filling the spaces in the Garden with a desirable and representative list of exhibitors and of demonstrating beyond all question that an exhibition devoted to the interest of sportsmen was wanted and would be appreciated and supported. Having accomplished this, and feeling sure that the Exposition of '96 will take care of itself so far as its spaces and attendance by the public are concerned, the Exposition Committee and the Sportsmen's Association are now making tremendously strong but very quietly prosecuted efforts to give the second exhibit a value from a trade standpoint, which the exhibit of last spring did not know to any considerable extent. In other words, it is intended, if possible, to bring to the Second Annual Exposition not only the sportsmen of the country, but sporting goods dealers from all sections, to the end that closer relations may spring up as the result of personal contact between buyer and seller, and that points of mutual interest to manufacturer, jobber and dealer may, under the auspices of the Second Annual Exposition, be discussed with profit to all concerned. The presence at the show of a thousand leading dealers in sporting goods, brought there as delegates to a sportsmen's convention, would unquestionably give the Exposition a value to the exhibitor far greater than it had last year, and that, too, without detracting an iota from its value as an educator and its interest to the general public. In this direction the Sportsmen's Association is working, and within a fortnight will be able to announce its perfected plans and the measure of success that has attended its efforts.

The Waterbury Brass Co., Waterbury, Conn., New York, Providence, R. I. and Newark, N. J., are sending out a tasty calendar for 1896. A winter scene is represented, showing two gunners in the forest. One is in the act of shooting while the setter stands several paces in advance, and by his position indicates the presence of the game. The company manufacture brass, gilding, metal, copper, German silver in sheets, rolls, bars, rods, tubing or cone, brass kettles, brass and copper rivets and burs, Hick's patent primers, percussion caps, flasks, pouches, belts, game bags, gun wads, powder and shot measures, etc., etc.

NEW YORK CYCLE SHOW.

The Third Annual Exhibition of Cycles, Cycle Accessories and Sundries that opened at the Madison Square Garden on Saturday, January 18th, and continued till January 25th, goes down in history as a cycle show without an equal. About two hundred concerns were represented at the show. It is not necessary here to describe the appearance of the Garden on the opening night; it really beggared description, being a sea of light and color. Nor is it our intention to give a detailed description of the individual exhibits, we having already done them justice in a recent issue. There has been some discussion among the manufacturers as to the desirability of the continuance of cycle shows, many expressing themselves as being opposed to them, but surely the immense crowds that have attended this one have shown them the folly of their ways. After visiting the show one appreciates what a strong hold cycling has on the public, but after all who could really be indifferent after seeing so many beautiful specimens of mechanical genius as were displayed at the show. The crowd that filled the vast floor space was so great that many were forced into the various balconies, thus assuring the exhibitors in these locations their share of attention. The souvenir fiend was out in force and he had a rich field from which to satisfy his desire, as the souvenirs offered were costly and numerous. The ladies' hearts yearned for the silver spoons given away by the Waltham Mfg. Co., and the gentlemen were equally anxious to obtain the silver bicycle plates given by the Bidwell, Tinkham Co. The E. C. Stearns Co. distributed a bamboo cane decorated with a yellow bow, which soon gave the crowd the appearance of a large college attending in body. The Pope Mfg. Co. showed a tandem equipped for military use. The wheel was provided with a blanket, two army overcoats, two rifles, two revolvers and apparatus for signalling. They also exhibited a single with one of the new Colt's automatic guns mounted over the handle bars. The wheel is intended for either military or police duty and would make a fearful weapon during a strike. E. C. Stearns & Co. showed one of the two sextets in the whole exhibit, the Fowler Co. showing the other. The ice bicycle shown by the Warwick Cycle Co. attracted universal attention. The Black Mfg. Co. showed a single inlaid with pearl, which was valued at $1,000. The Miami Cycle Co. had the only triplet and also showed a nobby carrier with glass case. The International Mfg. Co. showed a large fat man and an American tandem, the front chain working through the truss frame giving a center pull. The Syracuse Cycle Co. were ably assisted by their Syracuse braves, who doled out souvenirs to the eager crowd. The Humber people had a Chinaman on hand, dressed in handsome silks, with queue and all complete. The Liberty Cycle Co. showed a wheel equipped with a wooden handle bar, which is said to do away with all vibration. In the display of Crescents made by the Western Wheel Works was a spokeless wheel made by a farmer's boy of Monmouth Co., N. J. The boy's only tool was presumably an axe. Ordinary garden hose was used in lieu oi tires. R. H. Wolff & Co. showed a patent Wolff-American Duplex equipped with a gatling gun. The tendency for the coming season seems to tend to larger tubing, increased weight, larger tires and brakes. Amongst those prominent in the trade who registered at the Bureau of Information were the following;

O. W. Andrew, New London.
Allen Aldrich, Providence.
S. A. Adams, Jacksonville, Fla.
E. H. Brandt, Hartford.
George D. Buckley, Fitchburg, Mass.
C. E. Brayton, Syracuse.
H. F. Campbell, Holyoke, Mass.
George Collister, Cleveland.
O. J. Clough, Worcester.
C. D. Cutting, Chicago.
Charles M. Donohue, Lynn, Mass.
David Harry Darling, Brooklyn.
I. N. Nann, New Haven.
A. H. Funke, New York.
N. D. Griffin, Gloversville, N. Y.
J. Lee Greenleaf, Indianapolis.
O. H. Gordon, Newark.
Robert D. Gould, Fitchburg.
Louis Cuyler, New York.
J. L. Greenleaf, Peoria.
Trusdell Gorham, Marshall, Mich.
Robert Gentle, Elizabeth, N. J.
George K. Garwood, Stockton, N. J.
William H. Hayden, Worcester.
Thomas Hay, Indianapolis.
Frederick H. Hunger, New York.
Howard Hoffman, Brooklyn.
Gardner Hathaway, Marblehead, Mass.
A. J. Hammond, Lynn.
A. H. Huxley, Boston.
William H. Haggett, Portland, Me.
C. S. Henshaw, Brooklyn.
F. C. Hegeler, Cleveland.
N. B. Jennigen, Philadelphia.
Frank Jennings, Boston.
A. R. Keating, Fond du Lac, Wis.
J. D. Keating, Springfield, Mass.
J. R. C. Cross, New York.
W. H. Kirkpatrick, Chicago.
H. G. Kimball, Montclair, N. J.
R. F. Kelsey, Hartford.
F. J. Lang, Fond du Lac, Wis.
C. Albert, Lyon, Lynn.
C. H. Lamson, Boston.
H. C. Ladd, Buffalo.
J. H. Leonard, New York.
George W. Marble, Plymouth, Ind.
G. A. Marble, Plymouth.
J. C. Merwin, New York.
W. C. Marion, Jr., Indianapolis.
E. W. McCarlin, Chicago.
George C. Mattey, Hackensack, N. J.
A. W. Marchand, Cleveland.
J. W. Minnig, Reading, Penn.
E. N. Meyer, New York.
C. A. Mann, Buffalo.
Daniel Nast, New York.
William H. Newman, New York.
C. K. Plumb, Chicago.
Arthur Preyer, New York.
James Pace, Auburn, N. Y.
J. C. Pierres, New York.
Frank Price, Chicago.
W. H. Pedersen, New York.
E. R. Pughs, Cleveland.
Reuben Punnett, Rochester.
A. L. Prentiss, Buffalo.
G. Y. Patterson, Chicago.
Fred Patee, Indianapolis
C. G. Percival, Boston.
Edgar Park, New York.
George W. Pratt, Chicago.
J. F. Palmer, Chicago.
G. Fred Pollock, Paterson, N. J.
Forest Peabody, Lowell.
C. E. Piper, Lakeport, N. H.
George G. Pierre, Philadelphia
James J. Carr, Auburn, N. Y.
C. E. Davies, New York.
H. L. Doullard, New York.
G. V. K. Greene, New York.
W. A. Gray, Westboro, Mass.
E. C. Hinch, New York.
J. C. Herron, Trenton.
Charles A. Miller, Syracuse.
William J. McCormick, Kalamazoo, Mich.
William Shirley, Chicago.
B. V. H. Schultz, Chicago.
R. A. Strong, New York.
E. D. Sapportas, New York.
Frank O. Starkton, Newark.
C. Hudson Smith, Montreal, Canada.
George H. Strout, Boston.
L. X. Smith, Sidney, N. Y.
C. S. Sherman, Windsor, Vt.
H. G. Shepard, New Haven, Conn.
A. M. Straight, Chicago.
Sam S. Thorpe, Jr., Cleveland.

W. H. Butler, Worcester.
W. Hicks Bell, Philadelphia.
P. J. Berlo, Boston.
H. Crowther, Cleveland.

Cycle politics have been discussed during the week. Sterling Elliott, of Boston, who has L. A. W. presidential aspirations, was early on hand. President Willson, of the L. A. W., was also there. A large box at the Madison Avenue entrance was the headquarters of the League, and here was located a petition for legislation favorable to wheelmen, which all visitors were asked to sign. On Wednesday, January 22d, a meeting of the stockholders of the National Cycle Board of Trade was held.

The thirteen new directors elected were: W. A. Redding, A. G. Spalding, C. F. Smith, C. E. Stevens, George H. Day, R. G. Gormully, C. W. Dickenson, R. L. Coleman, J. C. Yost, H. G. Garford, J. McKee, W. J. Bruff and W. F. Wilson.

A. G. Spalding, the retiring President, announced that the organization was in a strong financial condition, with a balance of about $40,000 on hand.

The new directors then proceeded to elect officers. R. Philip Gormully, who was tendered the office of President, declined to accept. With Gormully off the ticket the second choice fell upon R. L. Coleman. The latter created widespread surprise at the meeting by declining to accept the office. This left the directors in a quandary, and in order to give the subject mature consideration, the election of new officers was postponed.

The impression gained after several visits to the show is the fine finish and handsome appearance and mechanical excellence of the 1896 mounts. The varied colors of the finishes, including red, yellow, green, blue, maroon, white, nickel, onyx, crimson and black, lend attractiveness to the scene. Society has smiled on the show and lent it charms. Ladies in handsome gowns and gentlemen attended in the sombre dress suit more numerously every night.

"Hop's" Corner.

Cycling has come to stay.

Of that fact there remains no longer the slightest doubt, and it well deserves its successful achievement.

But let us not forget one important fact, that it was the masses, the toilers, the warp and woof of the nation, who have popularized this sport.

It is the pastime of the people. They adopted it at sight, and made it possible that the 75 millions of dollars invested in this gigantic interest, should every dollar of it receive its just reward.

Certainly no greater boon has ever been bestowed upon the American people in the interest of healthful sport, and the beneficial results reached by its universal adoption by both sexes will infallibly increase the average longevity of those who love it.

Health is the foundation of all that is pleasant or enjoyable in life, and the constant activity engendered by the use of the wheel, makes the precious blood course through its natural channels in quicker currents and infinitely purer; and the overtaxed brain thus made healthy keeps our nerve functions vigorous; the muscular exercise acting beneficially on an irritated or depressed state of mind, the influence of the bicycle becomes one of the greatest remedial agents for removing the nervous and mental troubles so inseparable from the daily lives of our active population.

As a nation we are invariably hard workers—pushing our best faculties to their utmost tension to accomplish our ambitions; but, unless we learn to use with discretion the sports our exhausted natures turn to for relief, we will use up our physical resources without deriving any material benefit. We need constantly some healthful exercise in the fresh air, with frequent changes in the surroundings, polishing up our intellectual forces and filling our lives with the sunshine of contentment, all of which is made possible by the use of the bicycle, and all of which is consequently within our grasp.

What is there so exhilarating as the complete mastery of the wheel, and the feeling of conscious power which comes with the knowledge that by its aid we have within our reach limitless fields of intelligent enjoyment, extending by its use even the social possibilities of our existence?

It creates new phases of ecstasy, casting care and sorrow to the winds; opening up a newer and nobler love of Nature than we ever supposed our hearts were capable of feeling. We become more worthy of those we love; more unselfish in our aspirations; more humane in our feelings to those around us, and more considerate of their comfort and happiness; and all this increase in our capacity for enjoyment is brought into existence by our mastery of this new element of civilization.

"Hop."

The Lee-Clarke-Andreesen Hardware Co., Omaha, Neb., have elected the same officers and board of directors as those of last year, as follows: H. J. Lee, president; H. T. Clarke, vice-president; E. M. Andressen, treasurer, and W. M. Gass, secretary. The officers, together with J. C. Coit, comprise the board of directors.

The Berlin Iron Bridge Co., East Berlin, Conn., have just completed for the Ansonia Brass & Copper Co., Ansonia, Conn., a new boiler house 65 feet wide and 142 feet long. The side walls are of brick, and the roof is entirely of steel, covered with the Berlin Iron Bridge Co.'s patent anti-condensation corrugated steel.

Some Michigan Girls.

The Northern Refrigerator Co., Grand Rapids, Mich., manufacturers of the Glacier Refrigerators, have adopted a very unique method of compelling every man with blood in him, who enters the office of one of their patrons, to gaze continuously at an advertising card which they have just issued. It is a very artistic reproduction of half a dozen of Michigan's fair daughters occupying an opera box, somewhere, we presume, where the merits of the Glacier Refrigerator are being londly sung. The whole lot are joining in the chorus with all the energy there is in them. As a mere specimen of the latest Michigan fashions, both in dresses and hair-dressing, they fill the bill most admirably. It is a very attractive and artistic card, a foot and a half square, and so made that it will either hang on the wall or stand on the desk of any man who is appreciative of female beauty. They are also publishing a cute little hand-book entitled "Cooling Things," which sets forth in full the merits of their refrigerators, and which, by a very ingenious idea, is bound in samples of the charcoal sheathing used in the manufacture of their refrigerators. They are also sending their friends a handsome illustrated catalogue and price list of the "Famous Seven-Walled" Glacier cold dry air refrigerators, as manufactured for the season of 1896. This is also bound in samples of their sheathing, and contains sixty odd pages, upon every one of which is a presentation in fine half-tone of some one of their line of goods, with sizes, prices, etc. The company say that through their long experience in the business and their ownership of valuable patents, in addition to the immense stock of dry hard-wood lumber they have on hand, with the latest improved machinery, first-class dry kilns and skilled workmen, they are in position to guarantee their goods to give satisfaction both as to price and quality. They add that the capa ity of their works is over 200 complete refrigerators per day, and that they have five large warehouses in which they carry a stock of over 20,000 refrigerators the beginning of each season. The special points of merit to which they call attention are the seven walls for insulation, the Glacier air-tight locks, and the Barrett movable flues for cleaning, which were patented January 26, 1892. These catalogues will be sent on application.

Major's Water Filter.

The Water Filter here shown is an invention of A. Major, the well-known cement maker, No. 461 Pearl Street, New York. It is described as follows: It filters the water, instead of simply catching the larger particles of dirt and letting the smaller ones and noxious bacteria pass through;

can be placed in any water cooler and be cleaned out as easily as a saucepan. The filtering device consists of a porous stone that extracts all the impurity from the water. The filter can be filled up with ice if desired, and the impurities that too often exist in the ice are also eliminated before the water reaches the faucet.

HARDWARE is printed for men now on earth.

Bissell Carpet Sweeper Co.'s Advertising Department.

Some time before Christmas the Bissell Carpet Sweeper Co. announced an offer of a special cash prize for the best three "ads." on their line of Bissell sweepers as Christmas gifts. As an outcome of this they issued 1388 special electros, and received many excellent advertisements. After Christmas and after the returns were all in, the Bissell Co. secured the services of Messrs. Lord & Thomas, the well-known advertising agents of Chicago, to act as their judges in awarding the prizes, and the committee appointed by Lord & Thomas, after careful consideration of all the "ads." that had been submitted, awarded the prizes as follows:

First Prize—The G. B. Churchill Co., Galesburg, Ill. Second Prize—Vroom Bros., St. Stephen, N. B. Third Prize—Robies Dry Goods House, Bath, N. Y.

The first prize consisted of $50 cash, the second prize $30 cash and the third prize $20 cash.

The following five houses sent in very excellent advertisements and are entitled to honorable mention, but not quite successful enough to warrant cash prizes:

W. R. Hodgkin, care Gable & Co., Altoona, Pa. Porteous-Mitchell & Co., Saginaw, Mich. Harry H. Smith, Elyria, Ohio. Crews-Boggs Dry Goods Co., Pueblo, Col. James Patton & Co., Charlottetown, P. E. I.

The Sam'l C. Tatum Co., Cincinnati, Ohio, have issued a catalogue descriptive of their Ice Cream Freezers. This is rather unique in its arrangement, as it contains a number of pages which show in fac-simile the endorsement of their goods, made by leading Hardware and house-furnishing goods houses of the country. They also furnish a full description of the Ohio Freezer with prices, specifications, etc. They state that the catalogue has been issued to show how highly their goods are esteemed by those who have handled them, and add that while they have been manufacturing this freezer for two years, they have many thousands of them distributed in all parts of the United States, and that their sales for 1895 were much more than double those of 1894.

C. Flickinger, dealer in Hardware, etc., Erie, Pa., writes: "Please send paper as per enclosed order. I am at present well supplied with trade papers, but on examining a copy of *Hardware*, send me that, as it is the best Hardware paper I ever saw. I find that most of the trade papers try to crowd too much of a variety into one paper, and in that way cannot do justice to all." Mr. Flickinger adds that business in Erie just at present is very quiet, but that of the past year has been much better than was noted in the year before; that margins have to be cut so close that the results are not altogether encouraging. He lives in hope for the coming year.

The Mechanical Rubber Co., Cleveland, Ohio, are publishing a little pamphlet descriptive of the "Royal" factory fire hose for mill protection, as required by the associated factory mutual insurance companies. This article is described and illustrated fully, and on one page of the pamphlet is a representation of the standard factory hose-house, properly equipped with the "Royal" factory fire hose. All who are interested in the protection of their property will do well to send for this little pamphlet.

The Simmons Hardware Co., St. Louis, have issued a handsome spring catalogue, No. 240, for their spring trade of 1896, which illustrates and describes fully their seasonable goods, which include baby carriages, refrigerators, lawn mowers, boys' wagons, velocipedes, screen doors, ice cream freezers, etc.

The Truman Cycles For '96.

Chas. Truman & Co., Toledo, Ohio, are sending out a handsome catalogue which fully illustrates and describes their line for 1896. Among the wheels shown therein is their Model 24; height of frame 24 inches; weight 23 pounds; price $100. Model 21, height of frame 22 inches, regular, 20 inches special; weight 23 pounds; price $100. Model 26, height of frame 26 inches; weight 24 pounds; price $100. Model 23, height of frame 23 inches; weight 22 pounds; price $100. Model X, any desired height of frame; weight 21 pounds; price $100. Their model 23 is shown in this connection.

The catalogue contains specifications of the wheels, and full illustrated descriptions of the parts entering into the construction of their wheels. Their plain purpose and very comprehensive mottoes are explained in a note of introduction, in which they say: "We take pleasure in showing the public our line of business and pleasure bicycles, and from our past pleasant relations with the said public, we feel sure that it will appreciate our advancement and improvement in the ease of running, strength and beauty of our wheels. No Nonsense is our motto, and that applies to our policy of cutting out all the unnecessary and unbusinesslike expenses connected with the bicycle business as she is conducted. We have reference to the enormous outlay for useless racing teams, giving bicycles as prizes, and many other equally extravagant and wasteful methods of whooping 'er up at the expense of the quality of the machine. We put all this outlay into the makeup of the bicycle, and no expense will be spared to make the wheels absolutely perfect in every detail, and that is where we expect to gain friends. We make good wheels, but no 16 pound freaks for the road. Our line consists of a 26-inch frame for the six-footer, 24-inch frame for the mass of riders, 23-inch frame for the little fellows, and one the same height, with shorter cranks, for bloomer girls, the sweetest ladies' drop frame imaginable, and a 21 pound roadster of any desired height for the fast brigade, but no nonsense." This catalogue will be sent on application.

Annual Banquets.

The employees of the Sickels, Preston & Nutting Co. were entertained at their annual banquet last evening at Library Hall by the members of the firm. About thirty of the clerical force of the company sat down to a banquet of good things. Biehl's orchestra furnished the music for the dancing which followed, and which was thoroughly enjoyed. The firm is to be congratulated on the considerate interest they take in their employees, and in setting an example of colaboration which could well be followed, and is, by other firms of the city.—*Davenport (Iowa) Leader.*

Among the recent Hardware dinners was that of the Supplee Hardware Co., of Philadelphia, where one hundred of the salesmen and employees gathered about the festal board and spent an evening of great enjoyment. An address was delivered by W. W. Supplee, which took on the form of reminiscences in regard to his boyhood days, and the struggles through which he was compelled to pass before reaching his present eminent position in the Hardware trade. The evening closed with the singing of "Auld Lang Syne."

The annual dinner of the Hibbard, Spencer & Bartlett Co., of Chicago, was also a success, and was given at the Auditorium Hotel. About a hundred representatives of the company sat down, and William G. Hibbard presided and C. Bartlett acted as toastmaster. Speeches were made by John Peters, R. S. Marlin, Henry Cassidy and others.

The Athol Machine Co., Athol, Mass., have issued one of the most attractive illustrated catalogues and price lists of the season. This describes in full their line of goods, as iron founders, their improved American meat and vegetable chopper, Simpson's patent adjustable vise, Wright's animal tether, and other Hardware, household and agricultural specialties. Some fifty pages are occupied in these descriptions, and the whole catalogue is bound in a handsome black cover with gold lettering. The goods above referred to are illustrated in full, with prices, descriptions, etc. It also contains the list of goods made by the Standard Tool Co., for which the Athol Machine Co. are sole agents. These include squares, rules, bevels, gauges, calipers, pliers, micrometers, wrenches, etc. The book contains a price list of extra parts, descriptions as to ordering, and other matter, which makes it a matter almost of necessity that it should be in the hands of dealers everywhere.

Duane H. Nash, of Millington, N. J., and No. 30 South Canal Street, Chicago, has published a catalogue describing the Acme Pulverizing Harrow, Clod Crusher and Leveler manufactured by him. He describes it as "a harrow that will do the whole business; will crush, cut, lift, turn, smooth and level all in one operation."

The Buhl Stamping Co., Detroit, are sending their friends a little monograph which shows in full their line of milk cans, etc. Prices and details are given.

The Retail Hardware Dealers' Association of Michigan will convene in Saginaw February 12th.

As to Hardware Names.

Editor of Hardware: Referring to "Hardware Names" in your issue of December 25th, it has given me some pleasure in looking up the records, to see if your correspondent was correct in explaining the "whys," etc., etc.

From what I am able to learn, he is evidently in error in assigning the origin of the word "knife" to France instead of to Germany, where it seems to have been used first. I find "Knife," an instrument for cutting. The word is of distinctly Teutonic origin, the root being knip, to nip, to pinch. In German it is kneifen, to nip, to squeeze; in Anglo-Saxon, cnif; in Swede, knif; in French, canif. The word got very early into England with the Anglo-Saxons, and from there over into France, across the Rhine, where it is applied to penknives only, while a table knife is or was a mensacutae, and a little knife a kenivet.

Perhaps the following, in addition to the information you have given, may interest your readers: Pistol, a small hand gun, the name of which is derived from Pistoja, formerly Pistola, a place near Florence, Italy. But there were pistols before gunpowder came into use in Europe. The first pistols were daggers. An early Italian pistolese was a great horseman's dagger. In adopting the barrel and lock of the new invention the shape of the dagger handle was retained and the implement called a pistola. It has been said, moreover, the barrel of the pistol was at first attached to the dagger handle, so that the horseman might shoot, cut and stab with the same weapon.

The act of weighing, and machines for weighing, are closely connected with the Hardware trade; in fact, the first work I ever did for this firm was to weigh ten pounds of tenpenny nails; and it has occurred to me that some of the younger Hardwaremen may not know all about the "whys" of the different appliances used in weighing; possibly it may save some of the older men embarrassment, if they should be asked suddenly, as I was recently, why a steelyard was called a steelyard. I did not know then, but do now, and here it is:

Steelyard, a weighing machine; provincially pronounced stilyard; as a grindstone is called a grin-stone. But why steelyard? In its construction no steel is used, nor has the steelyard any hold on linear measure; but in London, some centuries ago, in Dorgate yard, near by the docks, a yard or storage place was set apart for handling steel that was brought over to England by the Hanse (North German) steel makers. To weigh such heavy metal a machine was devised, and it took the name of the place where it was used and has kept it, though the steel yard on Cosins Lane has long since disappeared. The word is found in none other than the English language, though the steelyard is universal.

Scales: The bowls or pans of a balance. Latin, bilanx—bi, two, lanx, pan—two pans suspended from a balancing beam. Scales, or balances, are of great antiquity, and are first found on the inner walls of religious temples in Egypt, as being used for weighing human souls to ascertain whether they shall be admitted into heaven or sentenced for a term in purgatory. They were also used to a great extent for commercial weighing. The history of scales is full of interest. But there are no scales. Scale means a shell, as of a fish, oyster or nut, and time was when these scales were suspended from the balance-beam—not now. Metal bowls or pans are used instead. The name abides, but the scale itself has disappeared from the weighing machine. Weights used in balancing are and were numerous, various, even ludicrous. In soul-weighing the tip of an ostrich plume is represented; in merchandise, the metal or stone heads of cattle, small hard seeds, tiny coin, etc. In our time, scruples (sand), dram (handful), ounce (inch), and pound (pondus) weights in avoirdupois (to have some weight), are used. In troy weight (Troyes, a French city). grains (little seeds), pennyweights (old silver penny) and ounces are yet tabulated as weights. In weighing precious stones, carat, Arabic quirret, a small weight, is used. The evolution of weights is a very interesting study for a Hardwareman.

JAMES R. NUTTING.

Sickels, Preston & Nutting Co., Davenport, Iowa, January 6, 1896.

He Has Tested His "Falcon."

The subjoined interesting letter shows what one rider did in California, and what can be done on a "Falcon," the well-known wheel made by the Yost Mfg. Co., Toledo, Ohio:

San Francisco, Dec. 12, 1895.

GEO. WEBB ALEXANDER, San Francisco, Cal.

Dear Sir:—On my trip south I started from San Francisco, via Oakland to San Jose, then via. San Juan and San Juan Mountains where my walking powers were tested for three miles up the mountains; I passed Salinas and on through to Chular. From there I went to Slack Canyon where I spent a few days hunting, and went down to San Mignet; there I received five hundred placards. After loading them on my wheel with my clothes and sundries I weighed two hundred and fifty-two pounds; making a big load for 22½ pound "Falcon" over rough roads. From there to Arroys Grande, which is one hundred and fifteen miles, the roads are very bad; being cut up by heavy teaming. From there through Nipomo via Pismo Beach to Santa Maria where I was delayed by rain for two days. We were then two hundred and seventy-six miles from 'Frisco, or three hundred and twenty-six miles via Slack Canyon.

From Santa Maria we encountered more or less sand until I reached the Santa Barbara mountains, where my walking powers were again tested for six miles up the mountains, though the scenery is so grand in these mountains one does not mind the climb. The grade after I left the summit was rather steep, although I rode down by tying a large brush to my wheel as a drag. Reaching the foot-hills we encountered sand and orange groves to Santa Barbara. From Santa Barbara I rode twenty-five miles on the beach to Ventura, where I received another batch of placards; then via Hueneme, Calabasas, Cahnenga Pass to Los Angeles, five hundred and thirty-three miles; actual riding time sixty-five hours. Had we gone direct without touching at Slack Canyon, could have made it in four hundred and fifty-two miles.

I left Los Angeles via Pasadena and Penona to San Bernardino; then to Redlands, Riverside, South Riverside through the Magnolia Drive to Santa Ana; from there I visited Olive, Orange, Anaheim; then back through Whittier to Los Angeles, and winding around touching at these towns I covered two hundred and seven miles, making seven hundred and fifty miles in all; actual riding time was 87 hours.

My return trip was through the San Joaquin valley. I left Los Angeles road to Newhall; then crossed the Tehachepi Mountains via. Tejon Pass. At the summit I encountered snow and rain, was compelled to take the stage for a few miles until I reached Antelope Valley. From there to Bakersfield the roads were fine; I rode one hundred and fifteen miles that day. From there via Tulare, Fresno, Madera, Merced, Modesta, Lathrop to San Francisco, which is five hundred and eight miles; making in all twelve hundred and forty-eight miles. Actual riding time was one hundred and forty hours. Yours respectfully,

E. S. ELLSWORTH.

Advertising Axioms.

The reward of the faithful advertiser is certain.

Man advertises and the people make purchases.

"Many men, many minds." Many ads. in many publications, many buyers.

The name and quality of good goods can be advertised so as to be "more lasting than brass."

Make your ads. speak the truth boldly, and the people will appreciate your frankness and respond.

"From nothing (in the leading publications) nothing comes." From *something*, however, results are sure to come.

"May his fame endure forever"—the advertiser who advertises with sensible copy that appeals to the sense of the people.—By J. Walter Thompson, of New York.

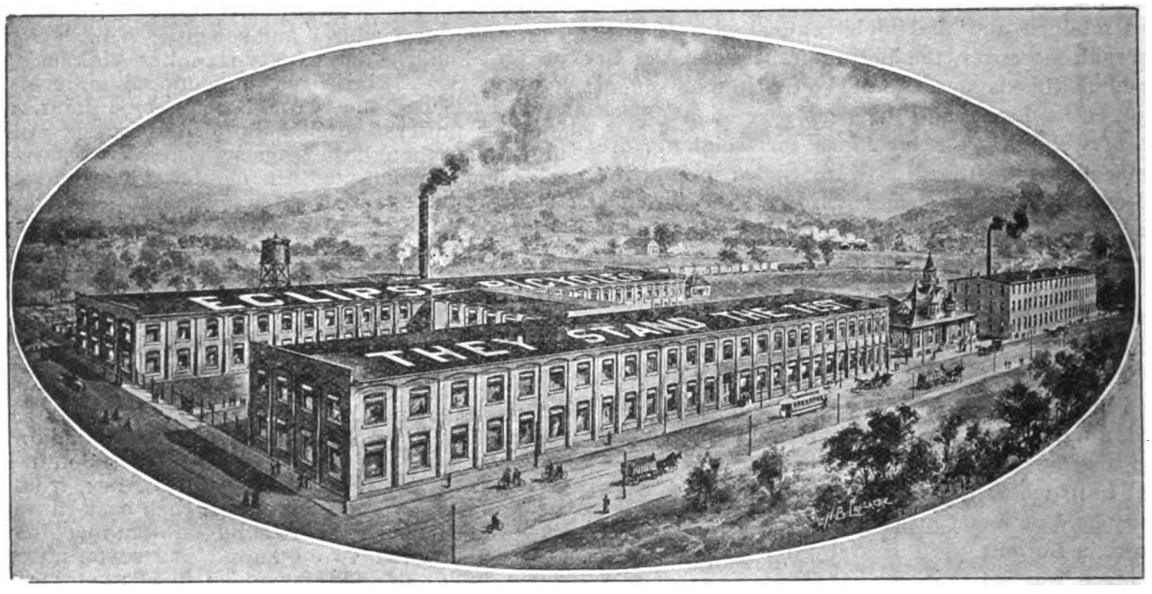
Eclipse Bicycle Works at Elmira, N. Y.

Few people have any idea of the extensive plant of the Eclipse Bicycle Co., at Elmira, N. Y., and the accompanying photo-engraving gives one some conception of their immense establishment, It is by far the largest bicycle factory in New York State, and ranks as fourth largest in the United States. The works are running to the fullest capacity, and are turning out 125 finished wheels per day, and not only the citizens of Elmira, but the general trade throughout the country, feel proud of such an establishment.

The company have already closed all their business west of Chicago, and are rapidly covering the East. Their foreign agencies in England, France, Germany and Russia are this year clamoring more than ever for goods. It is expected that in the near future they will have to add very considerably to their now extensive plant.

Considering the time this company broke ground for their new works, they have made an exceptionally good record. On the 5th of July, 1895, the contract was signed, with the agreement on the part of the contractor that he should have one wing of the building completed within thirty-five days, and that the entire plant would be ready to deliver to its owner within sixty days from the date of the signing of the contract. It was predicted by experienced men that it would be impossible to complete the building within the time specified, and persons experienced in the manufacturing business predicted that the Eclipse Co. would not have their machinery in operation before the first of January; however, they have proved that they are hustlers, and for the past month and a half have been turning out goods daily.

As the reader is aware, the company moved their plant from Beaver Falls to Elmira, and when it is understood that they took thirty-seven carloads of machinery and tools from that city, and since that time have had fifteen additional cars placed on their switch, containing automatic machines and other special bicycle machinery as well as an entire gas plant, that will turn out 25,000 feet of gas daily, also all the necessary appliances for an entire sprinkler system, consisting not only of an entire equipment throughout the building, but also a miniature water works, having reservoirs holding 70,000 gallons of water, besides a wooden tank holding 10,000 gallons, placed on a derrick, the top of which is fifteen feet above the building, one can gain an idea of the large amount of work that has been accomplished in that time.



The plant is heated throughout with steam, and is equipped with the latest devices for carrying off all dust that may accumulate about works of this description.

A novel feature of this company is an entire water works system outside their building. They have a large pamp with a capacity of 500 gallons of water a minute, and this is connected directly with their reservoirs, and they pump directly into a hydrant system which encircles their works. It has possibly the most complete water works of any factory in the United States.

The buildings are of the following sizes: Two buildings 325 feet long by 40 feet wide, connected in the centre by a building 50 feet by 60 feet, all two stories high, and one building 150 feet long by 40 feet wide, three stories high, besides boiler house, engine and dynamo rooms, blacksmith shop and enameling ovens. In addition to the above, the office building, which contains nearly as much floor space as some cycle factories, is a model of Queen Anne architecture, containing twelve large rooms beautifully finished in quartered oak and Georgia pine, with a beautifully finished veranda at the main entrance. The office is heated throughout with steam and lighted with electricity, which the company supply from their own plant.

The grounds around the factory will be beautifully laid out in the spring with fountains, palms, shrubbery and flowers.

The company are always pleased to see any of their friends and extend a hearty welcome to everybody interested in bicycles.

Commercial Travelers.

Commercial travelers who flourished at the beginning of the century would be astonished if they could see how business is conducted nowadays, remarks a writer in an English paper. "Bagmen" no longer confine their foreign journeys to a run on the continent, but they practically cover the whole face of the earth. One representative of a Midland establishment not very long ago visited the land of the Pharaohs, while another spent several months in India, with the happiest results. Now a well-known Birmingham firm have arranged for one of their staff to visit South Africa, and call on all the chief towns on the coast, and when he has exhausted these—without, I hope, exhausting himself—he is to hark away to South America, so that he stands a good chance of being absent from his own country for a year or more. Commercial travelers who make these long journeys must have strange experiences, and it is to be hoped some of them will be placed on record.

T. W. Williams, Eastern and foreign manager of the Bissell Carpet Sweeper Co., has recently been elected a director in the Citizen's Lloyds of New York.

Yale & Towne Chain Blocks.

In the issue last preceding somewhat extended mention was made of a handsome and comprehensive monograph on "Chain Blocks," just issued by the Yale & Towne Mfg. Co., Stamford, Conn., and New York. In this connection

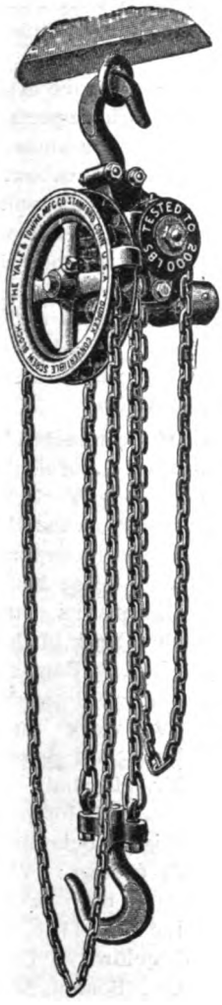

FIG. 1.

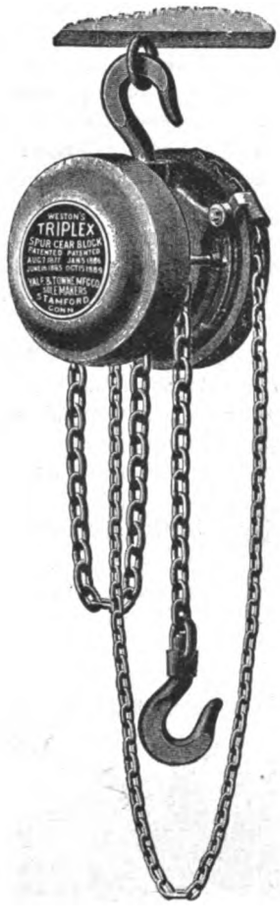

FIG. 2.

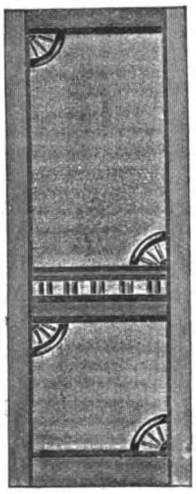
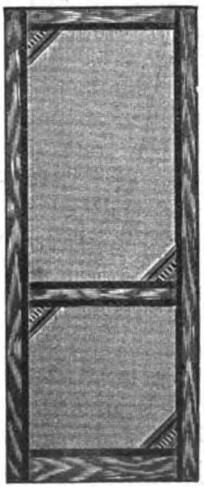
we are permitted to illustrate two of the lines shown in that publication. In Fig. 1 is seen a sample of the Yale Duplex Convertible Screw Block, which the company describe as the latest addition to the line of Chain Blocks made by them, and as "intermediate in efficiency and price between the Differential and Triplex types, and adapted to the widest range of uses." They add that "as indicated by its name, Screw Block, the leverage by which the hoisting capacity is obtained is that of a screw or, more properly, a worm and worm wheel. The device by which the load is sustained, and which acts in conjunction with the worm, is capable of conversion at the will of the operator so that a dispatch lowering action may be obtained when so desired." The detailed figures as to capacity, price, etc., may be found in the following:

Capacity In Tons.	Price Complete.	Hoist.*	Price Extra Hoist.		Net W'ght in Lbs.
			First Foot.	Additional Foot.	
½	$25.00	8	$1.80	$1.52	43
1	30.00	8	1.85	1.56	57
1½	40.00	8	1.95	1.60	76
2	55.00	9	2.00	1.64	110
3½	90.00	10	2.25	1.88	210
5	140.00	12	2.40	2.00	340
7	175.00	12	3.55	2.96	378
10	260.00	12	3.85	3.20	570



*Note.—Figures denote height in feet which blocks, with regular lengths of chain, will hoist from level on which operator stands.

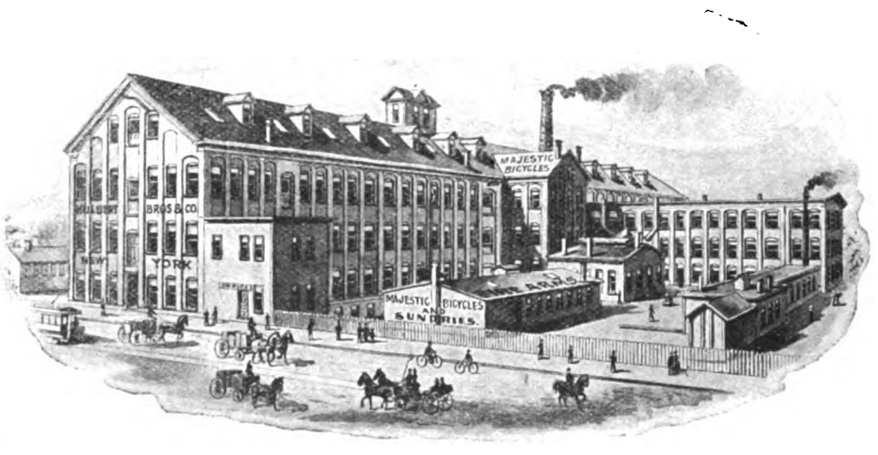


In Fig. 2 may be seen an illustration of the Yale-Weston Triplex Spur Gear Block, which, in this case, is shown in the direct form, without the lower block. The company state that it has "an actual efficiency of 79 per cent., or nearly three fold that of any other block, and constitutes a most remarkable advance upon all previous inventions in this class of machines." They add: "The trade name Triplex (Latin for three-fold or triple) has been adopted for this block because it has the three following important features, viz: 1. A triple gear, having the equivalent of three parallel shafts, each pair geared together. 2. A triple sun-and-planet-wheel motion, with three pairs of double pinions, ensuring equal distribution of the load and large wearing surfaces. 3. Three-fold efficiency of its predecessors."

In further description of the line they also say: "For sizes above two tons capacity the Triplex Block is made in the 'combination' form, in which, by using as many parts of a chain as may be required, the capacity of the Triplex Block may be multiplied to any desired extent, retaining the high efficiency of the direct block. Two forms of Triplex Combination Block are made, to meet the practical requirements. Type A is made with a wrought iron yoke, from one end of which the Triplex Block is suspended, while the end of the chain, or in larger sizes, the upper sheave, is held at the other end. The yoke is carried by the single upper hook and the entire combination is self-contained. This is the form more generally used, and meets the usual requirements completely. Type B omits the yoke, and uses instead two hooks, the Triplex Block and the upper sheave being separately suspended. This form is adapted for use with trolleys for overhead tramrail, or for permanent suspension from fixed eye bolts. The difference between Type A and Type B consists entirely in the mode of suspension; by varying the sheave combinations either form can be adapted to any capacity desired." Those who are interested, should not fail to send for a copy of this little book.

The Standard Oil Screen Door.

The A. G. Phillips Co., Fenton, Mich., manufacturers of wire screens, snow shovels and other specialties, have improved the design of their Standard Oil Screen Door, by cutting a scroll in the edges of the corner brackets, which practically makes a new pattern. This adds to the appearance of the door, and now gives the company what they state to be "one of the handsomest of cheap varnished screen doors." In this door the materials and workmanship are good, but the design permits rapid manufacture, and



but one coat of varnish is used, enabling them, as the company say, to "make extra low prices and yet produce excellent value." The company stand very high in that line of goods, and by push and energy and continuous presentation of their goods to the public, have built up a very large and successful trade.

The Berlin Iron Bridge Co., East Berlin, Conn., have just completed for the town of Houlton, Me., a new iron bridge 300 feet long and 18 feet wide, with a sidewalk 5 feet wide. The Bridge Co. furnished the entire bridge, substructure and superstructure complete.

Bicycle and Revolver Factory.

The accompanying illustration shows the firearms and bicycle factory of Hulbert Bros. & Co., located at Norwich, Conn. This business was established in 1865 on an extremely moderate scale, and has been in constant operation as well as of constant growth, ever since. The company is a close corporation owned for many years, and still jointly, by Messrs. Hopkins & Allen and Messrs. Hulbert Bros. & Co. For this reason most of the goods produced bear both the names Hopkins & Allen Mfg. Co. and Hulbert Bros. & Co. The building is equipped with the best automatic machinery throughout, electric lighted and strictly up-to-date. In fact no pains or money has been spared to make it absolutely complete and efficient. From the rough forging to the finished piece every operation is made on the premises, and it is in this way that goods of the quality produced are put upon the market at prices which commend themselves. All the shipping or orders and the handling of repairs are made at Norwich, while all the selling, correspondence and collections are transacted in the New York office. The building is four stories, of brick, running from street to street, and is built on the best fireproof plans. The floor space is about two acres, and the machinery being arranged largely in aisles, is perhaps easily gauged by the fact that there is one and one-half miles of it. The top floor is used for woodworking, such as gun stocks, fore ends, rims, etc., and the rear part of the same floor is used for the testing room—a most important department in every factory. The third floor contains the tool room and machinery for working small parts. The second floor is used chiefly for heavy machinery and stock room, with the assembling room on the first floor, and engines, dynamos and boilers in the cellar. The many duties in this plant are under the guidance of a corps of superintendents, each one being in full charge of his department, which departments are divided as follows: Woodworking, tool room, automatic revolver department, regular revolver department, rifle department, bicycle department, and specialty department. The two revolver and rifle departments manufacture about 200 varieties of firearms, ranging in price up to $25 each, with a minimum product of 250,000 arms per annum. The bicycle department makes but one grade, the very best, and makes this grade in four sizes; the minimum production being about 15,000 wheels. In the specialty section are made bicycle sundries, such as pumps, cycle grips, etc. The L is used for storage, shipping and repair department and the smaller buildings seen in the cut are the brazing and enameling rooms. All together, from bottom to top, the factory is complete in every detail for modernism, and unusually adapted to produce the highest class of work at the lowest cost.

The American Wringer Co. have recently fitted up in their new quarters at No. 29 Cornhill, Boston, which were formerly occupied by the Colby Wringer Co., one-half of their store for the stock and display of Bissell Carpet Sweepers. They will make a very attractive display in their windows and their outside advertising shows the high regard in which they hold the Bissell sweepers.

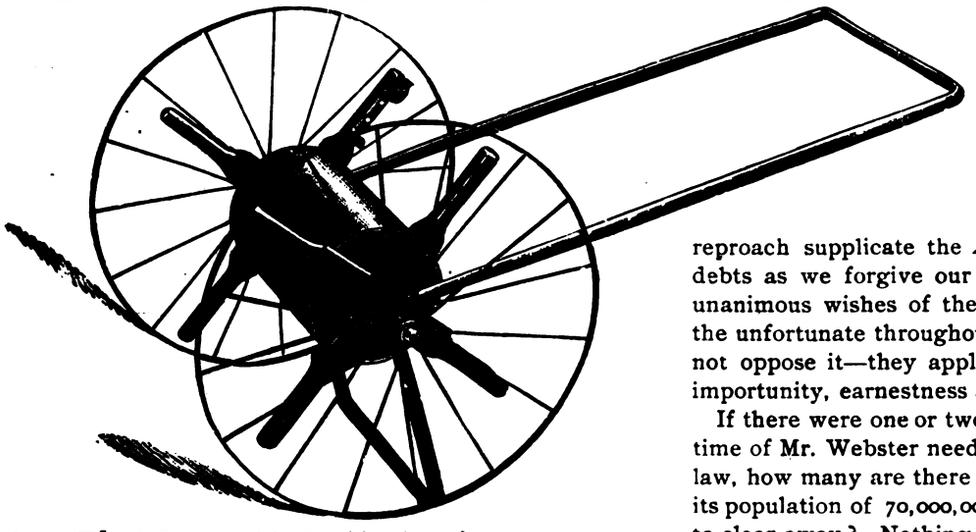
A Confidential Proposition.

Under date of January 10, 1896, the Troy Nickel Works make the following confidential proposition, which we hope every reader of *Hardware* will secretly preserve in his own bosom:

Fifty-million-dollar bonds will be placed on the market, providing we can get takers. It don't matter whether we can get gold or silver, one or the other will answer. We don't say that it will require this amount to move Alaska Knobs, Pokers, Lifters, Pipe Dampers and other specialties of our make, during the year of 1896. But, you know, the balance above our wants would be handy to have about the house, or when calling upon the trade. No bonds will be issued for less than one million dollars, as we do not want too many people interested. This call holds good until we get the money. This is open to only a few and we ask that you keep it confidential. Address all orders to Troy Nickel Works, Troy, N. Y.

Hardware Buyers' Association.

H. C. Marshall, having left New York and connected himself with the Marshall-Wells Hardware Co., of Duluth, Minn., the houses which he represented in New York, have joined each other in an organization known as the Hardware Buyers' Association, and have become incorporated under this title. Their headquarters will be at No. 107 Chambers Street, New York, in charge of W. B. Paulscraft, who will continue the work on the lines laid down by Mr. Marshall. The houses belonging to this Association are as follows: W. B. Belknap & Co., Louisville, Ky.; Bigelow & Dowse Co., Boston, Mass.; Dunham, Carrigan & Hayden Co., San Francisco, Cal.; Farwell, Ozmun, Kirk & Co., St. Paul, Minn.; the McIntosh-Huntington Co., Cleveland, Ohio.; Morley Bros., Saginaw, Mich.; Richards & Conover Hardware Co., Kansas City, Mo.; Stauffer, Eshleman & Co., New Orleans, La.



The annual meeting of the St. Johns, N. B., Iron & Hardware Association was held some evenings since at the Board of Trade rooms in St. Johns. The following officers and committee were elected: President, W. A. Thorne; vice-president, Thomas McAvity; secretary-treasurer, John J. Barry. Directors: J. C. Robertson, R. B. Emerson and S. Hayward. Executive committee, the officers and directors. Wholesale committee: W. H. Thorne & Co., T. McAvity & Sons, S. Hayward & Co., Kerr & Robertson, M. E. Agar, J. C. Robertson & Co. and Emerson & Fisher. Manufacturers' committee: J. C. Robertson, of the Portland Rolling Mills Co.; Geo. Ketchum, of I. & E. R. Burpee & Co.; Jas. Pender, of James Pender & Co.; R. B. Emerson, of Emerson & Fisher; Geo. McAvity, of T. McAvity & Sons; John Robertson, of J. Robertson & Co., and S. Sheraton, of Sheraton & Whittaker.

R. Nuttall & Son, Hardware and house furnishings, Nos. 1501–1505 South Second Street, Philadelphia, Pa., are sending their friends a handsome calendar for 1896. The company deal in lamps, glassware, queensware, tin, wood and willow ware and toys and novelties.

Digitized by Google

The "Toledo" Hose Reel.

The Toledo Metal Wheel Co., Toledo, Ohio, are placing on the market, with no small degree of success, the "Toledo" Hose Reel, illustrated in this connection. It is of steel frame, axles and wheel; is warranted by the makers not to swell or shrink; is described as light, handsome and strong. The numbers, sizes and prices are given as follows:

No. 1, Wheel Tires 9-16 inch wide, list, $30.00 per dozen. No. 2, Wheel Tires 1 inch wide, $36.00 per dozen. Wheels 20 inches diameter, tinned. Cylinder 12 inches wide. The company will be pleased to fill a sample order, and quote discounts on application.

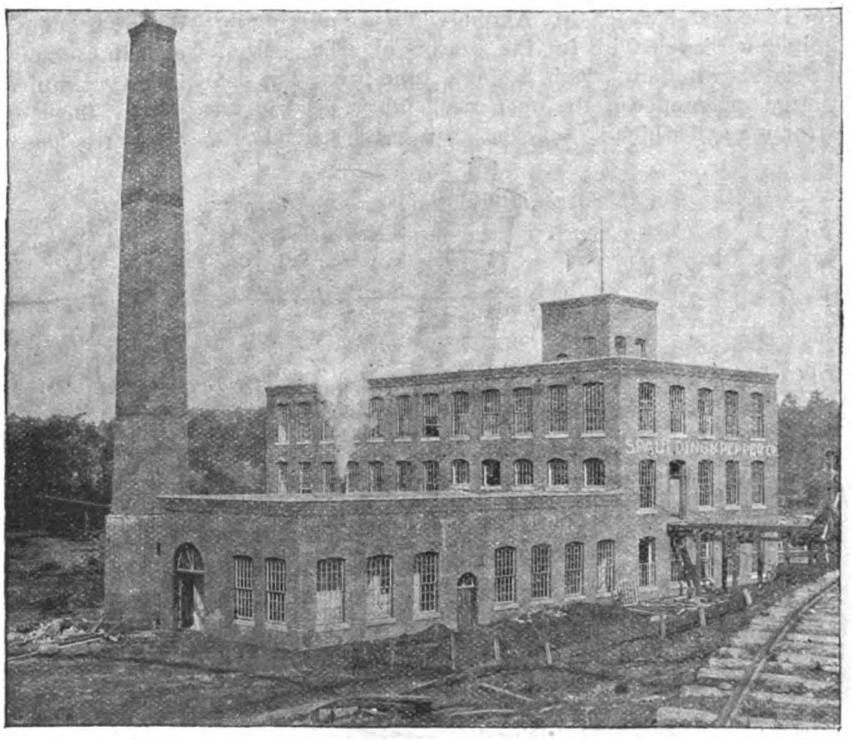
Spaulding & Pepper Co's. New Factory.

The handsome new factory here shown was recently erected and occupied by the Spaulding & Pepper Co., Chicopee Falls, Mass. It is of brick, three stories high, and is 100 by 50 feet in size, with a one story annex, 100 by 40 feet in dimensions. The works are run by a two hundred horse power Slater engine and two Hennessy boilers. The factory also contains a washer, three mixing mills, 16 by 40; one mixer, 26 by 60; one three roll calender, four hydraulic presses, one vulcanizer and a machine shop. The rubber machinery was furnished by the Farrel Foundry & Machine Co., Waterbury, Conn.

This great establishment is devoted to the manufacture of bicycle tires, and has a capacity of one thousand tires a day. The company employ one hundred hands.

The interests of the Spaulding & Pepper Co. are in the hands of men who understand the business from beginning to ending. Charles L. Pepper, treasurer and manager, was formerly connected with the Overman Wheel Co., and H. A. Middleton, the superintendent, is well known to the trade.

There will be six styles of single tubes made in the new factory, and one inner tube tire. The L. C. Smith Tire Co., Syracuse, N. Y., have contracted with the Spaulding & Pepper Co. to make and sell the L. C. Smith detachable tire for the coming season on a royalty; the patent rights remaining the property of the L. C. Smith Tire Co. The headquarters, which had been in Syracuse since the organization of the company, were closed after January 1, remaining open until that time to make necessary repairs and keep up the guarantee on the tires which had been sold during the past season. It is expected that the Smith tire for '96 will be somewhat improved, particularly in the quality of the rubber goods; but the mechanical device has been proven to need no change.



Daniel Webster and a National Bankruptcy Law.

"There are probably one or two hundred thousand debtors," said Mr. Webster, "honest, sober and industrious, who drag out lives useless to themselves, useless to their families, and useless to their country, for no reason but that they cannot be legally discharged from debts in which misfortunes have involved them, and which there is no possibility of their ever paying. . . . Can we lay our heads upon our pillows and without self-reproach supplicate the Almighty Mercy to forgive us our debts as we forgive our debtors? Sir, let us meet the unanimous wishes of the country and proclaim relief to the unfortunate throughout the land. . . . Creditors do not oppose it—they apply for it; debtors solicit it with an importunity, earnestness and anxiety not to be described."

If there were one or two hundred thousand debtors in the time of Mr. Webster needing the operation of a bankruptcy law, how many are there in the United States to-day with its population of 70,000,000 and with the debris of a panic to clear away? Nothing apparently but the natural inertia of a large body like Congress stands in the way of action which would do more, perhaps, than any other single measure to start the wheels of commerce moving in the right direction.

Why can't the leaders in both political parties get together and promptly enact a bankruptcy law that will be simple, quick and cheap in its operation?

The several salesmen of the Bissell Carpet Sweeper Co. spent a week of their holiday vacation at the factory and office of the Bissell Co., Grand Rapids, Mich. They have just started off on their respective trips, and will cover about the same territories as last year. The many new features that the Bissell Carpet Sweeper Co. expect to bring out this year will be very ably advocated by this excellent corps of men. Never were the prospects brighter for the Bissell Carpet Sweeper Co. than they are for the coming season.

SPAULDING & PEPPER CO.'S NEW FACTORY.

ILLUSTRATED BICYCLE NOVELTIES.

MANUFACTURERS and DEALERS are invited to make FREQUENT USE of these columns.

Anything NEW in BICYCLES or BICYCLE NOVELTIES should be sent us immediately. NO CHARGE, direct or indirect, is made, as our interest lies in SHOWING THE HARDWAREMAN what is going on in THE BICYCLING WORLD.

When your NOVELTY is ready, send us an Electrotype and descriptive matter, which will appear immediately.

Trenton Cyclometers.

The Trenton Watch Co., Trenton, N. J., are offering for the season of '96 three new cyclometers, models A, B, and C. Model A weighs 2¼ ounces and registers 1,000 miles

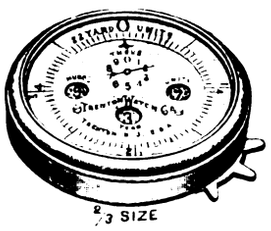

FIG. 1.—MODEL B.

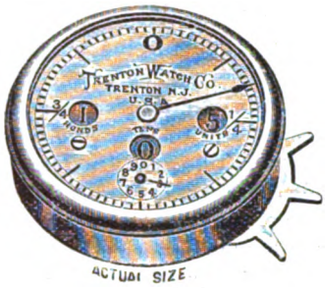

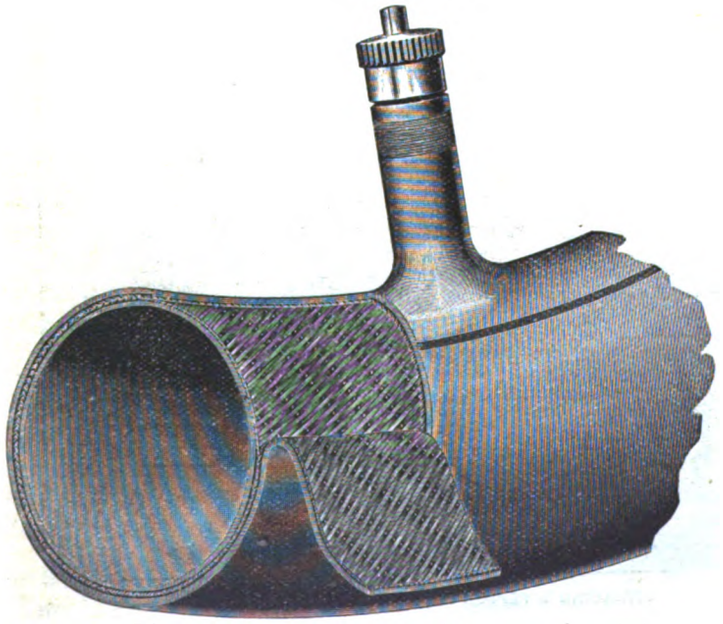

FIG. 2.—MODEL C.

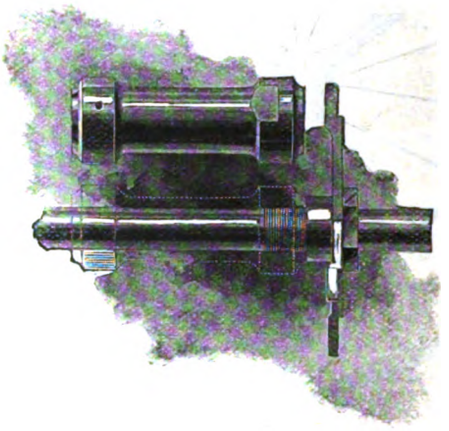
and repeats. Model B weighs 2¼ ounces and registers 10,000 miles and repeats. Model C weighs 1¼ ounces and registers 10,000 miles and repeats. The following points of excellency are said to be possessed by the Trenton cyclometers: Small size, handsome appearance, absolute accuracy, strength and durability, noiseless and positive action, extreme lightness, dust proof and waterproof, can be read at a glance from the saddle, beautiful satin finished aluminum dials which will not break or crack, polished aluminum case, which is but ⅓ weight of nickeled brass; scientific construction and careful inspection of all parts, can be run backward or forward at a high rate of speed without danger or injury to instrument or bicycle.

The Diamond "A" Road Tire.

The Diamond Rubber Co., Akron, Ohio, are offering an entirely new Bicycle Tire for the season of 1896, cut of which is shown here. It is a single tube tire. The cut shows the appearance of the open-mesh fabric used in its construction and which is believed to possess special advantages. The tire weighs four pounds per pair and is made in sizes from 22 to 30 inches by 1½ to 1¾ inches. It is remarked that the tire is durable and possesses resilience to a high degree. Roger B. McMullen & Co., Chicago and New York, are the selling agents for these tires.

Some Specialties of the '96 Lyndhurst.

One of the features of the '96 Lyndhurst, manufactured by McKee & Harrington, Nos. 173 to 179 Grand Street, New York, will be a double cone for the crank axle, as shown in Fig. 1. Both cones are turned in one piece, from



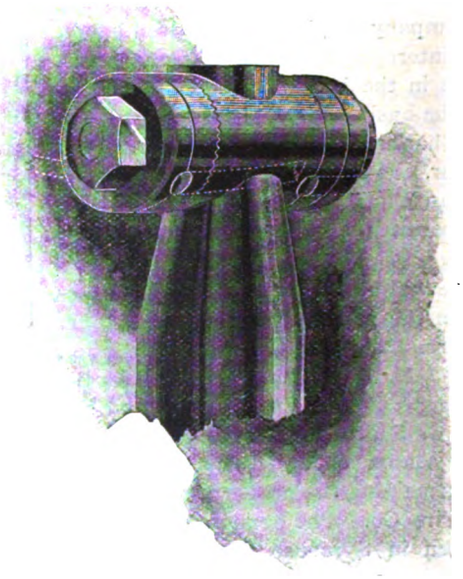


FIG. 1.

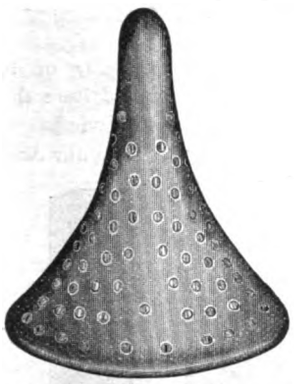
solid metal, tempered in oil and drawn to color instead of being case-hardened, and are ground into line on their individual axles in such a manner, it is remarked, that it is impossible for one line of balls to become out of true with the other. The cone is squared for a wrench, by which it can be screwed tightly against a shoulder end and, after being set-screwed, it is said to be impossible for it to become loose on the axle. Another feature of the Lyndhurst will be an adjustable seat post, making it possible to adjust the saddle to any angle and at the same time capable of being brought forward or backward. All the company's wheels will be fitted with a seat post which has three ranges of adjustment—raised or lowered, tilted up or down; brought forward or backward—a range of four inches in each direction. As is seen in cut its construction is very simple, consisting of four disks bolted to the post proper, these disks are milled in such a manner as to allow of the free passage of the springs of the saddle, as shown



F.G. 2.

by the dotted lines in Fig, 2. As they revolve on the bolt as a pivot, any angle may be obtained. The disks being dovetailed, the position is securely locked. Any saddle of the two-round-spring pattern may be used.

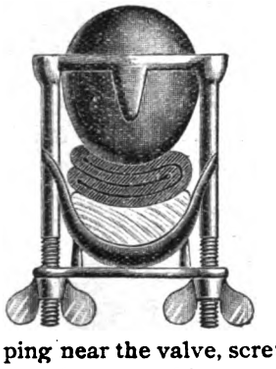
Digitized by Google

Detachable Saddle Top for Climax Spring Wire Saddle.

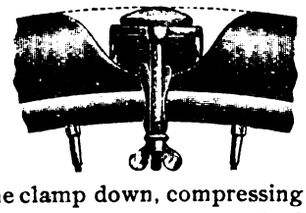
The Climax Mfg. Co., East Hampton, Conn., are offering the new '96 Climax Spring Wire Saddle with a detachable

laced cover, as shown here. The cover is referred to as being made of the finest quality of russet calf, and as giving the saddle a very finished and dressy appearance. Covers, it is stated, will be put on all of the company's saddles the coming season.

The F. and B. Air Tight Valve.



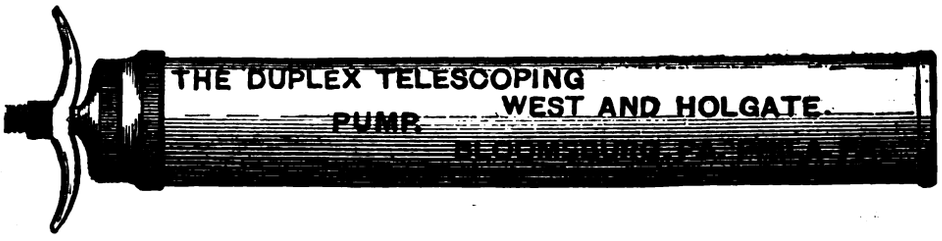
L. K. Buck, No. 82 Nassau Street, New York, has brought out the F. and B. Air-Tight Valve for pneumatic tires, as shown in the accompanying cut. It is a quick adjustable valve, simple in construction and made on entirely new



principles. It has the standard pump connections and will, it is said, fit any tire, and needs no wire cutting to adjust it. It is remarked that the action of this valve is perfect.

The Pneumatic Corker.

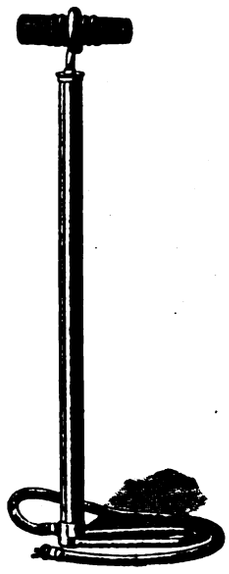
Anson Searls, No. 95 Passaic Street, Newark, N. J., is offering the Pneumatic Corker as here shown. It is a hollow rubber ball set in an adjustable clamp. Its office is not to mend the tire, but simply to compress it where it is punctured, thus preventing a leak and allowing the rider to get to a repair shop without trouble. In use the compression under the clamp drives the air into and inflates the top, making the pneumatic tread at the point where the tire is pinched, the ball taking the place of that part of the injured and compressed tire. The device is usually secured to the saddle post when not in use. When needed it can be applied in a few seconds, and lasts, it is remarked, almost indefinitely in case a permanent repair of the tire is not convenient. For tires having an inner tube lap-



ping near the valve, screw the clamp down, compressing the tire about two-thirds, not enough to prevent the air from running under the ball through the tube. Then inflate the tire fully and screw the clamp until the top of the ball is about even with the tire and firmly clamped thereon.

Duplex Pneumatic Tire Pump.

The accompanying cuts show the Pneumatic Tire Pump which West & Holgate, Betz Building, Philadelphia are putting on the market. The novel feature in this pump is its telescopic action. Owing to the length of stroke obtained from this method of construction, it is remarked that a tire is filled after 35 or 40 strokes, or about half the number required where ordinary single acting pumps are used. The piston runs the length of the smaller tube only, the valve on the plunger having its seat at the top of the lower tube. In operation both tubes are at work, causing a long stroke which materially shortens the operation of



filling a tire. The casings and piston are of brass, with steel tips, and the weight of the pump is about three and one-half ounces.

"Comet" Tire Inflator.

The Bridgeport Gun Implement Co., Nos. 313 and 315 Broadway, New York, are offering the "Comet" Tire Inflator as shown in the accompanying cut. The barrel is of hard, drawn seamless brass tubing, stiff as steel; highly polished and nickeled, as are all the parts of this pump. The rod is of steel, guided through the cap by a sleeve of sufficient surface to resist wear, and guided in the barrel by a long plunger head which protects the bucket from wear. The handle is of wood and is detachable and compensating for any wear or shrinkage, by merely turning it a little further in the ring of the rod, leaving, it is said, no possible chance of splitting or breaking. The foot piece is of steel, and when not in use, it is explained, may be folded in line with the barrel; when this is done and the handle laid along the barrel, the whole makes only a neat roll that fits easily in valise or trunk or may be strapped on to bicycle. The nipple to which the rubber tubing is attached is threaded into solid metal and has a valve, with bronze ball, that can never rust, and, it is said, may be removed for cleaning, if ever necessary. The pump is said to give double the air pressure of any other foot-pump, with one-quarter the exertion. It is equipped with Universal coupling. The length of barrel, 15½ inches; diameter of barrel, ¾ of an inch.

F. J. Groner, M. D., a well-known physician, read a paper some days since before the Grand Rapids (Mich.) Medical Society, in which he spoke as follows of the bicycle saddle that is being manufactured by the Automatic Saddle Seat Co., of Grand Rapids. After speaking of the saddles from a hygienic standpoint, he referred as follows to the one we have above named: "Some of our Grand Rapids people have gotten up the best saddle—everything considered—that I have yet seen on the market to overcome the objectionable features in a saddle that I have mentioned. It is a divided seat saddle, each section of the seat working with the motion of the leg. The seat can be widened to fit the rider, giving it the required opening in the centre. The Automatic Bicycle Seat allows the rider to propel his machine with facility and comfort. Its advent should be hailed with pleasure. You have something to sit on—you are not riding a rail. It is my opinion that this seat removes a positive danger from one of the most healthful of all forms of exercise."

NEW GOODS IN THE MARKET.

If you have anything NEW, let the world know it by illustrating it in these columns.

NO CHARGE WHATEVER is made, direct or indirect, as our interest lies in showing the readers of "HARDWARE" where the LIVE manufacturers and wholesalers are, and what they are doing.

When your NOVELTY or SPECIALTY is ready, send us an Electrotype and descriptive matter, which will appear immediately.

The Hardwaremen everywhere read this department; it is to your interest to make prompt use of it.

Foothold Dust Pan.

The O. M. Barber Stamping Works, Nos. 4-6 Harrison Avenue, Port Richmond, N. Y., are placing on the market the Foothold Dust Pan as represented here. In use the

foot is placed on the foothold as seen to the right of the illustration. Stepping naturally on it causes the pan to press closely to the floor. To move the pan from place to place, at the same time taking up the dust, the broom is placed on the front of the pan and lifted with the toe. The broom steadies the pan and prevents the dust from falling out. The point is made that the pan is a preventative against diseases arising from inhaling poisonous dust.

Moore's Storm Window Fastener.

The Stanley Works, New Britain, Conn., and No. 79 Chambers Street, New York, are offering the Storm Window Fastener as shown here. Fig. 1 shows the inside fastener. It is explained that with this fastener, storm windows can be adjusted from the inside in a minute with-

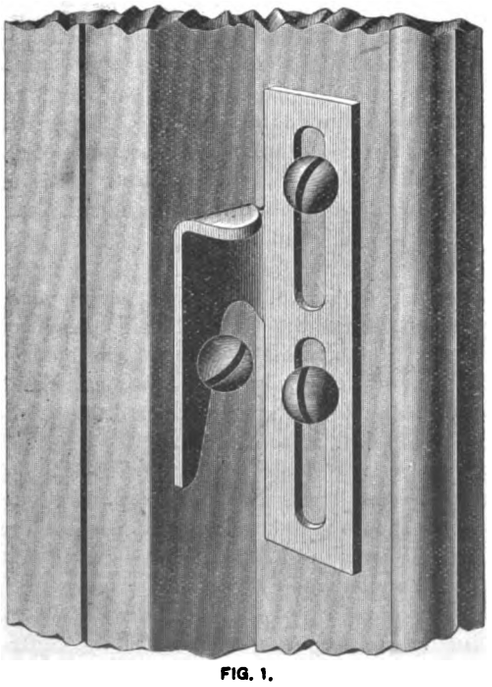

FIG. 1.

out the use of a screw driver or other tool than a small hammer, doing away with the inconvenience of climbing a ladder, and the windows are held in place more securely than in any other way yet invented. The cut shows the method of attaching the fastener, the flat surface being screwed to the storm sash, and the point mashing on to a screw in the edge of casing. The fastener is driven down with a small hammer, thereby drawing the windows as tight as desired. Fig. 2 shows the outside fastener which

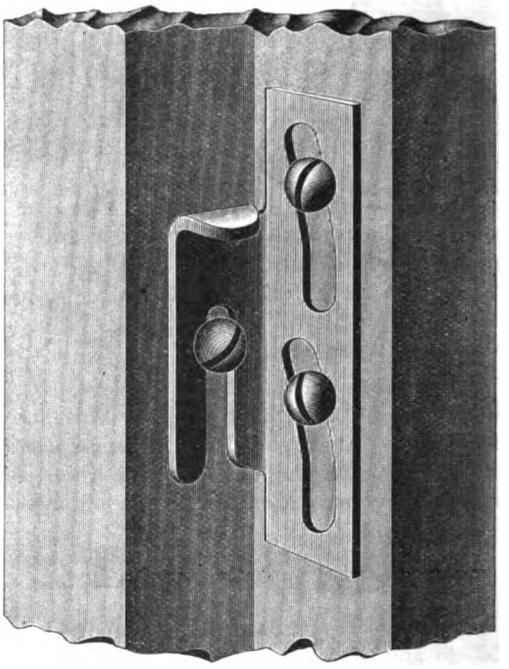

FIG. 2.

is designed to be used on any windows where it is not convenient to use the inside fastener. The method of attachment and adjustment is similar to the method used in connection with the inside fastener. The fasteners are made of wrought steel.

Stanley's Universal Plane.

The Stanley Rule & Level Co., No. 29 Chambers Street, New York, are offering the Plane represented in the accompanying illustrations. As shown in Fig. 1, it consists of a main stock, A, with two sets of transverse sliding arms, a depth gauge, F, adjusted by a screw, and a sliding cutter with stop. The letter B refers to the sliding section having a vertically adjustable bottom. The auxiliary center bottom C is designed to be placed in front of the cutter as an extra support or stop when needed. This bottom is adjustable both vertically and laterally by means of thumb screws and nuts provided for the purpose. In connection with the tool are two fences, E and D. The latter fence has a lateral adjustment by means of a screw for extra fine

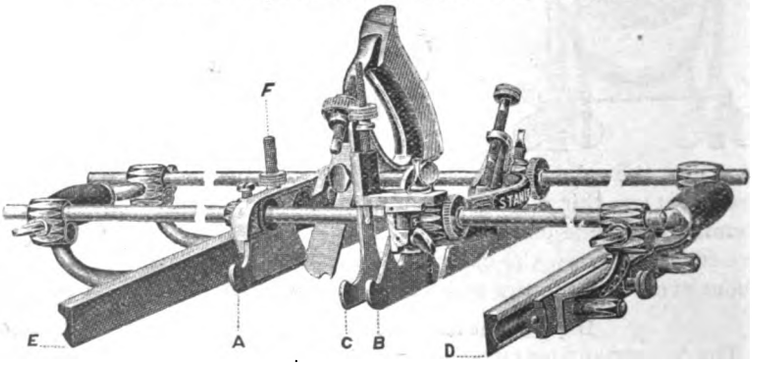

FIG. 1.

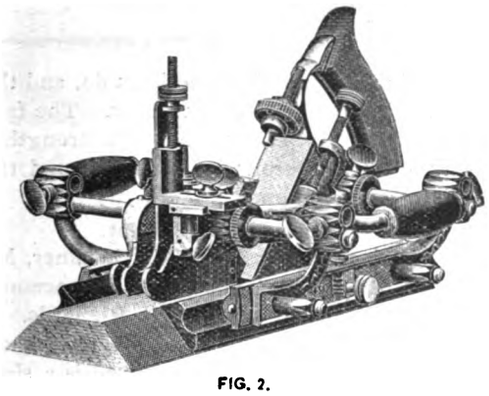
work, while fence E can be reversed for center beading wide boards. The fences can be used on either side of the plane, and the rosewood guides can be tilted, by simply loosening the screws on their faces, to any desired angle up to 45 degrees. When beading the edges of matched boards an adjustable stop is inserted on the left hand side of the

Digitized by Google

sliding section marked B. With each plane the makers furnish 52 cutters, thus permitting a very wide range of work. In Fig. 2 is the tool as it appears when used as a molding plane. In order to employ it for this use, the desired cutter is inserted and the bottom of the sliding, section B, Fig. 1, is adjusted to conform to the shape of the cutter, after which the section is firmly fastened by means of the check nuts on the transverse arms. When so required the auxiliary center bottom can be adjusted for additional support in front of the cutter. By tilting the rosewood guides on the fences E and D, moldings of various angles may be formed. For dado work the fences may be removed and the spurs set parallel with the edge of the cutter, after which a long adjustable stop is inserted on the left hand side of the sliding section. To use the tool as a slitting plane the proper cutter and stop are inserted on the right hand side of the main stock and either fence can be used as a guide. When the tool is used for chambering, the desired cutter is inserted, the fences are fastened on each side of the plane and the rosewood guides are tilted to the desired angle. The company manufacture a large number of cutters which can be used with this tool and will furnish special cutters to order, or blanks from which the workman can fill up any form he may require. The point is made by the makers that the arrangement of parts is such that in the hands of an ordinary carpenter the tool can be employed for all lines of work covered by a full assortment of so called fancy planes.



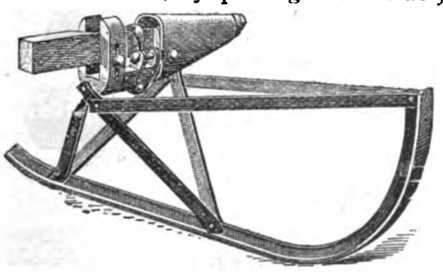


FIG. 2.

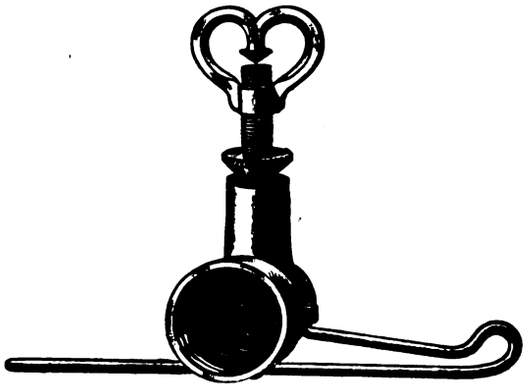
Schofield's Steel Runner Attachment.



Duane H. Nash, Millington, N. J., and No. 30 South Canal Street, Chicago, Ill., is placing on the market the Steel Runner Attachment as shown herewith. The runners are made entirely of steel and to fit all kinds of spring wagons and buggies, from the lightest size up to a 2-inch axle. The runners are provided with patent clamp fastenings, which are clamped to the square part of the axle, to relieve the spindles from all strain. It is explained that the fastenings can be attached so as to set the runners on the wide track if desired, by placing the inside jaws only

on the square part of the axles and the outside jaws on the spindles, giving the runners a range of adjustability. The oscillating bearings are below the axles; therefore, it is stated, there is no inclination to tip over in front. It is remarked that the principle upon which the runners are made and the material used in them secure the greatest possible strength with the least possible weight.

The Duplex Adjustable Sprinkler.

The Adams & Westlake Co., Chicago, Ill., are manufacturing the Duplex Adjustable Sprinkler, as here shown. It has no revolving parts and is therefore not liable to become clogged or to otherwise get out of order. The screw top enables it to be adjusted to high or low water pressure, to make a fine mist or heavy shower, and to use all kinds of

water. It can be used as a nozzle for washing windows. The device is made of brass, and nickel plated. It is packed singly in a pasteboard box and one dozen in a handsome display case.

The Eureka Carpet Tack.

The Eureka Carpet Tack Co., Nos. 312 and 314 Terrace, Buffalo, N. Y., are placing on the market the tack represented in the illustration. It is explained that the tack can be drawn with the greatest ease without injury to the carpet and with an ordinary tack claw; that it is easily driven; that the extended head

holds the carpet firmly and that the head forms no obstructions at door sills, as the nap of the carpet rises above the head, avoiding danger of stumbling. The New York agent for the tacks is W. H. Jacobus, No. 90 Chambers Street.

Columbian Novelty Co.'s Covered Glassware.

The Columbian Novelty Co., West Troy, N. Y., are placing on the market improved Oil Cans, Molasses Cans, Vinegar Cans, and Demijohns made of glass and covered with fibre as shown in accompanying cuts. A loop ¼-inch deep in the bottom of the covering keeps the bottom of the can from the floor. It is remarked that these cans may be washed and cleansed thoroughly, and are so constructed that they will stand any amount of pounding without breaking, also that the can may be set anywhere with the certainty that it will not leave an oil spot. It is explained that there being no obstruction at the bottom the can is transparent, and the quantity of liquid contained may be determined any time.

Digitized by Google

Bissell's Child's Sweeper.

The Bissell's Child's Sweeper, that had such an unlooked for sale prior to the holidays, the manufacturers say, has come to stay, and is destined to become an all-year-round

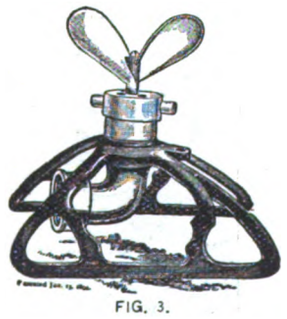
article. The housefurnishing trade say they will be used very generally as hearth brushes, a point which was not taken into consideration when the manufacturers first produced them. The accompanying illustration shows the article.

The Magic Nozz'e and Cyclone Sprinkler.

W. D. Allen & Co., No. 151 Lake Street, Chicago, Ill., are offering the Magic Nozzle and the Cyclone Sprinkler, illustrations of which appear herewith. The Magic Nozzle, Fig. 1, is a spray and solid stream nozzle which throws various varieties of sprays, varying from a fine mist to a

FIG 1.

solid stream; which, it is remarked, includes a spray that closely resembles the falling of rain drops. It is explained that it does not get out of order easily, and being fitted with a detachable tip, more than one sized stream can be obtained. The workmanship and material employed in the construction of these nozzles is said to be of a superior order. The Cyclone Sprinkler, Fig. 2, is one that will throw either a full or half circle, throwing, it is remarked, as much water on the half as on the full. It is pointed out that this half circle feature is a great advantage to anyone wishing to sprinkle his front lawn without wetting the sidewalk and passersby: being attached to a sled-like base, it can be easily moved about the lawn by the operator without turning off the water or getting wet. The actions of



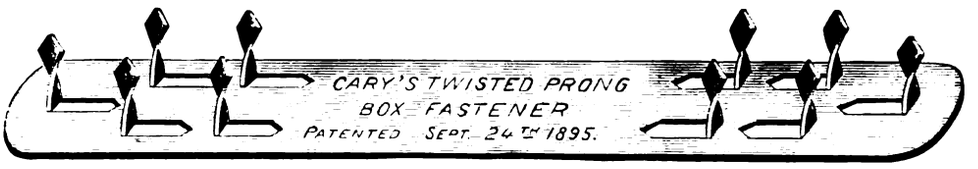


FIG. 3.

the revolving parts, it is explained, are very free and smooth, which is a great feature in revolving sprinklers, especially where there is none too much pressure.

Cary's Twisted Prong Box Fastener.

The Cary Mfg. Co., Nos. 5 to 9 Elm Street, New York, are offering a Twisted Prong Box Fastener as represented here. The advantages claimed for the fastener are as follows: That the twist strengthens the prongs; that the points are turned so that they usually start in the wood with the grain or less directly across it than with a straight prong; that it does not cut the wood as much as a flat prong driven directly across the grain; that as it is driven it assumes a screw-like action; that the twist allows the prong to pass to one side or to turn more with the grain in hard places of the wood, thus holding better against obstructions of this kind; that it does not crush down on the

wood as a straight prong will sometimes do, and that it approximates the holding power of a screw. The fastener is intended for use on the corners of boxes to strengthen them, and also on the sides where there is a strain and the package is liable to be forced open.

An Improved Axle Point.

The Wentworth Spring & Axle Co., Gardiner, Me., have introduced the Axle Point shown in the accompanying cuts. It is the invention of John E. Richards. The improvement consists of a washer D, on a conical neck F, and a flange, G, in the nut. The result sought is a simple and inexpensive axle point for light work that shall have the oil retaining capacity and cleanliness of the double nut for heavy work, and also be applicable to all axles. In operation, before the wheel is put on the arm, the oil-retaining and anti-rattling washer or packing, D, is screwed on over the thread. It is explained that the washer should fit so tightly that it must be screwed on, and that if so fitted it

FIG. 1.

will not pull off when taking off the wheel, but that when the wheel is removed the washer, D, will slip down on the small part of the neck, F, the wheel then easily coming off over it. When the nut is screwed up the flange, G, presses the washer, D, back on the part of the neck, F, thus expanding it against the inside of the box, making an oil-tight joint and a cushion to prevent rattle. The makers state that the improvement has been thoroughly tested on many vehicles with unvarying success; that the nuts are kept absolutely clean; that oil is prevented working around the box into the hub; that vehicles furnished with the improved point on "Long Distance axles" have been run six months without recoiling, and that it allows a small axle to be furnished for light work with every advantage that a

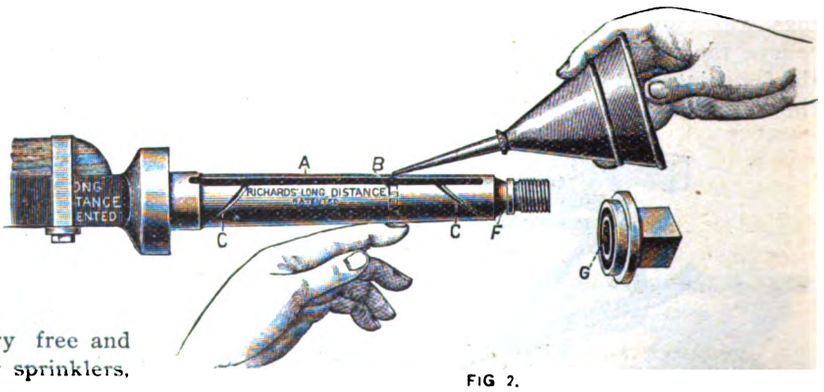

FIG 2.

double nut axle possesses, and with the addition of an anti-rattling cushion. It is shown that with this improvement it is unnecessary to screw nuts tight to keep oil on the axle arm. The improvement has been patented.

The Eureka Mole Trap.

The Atwater Mfg. Co., Southington, Conn., are placing on the market the Mole Trap as shown here. In Fig. 1 the trap is illustrated set, the uplifted ground being previously pressed down the length of the trap. The trap is placed

Digitized by Google

lengthwise on the burrow, with the trap pan, or flat piece, at the centre of the trap pressed firmly on the ground. The trowel, Fig. 2, has notches along the edges of the blade, around which one of the wires is placed, and the trowel

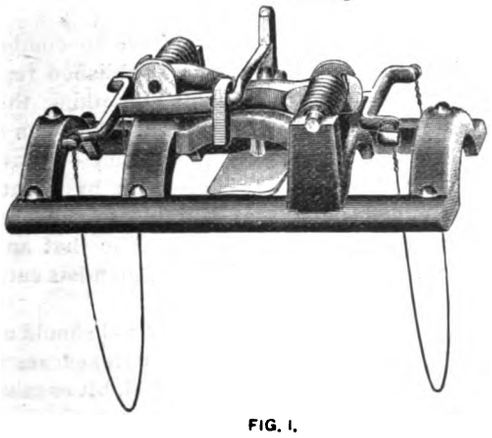

FIG. 1.

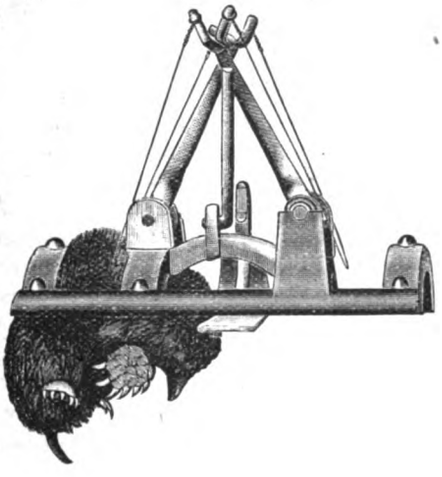
is inserted into the burrow between the openings at one end of the frame. The trowel is withdrawn and the other wire similarly treated, leaving the wires in the burrow. The arms are folded down as in Fig. 1, the trap set by a wire catching in a notch connected with trap pan, and the wires are attached to the arms of the trap. As the mole burrows under either end of the trap its head passes through one of the wires, and when its head comes in contact with the trap pan the pan is raised, springing the trap and drawing the wire tight under the animal, Fig. 3. The

FIG. 2.



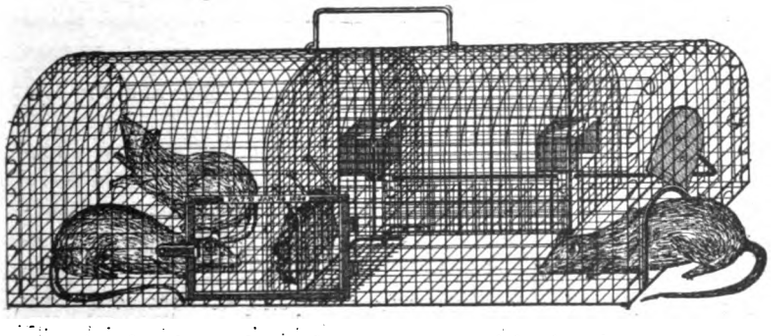


FIG. 3.

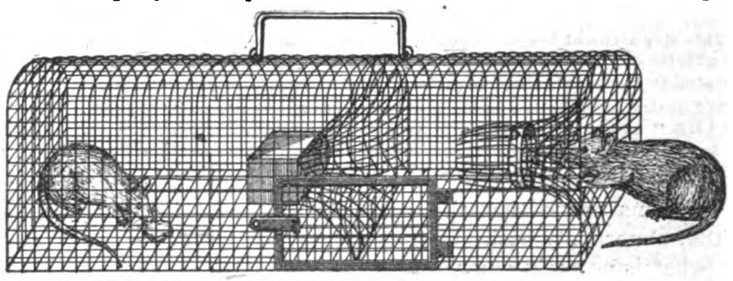
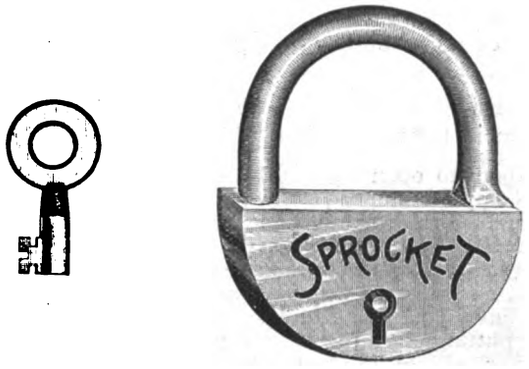


makers remark that the trap is practical, as it actually catches the mole, and that there is no getting away from it, that children and animals on the lawn cannot be harmed by it, and that the trap is easily set and operated. An instance is cited of one man catching eight moles from one hole with one of the traps.

Rat and Mouse Traps.

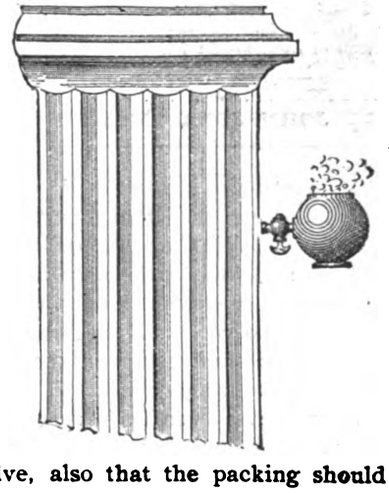
The Smith & Egge Mfg. Co., Bridgeport, Conn., have been so successful in the making and selling of their old reliable lines of goods, and have established so sound a



reputation for themselves, that any new article they introduce is looked upon by the trade as first-class and reliable in every respect. This holds good in connection with the new Rat and Mouse Traps which they are now successfully introducing and illustrations of which are here shown. The company call especial attention to the fact that these Traps

are well made, strong, and well adapted for the capturing of vermin for whose destruction they were created. They add that both Traps have been carefully and repeatedly tested, and that they "offer them to the trade feeling assured that they will give entire satisfaction." They will be pleased to send prices and descriptive circulars on application.

A Sprocket Lock.



Ryan & Neefus, No. 75 Chambers Street, New York, are placing on the market a new Sprocket Lock No. 1896, made in plain bronze, also bronze nickel-plated. The ac-

companying illustration is the exact size. They will be pleased to send prices on application.

The Vapor Valve.

The Vapor Valve Mfg. Co., No. 26 Cortlandt Street, New York, are offering the Vapor Valve as shown here. It is designed for use in connection with steam pipes or radiators. The manufacturers claim that by its use the air in a room can be kept moist and consequently healthy, and that the valve may be used as a deodorizer or disinfector, a few drops of kreasole, trikesol or sanitas placed on the packing of valve, having the immediate effect of perfuming the apartment. It is remarked that steam escaping through this valve makes no noise whatever. It is stated that anyone can attach the valve to the radiator and that it must be attached to the smooth, or on opposite end from

water or drip valve, also that the packing should be renewed occasionally.

ADVERTISING A RETAIL STOCK--II.

This department is conducted by an experienced advertising man. It will be devoted to questions of profitable publicity as especially related to the retail Hardwareman.

We desire to make it of practical benefit to the readers of "HARDWARE," and to that end invite you to ask any questions on advertising, make any suggestions, or send in your ads. for criticism. We will do our best to make the path of advertising easy for you.

It seems to me that the retail Hardware dealers are either abnormally bashful, or else have not yet awakened to what is becoming more and more patent to retailers in every other line of trade—the value of advertising as a means of increasing business, or building up a business from the foundations. Last month, when the first of these articles on retail advertising appeared, we put at the head of the column, in bold, black type, a request that the readers of *Hardware* send in any questions that might occur to them from time to time, on the subject; any ads. they might have, for criticism and suggestion; for advice, in short, on any question within the sphere of business publicity, and a number of responses have been received, but not so many as expected. This invitation was extended in all honesty. This department is for you, and we want to make it as practical as possible. You can help us by accepting the offer in the spirit in which it was given.

I received, a few days ago, the following letter from a gentleman in the western part of Pennsylvania:

I am about to open a general retail store here, and shall carry a complete line of Hardware, stoves and specialties. It is a small town of about 5,000 inhabitants, and there has been one Hardware store here for a number of years. I have a good location on the main street, near the center of the town. I want to do some advertising, and would be glad to have you make any suggestions. I had thought some of putting out a few circulars for street distribution as a starter. What do you think of the plan?

Yours very truly, J—E—C—

I like to receive a letter like that. It shows a spirit of progress, and opens up the whole subject of Hardware advertising from A to Z. For that reason I shall try to answer it here. The Hardware business is much the same the world over, and what is applicable to one case is, with very slight modifications, just as applicable in another.

Mr. C— is wavering before the temptation that assails nine out of ten men just launching a new enterprise—to flood the town with dodgers and circulars. I can only say "Don't." In ninety-nine cases out of every hundred it will not pay. The best evidence that it will not is that very few of the successful retail advertisers in any line use this method. I have talked with numbers of them and find them almost unanimous in condemning the circular. Few people ever read one, and those who do are not impressed. It has but a momentary influence and that is not the kind that brings trade. Think of it yourself—half the time you never even look at the dodger that is thrust in your hand as you walk along the street, much less think of being influenced by it to buy in the store it is supposed to advertise.

The one great point that Mr. C— will have to combat if his enterprise is to succeed, is the long established reputation of his competitor—that indefinable something that is spoken of as the "good-will" of a concern. This can only be done by a vigorous and systematic policy of constant talking into the ear of the public, backed up by a careful attention to every little detail that will please the chance visitor to his store; by persuading the public that an extremely energetic, wide awake and honest man has entered into the Hardware field.

Instead of the circular suggested by Mr. C— I should use a small booklet. It has the appearance of greater earnestness and force. It is not so much like a shot fired, hit or miss, in the air. Almost any printing house can get up a neat, tasty design, and the cost need not be more than $15 or $20 a thousand at the outside. Let it be well written, short and to the point—let it tell all about the new store—speak of the new stocks, fair prices, &c. Play upon the points of store arrangement, polite clerks, willingness to show goods without urging to buy, everyone welcome to come in and look around, and end up with a politely worded request for a trial from every household. Do not attempt to be elaborate or "funny." I should not attempt anything remarkable, even on the cover; call the book, say, "The New Hardware Store." The best blow in boxing is straight from the shoulder. The most effective method in business is to talk business.

I should send one of these booklets to the head of each household in a sealed envelope. This will add a little to the postage bill, perhaps, but the increased effectiveness will more than equal the extra cost.

The main object of the booklet is to arouse interest and curiosity. It will not do to stop there. A few days before the store is opened, and after the booklets have been sent out, I should begin to use the columns of the local papers. In a place of the size of the town in question I should use all the papers, as it is from practically the entire population that Mr. C— must draw his trade. If the town were large, and there were more than one or two papers, I should use the one or ones that circulate most exclusively among the class of people whose patronage I was striving to get.

The first ads. I should have merely as a further announcement of the opening of the new store. Something as follows could be used to advantage;

A New Store

on Main Street, near the centre of the town. Full of new, bright Hardware, fresh and clean. Everything from carpet tacks to stoves. Easy prices. Come in and look around. . . . . .

JOHN JONES, Main St

Up To Date

in every respect. At our new store, to be opened Feb. 1, will be found a complete line of Hardware, Stoves and Furnishings. Everything the newest, brightest and best.

JOHN JONES, Main St

A New Stock

OF HARDWARE

in a new place, at prices that will be new to you. Our new store will be open about Feb. 1. Come in and look around. . . .

JOHN JONES, Main St.

Do not in these ads. try to give all that you have in stock. As in the booklet, I should let the new goods and the low prices be the talking points.

On the day of opening I should come out with an offering of a special article at a special price, and should keep up that idea week in and week out. There must be something to draw people out of the rut. They have been in the habit of going to the other store. They will not change save for some good reason. At first they will come for the particular article offered. Gradually they will get in the habit of coming there instead of going to your competitor, and finally you have enrolled them among your customers.

Digitized by Google

Change the article offered every week, and make it with a due regard to the times and the season.

Along these lines some such ideas as these could be used:

YOU
CAN
LEAD

a horse to water, but you can't make him drink. We can offer you this week an elegant . . .

KITCHEN RANGE for $18.00

Same we have been selling for $23.00. What do you say about buying? . . . . . .

JAMES E. CLARK, Main St.

WE want you to know that we have the brightest and best of everything in the Hardware line at our new store. To tempt your investigation, we offer this week

Pie Tins - - 4c.

We have all you want at this price for this week only. Everything else just as reasonable.

JAMES E. CLARK,
MAIN STREET.

BARGAIN
THIS WEEK
IN
LAMPS
Every Style Every Price.
15c. to $6.00.
JAMES E. CLARK,
MAIN STREET.

I believe that this is the best and quickest method of establishing a paying business. The bargain idea is just as practical and just as effective in the Hardware line as in any other. Bargains are primarily to attract the attention. They are not profitable in themselves, save as they affect the future trade. In the face of the conditions that confront Mr. C— they will prove doubly effective.

In the case of a store already established the same general plan can be made use of to increase the business by changing the character of the booklet. The bargain idea is good under any conditions and is bound to increase the trade in the long run. I know that the margin of profit in Hardware is comparatively small, and that for that reason Hardwaremen shun the thought of bargains. It has been proven time and time again in every line of trade that the "bargain" offered is seldom the article which has the heaviest sale. The small reduction in price on one line will be more than made up by the increased sales in the others. ARTHUR B. CHIVERS.

Trade in a certain line of goods, writes an English dealer, which properly belonged to my business, was being rapidly monopolized by the department shops until the profit on these goods hardly paid the interest on the capital invested. I was tempted to give up this line, as many other retailers have been forced to do with goods they were accustomed to sell. Instead of yielding, I bought more, chance favoring me with a particularly desirable lot. I went through the whole line, and marked every article close to its cost; I engaged advertising space in two trade papers and contracted £20 worth of bill-posting in my locality. No matter for what purpose a person came in my shop, I introduced these goods and required my assistants to literally carry out the text, "No trouble to show goods." I soon noticed a decided increase in the sale of this once-despised stock. It is now the livliest stock in my shop. It brought new trade, who not only bought goods on which there was a more satisfactory profit, but recommended to me many customers.

The 1896 calendar presented by the Union Metallic Cartridge Co., Bridgeport, Conn. and New York and San Francisco, is a very handsome and striking creation. The scene depicted is that of an Arizona desert, showing in the foreground a Navajo war chief, mounted on his broncho, and decked out in his war paint.

Death of John E. Bassett.

The sad news comes of the death of John E. Bassett, of the firm of John E. Bassett & Co., dealers in manufacturers' supplies and general Hardware at New Haven, Conn. He had been ill for some six weeks with malarial fever and a complication of diseases, the prominent feature of which was erysipelas, and in his weak condition he was unable to rally. Mr. Bassett was born in Hamden, Conn., March 31, 1830. At the age of nine he removed with his father's family to New Haven, which has since been his home. Before this he had attended school in Hamden. He continued his studies in the public schools of New Haven, and finished them, when between fifteen and sixteen years old, at the Lancasterian school, then under the management of John E. Lovell. Not long afterward he entered the Hardware store of E. B. M. Hughes as a clerk, thus beginning his career with that establishment, which has been unbroken to the present time, marking him as having been longer in one place on Chapel Street than any other man now in business there. That was in 1846, and Mr. Bassett looked back over the sunshine and shadows of nearly forty years' association with this spot, formerly known as No. 236 Chapel Street, but now as No. 754, during more than thirty years of which period he has been a proprietor in the enterprise.

The business was first begun in 1784 by Titus Street, who continued it alone till 1792, when Samuel Hughes went in with him and the business was conducted under the firm name of Street & Hughes until 1802. Then it was Street, Hughes & Co., Street, Sherman & Co., Hughes, Sherman & Co., and Hughes & Sherman. Mr. Street retired from active business in 1821. Samuel Hughes continued the business after that with his son, E. B. M. Hughes. From the death of his father in 1838 E. B. M. Hughes conducted the business alone until 1855, when John E. Bassett was admitted to the firm. Mr. Hughes remained as senior partner until his death in 1864. In 1865 H. N. Jarvis became associated with Mr. Bassett as partner, remaining as such during three years, when he removed to Denver.

It will be noted that since the foundation of this business in 1784 it has never been sold out, a surviving partner always carrying it forward. The small wooden building in which it had its origin is but a memory now, but its successor, a little above, by repeated additions and enlargements, now extends from No. 754 Chapel Street to Nos. 318 and 320 State Street, thus appropriately encircling its birthplace. He took great pleasure in speaking of the antiquity of his house and in showing to curious visitors the little old safe, which was the only one in use in the store until the death of E. B. M. Hughes, and the quaint old ledger and blotter in which Titus Street kept the record of his daily mercantile transactions.

Exceptionally genial in address, he had many and warm personal frlends among the leading business men of New Haven and other cities. He was a Democrat, but not a politician; an attendant upon the services of the Episcopal church; and a citizen of public spirit and progressive ideas. Mr. Bassett had not interested himself largely in enterprises outside of his own trade, but had been connected in one way or another with a few first-class concerns, notably with the New Haven and Centerville Horse Railroad Co. as one of the incorporators and as its treasurer and president.

We have received the catalogue of the Union Heater Supply Co., Detroit, Mich. The company say: "We have excellent facilities for the construction of special gasoline heaters, and have manufactured both from our own designs and those of others, and can guarantee satisfaction on work of this character." The catalogue illustrates and describes the fire pots, furnaces, etc., manufactured by the company.

What They Think of Sager Saddles.

On another page the Sager Mfg. Co., Rochester, N. Y., show very conclusive evidence that they are not alone in the belief that Sager Saddles are superior and first-class in every respect.

It is not likely that a few years ago, when Mr. Sager first turned his attention to saddle construction, that he ever dreamed of making a saddle which would become so popular that a factory with a capacity of 2,000 saddles every ten hours, would be tested to its utmost to supply the demand, and that, too, in face of the fact that it costs more than any other bicycle saddle. But such are present conditions. The Sager Co. have made contracts with sixty-five of the leading bicycle manufacturers of the country in quantities of 1,000 and upwards, the largest contract being for 20,000. In addition to these are numerous orders for less numbers.

Believing this to be a showing of which any manufacturer of bicycle equipments might well be proud, the Sager people wrote a short note to each of the sixty-five manufacturers referred to, asking permission to use their names in a "Sager List."

This request was not only universally granted, but a large number of the bicycle makers in their replies took occasion to speak of the Sager in the highest terms, as the following extracts from some of their letters show:

PNEUMATICS ON ORIENTS.

Waltham, Mass., Dec. 20, 1895.

Sager Mfg. Co., Gentlemen:—In answer to your letter of the 19th will say: You can use our name in your advertisement, as users of the Sager Saddles on our entire output of "Orients," "Pneumatics" if you wish it so.

Yours truly, THE WALTHAM MFG. CO.

SAGERS FIRST.

Goshen, Ind., Dec. 19, 1895.

Sager Mfg. Co., Gentlemen:—In reply to your favor of the 17th will say that you may include our name in the list which you are about producing. In this connection we will add that in making up our order for saddles, we wrote very many of our agents as to what was best to purchase, and made contracts with those manufacturers whose names were mentioned oftenest, and will say that of the lot yours was the greatest. Yours very truly,

ARIEL CYCLE MFG. CO.

COST MORE, BUT WORTH MORE.

New York, Dec. 20, 1895.

Sager Mfg. Co., Gentlemen:—You are at liberty to use our name as being one of the manufacturers using Sager Saddles. We like Sager Saddles and recommend them highly to our customers. We know that Sager's cost more money than other saddles can be bought for, but we know that Sager's give satisfaction and we prefer to pay the advance price and not experiment. Truly yours,

THE LIBERTY CYCLE CO.

OBLIGED FOR THE OFFER.

Toledo, Ohio, Dec. 29, 1895.

Sager Mfg. Co., Gentlemen:—Replying to yours of the 19th, would say that we should have no objection whatever to your including our name in the list of manufacturers that you refer to. In fact we are obliged to you for your offer to do this, and, if we may be permitted to offer any suggestion, it would be that in your announcement you mention the name "Viking," as well as our name as manufacturers. Yours truly, UNION MFG. CO.,

WM. PETER, Owner.

GIVE SATISFACTION.

Kenosha, Wis., Dec. 21, 1895.

Sager Mfg. Co., Gentlemen:—Yours of the 19th at hand. It gives us pleasure to say that we have used your saddles in the past and are still using them on our Sterling Bicycles and they give good satisfaction. Yours truly,

B. J. MOORE, Gen'l Mgr.
STERLING CYCLE WORKS.

SAGERS ARE STANDARD.

Erie, Pa., Dec. 23, 1895.

Sager Mfg. Co., Gentlemen:—After two years' experience with Sager Saddles we have adopted them as a part of the standard equipment of Tribune bicycles for the season of 1896. Before making this decision we very carefully investigated the merits of the different patterns upon the market, but were unable to find anything of as high a class of workmanship, finish and material as the Sager.

BLACK MFG. CO.

These letters are simply a few from the many. It is not to be wondered at that the Sager Co. are proud to show to the trade such "certificates of character."

Biddle Hardware Co. on Wheels.

The Biddle Hardware Co., Philadelphia, are sending their friends the 1896 catalogue of A. Featherstone & Co., whose wheels are handled by the Philadelphia house, and being pushed with the vigor which characterizes everything done by that enterprising company. They handled the Featherstone wheels all last season, and the great success which attended their bicycle department has fortified them in the belief long since expressed, that this is one of the very best lines of jobbing wheels in the market. In touching upon the question of prices, Mr. Ritter, the manager of the company, says: "In our opinion the day has gone past for anyone to pay $100 for a bicycle, unless he wishes to do so for the sake of the name. I will add that we have never sold a machine which gives such entire satisfaction as the Featherstone line." The wheels comprise the Royal King, Royal Queen, Duke, Duchess, Prince, Princess, Middy and Midget. The catalogue to which we refer gives an illustrated description of each of these wheels with specifications, etc., and will be sent to anyone interested on application to the Biddle Hardware Co., Nos. 507–509 Commerce Street, Philadelphia. The house stands very high in the opinion of the Hardware trade, as it is, perhaps, needless to mention, and any guarantee that they make will, of course, be carried out. It may be no betrayal of confidence to quote an expression used in a recent letter from Mr. Ritter, in which he says: "We are Quakers, and drab and quietness are our characteristics, but when it comes to handling wheels and selling a quantity, we can truthfully say that we are in the very front of the procession."

The Columbia Calendar.

The Columbia pad calendar for 1896 has made its appearance, representing the eleventh annual issue, and handy and convenient as it has been heretofore, the new issue certainly surpasses any of its predecessors. The cycling fraternity, to say nothing of the general public, has acquired a decidedly friendly feeling for the Columbia calendar, and its annual advent is looked forward to with interest and pleasure. The new calendar contains a much better arrangement than in previous years, more space having been allowed for memoranda, while a greater charm has been added by liberal illustration and an unique and convenient grouping of dates, calculated to meet the hurried needs of business men, All these, however, merely form a setting for the bright and sparkling thoughts contributed by Columbia riders everywhere; for such a host of friends has the calendar acquired that it has become a customary practice for wheelmen all over the country to jot down their best thoughts and inspirations after being subjected to the exhilarating influence of a Columbia ride, and to send them in to brighten its pages. In addition to these pleasing features the moon's phases are indicated for the benefit of those who wish to know the best time for night riding. The many dainty sketches that embellish its pages render it indeed a work of art. Owing to the unusual demand last year a much larger edition has been issued for 1896. The calendar can be obtained for five 2-cent stamps by addressing the Calendar Department of the Pope Mfg. Co., Hartford, Conn.

Belgium possesses the deepest coal mine, the one at Lambert being 3,490 feet deep.

BICYCLE ANNOUNCEMENTS FOR 1896.

The Overman Wheel Co., Chicopee Falls, Mass., are sending out a novel catalogue for 1896. It is of Japanese design, and a fantastic dragon decorates the covers. The company's trade mark in red appears on the upper corner, while on the back cover on a red panel in true Japanese style appears the words "Victor Bicycles for 1896." The catalogue is printed on paper that helps the deception of its Japanese origin, and all through its pages are quaint and characteristic views of almond-eyed maidens and Japanese scenery. The catalogue is really a work of art. The company's wheels are fully described and illustrated.

E. C. Stearns & Co.. Syracuse, N. Y., are also enterprising enough to publish a spokesman. It is very attractively designed, the words "The Yellow Fellow" in that striking color, showing up to a great advantage on a black background. The front cover shows Earl H. Kiser, the star of the Stearn's team, on his Yellow Fellow, dressed also in yellow, which makes him a "Yellow Fellow." The little publication abounds in bright ideas and interesting illustrations, and is a credit to the company.

The Grand Rapids Cycle Co., Grand Rapids, Mich., have gotten out their 1896 catalogue. The front cover represents an enchanting view of the sea coast, where a party of cyclists are riding along the beach in full view of a clipper rigged ship. The company say: "The year 1896 finds us better equipped and in better position than ever to meet the exacting demand of a rapidly growing business. We wish to thank our friends and customers, who have been the indirect means of the establishment of our enviable reputation for producing unexcelled 'Business Bicycles.' Early in 1889 the first Grand Rapids Bicycles were made in the little shop illustrated on page 22 of this catalogue. These safeties were among the very first American made safety bicycles. From that small beginning our business has steadily grown to its present size. With new additions to our plant, the capacity is again double that of any previous year. Since we made the first New Clippers our aim has been to supply our friends and the trade with wheels that may be relied upon to satisfy the purchaser. For reference we point with pardonable pride to the thousands of New Clippers now in use. We shall continue the policy and practice of giving local dealers preference and selling direct to them rather than to the jobber under other names. Our New Clippers have gained for themselves a reputation as thoroughly good and reliable wheels, sold at reasonable prices to the very best retail trade throughout the country."

The Fenton Metallic Mfg. Co., Jamestown, N. Y., have sent out their advance bicycle announcement for 1896. The company say: "This small book is intended to give our numerous friends and patrons a short outline of our new models, preparatory to issuing our regular catalogue. We shall continue our policy of building only a strictly high grade bicycle, regardless of cost for material and mechanical skill, always endeavoring to maintain our present reputation for high standard of excellence. We cheerfully commend these condensed specifications of our 1896 models, and trust they will create enough interest in the reader to ask us for our complete catalogue, which will be gladly mailed."

The Syracuse Cycle Co., Syracuse, N. Y., have gotten out a striking announcement of their line of wheels, which includes the Syracuse pacer, Syracuse model D, Syracuse Thelma, Special Syracuse, Syracuse model C, Syracuse racer, Syracuse tandem, Syracuse racing tandem, Syracuse quadruplet and Syracuse quintette. The following Hardware jobbing houses are agents for the Syracuse Cycle Co.: A. F. Shapleigh Hardware Co., St Louis, Mo., wholesale distributors for Western and Southwestern territory; Farwell, Ozmun, Kirk & Co., St. Paul, Minn., wholesale distributors for Northwestern territory; Supplee Hardware Co., Philadelphia, Pa., wholesale distributors for South-Atlantic States.

The Empire Cycle Co.. Syracuse, N. Y., manufacturers of the Empire bicycles will offer two models for the season of 1896, *i. e.*, Empire model, No. 1, and Empire lady's. The company say "the Empire lady's wheel has been constructed with a view of placing within reach of the cycling public a handsome mount suitable for practical use. It combines all the latest principles in substantial bicycle construction. Though light in weight, it is strong and durable and will prove a serviceable mount. Especially commendable are its handsome lines and graceful drop-frame. In construction it is like our Empire model 10, made from the highest grade of stock and with the best possible skill in workmanship. These wheels have Nile green rims."

The 1896 catalogue of the Marion Cycle Co., Marion, Ind., is at hand. The company say "We herewith present our catalogue for 1896. Progress was our aim in ninety-five. Then need we say that 'expectations realized' was the gratifying report of the year just closed? For the coming year our design and construction surpass anything ever attempted by us, and is thoroughly up to date in every particular. For '96 we shall put upon the market the 'Halladay,' changing the name from the 'Halladay Temple Scorcher.' While the name of our bicycle is changed, there is no change in the management of the factory, Mr. L. P. Halladay still remaining in the capacity of president and general manager. We have more than doubled the capacity of our factory, and have added the very latest and improved machinery for cycle construction, and are better fitted than ever before to cater to the demands of the best people in the trade, which, we are pleased to state, we have been able to secure as agents for the 'Halladay.'" The company manufacture the Halladay, the Halladay racer, Halladay ladies' and Halladay tandem.

We have received the Humber specifications for 1896. The company will place on the market seven models, including Humber racer for track or road. Humber roadster, Humber tourist, lady's Humber, Knickerbocker lady Humber, Humber road tandem and Humber combination tandem. The American factory of Humber & Co. is at Westboro, Mass., and the New York office is at No. 318 Broadway.

Arnold, Schwinn & Co., Peoria and Lake Streets, Chicago, have gotten out an attractive advance announcement of their wheels. The cover shows their wheel and the world, which is the company's trade-mark, in raised work. The company say: "We desire the best representation in every city in 'the world.' We faithfully promise to furnish a most superior machine in material, construction and finish, so that our business relations will be of mutual pleasure and financial benefit." The company manufacture a line of seven wheels, including a standard roadster, a light roadster, a flyer, a ladies' wheel, a standard tandem, a combination tandem and a flying tandem.

The advance sheet of the Iver Johnson's Arms & Cycle Works, Fitchburg, Mass., will undoubtedly prove of great interest to the cycling public. The company say: "Fully appreciating the compliment paid us by the almost numberless requests for Iver Johnson catalogues which have come to us since our announcement that we should hereafter supply the trade direct, and desiring to issue a comprehensive and artistic catalogue, a matter which involves a considerable amount of time, we have thought it best to

Digitized by Google

send out this little pamphlet, which in a general way describes the Iver Johnson and Fitchburg cycles, the last being a well known bicycle of many years standing in the trade, but which until this season has been sold through a large jobbing house, under another name, but which has been manufactured by us since 1889. We have greatly improved this cycle, and it will be turned out with barrel hubs, improved chain and crank adjustments, etc., making a grade which few makers listing their goods at $100 can equal. The Fitchburg was sold last year by the jobber mentioned, at $100, and at that price gave universal satisfaction. We have greatly improved it in many ways, and have set the price at $75. Both the ladies' and gentlemen's model of th eFitchburg is *Fin de siecle*, and standard, in peints of design, materia and workmanship, and we are prepared to forward either model, singly at list, or in quantities to agents and dealers at a fair discount. We have been working our immense plant to its utmost for many weeks and can supply any and all demands promptly." The company will turn out six Iver Johnson cycles, including a racer, light roadster, ladies' light roadster, mens' tandem and combination tandem and three Fitchburg models—light roadster, full roadster and ladies' roadster.

W. H. Wilhelm & Co., Hamburg, Pa., will have five models on the market for 1896, including the Wilhelm gentlemen's wheel, model A, Wilhelm ladies' model C, Wilhelm ladies' model B, Wilhelm boys' model and Wilhelm girls' model.

The Relay Mfg. Co,, Reading, Pa., have published their fifth annual catalogue. The company say: "It is with pardonable pride that we present this, our fifth annual catalogue, to the public, not only because of the fact that we could not meet the demand for the Relays during the p' ' season, which fact is the strongest commendation anyone could wish, but that with unusual unanimity our patrons speak in the highest terms of the qualities of our production." The Relay line comprises a Relay special, Relay special flyer, Relay model A, Relay B, Relay model C, ladies' Relay and Relay tandem.

The Iroquois Cycle Mfg. Co., Buffalo, N. Y., have distributed their advance circular for 1896. The company say: "We beg leave to encroach upon your valuable time for just a few moments, and desire to let you know something about the goods we are manufacturing for the '96 cycle trade. We have, we consider, one of the handsomest bicycles ever turned out by any bicycle factory, and several new features to which we desire to call your considerate attention. We are prepared to take excellent care of a few good agents, and with such who will take the trouble to drop us a few lines we should be most pleased to communicate. The company's wheel is known as the Cayuga."

O. J. Faxon & Co., Boston, Mass. are very much pleased with their success in obtaining such valuable agents as Surpless, Dunn & Alder, and feel confident they have made no mistake in securing so worthy a house to represent their wheel in the State of New York. Surpless, Dunn & Alder have placed an order with them for a thousand wheels, and feel confident they can dispose of double that number. Owing to the fact of the large demand for Puritan cycles, Faxon & Co. have already sold their entire output and are now considering propositions for another factory.

The Lufkin Rule Co.

The Lufkin Rule Co., Saginaw, Mich., make he pleasing announcement that they have just completed the most prosperous year in their career, and that with their increased facilities in the shape of an addition to their factory and more improved machinery, they are in better shape at present than ever to attend to the wants of their customers. They carry a very complete line of steel and metallic measuring tapes, but they are yet unsatisfied as to the character and extent of their product, and intend to make more additions and spare no expense to keep up the high standard of their goods. They note with pleasure that the trade is beginning to realize the fact that American goods are superior to those of foreign make, and add: "We have demonstrated that better goods can be made on this side of the pond, as our measuring tapes stand preeminently at the head."

They are sending their friends a very amusing little cartoon, which suggests how the Venezuelan question can be settled. The idea is conveyed that the British lion has heretofore measured the boundary line with English tape, while the use of one made by the Lufkin Rule Co. would satisfy both sides, and mark the exact line. No doubt the Venezuelan commissioners will use a "Reliable Steel Tape" in determining the disputed boundaries, and the Lufkin Rule Co. assure us that they are stocking up their New York store, No. 2½ Murray Street, in anticipation of the heavy demand from foreign as well as home markets.

No Dispute Where Our Tapes Are Used. from New York World.

The latest poster competiton is one to exploit the Columbia bicycle, for which substantial prizes are offered of $250, $100 and $50, together, in each case, with a wheel, while the fourth award will be the machine alone, the value of which, being $100, adds just that much more to the prizes. Drawings and sketches entered in this competition must be on paper or other suitable material, 28 inches wide by 44 inches long, and in coloring and finish must be complete and accurate representations of the poster when finished. All drawings and sketches should be delivered in Hartford, Conn., on or before Saturday, February 15, 1896. Awards will be made immediately. Designs winning prizes are to become the property of the Pope Mfg. Co., to whom everything must be sent. Further particulars will be furnished upon application.

"Forged Cutter Blanks, Annealed," is the title of a leaflet sent out by the Crescent Steel Co., No. 480 Pearl Street, New York. It is announced that these goods are carried in stock, that round blanks are made to order of any desired quality of steel, and sizes, prices, etc. are given.

PHILADELPHIA HARDWARE DINNER.

The Tenth Annual Dinner of the Hardware Merchants' & Manufacturers' Association of Philadelphia, was given in Union League Club of that city, on the evening of January 23d. The guests and members assembled at about 6:30 and spent an hour in social intercourse. When the company filed into the banquet hall an unusual sight met their eyes, the beauty of which will no doubt long dwell in their minds. The tables were arranged in the form of two ellipses, one within the other, and were profusely decorated with evergreens, cut flowers, colored candelabra, small potted palms, lawn mowers tied with gorgeous red ribbons, while scattered around at random, were other articles, identified with the trade, such as saws, hammers, files, coffee mills, meat cutters and many articles of a similar character. The walls of the hall were completely hidden from view to about the height of ten feet, with palms, flowering shrubs in pots, small pine trees aud other plants. The beautiful crystal chandelier in the center of the room was festooned with foliage, while falling from the sides to supports on the tables were long trailing vines of Virginia creeper in blossom. In one corner of the hall a string band behind the dense and luxurious decorations, discoursed sweet melodies during the evening. At the plate of each guest was a handsome menu card bearing the following: "Tenth Annual Dinner Hardware Merchants and Manufacturers Association of Philadelphia," and showing a merry party around the festive board. It also contained the order of toasts and the names of the guests and members of the Association. The menu was an appetizing one and is here given:

MENU.

Lynn Haven Bays, Clear Green Turtle Soup,
Baked Fresh Shad,
Cucumbers, Bouchee a la Capuciner.
Arrack Punch,
Saddle of Canada Mutton, Fresh Peas,
Bermuda Potatoes,
Terrapin, Lettuce and Fresh Tomatoes,
Cheese,
Neselrode Pudding, Coffee.

After partaking of the good things prepared for the inner man, and when cigars were in order, Chairman, W. W. Supplee called the meeting to order, and those present prepared themselves for an intellectual feast. The order of toasts was as follows:

TOASTS.

INTRODUCTION OF OUR NEW PRESIDENT BY THE RETIRING PRESIDENT AND CHAIRMAN OF THE EVENING, - - - - - William W. Supplee.
And the night shall be filled with music
And the cares that infest the day
Shall fold their tents like the Arabs
And as silently steal away.—Longfellow.

ACCEPTANCE AND RESPONSE BY THE PRESIDENT-ELECT, - - - - - - - Samuel Disston.
Boast not of what thou wouldst have done
But do what then thou wouldst
Thou seest it in thine hand.—Milton.

TENOR SOLO, - - - - - C. Stanley Hurlbut.

JUNIOR PARTNERS, - - - - - William D. Supplee.
Might have gone farther and fared worse.—Heywood.
Wisely and slow: they stumble that run fast.—Shakespeare.

THE RELATION OF BUSINESS MEN TO MUNICIPAL AFFAIRS, - - - - C. Stuart Patterson.
If to do were as easy as to know
What were good to do,
Chapels had been churches
And poor men's cottages palaces.—Shakespeare.

BARITONE SOLO, - - - - - - Frank W. Huff.

MODERN BUSINESS METHODS, - - - - H. H. Bishop.
Let me stand to the main chance.—Lyly.

OFFICE BOY, - - - - - - Frank Taylor.
Shall I stop to do't? No! No!
Although the air of Paradise did fan the house
And Angels officed all.—Shakespeare.

SONG, - - - - - - "And the Band Played On."

AMBITION, - - - - - - - - T. James Fernley.
They tell me thou art rash and vain,
A searcher after fame,
That thou art striving but to gain
A long enduring name.—Whittier.

Mr. Supplee addressed the gathering as follows:

SPEECH OF WILLIAM W. SUPPLEE.

Gentlemen of the Hardware Merchants' & Manufacturers' Association and Invited Guests: It is both my duty and pleasure to extend to all present a sincere and hearty welcome to this, the Tenth Annual Banquet of our Association, and to the invited guests I desire to extend an especial welcome.

Two short years ago when I entered upon the duties of presiding officer of this Association, ex-president Fayette R. Plumb proclaimed aloud, "The King is dead, long live the King." These same words are now both applicable and appropriate. Having been elected for two successive terms, which is the limit permitted by our constitution and by-laws, my official career has ended, and I will soon present to you our newly-elected president.

Mr. Samuel Disston needs no formal introduction to those present. His name is well and favorably known over our entire city. He is also connected with and represents a firm whose name has not only a national reputation, but I can safely say is known over a greater portion of the civilized world. Is it therefore any wonder that I repeat what I recently stated before the members of our Association, that my successor was not only my choice and preference, but what powers of persuasion I possessed were used to induce him to permit a nomination, which, when first suggested, he emphatically refused, and only at a later date further vigorous persuasion induced him to accept.

The garments of authority worn by my predecessors and laid aside spotless and unsoiled, and which I have endeavored to conscientiously and creditably sustain, are now fittingly placed upon Mr. Disston's shoulders, and I but voice the sentiments of all our members when I state that they are equally secure and safe in his hands.

Our Association has been an object lesson to those not only in our line of trade, but other occupations—indeed has extended into the halls of finance. We, therefore, may be permitted to feel proud that we were not only the first Hardware merchants and manufacturers to couple social enjoyments with business problems, and in taking the initiative not only brought harmony out of chaos in our midst, but set an example which now extends into almost every State in the Union.

The President of the Philadelphia Bourse recently stated that the present era might well be called an era of organization. In this he is unquestionably correct. Mr. Clark stated: "Efforts through these organizations could be directed with the compact precision of the rifle bullet, instead of the scattered fire of the blunderbuss." These words were spoken at the recent opening banquet of the Philadelphia Bourse, a building which does credit to the president and officers who carried it to a successful completion, and which is now a credit to our city, and I believe the results will be of incalculable benefit to our commercial, industrial, financial and other interests.

Several of the members of our Association were among the first to extend financial aid to the enterprise. We were among the first to secure rooms, and the first to hold a meeting in the general assembly room.

Within the walls of this building it is the desire and intention that all of the many organizations of our city shall center. Already one organization of two thousand members; another of from five to seven hundred members have responded with handsomely furnished rooms, while nearly all other organizations in our city have correspondingly shown their appreciation of the enterprise.

Scattered individual efforts, like the scattered shots of

Digitized by Google

the blunderbuss, may be concentrated through organization where commercial sentiments and business interests can be discussed, fostered and culminated, but the most splendid and gigantic possibilities of our natures, abilities and energies must remain unrealized and our social qualities remain undeveloped if we live entirely within the four walls of our warerooms, or the environment of our own homes.

We recognize the fact that rivalry in trade may be fierce, vigorous and unyielding, yet neither the efforts of the or the intensity of the salesman should extend beyond "a high standard of business methods."

In these methods intelligence, wisdom and prudence should be the guiding star and characteristics of our efforts, and the weapons used should be so guarded and chained that they may not be of a demoralizing nature. not traduce the character of competitors, for this is the most ignominious of all evils.

In the words of *Iago*, "He who steals my purse steals trash. 'Tis something, nothing. 'Twas mine, 'tis his, and has been the slave to thousands. But he who filches from

WILLIAM W. SUPPLEE.

me my good name, robs me of that which does not enrich him, but makes me poor indeed."

"Beware of jealousy, oh my lord! It is a green-eyed monster, which doth mock the meat it feeds on."

During the past two hours we have been seated in a bower of tropical and other living plants, with a background of one hundred standing sentinels of evergreens, within the sound of the soft strains of music, with only the symbols and ensigns of trade, table decorations (which are distinctively our own), to remind us of the outside world.

Having finished the first part of our program, "eat, drink and be merry," we will now enter upon the intellectual feast of the evening, where reason sublime, wit supreme and music enchanting will delight us, not thinking of to-morrow, which W. D. Howells describes as follows:

> "Old fraud, I know you in your gay disguise,
> That air of hope, that promise of surprise;
> Beneath your bravery as you come this way
> I see the sordid presence of to-day.
> And I shall see long ere you are gone
> All the dull yesterdays that I have known."

I now take pleasure in introducing our newly elected president, Mr. Samuel Disston.

Mr. Disston here arose.

Mr. President:—I take pleasure in presenting you with this beautiful gavel, given by your friends, who are members of this Association. The gift, although a token of esteem and goodwill, is but small in comparison to the sincere feeling towards you in the hearts of those who present it, and who feel that this symbol of authority will be used by you in a manner which will do both credit to yourself and our members, who will always cheerfully submit to your wise rulings.

Chairman Supplee then introduced Samuel Disston, who was greeted with hearty applause. Mr. Disston responded to the effect that he felt honored by the choice the Association had made, and assured his hearers that he would serve them to the best of his ability. Mr. Disston was followed by C. Stanley Hurlbut with a tenor solo, which was so well rendered that he was encored. W. D. Supplee next responded:

SPEECH OF W. D. SUPPLEE.

Mr. President and Gentlemen:—When called upon in advance by your committee to address the members of your Association, with their invited guests, and remonstrating that my name be even suggested, I was advised by your genial and hearty secretary, "Oh, speak; go ahead, Will; we have selected all new speakers, all novices—men who have never spoken in public before," and thus through his eloquence I allowed him to use my name as a member of the supposed new Kindergarten Class. However, seeing as I do on your menu the names of such men as Messrs. Disston, Patterson, Bishop and Fernley, I confess to my feelings as more resembling a youthful student, speaking in such company as college professors.

While fully appreciative of the honor bestowed on me by your committee, in granting me this opportunity of addressing you, I must acknowledge a certain reluctance in assuming what might be considered the duties of an after-dinner speaker, that duty being understood by me to be to either amuse or instruct. The former I dare not attempt; the latter, with before me the sages of the trade, of the bar, and of our municipal authorities, I cannot.

While numerous are the advantages the younger men have to-day over their seniors, whose early efforts were directed toward the winning goal, without that kindly and possibly fatherly assistance that only experience can grant, there is one advantage especially worthy of note that it is our privilege to enjoy. It is: the Association whose guests we are to-night, an Association whose name has won for itself a place second to that of no local Hardware association in the country—nay, more, an Association I feel safe in saying is second to that of no local trade organization of any trade in the country.

The Association has placed us young in life on the friendliest of terms with our competitors; it has even placed our competitors on that basis of friends and true ones.

As we well know, only a short time prior to the formation of the organization, many of our city jobbers were unacquainted with each other, while to-day one and all are on the best terms, and it is an every day occurrence to see and meet our competitors for a happy lunch hour.

It is a regret to me that more do not take advantage of the opportunity granted them of attending the meetings, profiting by the words of wisdom, by the experience they could gain, which will possibly not show direct results at the moment, but will undoubtedly bear fruit later on.

Mind, I would not have "The Junior Member" usurp the senior's privilege; we want them both; we want and need the seniors for their wise and good instruction; we want the juniors for their own good and advancement into the paths of knowledge, as what better school is there than contact with fellow-man?

The "Junior Member" may, undoubtedly, nay, I can safely say, will, undoubtedly, feel at first his importance; it were well, however, that he hide the same for reasons too good to need explanation. Chide him not if these feelings exist. If the young man has not his own advancement

Digitized by Google

sufficiently at heart to feel proud of its appreciation being shown by his seniors, I would feel that his energy and push were lacking.

While he may give to his partners his time, brains and devotion, he lacks for them the pride to the further advancement of the house itself if he lacks it in his own makeup.

By the law of faith in human nature, we must at times feel our views are those that are right, our side of the question the correct one, and in presenting them, recall that the decisfon on the other hand emanates from those who have had that wonderful schooling—experience; those whose knowledge we seek have ever been alert to the best ends in view; they have been enterprising and progressing, and their success has mainly been won by the combination of courage, tact, brains aud industry.

To those beneath us, let us endeavor at all times to show that respect, show that appreciation of the work of others that we always appreciated when we were one of the grand and noble army of the public at large. Kind words shown in return for good and honest work will never cost you a penny, and they are more likely to add to the profits of your house. Use them, therefore, in place of harsher ones.

When decision is necessary, do it not under heated brow, but cool your senses that on the morrow there may not be regret at your action, but only for the cause that necessitated it.

With the growing trade of a house, or even the maintenance of its past standard, there is, necessarily, work, and lots of it. We need what I may term stick-to-ativeness; for this quality there is no substitute; learn what to do, learn how to do it, and then see that you do it.

Neither the shirker, the laggard, nor the braggard, has a place in the position coming under the head of my text.

I can recall even now the thoughts I had when in attendance at my first dinner given by the Association. I had listened to words of wisdom from the wise men themselves, I had feasted well of the usual bounteous board, and then, as has more than once since come the thought: these are sturdy warriors, they have fought, they have battled with competition, with panics, with troubles, and with difficulties which I, as one of the younger men, may hope never to experience. Most of them have started with only their small earnings as their capital; they have grown from a small and almost unknown house to a rank where recognition is general and esteem is universal.

To these men, such as Messrs. Allen, Ghrisley, Peters, Griffiths, Biddle, Seltzer, and, I may add, the head of my own house, with Messrs. Disston, Plumb, Barnett and McCaffrey, we look with pride and even love. We are proud of the name that they bear.

We love them for the battles they have won, for the good and great counsel they have given us, and the "Junior Member" hopes that when the hairs on his head may have become gray from the daily trials of this life, when his shoulders may have become bent from the burdens they have borne, and the wisdom that he has gained from experience may have placed him in that position, when we can return honor for honor bestowed, that those now young, now unborn may look on him with the same esteem and respect that our eyes and heart see and beat to-day, for these are standard bearers, and I know that I express the wishes of one and all when I say, all honor to those who have so faithfully paved our way.

C. Stuart Patterson was next introduced, and answered in an able manner to the toast, "The Relations of Business Men to Municipal Affairs."

Frank W. Huff was then called upon for a baritone solo, which delighted his hearers, and he was called upon to repeat.

T. James Fernley, the secretary-treasurer of the Association, then read a letter from Peter McCartee, the President of the New York Hardware Club, expressing his regret at his inability to be present. H. H. Bishop was next introduced, and he spoke on Modern Business Methods.

H. H. BISHOP'S ADDRESS.

Mr. Toastmaster and Gentlemen:—Lord Bacon has said in the preface of his Maxims of the Law: "I hold every man a debtor to his profession, from the which as men of course do seek to receive countenance and profit, so ought they of duty to endeavor, by way of amends, to be a help and ornament thereto." It is in recognition of the duty, plainly defined in the opinion of this eminent philosopher, that I presume to stand before a body of men, many of whom are my superiors in age and wisdom, for the purpose of addressing them upon any subject. If I fail to be helpful, I can at least have the satisfaction of knowing that I have made a faithful effort, and that my willingness to do so may perhaps serve to inspire others more capable to take up and perform the duty in an acceptable manner.

SAMUEL DISSTON.

The superiority of "Modern Business Methods" to those in vogue a century ago, or indeed a half century since, is so generally recognized and so thoroughly appreciated that it seems almost unnecessary to rehearse the progress made. Within that time we have seen the development of railways, the telegraph, the telephone, electricity in many other forms of value in all walks of life, the practical utilization of steam as a force, innumerable inventions of labor-saving devices that affect the farm, the factory, the store and the dwelling. Articles that were formerly considered luxuries have now become necessities. Each year that passes over our heads seems to vie with its predecessor in establishing a record for greater development, progress and improvement.

It would not be difficult to spend much more time than would be appropriate on this occasion in picturing the great contrast between the present day and the past on a

Digitized by Google

multitude of items, but as those whom I am addressing are interested principally in the manufacture and sale of Hardware, I shall confine my remarks to matters which I hope may interest them.

My knowledge of the manufacture of Hardware does not carry me back so far as fifty years ago, but in the comparatively short time that I have been in the harness, I have seen the manufactures of this country gradually displace those of Europe in many lines. Butchers' files, for example, are unknown to many of the younger men in the trade, and in their place we find the names of Black Diamond, McCaffrey and Kearney & Foot. Spear & Jackson Saws were once an essential part of a Hardware stock, but since Disston came into the field, we no longer have use for them.

As far as I know, the Europeans never developed enough ingenuity to produce a lawn mower, and the "Pennsylvania" and "Philadelphia" are known as well in foreign countries as our own. Who but an American could ever have devised a meat cutter like the "Enterprise" or "Perfection?" What merchants want to carry, or what

H. H. BISHOP.

carpenter wants to use a foreign made hammer or hatchet when he can get one branded "Hammond," "Germantown," or "Plumb?"

The city of Philadelphia is sometimes spoken of as slow. Is not such an accusation most tellingly refuted when these examples of progress in manufacture are pointed out? They are all examples that you do well to be proud of.

I have heard a story somewhere of a man, who, having occasion to transact business with one of the large establishments in his city, visited it, and was shown to the office of the proprietor, which in this instance was on the topmost floor of a six-story building. In the course of his visit he rendered himself obnoxious. A button was touched, and a stalwart man presented himself in response. He was instructed to put the gentleman out of the building, and immediately undertook the task, escorting him to the head of the stairway on the sixth floor of the building. By the assistance of his boot the obnoxious individual reached the fifth floor without using any of the steps in the proper manner. On the fifth floor he found another Hercules in waiting for him, who saw that he reached the fourth floor with proper expedition, and the same attentions were paid him on each of the third and second floors, and on the first he was finally thrown bodily through the door and landed on the sidewalk.

After satisfying himself by proper examination that no bones were broken, his face was lighted up with a smile of appreciation, and he exclaimed, "Great Heaven! what a perfect system," and pursued his way without further comment.

System is one of the characteristics of "Modern Business Methods," and is rendered necessary by the vast increase in detail and volume found in all branches. A little time taken for the perfecting of a proper system means the saving of much time in all transactions. No one can appreciate the truth of this better than a Hardwareman.

While it must be granted that "Modern Business Methods" are vastly superior to "Ancient," it will not do for us to believe that they are perfect, and it may perhaps be more helpful if some of the defects are pointed out, so that the inventive faculty that is abroad in the land may turn its attention to remedying these defects.

In the period fifty years ago and prior to it, the legitimate channels through which manufactured articles were to reach the consumer were clearly defined. They had their origin in the shop of the manufacturer; from there they went to the jobber or distributor, from him to the retail dealer, and through him finally to the user. The province of each one was clearly defined, and each obtained his fair share of the profit accruing. Modern Business Methods are not an improvement over the old ones in this respect; indeed, I must say that they are degenerate. We have to-day manufacturers who seem to hold the opinion that they must be manufacturer, distributor and retailer all in one. They hold the doctrine that "All's fish they get that cometh to net." The line of demarcation between the various classes is becoming fainter and fainter, and competition between all classes holds high carnival.

Competition is said to be the life of trade, and it is just as aptly said to be the death of the trader. The keen competition which is one of the characteristics of modern business methods is a weapon from which the edge must be taken before it has had time to do all the damage of which it is capable.

It must be conceded that the greatest fault to be discovered in modern business methods is excessive competition. It exists between manufacturers, between manufacturers and jobbers, between jobbers, between jobbers and retailers, and between retail dealers. Like steam or electricity, it is a force for good or for evil, dependent upon whether it it is controlled or uncontrolled. Controlled, it brings peace, development and prosperity; uncontrolled, it brings war, bitter feeling and destruction, and knows no rule, save that which governs a race of barbarians "might makes right." It leads men to resort to false representations, to make promises with no intention of fulfilling them, to the blunting of conscience, to perjury, to arson and to minor misdemeanors innumerable.

To bring the mighty force under proper control, seems like an herculean task, and one which it is beyond the power of man to do. It certainly cannot be accomplished in a day or a week or a month or a year, but I do not look upon it as an impossibility. It is hard to teach an old dog new tricks, but it is possible to educate the young, and even if we make an effort now which brings no immediately satisfactory results, it will surely benefit the generation to come. It will be well, therefore, for those of you who agree with my views, to make efforts to educate those in their employ, to use only honorable and upright means for securing their standing in the business world.

Impress your salesmen that they are representing you, and that you want their business methods to be such as are worthy of you. Much of the trouble that we now experience arises from unworthy and incompetent men holding these positions, which are under the present regime of much greater responsibility than was the case fifty years ago.

This branch of your business must be in the hands of men who are of ripe judgment, high morals and excellent business qualifications. The presence of men who lack

Digitized by Google

these qualities in the ranks of our salesmen, is one of the problems that we have to contend with.

That this subject has already received consideration at the hands of thoughtful men, is evidenced by your presence here to-night. "The Hardware Merchants & Manufacturers Association of Philadelphia" must be one of the factors in bringing this mighty force under control so far as lies in its power, and that some progress has been made is shown by the fact that you have met together as men and friends, and not as enemies with daggers drawn.

That the subject is receiving consideration in a more general way is proved by the existence of bodies such as the National Jewelers' Association, the National Druggists' Association, and last but not least the National Hardware Association. I have the honor to be a member of the last-named, and although I only play one of the second fiddles, I can truthfully say that I keep it in harmony with the first violin, who happens to be one of your own members Mr. W. W. Supplee. Our secretary, Mr. T. J. Fernley, is an entire band in himself, and rarely, if ever, strikes any false tones.

We sincerely hope, gentlemen, that this Association may be a factor in the improving of "Modern Business Methods." That is the purpose of its organization, and while its labors are performed in a quiet and unobtrusive manner, they are directed in such a reasonable manner that the natural effect must be to bring about that feeling of friendship and confidence that is absolutely necessary to a proper understanding between manufacturers and jobbers, between jobbers themselves and between jobbers and retailers.

"A little leaven leaveneth the whole lump." The leaven which we must all use is "A High Standard of Business Methods."

Frank H. Taylor then responded to the toast, the Office Boy.

"THAT OFFICE BOY," BY FRANK H. TAYLOR.

I have observed that there are a great many kinds of "Office Boys," and, in order to understand them, some classification is required. Possibly we may group them as was once done by a professor in a theological seminary, who said his men consisted of three classes—one of whom had talents without piety, the second piety without talents, and the third had neither.

And so of these lads. We have the clever little rascal, the lovely boy who surely is stupid, and the one who seems to fail utterly after a very short trial: yet I believe in the boys and am sure they can improve. In fact, no boy who is anxious to work is very wicked unless we men make him so. His thoughtlessness and irregular ways impress themselves upon us sometimes in a most trying and discouraging manner, but, like all of us, he only needs to be thoroughly busy to be happy, and if fairly treated, skilfully handled, and not crowded too hard, he will display spirit and enthusiasm that will be an inspiration for his masters.

If your boy belongs to the class without piety, let us have patience. The hope of repentence in man is not lost until quite late in his career.

An enthusiastic colored man said at a late quarterly meeting: "Oh, bredren, since I was las' here I done broke all de Ten Commandments, but I t'ank de Lord I ain't lost my religion yet!" And so of our office boy—with all his peculiarities and all his youthful pleasantries, he is a long way from being altogether bad.

And now while I talk about the boy, let it be understood that I consented to speak to this toast for the purpose of bringing to mind all that hard-working and faithful group of people with whom we live. All these are doing their part to advance the Hardware interests, and it is fitting that they who are absent from our banquet should be in our minds as we celebrate the commencement of the year and fit ourselves for the struggle of 1896. For the sake of convenience, we will consider the Office Boy as a type of all the rest.

The Philadelphia Office Boy is primarily good natured. He demonstrated that during the Trolley strike which has just closed, by carrying in his hat the cheerful sign, "I will walk;" and, by doing so, he has called up the better part of our natures. This notice indicated a state of public feeling that was admirable, and I quite believe that the Boy stood for the good nature of the American people, who are glad to help any set of men defend themselves against infringement of private rights. One of these rights is that American workmen shall be free to organize and to support their unions, while it is equally admitted that these unions must not intrude themselves between employers and their individual employes. Sharp practice on either side of this line always makes trouble. I do not wish to excuse the lawlessness of idle ruffians, nor do I praise the barbaric instincts that came to the surface during this strike, but our Boy did well to "walk" so long as our Traction Co. compelled its new men to agree in advance not to join the labor organization.

WILLIAM D. SUPPLEE.

I place the responsibility for the rioting, by persons who had no interest in the struggle, upon the false position of our political officers. It is our fault that this Republic does not demand public men of a higher standard than we now accept. If we trust our safety to men whose chief claim upon us is in their power to marshal this very crowd of ruffians to carry their wards on election day, we cannot expect they will ever control them successfully. So long as public officials find it necessary to hob-nob with the lawless, so long shall we be subject to riots. Let us not throw the blame on the office boy who "walks."

Happily in our business affairs the case is different. There should be but little fear of anything going wrong on the part of men working with employers of high purpose, who value honor and truth. The Office Boy puts his affairs in our hands with confidence, and looks for fairness and prompt advancement when he has earned it—and nowhere are honors won with greater labor than in Hardware. We do not forget that the boy will soon grow up and that we are training the merchant of the future and the future citizen. I say this with confidence, because if it be not true then history will not continue to repeat itself as has been its habit. As I look in your faces, I remember that the

Digitized by Google

chief delight of many of the best of you is to recall your own business start, when as an Office Boy in the good old times you began your career by lighting fires and sweeping out the store at an hour in the morning that now appears appalling!

To-day you represent the wealth and power of the manufacturers and merchants in one great field of industry. Who knows but that our office boy shall yet hold in his hands the riches which will either be a curse to him, or will be held by him as a trust for the good of the public?

Patrons of the arts must ever be those who hold money in individual hands. It was recently stated at a University lecture by a distinguished student of history that Florence, the most brilliant city of the Italian Renaissance, and in her prime was the great centre of art—and art of the very highest type—was a city of shop-keepers, not a city of warriors famous for conquest. In Florence public opinion demanded that a rich merchant should not spend on himself more than one-fourth of his income, and that the balance should go to the city and be devoted to the purchase of works of art. These still remain in the public edifices of that city, open to all—an encouragement and

FRANK H. TAYLOR

relief from the struggle for existence that all can enjoy.

If the conditions of to-day do not cause these sacrifices to appeal to us individually, yet we can at least put high ideals before the lads around us. We shall do more in this way than by experimenting with them in profit sharing or offering rewards for extra efforts or exhausting and demoralizing bursts of speed. Mr. Carnegie is reported as saying that wages and their amounts are in the long run governed by "inexorable economic conditions," and I entirely agree that co-operation, profit-sharing and many other of the modern socialistic schemes are based on a too narrow appreciation of human nature. But this sort of speculating will lead us far afield, and I must conclude by giving our Office Boy a good old-fashioned blowing up.

I am going to enter a complaint against the retail Hardware counter of this country over which our products are sold to the American people. As I said, I am going to blow the Boy up, for of course it is his fault. These counters are entrusted to children instead of trained clerks. I say this because I have so often heard the testimony of shoppers and casual buyers to the effect that Hardware stores are the worst places in the world to buy anything. It is the universal complaint that one cannot get intelligent attention. If I am wrongly informed I shall beg the Boy's pardon! But if I am correct it will pay to improve the conditions. Hardware is machinery; the business is technical, and goods must be appropriately selected for their intended service. Training is necessary for their proper sale. The first mistake that a poor clerk makes is to sell a cheap rather than a good thing, and the results are easily seen in the disgust of the buyer, and more seriously in the quiet undermining of the merchant's reputation, who finds that his elaborate exhibits and advertising no longer avail. His business falls away and he is lost, and puts the blame upon Congress. I find that the American people want the right and sufficient thing for every service, and the American people are obliged to buy all of their Hardware from the very Office Boy acting as retail clerk of whom I am speaking. I have undertaken to state this fact without recommending any cure, and I shall close the subject by asking whether we have taken advantage of the skill, the quick wits and the tact of women in disposing of Hardware over our counters? I just remind you that the Office Boy has a sister who has no natural knowledge of Hardware, but one who can be taught.

Finally, I shall be more than rewarded if I have made any of us think more carefully and unselfishly of our assistants who have become, or are properly becoming, essential elements in our success.

I call on you to take a deeper interest in the Office Boy. Watch him and make him your friend; take an interest in his amusements and his life. There are at least some of us who no longer retain the strength and vigor for playing the old games that one time afforded us so much amusement. The spring has gone out of us, and we have come to form part of the audience in all the contests. It is a sign of our genuine manhood that we are occasionally found in the bleachers of the foot-ball and base-ball fields, and I have observed with interest that there no better "rooters" for a home team than the Hardwaremen. This is excellent, but, on my word as an old sportsman, there are greater joys than watching the play of professions of doubtful honesty win for our city, or break worlds' records on our wheels. You will find a better joy and more real satisfaction by devoting a holiday to watching this Office Boy of yours playing shinney on a cheap pair of skates on which you made no profit, or winning a bicycle race on the Fourth of July, or breaking a bat at a ball game. Follow the youngster to the fields, and we shall be sure of a real holiday; and the fact of our presence will insure a renewed devotion and more self-forgetful service.

The company then joined in singing, "And the Band Played On."

T. James Fernley's toast was Ambition.

SPEECH OF T. JAMES FERNLEY.

Mr. President and Gentlemen:—I arise to respond to the toast, not because I have sought a position on this program, but because the Banquet Committee of the Hardware Merchants & Manufacturers Association deemed that it was my duty, at least, to say a few words.

I cannot understand why it is that such a quotation was annexed to my toast. You will find by referring to the menu these words:

"They tell me thou art rash and vain,
A searcher after fame.
That thou art striving but to gain
A long enduring name."

Undoubtedly the imbecile or imbeciles who selected this quotation thought that there was something humorous and sarcastic in it.

But I assure you, gentlemen, that I fail to find either. The quotation starts off with an assertion which is exceedingly indefinite. "*They* tell me thou art rash and vain." Who is it that has told this Banquet Committee that I am either rash or vain? I have never been accused

Digitized by Google

of being rash, and no one but my friend from Boston has ever intimated that I was vain.

The quotation says I am a searcher after fame. This, gentlemen, I am prepared to deny, and a majority of the gentlemen around this board will bear me witness that the fame which I have achieved has been thrust upon me. So, gentlemen, I would have the members of this Association distinctly understand that whatever honor they may have conferred upon me in the past has been forgotten, and it is beyond their power to honor me in the future.

Those of our guests present are perhaps not aware of the fact that I positively declined to accept the presidency of this Association because of the fact that objections might be raised by other organizations, superior to this one, with which I am officially connected.

Who are these people that bring this accusation? What is their standing in the community that they dare give to me such untruthful attributes? But by referring to the last part of the quotation wherein it says: "Thou art striving but to gain a long enduring name," I see an attempt to do me the justice that my position in this society commands.

Striving to gain a long enduring name; why certainly, gentlemen, that is what I have been striving for ever since I came to this country, at which time I had not one cent in my pocket.

I have read somewhere that "a good name is better to be desired than great riches," and while this board is surrounded by many men who are possessed of millions, it is somewhat doubtful whether all members of this Association could produce a reputation which, in the esteem of the pure and good, would be as valuable as their cherished wealth.

We all honor the gentleman who has recently been elected president of this Association; he is a man of whom Philadelphians are justly proud. A concern manufacturing more saws and better saws than any concern in the world, owes its success largely to the energy, sagacity and ability of Samuel Disston. We of Philadelphia are proud of him; he is one of us, and at no time has he ever been ashamed to meet as an equal any citizen of Philadelphia, even though he be the most humble employe in his establishment.

Is it any wonder, gentlemen, that when this Association found that a by-law prevented the re-election of Mr. William W. Supplee for more than two successive terms, and after they ascertained that I would not accept the position under any consideration, is it any wonder, gentlemen, I say, that this organization demanded the services of Mr. Disston? Under his administration the continued success of this Association is assured.

I have nothing to say of the gentleman you have elected vice-president. He has been a competitor of mine for years, and I have constantly been compelled to keep one eye on my next door neighbor to see that he did not seduce my customers. This being the fact could I be expected to eulogize Mr. Ritter?

During the past two years this Association has had most excellent officers. One of the guests of the evening asked me, in the reception room, who were to "replace" the officers whose terms expired. I answered and said that such men as myself and William W. Supplee could never be replaced; that a creditable successor to Mr. Supplee we had, and he has been elected.

Under the by-laws it was necessary to elect a successor, but it is no disrespect to the present president of this organization to state that Mr. Supplee is an organizer and leader among men. He is a man, gentlemen, among men.

He found this organization with a membership of 55, and vacates the presidency with a membership of 101. He took the position with a treasury of $772.51, and hands it over to his successor with a surplus of $1,542.93. He took up the gavel from the hands of a man that knew nothing of parliamentary law (although he thought he did), and hands it over to his successor after having instructed every one of the members of this organization in proper parliamentary tactics. During his tenure of office he had associated with him a vice-president, of whom I already have spoken, he who is now our president, and a secretary-treasurer, of whom modesty forbids me to speak.

With this explanation of the sarcastic quotation which is annexed to my name, I desire to proceed directly to the subject of the toast.

"Ambition" is a dream—a vapor,—it is so light and airy that we cannot grasp it,—it is merely a shadow, but so entwined with the destinies of the world, that we are amazed at its intensity, at the slavery that enchains its followers.

Before the creation of the world, when only heaven existed, we read that Satan's ambition to usurp the throne was the cause of his down-fall and confinement in Hades, and the indomitable, unconquered, ambitious—though fallen spirit of the Ruler—is still revealed in the wickedness of mankind.

T. JAMES FERNLEY.

Coming along in history we find Cain murdering his brother Abel because his ambitious spirit was not gratified in the acceptance of his offering, Abel's being preferred.

And so along the whole line of Biblical and profane history we find many examples.

Alexander the Great invading Asia, trying to conquer it so that he could be ruler of the then known world; again, we have Caesar, whose ambition seemed to run in the same line as that of Alexander the Great, and we remember that Brutus his friend who slew him said, "but, as he was ambitious I slew him: there is tears for his love; joy for his fortune; honour for his valour; and death, for his ambition." Such was the end of one of the most ambitious spirits this world ever produced.

Napoleon, with his indomitable, ambitious spirit; see how he sacrificed life, money, everything to be known as a great ruler. What, but ambition, would have led him to cross the Alps in mid-winter to accomplish the object?

We find Noah's descendants building a tower to reach

Digitized by Google

Heaven's gates, and feel surprised at their audacity. We do not realize that our own ambitions will appear just as absurd, and if they were chronicled in history they will be ridiculed in the ages to come.

In Enrope we find the great Suez Canal, built as an outcome of commercial ambition.

The Panama Canal stands forth as a monument, although unfinished, to the greatness of De Lesseps' ambition, and undoubtedly will yet be one of the wonders of the twentieth century.

Our own country would not have been discovered when it was, had it not been for Christopher Columbus, whose ambition to find a short route to India, and Isabella was so ambitious to have this project succeed under her reign that she was led to hypothecate her jewels in order to further the project. If it had not been for this ambition, where would our fair country be to-day?

The success of the president of this Association as a manufacttrer of saws is due largely to his ambition to emulate the example of the founder of his business, and for fear the mantle of Henry Disston would not fall upon him, he uses, as you know, the same desk as was used by his predecessor. the only difference being he has allowed his leg to be pulled, while his predecessor always objected to any one attempting the same thing with him.

The great public works of this country and of Europe are monuments to our ambitious men. The Pyramids, work of ages, are enduring, but of no use but to gratify the overwhelming ambition of some past Pharoah.

Take the great discoveries of the day and tell me are not nearly all of these the results of profound study and experiment on the part of ambitious men? It has not been the desire to create wealth that has spurred on our medical scientists to discover the bacilli of cholera, diphtheria and tuberculosis, but it is their ambition to excel and outdo their fellow scientists. The commercial world is full of men who haye succeeded by reason of their ambition, and indeed, gentlemen, there at least two qualities that are *sine qui non* of success in commercial life, the first ambition and the second gall. I am speaking to you now of the former; of the latter I know very little.

What has made it possible for the former president of our Association to be the head of one of the largest jobbing houses in the United States? Why is it that he is the president of a jobbing house with over two hundred employes? I ascribe it, gentlemen, to ambition. Why is it, gentlemen, that I should be such a wonderful success? It is due entirely to my ambitious desires, not to gall. Why is it that we as a city cannot produce men endowed with sufficient ambition to build a canal from this port to the Capes, so that a vessel might be at sea three hours after leaving our docks.

After fixing our mind's eye on some point of vantage, we immediately bend all our energies to attain it. 'Tis not possible to grasp it with the hand, but we must strive to attain it. We must work with the object of ambition constantly in view.

> The heights by great men reached and kept,
> Were not attained by sudden flight;
> But they, while their companions slept,
> Were toiling upward in the night.

The following gentlemen were present:

William W. Supplee; Samuel Disston; H. H. Bishop; Samuel A. Bigelow; R. R. Williams; R. O. Moon; Joel J. Bailey; Silas W. Pettit; J. Wesley Supplee; C. Staurt Patterson; Mahlon N. Kline; Fayette R. Plumb; Charles L. Mead; Ralph H. Plumb; F. E. Drury; James F. Hope; Lewis W. Klahr; A. B. Lovejoy; I. F. Bless; William D. Supplee; C. Stanley Hurlbut; J. C. Bowe; T. Henry Asbury; Frank H. Taylor; Wm. H. Allen; Alfred P. Shannon; Wm. C. Peters; Paul A. Griffith Chas. M. Biddle.

John R. Griffith; Henry W. Scattergood; H. J. Gosling; S. E. Carver; E. G. Chandler; Harry N. Barnett; Henry Barnett; Alfred W. Barnett; William Wilson; Samuel F. Wilson; C. W. Asbury; Chas. M. Seltzer, M. D.; John R. Seltzer; Edward Knight; James H. Ritter; Cyrus D. Martin; Hugh McCaffrey; John McCaffrey; Harry E. Asbury; Charles M. Ghriskey; Louis J. McGrath; Thomas Devlin; George W. Van Tine; C. S. Van Wagoner; Wm. S. Lloyd; Robert W. Mallon; H. H. Barton, Jr.

H. B. Nicholson; Leon S. Dexter; Elliott Fisher; Frank West; H. A. Terry; Frank G. Drew; J. H. Van Newkirk; Geo. Reuter, Jr.; John M. Reeves; R. J. Maharg; Tylee B. Hendrickson; Thomas Nelson; John E. Harbster; Walter J. Parsons; S. Spencer Scott; Harry C. Disston; James D. Green; W. D. Walkley; George L. Irvin; Frank W. Huff; Wm. R. Weaver; Chas. H. Weeks; Crawford Miller.

The banquet committee was composed of the following gentlemen: Fayette R. Plumb, Chairman; Lewis W. Klahr; Samuel Disston; T. James Fernley, and John R. Griffiths.

ANNUAL ELECTION.

At a meeting of the Hardware Merchants' & Manufacturers' Association of Philadelphia, held on January 21st, the following officers were unanimously elected:

President: Samuel Disston.

Vice-President: James H. Ritter.

Secretary-Treasurer: T. James Fernley.

Board of Directors: William W. Supplee, Samuel Disston, James H. Ritter. T. James Fernley, Fayette R. Plumb, Hugh McCaffrey, Charles M. Ghriskey, John Griffith, William C. Peters.

Acme Razor Strops.

On page 51 of this issue the Acme Mfg. Co., No. 441 Broadway, New York, make an announcement in regard to Razor Strops which should attract the attention of every dealer interested in that line of goods. The cost of a postal card will bring you the terms, proposition, etc., and they feel that they are in position to do you good. The addition of new machinery, and the increase of other facilities, has enabled them to handle a large trade at the lowest cost.

Hardware Gatherings.

The East Tennessee Hardware Association met at Morristown, Tenn., on January 15th. The first meeting of this association was held at Greenville in October last. It is composed of Hardware merchants from different parts of East Tennessee. At that meeting G. E. Speck, of Morristown was elected president, J. W. Willis, vice-president, and R. M, Rogers, of Greenville, secretary and treasurer. At the meeting which was held on the 15th, an address was delivered by the president, on "My idea of the Benefits to be derived from this Association." This subject was ably handled, the speaker showing the advantages in a social way, and the protection gained to the trade through organizations of this character, J. W. Willis spoke on "How and When to Buy," and William C. Brown on "Drawbacks to the Hardware Business in East Tennessee and How to Handle Them," The business was completed in the evening, and the Association adjourned to meet at Athens, Tenn., on June 9th, 1896.

The second annual convention of the Western Retail Implement & Hardware Dealers' Association was recently concluded at Kansas City, Mo. Speeches were delivered by J. M. Patterson, representing the jobbers, W. C. Nones, representing the manufacturers, W. L. Day, on behalf of the traveling men, and E. R. Moses, as spokesman of the dealers. Other addresses of an interesting character were also delivered. A reception was tendered the visitors by the Kansas City Vehicle, Implement & Hardware Club, at the rooms of the Commercial Club. Speeches of welcome and responses were made. On the second day reports were made on the various subjects of interest to the Association.

Review of the Markets.

The condition of the Hardware market would indicate that dealers were beginning to anticipate the spring trade. Mail orders are more numerous and liberal. The character of orders received from traveling salesmen shows that stocks in the hands of dealers are small. Some price cutting has been reported, but, on the whole, prices have been held steadily.

Wire Nails: There are no changes in prices to report. Quotations are on the basis of carload lots, $2.25 per keg, base, f. o. b., Pittsburg; less than carload lots, $2.35, base, f. o. b., Pittsburg. Carload lots on dock at New York, $2.43; small lots out of store, $2.53. The recent meeting of the Wire and Cut Nail manufacturers held in Pittsburg was merely a meeting to transact routine business and not in the interests of a combine between these two branches of the industry, as has been alleged. There has been an understanding between manufacturers of Wire and Cut Nails for some months past, limiting the production. The tone of the market shows improvement.

Cut Nails: Prices remain the same. We quote as follows: $2 per keg, base, f. o. b., Pittsburg. Carload lots on dock, New York, $2.18; small lots on dock, $2.20, and small lots out of store, $2.30.

The new price list issued by the National Lead Co. for Lead in Oil is as follows: In lots of less than 500 pounds, 5¾ cents net; in lots of 500 pounds and over, 5¼ cents; Red Lead and Litharge in barrels and half barrels, ¼ cent per pound less than price in kegs; White Lead in 12½-pound pails (packed in 100-pound cases), 1 cent over price in kegs.

Putty: Quotations are as follows: $1.40@$2.25, as to style of packing and quantity.

Linseed Oil: Prices remain unchanged, and are as follows: Raw, 42 cents per gallon; boiled, 45 cents per gallon, and Calcutta raw, 50 cents per gallon.

Clapp & Co., bankers and brokers, New York, in their weekly letter, say: "Our Golden Executive and Silvery Senators will not forget the debt they owe to Uncle Sam. The prosperity of every hamlet appears to rest on their yea or nay. Hope trembles in eager anticipation of witnessing unselfish courage. The Republic delights to honor a confession of error that corrects the mistake. Labor and capital stand hand in hand awaiting the word that will start hesitating industry into unparallelled activity. Our national debt was reduced over 1880 million dollars during twenty-four years ending March 1, 1893. For three years ending March 1, 1896, it may show an increase of over 262½ million dollars; adding interest to maturity the debt will be increased to about 500 million dollars. We believe a popular loan should be so arranged that the people could subscribe for small or large bonds at all National banks or sub-treasuries or post-offices at a fixed price, rather than be hampered by complications to aid syndicates. There is no doubt but one or two hundred millions have been subscribed for, but the Government will scarcely secure as much net money as if the loan sold under the French or equity system of popular loans. The pending Tariff bill appears to only need the support of a few United State Senators who represent people that have taken immense sums from the treasury. The President's tariff agitation evidently has cost the Government and people untold millions, by creating a deficiency in revenue which can likely be made good from this time on by his signing the proposed tariff for revenue bill."

THE TOLEDO TRADE.

Again another year has passed, and we can look upon another year's business that has gone by. No doubt, most all have by this time finished taking stock and invoicing, and are prepared to again enter the commercial field with renewed zeal and new hopes. In looking over the past year, we can see a great many things that have tended to make the Hardware business (by the way, it is Hard-wear) profitable and enjoyable; still there are a great many things that would have been better if they had not existed, for instance, booms and inflated prices, but there is satisfaction comparing invoices of January 1, 1895, and January 1, 1896, and that we are not obliged to face a loss of from 10 to 25 per cent. as in previous years. As far as we are concerned, we can say that 1895 has been a banner year for us. We have sold more goods this last year than any other year, 1892 not excepted.

Trade this month so far has been quite satisfactory, in fact, better than any previous January. Collections are fair, but not as good as we would like to see them, but still up to the average. Looking forward to spring, we anticipate a brisk trade, provided our Fathers in Washington will let us do so. By the way, it would be a good idea if Congress would pass the appropriation bill, repeal the tariff laws at present, adopt a protective tariff and then go home.

Wishing all the subscribers of *Hardware* a prosperous New Year, we remain, THE STOLLBERG & CLAPP CO.

THE BUFFALO TRADE.

The annual inventory is about completed, and the traveling men are just commencing their work, consequently it is a little early to say much of special interest regarding business.

Thus far trade has been quite satisfactory, it being a decided improvement over a year ago. Stocks in the hands of the retailer are low and need replenishing. For this reason, if for no other, we anticipate a fair trade.

Prices on barbed wire, poultry netting and wire screen cloth are not as firm as we should like to see them, but we hope that as we approach the spring trade these difficulties will not exist.

From all reports that we can gather we are led to believe that we will all enjoy a steady trade, and should nothing unforeseen occur, we have every reason to believe that we will realize our expectations. WEED & CO.

THE DAVENPORT TRADE.

A very interesting, but nevertheless unaccountable feature of the Hardware trade has recently developed, in a perfect rush of orders for barb wire.

The uninteresting and easily accounted for dullness continues in the wire nail market.

Sales are being made in binder twine for future shipments, but contracts are frequently offered, with so many strings attached, that they are either returned to the buy-

ers, with thanks, or are entered very reluctantly. Why should so staple an article be sold in such a fast and loose manner? The seller never really knows whether a sale has been fully consummated; even if it has been surely made, he is never quite certain what price he will ultimately receive for his goods. Would it not be better for all concerned, if seasonable goods were withheld from market until nearer the time for using them? This would especially apply to screen wire, poultry netting, haying tools, farm implements, such as forks, rakes, scythes, snaths, etc., etc.

Manufacturers of screen wire are evidently trying to see how cheaply they can sell and continue to enjoy the sport of reducing prices; and it is safe to predict, that after the present losing game is finished, they will all get together and advance prices from two to three hundred per cent., trying to regain in one year the profits that it has taken them six years to lose.

Collections are improving, and if the war clouds in the East continue to develop, they may yet be beneficial to the crops of last year that are so largely being held in cribs and granaries awaiting higher prices.

Sickels, Preston & Nutting Co.

THE ST. PAUL TRADE.

Business in this market during the month of January is habitually very light, and this year is no exception to this rule. The retailer is selling very few goods, but is trying to get his pay for what he has sold; consequently he is not in the market to replenish his stock. To be sure, some jobbers are trying to secure advance orders for wire, nails, wire cloth and some other articles, but with the present condition of the market, there is very little inducement for the dealer to purchase. It is to be hoped that later on, when the time has arrived to use goods in the Hardware line, that we shall all enjoy our usual volume of trade. The prices on all market products continue to rule very low, and a small appreciation in this line would undoubtedly greatly stimulate all kinds of business.

C. W. Hackett Hardware Co.

THE PHILADELPHIA TRADE.

It is pleasant to report that salesmen are once more on the road and business is commencing, orders are coming in with some freedom, and the assortment is good and quantities fair in size, the only drawback seems to be collections, which at present are slow.

The demand for bicycle sundries is phenomenal, far exceeding expectations, and these are, apparently, to be an important part of the Hardware business, while the sale of bicycles is keeping up in a way that surprises us all. Of course the open winter has had much to do with this, and never has riding been so general throughout the season.

As for skates, the demand has simply been enormous and we do not recall a year in the last decade that the output has been so large, especially on ladies' skates, and on these it has been impossible to fill orders.

It is always a gratifying sign when retailers exhaust their stocks of winter goods as they are much more disposed to buy for spring, and prospects on all sides seem to point towards a fair spring trade, which we hope will be realized.

Biddle Hardware Co.

THE BOSTON TRADE.

January is a month which is always welcomed by the average Hardware jobber, inasmuch as it gives him an opportunity, after having taken the annual inventory, to look

carefully over the business of the past year, and note whereby certain methods may be improved, goods that have not met with the ready sale that was anticipated be brought to the front, adjustment of certain expenses in order that the best results may be obtained for the amount expended, and a general correction of errors which naturally arise in a business having such a large amount of detail.

The history of the year just closed having probably been more interesting from a financial point than those preceding, the question arises what is the outlook for 1896? Although there exists at the present time certain unfavorable conditions and disturbances in the financial and political world, such as create an uncertainty in future operations, yet it is firmly believed that our national obligations will be honorably met, business will soon go on in its usual channels, and indications for improvement are sufficient to encourage every earnest and hopeful effort. In the meantime merchants continue a conservative policy and place orders for only such goods as immediate demand requires.

FRYE, PHIPPS & CO.

THE CLEVELAND TRADE.

Early January is always a month that produces very little actual business. In some seasons there is quite an active booking of orders for future delivery, which tends to swell the actual business of March and April. The conditions of the market at present, however, are not such as to encourage the trade in carrying out this custom, as the staples are undoubtedly weak, and seem to tend to lower values.

The price of nails is maintained by the Association, and purchasers are made by dealers only in such quantities as they absolutely need, the feeling being upon all sides that the price is entirely too high as compared with other articles, and that it must perforce be reduced before very long. Smooth and barbed wire are very unsettled as to price, although they are gradually reaching a figure below which it will not be possible to go.

Some people seem to think that the recession of prices is an extreme one and that they are now lower in many cases than is justified by conditions. These prophesy an advance within the next six weeks. For ourselves, we are not in the business of prophesying, and believe that the safe and conservative course of buying is the one that should be practiced by retail dealers at all times, regardless of the condition of the market. Their business is a legitimate one, into which speculation does not enter, and if they can obtain a reasonable profit upon everything that they handle from time to time, they are certainly doing a successful business.

Bicycles are taking up much of the attention of the trade at present with their efforts to make arrangements for the coming season. The Chicago Cycle Show has come and gone, and while there was not very much actual business transacted there, it has probably laid the foundation of acquaintances between manufacturers, jobbers and dealers, so that it will result in business in the future.

The fact was developed on this occasion, that there is a marked scarcity of wheels at popular prices. It will be well for dealers who use these in an ordinary way to recognize this fact and make their arrangements so that they will unquestionably be covered when they are required. Present indications point to a much larger bicycle business during 1896 than has ever been known in this country.

THE MCINTOSH-HUNTINGTON CO.

THE OMAHA TRADE.

Very little is being done of late except to close up the business of the last year, and prepare to open that of the present one. Comparatively few salesmen have been on the road, most of them being employed in posting up on the lines of goods and getting their catalogues and sample cases in shape to start out. The past year, while not up to what was expected of it early in the season, has not dealt unkindly with the Hardware trade. The volume of business has been somewhat in excess of the previous year, and prices have been fairly well maintained.

Reports come of irregularity and extremely low quotations made on wire cloth, screen doors, and other season goods for spring delivery, and the anxiety with which

dealers fall over each other for unprofitable orders on season goods from six to eight months ahead of the time they are used, doubtless carries the impression to the retail trade that they pay a very large percentage of profit. Should the time come when these goods are sold on a business basis, and when they are needed, it will result to the advantage of the manufacturer, jobber and dealer, without the demoralization now existing, and the retailer, with no inducement to overstock, will buy his goods when he needs them, and sell them at a profit, and in the long run all parties interested will be better satisfied.

RECTOR & WILHELMY CO.

THE COLUMBUS TRADE.

We can hardly say what the trade prospects are for spring, as we have been moving into our new and commodious quarters, and have paid but little attention to trade for the past three weeks.

We have had some very encouraging orders the last few days, however, and hope this fact is a forerunner of good things ahead.

Collections are not good; in fact they are bad. Prices on smooth and barb wire seem to be badly demoralized, and the same condition of affairs on this staple article is being repeated, namely, selling at cost, or nearly so. It helps the volume of your business you know, and some dealers seem to be satisfied with that.

There is no settled price on screen wire cloth; every manager and jobber has his war paint on, and forgets that it costs money to do business.

This has been another good season for skates, and managers and jobbers are sold out on the low-priced grades.

Bicycles are selling well, and it looks as though there would be a scarcity of popular priced wheels.

There have not been many changes in prices on builders' and shelf Hardware. THE SMITH BROS. HARDWARE CO.

THE CHARLESTON TRADE.

January business is fully up to expectation, and we are uncomfortably behind in completing orders. It is, of course, impossible for any traveller to be at more than one place or neighborhood in his territory at a time, and we are in daily receipt of postals inquiring when our representative will be around. The extremely favorable weather has permitted all farming operations to be carried on without interruption, and the demand for all lines of goods pertaining to preparation for planting is in consequence unusually good. We are still on the anxious bench, waiting for some encouraging news of shipment from manufactories of much needed goods, but the indications are that if we receive at all in time the quantities will barely enable us to partially fill orders already taken; with little prospect of supplying those that may hereafter come.

Business, although unusually brisk, is made so by the number of orders rather than the size of any, and our experience is that we will have a continuance of such for a larger period than usual, and the strictly early spring business be gradually extended until far in the spring proper, and give a steady business until the close of the year.

Prices have varied slightly, but no decline sufficient to be specially noted has taken place. While indications point to material concessions on many lines in the near future, we do not think such reductions will seriously affect stocks that may then be on hand.

The fact that the consumers' demand has been good, and the obtainable supply limited, the accumulation of any special line has been impossible. Collections have taken on new life, and it is very gratifying to record the numerous settlements already made.

It has been the custom for ages, commercially speaking, for arrangements for fall settlement to be made when January purchases are received, and we were fully prepared to have numerous customers remind us of their usual mode of settlement, but up to the present writing few have intimated that purchases were made with such expectation and understanding. This condition of trade is very satisfactory, and we see no reason why accounts should not be materially reduced by the time the crop is fully planted, and if extension to fall is needed the amount in proportion to volume of business be less than for years past.

Few novelties are offered in Hardware, and the monotony of looking at the old standard samples and handling the same style of goods year after year is dreadfully tiresome, the only variation being that each is handled in season, and the season occurs only once annually. We hope to be able to continue the heretofore good report of business since June last, and even to report an improvement on present conditions.

Should the spring and summer be favorable to truck farmers and fruit growers, it will round a year almost unexampled in the history of the South, and materially replace the losses of the past three years, which were not only non-sustaining, but entailed actual loas on the entire farming commtunity. MARSHALL, WESCOAT & CO.

THE PITTSBURG TRADE.

The year 1896 has opened with a fair degree of activity in Hardware. January is not usually one of the big months and this year will be no exception to the rule. Our mills and mines are generally running, but are not pushed to their capacity, as buyers are conservative and only ordering for immediate wants.

Prices of heavy goods have receded with the fall in iron, and seem to have reached "hard pan." We are glad to note a slight reaction in the pig iron market, and as coke is to be held up, and labor is not giving way, there must be better prices for iron soon. If our legislators would only settle the financial question on a substantial basis, so that confidence could be established, we believe all other conditions are favorable to good business this year.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc, will be gladly received, and promptly published.

New Companies, Etc.

Chicago, Ill.—The Butler Mfg. Co.; incorporated. Capital stock, $2500; to manufacture Hardware. Incorporators—M. E. Butler, E. L. Church and H. R. Niland.

Chicago, Ill.—The General Mfg. Co., incorporated by J. H. Whitehead, J. S. Butler and N. R. Niland. Capital stock, $2500; to manufacture Hardware.

Dayton, Ohio.—The Cows Fence & Foundry Co., incorporated by a number of Dayton capitalists. The capital stock is $50,000.

Des Moines, Iowa.—The Musgrave Co., which proposes to manufacture and sell wire fences, has filed articles of incorporation. The authorized capital stock is $100,000. The incorporators are E. C. Musgrave, J. S. Mangehmab, G. I. Huffman, L. M. Jackson and W. W. McCullough.

East Moline, Ill.—East Moline Tool Co., incorporated. Capital, $75.000. Incorporators—Adolph W. Shirring, Charles H. Pope and Edward B. Kreis.

Findlay, Ohio.—The Findlay Axe & Tool Co., incorporated. Capital stock, $12,000.

Hartford, Conn. — The Acme Machine Screw Co. have filed articles of incorporation with the State secretary. The capital is $10,000, divided into 100 shares. E. C. Fenn, of Bloomfield; R. Hakewessel, of Hartford; William J. Gabb, of Bloomfield, and A. W. Henn, of Cleveland, Ohio, are the stockholders.

Jersey City, N. J.—The Hecla Co., incorporated by Cornelius Van Wagoner, of Cleveland, Ohio; Christian T. Stork, of Jersey City, and John J. Seeple of Brooklyn. Capital stock, $100,000. The company will manufacture forgings, Hardware and other articles of metal.

Kansas City, Mo.— The Black Diamond Mining Tool Co. Capital stock, $5000. Incorporated by J. R. Cline, H. B. Green, R. L. Yeager and others.

Memphis, Tenn. — The Iron Roofing & Corrugating Co. have filed application for charter in the office of the secretary of State.

Paxton, Ill.—The Tindall Mfg. Co. Capital stock, $10,000; to manufacture Hardware. Incorporators—A. Tindall, W. Lamb, George Grove, John Clapp, J. B. Middledorff and C. A. Nordgren.

Poughkeepsie, N.Y.—The Mitchell Heater Co., incorporated by Charles Mitchell, F. B. Lown, Lewis H. Vail and others; to manufacture water or steam heaters. Capital stock, $50,000.

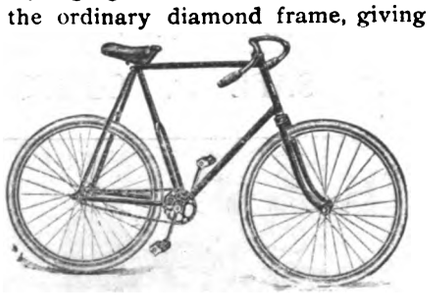
St. John, N. B. — The McDonald Nut Lock Co., incorporated by C. N. Spinner, of St. John; E. G. Evans, of Hampton, N. B.; Dr. de Bertram, L. A. Dumainville and Thomas S. McDonald, of New York. Capital stock, $60,000; to manufacture nut locks.

Changes and Removals.

Beaver Falls, Pa.—The old Beaver Falls Cutlery Works have been purchased for $75,000 by a company which will use the buildings for the manufacture of steel tubing.

Cambridge, Mass.—The Standard Brass Co. have purchased the entire plant of the Framingham Brass Co., a concern doing business at South Framingham for some time past. The machinery and stock of the latter is now being removed to Cambridge.

Cincinnati, Ohio.—The Lodge & Davis Machine Tool Co. have been reorganized, and will hereafter be known as the Davis & Egan Machine Tool Co. As announced recently the entire Lodge interest in the concern was bought out by Chas. Davis, president of the Lodge & Davis Co.; Robert Laidlaw, president of the Laidlaw-Dunn-Gordon Co.; Thos. P. Egan, president of the J. A. Fay & Egan Co., and Thos. McDougall. The reorganization followed. The two largest machinery houses in Chicago are operated by the Egan and Davis companies, and the consolidation will make one of the largest combinations in the country, employing over 2000 men. The Davis & Egan Co. will manufacture iron, steel and brass working machinery for the production of locomotives, engines, dynamos and motors, bicycles, mining and agricultural and other machinery. The present capacity of the plant will be largely increased. The new company controls unlimited capital, has no preferred stock, and will rank as one of the leading industries of the city.



New Buildings and Improvements.

Canton, Ohio. — The Canton Pump Co. have recently put in a new boiler in their East Ninth Street establishment. They have also added a motor for reserve purposes.

Hamilton, Ohio.—The Niles Tool Works Co. are making an addition to their plant of another large foundry to be built of steel, brick and slate, 436x300 feet, and 38 feet high to the roof trusses. Eight overhead traveling cranes will be used, with lifting capacities of from five to thirty tons.

The Union Nut & Bolt Co.'s Wheel.

The Union Nut & Bolt Co., No. 107 Chambers Street, New York, have taken the agency for the America wheel, manufactured by the International Mfg. Co., Nos. 73, 75 and 77 Fulton Street, Chicago. The feature of the America is the truss frame which was patented by Mr. Graham, the superintendent of the International Mfg. Co. The company remark that also in all other respects the America is a strictly high grade machine. The America is also made with the ordinary diamond frame, giving the rider

an opportunity of buying either the truss frame or the diamond. The America line comprises the following wheels: Special America racer, model 9, 17 to 20 pounds, $125; the America, model 8, 20 to 23 pounds, $100; Special America, racer, model 10, 17 to 20 pounds, $125: New America, model 11, 20 to 23 pounds, $100; Improved America, ladies', model 12, 22 pounds, $100, and America tandem, model 13, 37 pounds, $150. The wheels are described as follows: "Scientifically constructed. Specially prepared cold drawn, seamless tubing, 1⅛-inch diameter in main frame, ¾-inch in back frame, and 1¼-inch head. Fully re-enforced, producing unusual strength and lightness. Connections, best steel drop forgings throughout. A much stronger, lighter and more rigid frame than heretofore produced. Heights of frame to suit. Best quality piano wire tangent spokes, thoroughly tested and guaranteed as to tensile strength. Best wood rims. Finest quality solid steel large barrel hubs. Bearings made from highest possible grade of tool steel, absolutely true and uniform; cones specially improved, and every cup and cone being ground, polished and tested. Finest hardened steel balls. Cranks forged from best grade of spring steel. Pedals, improved rubber or rat-trap Brandenburg, Record, Spaulding, or our elegant combination Special 'Graham' pedal. Chain, 'the best' ¼ or 3-16-inch. Saddles, the best models of ease and comfort the market affords. Raised, medium, low drop or our improved special 'adjustable' handle bars. All bright parts heavily nickel-plated on copper. Frames elegantly polished and enameled, plain or striped as desired. Five-inch tread. Tires, customer's choice. Equal in every respect to any strictly first-class, high grade bicycle on the market." The cut shown herewith illustrates the truss frame construction. The Union Nut & Bolt Co. are agents for northern New Jersey and central and eastern New York State and the metropolitan district, also the export trade.

The following announcement to the trade is made by the Rhode Island Perkins Horse Shoe Co., Providence, R. I.: "Messrs. J. C. McCarty & Co., No. 97 Chambers Street, New York City, are no longer agents of this company, our arrangement having expired by limitation this date. A full line of our goods will be carried by Messrs. Vought & Williams, No. 363 Greenwich Street, New York City."

When you begin handling bicycles

One of the important things for you to do is to find the pneumatic tire which has the most friends. When you have found it, stick to that tire. It will be well for you to know that more than sixty-five per cent. of the total tire business is done by Morgan & Wright, Chicago. They have a guarantee which guarantees. They know how to take care of their customers. You have often seen their trade-mark—

MORGAN & WRIGHT TIRES
ARE GOOD TIRES

The M. & W. quick-repair pamphlet is interestingly illustrated from life.

THIS CUT

represents our **Telescopic Detachable Crank Shaft,** forged in two pieces from best Sweedish Steel. How do you like it? Any child old enough to ride a wheel can take it apart or put it together. In four minutes you can take it out, clean the bearings and put it together again without disturbing the adjustment of the bearings in the least. The balls cannot fall out, there are no Cotter pins to annoy and vex you, in fact you have no trouble of any kind with this crank Nothing can be more simple—nothing more durable. Expert wheelmen pronounce it out of sight of any Crank now in use. Please remember you will find this Crank Shaft on every

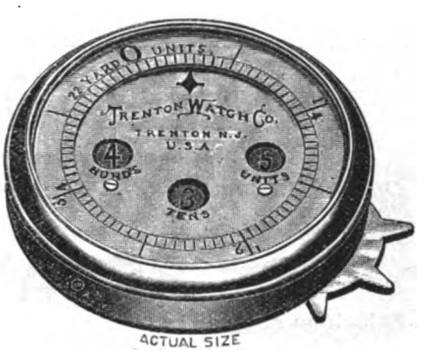
and not susceptible to change of temperature.



Made in three styles, Models "A," "B," and "C." Made for 26, 28 and 30 inch wheels.

MODEL "C" registers 10,000 miles and repeats; handsomely nickel plated, with celluloid face plate. This instrument is principally adapted for century clubs, long rides, and for riders who do not care to set their cyclometers back to zero.

SOLD BY ALL DEALERS AT A LOW PRICE

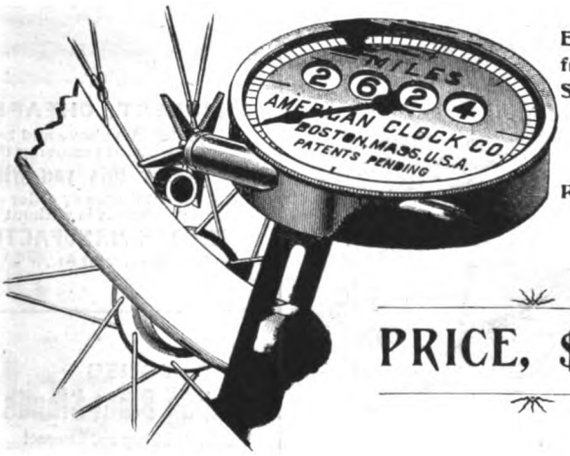
"TRENTON" CYCLOMETERS ARE THE BEST.

MADE OF ALUMINUM.

Light, Strong, and Accurate. Electrotypes supplied to the trade upon application.

TRENTON WATCH CO., Trenton, N. J.



BICYCLE MANUFACTURERS who are putting Cyclometers on their wheels this season will make no mistake if they supply . .

THE AMERICAN.

TEN THOUSAND MILES AND REPEATS.

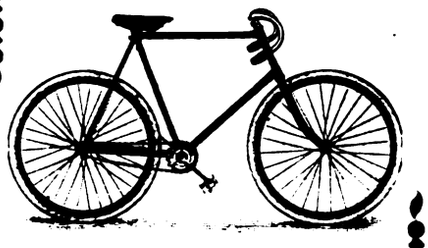
The Best Seller on the Market.

Insist on receiving our Registered Guarantee with every American.

Easily read from the Saddle.

Requires No Care.

PRICE, $2.00.



The American Cyclometer, Model B, is not a dinkey toy, too small to be of any use; it does not get out of order if you run it backwards like others that are being put on the market. A cyclometer, though built like a watch, if too small cannot be depended on. The AMERICAN tells you the small fraction of a mile; others do not. **The American leads; let those who can follow.**

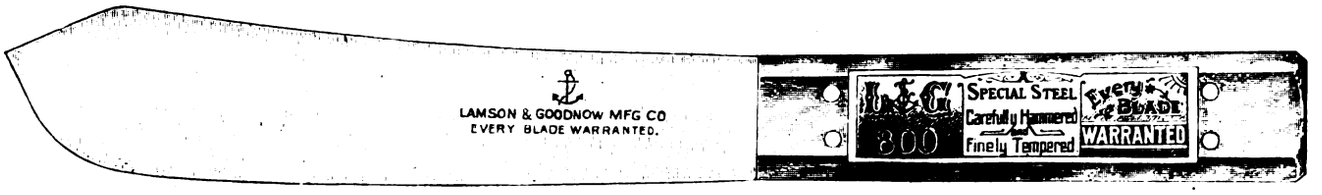
ONE REASON WHY

Our business has grown out of all proportion to any other manufacturer of

CUTLERY IN THE U. S.

Is that while our goods are unsurpassed in finish and general appearance our special aim has been to adapt them to the purpose for which they are to be used.



In the matter of Carvers, your customer wants a Knife to cut with as well as to look at. All our Carver blades are made from carefully tested Butcher Knife Steel. They take and hold a fine cutting edge.

We also make Table Knives, Butcher Knives, Shoe Knives in great variety. All fully Warranted.

MAKE THIS A STUDY

ALASKA
STOVE HARDWARE
PATENTEES AND SOLE MANUFACTURERS,
TROY NICKEL WORKS, Troy, N. Y.

AN IDEA

That will increase your business. A thoroughly practical plan for making your store popular. Popularity brings prosperity.

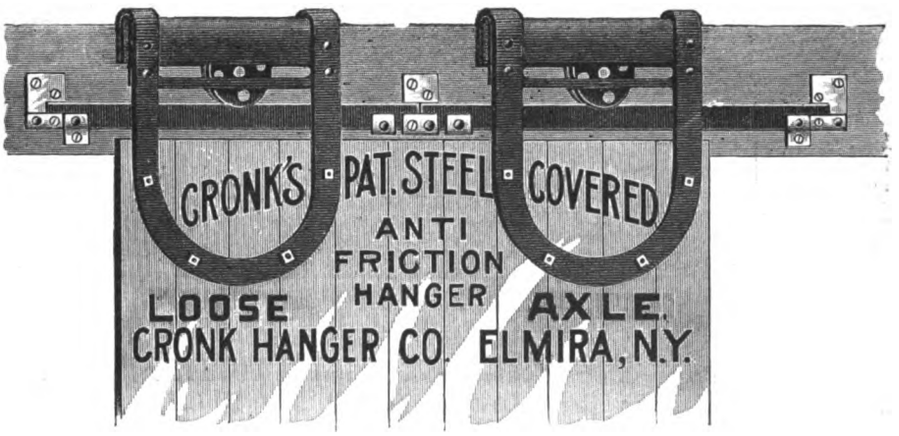
WANT IT?

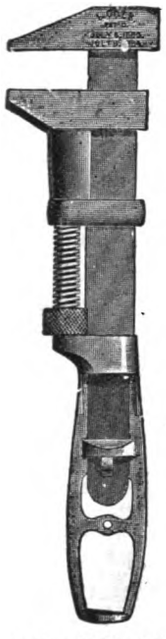
Arthur Boughton Chivers,
Advertising Writer,
257 Broadway, New York.

A GREAT LEADER for you is WORTHLY'S PATENT "SLOW FEED," $1.60, 25-lb. Manger.
10,000 in use Send for Book of Discount on these, and for list of Hay Racks, &c.

BROAD GAUGE IRON STALL WORKS,
53 Elm Street, Boston, Mass.

GLASS CUTTERS





We want every hardwareman to know that our specialty is the manufacture of . . . Rolling Steel Wheel Glass Cutters and that we can make it worth money to them to handle our goods. Correspondence solicited.
W. L. BARRETT, BRISTOL, CONN., U. S. A.

TWO PATENTS FOR SALE.

Two Valuable Patents. One the Gokey Grinding and Calk Sharpening Machine. Money in this. Also three States for the Woodward Combination Carriage and Cradle. This also is No. 1. This is a great chance for smart man. Write for description and then hustle. Not often such a chance as the above.
E. A. WORTHEN,
Burlington, Vt.

L. COES'

Genuine Improved

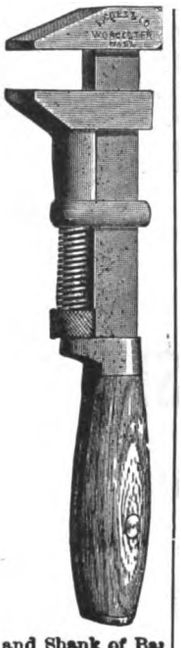
KNIFE HANDLE

PATENT

Screw Wrenches.

MANUFACTURED BY

COES WRENCH CO.,



WORCESTER, MASS.

Established in 1839.

Registered March 31, 1874.

Patented July 6, 1880.

Patented July 8, 1884.

Sectional View Illustrates our New knife Handle, showing Malleable Iron Frame and Shank of Bar keyed into position.

Straight Bar, Extra Long Nut for Screw in Jaw.

The BEST MADE and STRONGEST WRENCH in the MARKET.

J. C. McCARTY & CO.,
JOHN H. GRAHAM & CO. } New York Agents.

EVERY FAMILY WANTS ONE!

THE "FAMILY COBBLER"

Sample Outfit sent on receipt of **$2.00.**

A Household Necessity.

Contains the following articles: Iron Clinching Stand, with three reversible feet, Shoe Hammer, Shoe Knife, Pegging Awl and Handle, Large Bottle of Leather Cement, Large Bottle of Rubber Cement, Four Pairs of Heel Plates, Package of Pegs, Package of Heel Nails, Package of Clinching Nails for Men's and Boy's Work, Package of Clinching Nails for Women's and Children's work, and

THREE PAIRS OF HALF SOLES.

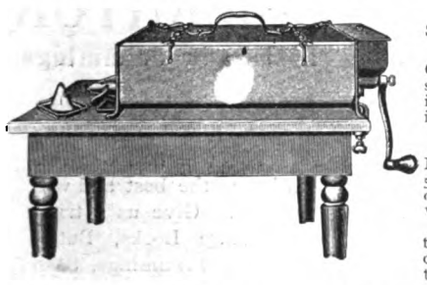
Securely Packed in wooden box with hinged lid. Weight 17 lbs.

No family can afford to be without one of these Outfits. Will pay for itself many times over each year.

For Sale By All Hardware and General Stores.

The Trade Supplied By Hardware Jobbers Generally,

or by BRANDENBURG & CO.,



Sole Proprietors of the "Family Cobbler," the "Family Harness mender," the "Bonanza" Half Soles, etc.

CHICAGO, ST. LOUIS, KANSAS CITY, OMAHA, SIOUX CITY.

Agents Wanted. Send For Catalogue.

Sample Each, Cobbler and Harness Mender for $3.50.

Polar Star Instant Ice Cream Freezer.

A Marvel to all who behold it in operation.

Size, 21x7x7. **Retail Price $3.75.** Capacity unlimited.

It makes perfectly smooth ice cream with all milk. Cream added makes it somewhat richer, but not smoother. It makes very superior, smooth water ices, frozen fruits, frozen custards, sherbets, etc., and is a very simple, convenient and economical freezer.

No Gearing, cogs or fixings to get out of order.

Noiseless in operation. A child can operate it. Makes a plate of ice cream in 30 seconds or a quart in 5 minutes. All other quick freezers merely SCRAPE it off a tin surface of some kind, but do not BEAT IT or WORK IT.

Our Freezer **Mixes, Mashes, Pulls, Grinds** and **Whips** the cream more in **30 seconds** than any paddle freezer does in **30 minutes.** Dealers will do well to investigate this promptly. Correspondence solicited.

Manufactured solely by **Polar Star Freezer Co.,**

Send for particulars and discount. **235 LEVANT ST., PHILADELPHIA, PA.**

ESTABLISHED 1818.

THE OLDEST AND LEADING MANUFACTURERS OF GALVANIZED WIRE GOODS IN AMERICA.

Patented Aug. 7th, 1894.

SOMETHING NEW

"Enterprise" Electric Light and Lamp Guards

WE are now ready to supply the trade with the Enterprise Patent Electric Light and Lamp Guard, of which we are the sole owners and manufacturers. . . . . .

This guard is a great improvement over the old style guards, being more easily attached around the socket, and requiring no brass ring for that purpose. It is made of steel wire twisted, afterwards tinned, soldering all the twists together, and made with a hinge and clasp in the middle so that you can get at the glass globe to clean or to put a new one in without detaching the guard from around the socket, which has to be done in the old style guards that have a brass ring attachment. We have seen and know by experience that the screws in the brass rings on the old style guards drop out from the vibration of buildings and the globe works out of the socket, falls to the floor and breaks. This is impossible with our guard. It is stronger than any guard in the market and very neat in appearance and has given better satisfaction to firms, that have put them in use, than any other guard they have tried. . . . . .

The price of this guard is lower than any of the old styles which have been used by some of our factories, steamships, etc. . . . . .

It will pay you to write for a sample guard and our price before purchasing elsewhere.

Sole Manufacturers, **Edward Darby & Sons,**

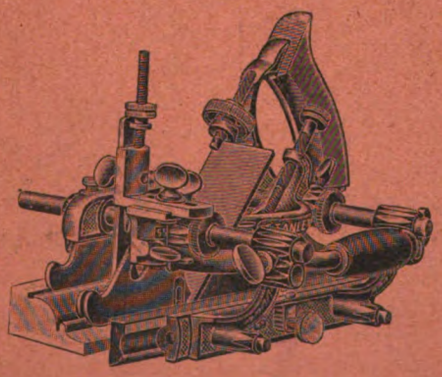
Pennsylvania Iron Works. **233 and 235 Arch St., Philadelphia.**

When ordering guards please state socket.

STANLEY'S

UNIVERSAL PLANE.

INCLUDING:



Moulding Plane, Match, Sash, Chamfer, Beading, Reeding, Fluting, Hollow, Round, Plow, Dado, Rabbet, Filletster and Slitting Plane.

NEW SCREW PITCH GAUGE No. 20.

22 Pitches.

IT will measure the threads of nuts as well as of screws, 9, 10, 11, 11½, 12, 13, 14, 15, 16, 18, 20 pitches, on one end, and 22, 24, 26, 27, 28, 30, 32, 34, 36, 38 and 40 on the other end.

It also contains the 11½ and 27 pitches for pipe threads.

The gauge numbers are stamped on the outside of the frame, as well as on each blade, allowing the user to determine the position of a desired number at a glance. Price, $1.00.

ORANGE SPORTING POWDER, MANUFACTURED BY LAFLIN & RAND POWDER CO.

ORANGE RIFLE EXTRA, ORANGE SPECIAL, ORANGE DUCKING, ORANGE LIGHTNING.

The attention of TRAP AND FIELD SHOOTERS, RIFLEMEN AND DEALERS IN GUNPOWDER, is called to the new ORANGE SPORTING POWDER, patented April 17th, 1888, and branded **ORANGE RIFLE EXTRA.**

This Powder is quick and strong, and burns with such perfect combustion that the only residum left in the barrel after shooting is a dark oily substance easily removed While this Powder is not exactly SMOKELESS, it gives only a light bluish smoke, which is almost instantly dissipated, and interferes but little with the shooting of the second barrel, taking the place of the so-called smokeless powders in this respect.

This brand of powder sells at the same price as any other brand of Rifle Powder and is superior to any made. No person who shoots can afford not to give it a trial, as after once trying it he will never use any other Powder when he can obtain the ORANGE EXTRA. Weight and quality guaranteed.

MILITARY, MINING AND BLASTING POWDER.

IT TAKES A PULL

to separate the plies of our rubber belting. A yoke of oxen can do it, but hard service won't, so strong is the friction. Our belting is uniform in width and thickness, consequently more of its surface comes in contact with a pulley. That means

NO WASTE OF POWER.

Rubber belting is never injured by water, hence it is best for out-door use, for wet localities, and for mills where the atmosphere is surcharged with moisture or steam, as in paper mills, tanneries, etc. Buy the durable kind, branded 1846-Para, Double Diamond or Carbon, made for 50 years by the

Toledo Wheelbarrow Works. Toledo. O.

The AMERICAN WICK is made on scientific principles. The gum inherent in the natural cotton is taken out, and no expense is spared to produce a wick that will give THE GREATEST ILLUMINATION.

THE

AMERICAN WICK

Made by the
WICK DEPARTMENT
Of the STANDARD OIL CO. of NEW YORK.

Oil drawn up through the AMERICAN WICK burns with a large, clear, white light and the flame does not drop off in size as it does when a poor wick is used. When the cotton is clogged with its natural dust and gum the full illuminating power of the oil is not obtained and the complaint is heard that the light DROPS.

Do You Desire

an article that every family would buy if they simply had their attention called to its merits? If you do, put in a stock of P & A's Banner Oil Stoves. See Cut.

Banner Oil Heater

SIMPLE, NOVEL and PRACTICAL.

Requires less care than the ordinary Lamp.

Will burn 8 to 10 hours and heat comfortably a room 15 to 20 feet square.

NO SMOKE! NO ODOR!
PERFECT COMBUSTION.

POINTS:

The Oil Fount is brass, handsomely embossed and highly nickeled. It holds one gallon of oil. As each fount is tested under steam pressure before leaving factory, there is no danger of leaking.

No Chimney. The drum of the **BANNER** in its construction acts as a chimney, saving the expense incident to the renewal of glass chimneys of other makes.

The Fount Frame is artistically made of wrought iron, making a solid base for the stove.

The Burner is the best made, and ONLY ONE with feeder wick, allowing all the oil to be consumed.

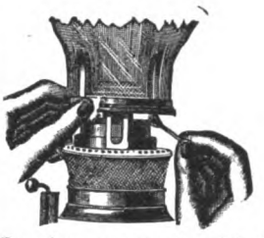
The Indicator shows at all times how much oil there is in fount.

The Flame is regulated with our ratchet wick movement, which allows the wick to be raised or lowered with nicety and exactness.

Lighting. It is not necessary to remove any part of the stove to light it. The sliding door in the drum is made for this purpose.

Draft. The round openings in the drum create great suction of cold air in addition to the regular draft. Double the radiating force of the ordinary stove is thus secured.

Get one for your Bed, Bath or Smoking Room, Library, Nursery, Office or Conservatory.



No. 971. Heater Complete. Height, 27 inches.

WE GUARANTEE THAT THE CIRCULATION OF
"HARDWARE" DURING 1896 WILL EXCEED

ONE HUNDRED AND TWENTY THOUSAND

AND THE SAME WILL BE PROVEN BY THE
PUBLICATION ON THIS PAGE, IN EACH ISSUE,
OF THE POST OFFICE RECEIPTS FOR COPIES
MAILED THE PRECEDING ISSUE.

"In another month we should be quite happy," is the suggestive phrase employed by a correspondent in to-day's market column. His reference, of course, is to the opening of spring trade, and in that view of the case merchants are perhaps justified in waiting for happiness in some day of the early future. But as a matter of fact those who wait for happiness in the future, miss a great deal of pleasure in the present. As a matter of practical philosophy, the only way to be happy is to be contented; and the only time to be contented is to-day. But how few there are who can command philosophy to that extent!

The annual dinner of the New York Hardware Club for 1896, will be given on the evening of Thursday, February 20th. The indications are that it will be as successful as were its predecessors, and those who fail to give their orders for tickets in time, will feel as did those foolish virgins who were short on oil; they will miss a good time, and hear only the echoes of the festivities within. Application for tickets should be made immediately to A. D. Clinch, chairman, care of the Hardware Club.

Hardware's Circulation Jan. 25th was 5125.

The following receipt carries its own explanation and moral:

ORIGINAL.

New York Post Office,
Jan 25 1896
Received from
Hardware
IN WEIGHT, AS FOLLOWS:

	TARE.	GROSS WEIGHT.
32 No. 1 Sack, 3 lbs.	96	3032
No. 2 Sack, 2 lbs. 5 oz.		96
Net weight,		2936
Rate per pound		.01
Amount of postage,		$29,36

N.Y. - NEW YORK - FICE - R. DEPT. - 1896 SEP 1-C

Per M. J. Callahan Receiving Clerk.
Chas. Daly Postmaster.

In other words, there were mailed, at pound rates, on January 25th, 1896, 2936 pounds of *Hardware:*

2936 × 16 = 46,976
46.976 ÷ 10½ = 4474
4474 + 651 = 5125

That is, 2936 pounds, or 46,976 ounces, divided by 10½ ounces, the weight of one copy of that number, equal 4474 *Hardwares* sent out by pound rates. To these should be added 651 copies prepaid by postage stamps, delivered by carrier in New York City, and retained for office use, and we have 5125 copies proven for January 25th, 1896. Add these to the 5651 of our issue of January 10th, and it gives a total of 10,776 as our circulation for the first month of 1896.

The Benefit of Expositions.

The great success of the Bicycle Show, which was held recently at the Madison Square Garden, followed by an increased interest in bicycling, shown as it was by all classes, indicates in a measure the benefits that

Digitized by Google

manufacturers must reap from this mode of advertising and displaying their wares. The second annual Sportsmen's Exposition is billed to take place in March, and as was the case with the Bicycle Show, offers a wide field for the energies of the up-to-date Hardwareman. First of all he must make it a point to be present, and then, how much he will be benefited depends largely on himself. If he has enterprise, he will endeavor to find out all about the latest inventions, and if he considers them practical, will enter into negotiations with the maker for the agency of the article which receives his approval, or if unsuccessful in this effort will at least carry the article in stock. He will also meet other dealers, and is likely to pick up valuable ideas and suggestions as to others' methods, and is also able to know and form opinions of his competitors, which is bound to prove valuable. He can also make the acquaintance of the manufacturers with whom he deals, and when a maker has a personal acquaintance with a customer, the latter is apt to receive better treatment at his hands, especially if the acquaintance is a pleasant one.

The general broadening effect of gatherings of this character cannot well be overestimated. The opportunity for special information is very great, and the most casual visitor to an exposition like those above mentioned, must of necessity learn something of value, and gain a widened view of the resources of the country, and the extent to which manufactures have been carried by American ingenuity.

Committees of the National Hardware Association.

The following committees of the National Hardware Association of the United States have been appointed to service during the year 1896, and the same duly approved by the executive committee:

MEMBERSHIP COMMITTEE.

H. S. Blossom, Chairman, Cleveland; Col. M. B. Belknap, Louisville; W. S. Wright, Omaha; W. A. Parker, Atlanta; F. E. Smith, Peoria; C. W. Hackett, St. Paul; J. R. Nutting, Davenport.

FRATERNAL RELATIONS.

Jno. Bindley, Chairman, Pittsburg; Geo. Deming, Cleveland; S. D. Kimbark, Chicago; Cortland Van Camp, Indianapolis; Chas. H. Turner, Albany; John S. Brown, Knoxville; Geo. L. Irvin, Baltimore.

PRESS COMMITTEE.

Geo. T. McIntosh, Chairman, Cleveland; D. C. Delamater, Detroit; A. J. Warner, St. Joseph; Hermann Bahlmann, Cincinnati; J. H. Fall, Nashville; T. A. Harvey, Saginaw; Geo. A. Braun, Toledo.

GRIEVANCE COMMITTEE.

F. C. Pritzlaff, Chairman, Milwaukee; Horace M. Hill, Minneapolis; Hon. C. B. Lockwood, Cleveland; W. E. Newill, Atlanta; Harry Walbridge, Buffalo; A. M. Wiley, Boston; Rufus K. Hireman, New Orleans.

TRANSPORTATION COMMITTEE.

James H Ritter, Chairman, Philadelphia; Simeon H. Crane, Chicago; Capt. Frederic Barker, Elmira; Wm. Chamberlain, Portland, Me.; Jos. G. Standart, Detroit; F. H. Mason, Spokane; J. D. Moore, Birmingham.

ENTERTAINMENT COMMITTEE.

T. James Fernley, Secretary-Treasurer, Chairman, Philadelphia; John Griffith, Philadelphia; William D. Supplee, Philadelphia; W. C. Reitz, Pittsburg; Hobart Weed, Buffalo; John Conover, Kansas City; W. C. Johnson, Cincinnati.

L. Straus & Sons' Bicycles.

On another page we present an announcement by L. Straus & Sons, the largest china and pottery house in the world, who occupy four stores on Warren Street, New York, running through to Chambers, and numbering from No. 42 up, to the effect that they are now prepared to supply bicycles to the trade, and are open to propositions for the agency of their wheels. The company now own a plant in New Jersey, equipped with the latest and most approved machinery, and are making, to borrow their own words, "as good a bicycle as is possible to build."

The Straus wheels will be listed at $85, from which price a liberal discount will be allowed to the trade only. L. Straus & Sons have been in business for over a generation, and are considered one of the strongest and most reliable concerns in New York. They enjoy the highest commercial rating, and in fact, their capital is practically unlimited. The sons are brilliant and enterprising men, one of whom, the Hon. Oscar Straus, ex-minister to Turkey, is a gentleman who has shown a profitable interest in public affairs. The manager of their sales department, C. P. Brown, has been with the Pope Mfg. Co. for the past several years, and is well known to the trade.

The mechanical skill employed in the construction of the Straus wheels is the best obtainable, and it is safe to predict that before another season the firm of L. Straus & Sons will cut a very conspicuous figure in the bicycle trade.

Cleveland Wire Spring Co.'s Fire.

Some nights since fire was discovered in the rear part of the Cleveland Wire Spring Co.'s factory, at the northeast corner of Hamilton and Wason Streets, Cleveland, Ohio, and in spite of the most valiant efforts on the part of the fire department the entire plant was destroyed. The loss will reach in the neighborhood of $30,000. The buildings were two-story structures, partly of frame and partly of brick, the latter being a new addition in which were located the company's offices. The origin of the fire is a mystery. The theory is that it is a case of incendiarism, although no clew was discovered which would bear out the theory. Besides the machinery used in the building, there was also stored a large quantity of spiral springs, which the company manufactured. The fire will throw about 120 men and women, mostly young persons, out of employment. The officers of the Cleveland Wire Spring Co. are: President, F. H. Hilliard; secretary and treasurer, W. A. Comstock.

Berlin Iron Bridge Co. Election.

The Berlin Iron Bridge Co., East Berlin, Conn., have just completed a very successful year. The shipments have been the largest in the history of the company, and represented by over one and one-half million dollars worth of business. At the annual meeting of the stockholders, which was held at the office of the company on Thursday, January 30th, the following directors were elected: Chas. M. Jarvis, Burr K. Field, Geo. H. Sage, H. H. Peck, of Waterbury: S. H. Wilcox, of Brooklyn, N. Y.; J. W. Burr, and F. L. Wilcox. At the meeting of the directors the following officers were re-elected: President and chief engineer, Chas. M. Jarvis; vice-president, B. K. Field; secretary, George H. Sage; treasurer, F. L. Wilcox; manager of highway bridge department, D. E. Bradley; assistant to the president, E. W. Stearns.

The power house for the Brunswick Traction Co., Milltown, N. J., will be furnished by the Berlin Iron Bridge Co., East Berlin, Conn. The engine room will be 64 feet long and 85 feet wide, and the boiler room 45 feet wide and 48 feet long. The side walls are of brick, and the roof trusses of iron.

Why Folks Read Business Papers.

BY NATH'L C. FOWLER, JR., DOCTOR OF PUBLICITY.

Business people read business papers.

He who can't get business out of the business paper has no business to be in business and generally isn't.

The daily paper has its business department.

The religious paper recognizes business.

The business paper is all business, for it can contain nothing excepting that directly pertaining to the business it represents.

The business paper is the distributer of hard business literature.

The business paper is the periodical clearing house in which is made the balance of trade.

The business paper increases trade; regulates competition; protects industries.

It is a protective organ, as well as a medium for the distribution of unpolitical free trade.

I do not mean to say that all poor business men do not read trade papers, but there never was a good business man who did not depend upon the paper of his trade.

Perhaps the trade paper editor may not have been drilled in the business he represents.

Perhaps he may have been a failure as a business man.

It is not the business of the business editor to be a success in business.

It is his business to act in the capacity of the absorber of business information; that he may the better present, with or without argument, the data of business.

Into the trade paper goes the theory and practice of business manipulation.

It is a mirror of business.

It reflects trade directly.

It does not allow the rays of business to diverge from the straight line of trade.

The business man may read an hundred daily papers, or he may read a dozen magazines, and from them all he may obtain general information of positive value in the conduct of his business; but from a good trade paper he receives definite, practical information of as much importance to him as the counter in his store, or the record book in his office.

Folks read business papers because they want to.

Folks read business papers because they have to.

The first indication of intelligent progression in the clerk is when he turns from his desk at opportune moments to absorb the paper of his trade.

The intelligent man of business reads his trade paper from beginning to end; advertisements and all.

He may not always read it intelligently, but he gives to every page at least an eye glance.

The advertisements to him are of the same importance as the reading matter.

In the combination of the two he derives information of pertinent necessity to the management and development of his business.

The trade paper is a necessity, and so long as it occupies that position it will be read conscientiously and intelligently by every business man who has proven his right to do business.

Copyright, 1896, by Nath'l C. Fowler.

A Canadian Hardware Dinner.

Following a pleasant custom that is becoming quite general, the Hobbs Hardware Co., London, Ont., some evenings since entertained their employees at dinner. Some fifty people sat down at the feast, and at the conclusion thereof W. G. Willis, manager of the glass department, and chairman of the evening, made a speech full of personal reminiscences. He then proposed the first toast, "The Queen," which was enthusiastically received, and accorded musical honors. Interspersed with various musical selections the following toasts were also honored; "Our Traveling Interests," suitably responded to by I. B. Young, F. B. Hope, W. A. Cameron and N. J. Dinnen, all members of the traveling fraternity of the house. "Our Employers" brought W. A. Eastwood and W. A. Tanner to their feet with appropriate remarks. In replying to the toast of "The Warehouse" A. Morgan and W. West took occasion to refer to the excellent good feeling and friendly rivalry existing between the employes of the warehouse and the glass factory. The compliment was returned by W. G. Willis and D. Young, who rose to respond to the toast of "The Factory." After "The Ladies" had been appropriately championed by W. A. Cameron, Geo. T. H. Platt and A. Sippi, the toast of "Our Hosts and Hostess" closed the list.

Michigan Hardware Association.

The following programme has been arranged for the first semi-annual meeting of the Michigan Hardware Association, to be held at Saginaw, E. S., Mich., on Wednesday and Thursday, February 12th and 13th, 1896, in the rooms of the East Saginaw club:

WEDNESDAY, FEBRUARY 12TH.

Afternoon session—2 o'clock.

1. Roll Call.
2. Selecting Committee on Credentials.
3. Recess of Thirty Minutes.
4. Reading of Minutes.
5. President's Address.
6. Report of the Secretary and Treasurer.
7. Adjournment.

Evening Session—7:30 o'clock.

1. Paper—"The Best Method of Creating and Maintaining Harmony Between Local Dealers." - - - MR. HENRY C. WEBBER, Detroit.
2. Discussion.

THURSDAY, FEBRUARY 13TH.

Morning Session—9 o'clock.

1. Paper—"Present Method of Making Net Profits Now, as Compared to Twenty Years Ago." - - - MR. T. A. HARVEY, Saginaw.
2. Discussion.
3. Paper—"How to Overcome Competition in the Sale of Inferior Goods by Irresponsible Dealers." - - MR. T. FRANK IRELAND, Belding.
4. Discussion.

Afternoon Session—2 o'clock.

1. Paper—"The Retailer, the Jobber and the Traveling Man." - - - MR. EDWARD A. MOYE, Marquette.
2. Paper—"The Traveling Man's View of it." - - MR. ALBION F. WIXON, Marquette.
3. Discussion.

Thursday Evening.

Complimentary Banquet at the East Saginaw Club.

The headquarters of the Association will be at the Bancroft House. Executive committee headquarters, Room 8.

Advertising Axioms.

"The better the day, the better the deed." The better the "ad." and the better the mediums used, the better the results.

If you have something that people need, advertise "with courage and faith," and the people at home and abroad will respond to your profit.

Do not forget that an advertisement in "perpetual motion," *if it is good*, will wear its way into the people's memory with consequent results to you.

Here is a suggestion—"*Make your advertisement an argument deriving its force from the situation, and present it clearly to all to whom it is addressed.*"

By advertisers I mean those who *know* that advertising *well done* is bound to bring results; by business men I mean a very large class of manufacturers who are "poor in the midst of great wealth," *i. e., of possibilities of development.*—By J. Walter Thompson.

The Sportsmen's Exposition.

As preparations progress for the Second Annual Sportsmen's Exposition at Madison Square Garden, New York, indications are not wanting to the effect that it will far surpass that of 1895 in the variety of its displays, and in the attractiveness with which they are to be arranged.

The rivalry among manufacturers and dealers to produce displays which, in novelty of feature and attractiveness of arrangement, will loom up much in the nature of a surprise on the opening day, is in itself an indication of the healthy degree of enthusiasm that pervades all circles interested. An amusing degree of mystery and secretiveness has been called into play clear down the line of exhibitors, and even those who are destined to be outrivaled, if not eclipsed, next March, will at least have the satisfaction of knowing that they have made an earnest and plucky fight for priority in the Show.

The past week has seen the efforts of the Sportsmen's Association crowned with success in the direction which unquestionably means much to the coming Exposition. This has been the securing of a concession from the Trunk Line Association, embracing all of the prominent roads centering at New York, of a one and one-third fare rate, to be enjoyed by all accredited delegates to the Sportsmen's Convention, to be held at Madison Square Garden during Exposition week. By this provision, accredited delegates will purchase their tickets from their homes to New York, and on having their credentials vised here by the trunk line agent and by the assistant secretary of the Sportsmen's Association, they will be sold a return ticket for one-third of the regular fare, which will give them the round trip for one and one-third of the regular rate. The leading members of the Association, who are also exhibitors at the coming Exposition, have heartily endorsed the project for a Sportsmen's Convention during Exposition week, which in itself will be an educational feature of decided importance. Plans are on foot to make this convention one that will be memorable in the history of sport and sportsmen's displays. These plans will be announced a little later. Meantime, leading exhibitors will see to it that among those who receive credentials as delegates to the convention will be representatives of some of the oldest and most prominent out-of-town houses in the retail sporting goods trade. An opportunity for exhibiting manufacturers to meet their customers personally and to cement the ties of good fellowship by a little personal attention upon so memorable a visit as the coming journey to New York will prove to many of the delegates, will be improved to the utmost extent.

Through this happy condition of things, it is expected that the Second Annual Sportsmen's Exposition will be given a degree of importance from a trade standpoint that it has never attained before.

Electroplating Apparatus, Etc.

The Zucker & Levett & Loeb Co., No. 526 W. Twenty-fifth Street, New York, have issued a complete and handsome catalogue of the great line of nickel and eletro-plating supplies and polishing materials which they carry. The earlier pages are devoted to a general description of the Improved Giant Dynamos for electro-typing and electro-plating. These are of the inverted horseshoe type and have a laminated field made of the best Swedish iron in the smaller and of a special cast iron in the larger sizes; the armature is thoroughly laminated to prevent a possible heating due to Foucault or eddy currents, and the armature heads are covered to prevent any dirt or oil from entering them, also to prevent the wire from receiving mechanical injury. The commutator has a large number of sections, thereby insuring a perfectly even current and deposit, and likewise reducing to a minimum that well-known evil, sparking. The commutator bars are drop forged copper, and are thoroughly insulated with mica. The machines are shunt wound and so proportioned that it is impossible for them to reverse. The bearings are made of a special alloy, much harder than phosphor bronze, and are provided with an automatic oiling device, which keeps the shaft of the armature constantly lubricated. These dynamos are described as extremely simple, all the parts being in sight and easily accessible and the armature and other parts can be removed and replaced by any one in a few minutes. The greatest possible care is taken in the manufacture of these machines, and every part is subjected to a thorough test before the machine is assembled. After it is put together, it is run for several hours on an overload, to see that it fully comes up to the efficiency claimed for it. The brush holders are of an improved pattern and are adjustable in every respect. The brushes can be lifted from the commutator by means of a thumb screw, with which the tension of the brushes is also regulated. All parts of the dynamos are made to standard gauge and are interchangeable. They also publish a great many testimonials from prominent users who have found these machines very successful in operation. Several pages are devoted to descriptions of batteries for electro-plating, accompanied by a complete description of an electrotyping plant, with the parts necessary for a nickel-plating and polishing outfit. These lists range from $100 to $3600, the latter named having a capacity for handling one hundred bicycles per day. Like lists are also given for silver-plating, gold-plating and copper, brass and bronze outfits. The catalogue in addition contains full descriptions of all the machinery and appliances for carrying on the work of electro-plating.

The Hardware Industry.

Fifty years ago the great proportion of Hardware used in this country was imported; to-day the great proportion is manufactured here. The growth of the business, from a small beginning to its present huge proportions, has been through gradual development. Hardware is a staple article, or articles, for the term implies endless articles necessary to house building, metal trimmings, all kinds of tools, cutlery and nails. In an interview, a prominent member of the trade said: "New York is the biggest Hardware manufacturers' centre in the United States. There are large distributing cities, such as Cleveland, Chicago and St. Louis, but they depend largely on the New York houses for supplies. The biggest market for American manufacturers is America. New York's pre-eminence in the Hardware trade is probably due to the fact that the industry is one of Eastern origin, and New York was the natural stopping place for merchants from the West and South. Instead of going to New England, they stopped at New York."—*New York Mail and Express.*

Covert's Saddlery Works, Farmer, N. Y., inform us that they have lately greatly reduced their prices on Neck Yoke Centers, and add the pleasant news that their entire line of saddlery, coach and general Hardware is booming. Their 1896 catalogue and price list is ready to mail, and they will be pleased to send it to all who request the same.

The Berlin Iron Bridge Co., East Berlin, Conn., have just completed for the Newport News foundry, Hampton, Va., a large foundry 40 feet wide and 160 feet long, the central portion being controlled by a traveling crane. This is one of the best and most modern foundries of the Southern States.

J. V. Bickford & Co., Machinists and Steam Fitters, Mount Holly, N. J., Jan. 28, 1896. Hardware Publishing Co., Gents: You will please find our check for another year's subscription to *Hardware*. We don't want to be without it.

Law Suit a Weapon.

The Magnolia Metal Co., at No. 74 Cortlandt Street, New York, has had to defend itself against several peculiar attacks by rival corporations, which have wanted to get control of its patents, and the latest attack is in the form of an attachment, which has been served in advance of the trial of a suit for $35,000. Charles B. and Edward C. Miller organized the company eight years ago, and the corporation is incorporated under the laws of West Virginia. As the company manufactures the finest grades of metal used in journal bearings, its patents are of great value, and several capitalists have vainly tried to get control of them.

Recently a discharged employee in Chicago made a claim against the company for $7000, and the claim was assigned to James Shanks, of this city, who brought a suit. The company settled the claim for $1 and caused the arrest of Shanks for alleged perjury in the proceedings. Now an attachment has been issued against the company in a suit brought by a man named Lawlor, as the assignee of a claim of $35,000 made by an English construction company. As Lawlor is a New Yorker and brings the suit against a foreign company having an office in this city, he has been able to get the attachment before the trial of the suit. Although the suit is for $35,000, he has been obliged to give a bond for only $1000, and ex-Dock Commissioner Phelan is on the bond.

Charles B. and Edward C. Miller said last evening that the English construction company, which has made the claim for $35,000, really owed them about $80,000, and they would be able to show that by the contract if the suit of the assignee could ever be brought to trial. The suit was an American suit, they declared, and had been brought in order to secure the attachment as a club to compel them to sell their patents cheaply. They declared that they would dispose of the suit in short order and show the animus of it when the case could be brought to trial. Instead of being liable to a judgment, they said, they had made about a million of dollars in the manufacture of magnolia metal and only lately passed $150,000 of the company's surplus to the capital account.—*New York Tribune.*

The Magnolia Metal Co. of New York has given bond for $36,000 in this matter, and has brought suit for $100,000 against the parties who instigated these attachment proceedings for money actually due from them to the Magnolia Metal Co. and for attempted damage by the attachment proceedings.

A most beautiful prospectus is being sent around to friends of the Magnolia Metal Co., offering stock in this company with a 10 per cent. guaranteed dividend, payable semi-annually.

An Iowa Hardware House.

The *Iowa State Advertiser*, Clinton, Iowa, published, in a recent issue, an extended and appreciative article on the Sickels, Preston & Nutting Co., Davenport, Iowa, from which the following extracts are taken: In a conversation lately with Mr. J. R. Nutting, manager of the great wholesale Hardware concern of Sickels, Preston & Nutting Co., of Davenport, we were told that it has been the invariable rule of that house for years past to buy goods at home or as near home as possible, and that to-day they are buying goods in Clinton, Dubuque, Cedar Rapids, Burlington, Fort Madison and other Iowa cities wherein there is a factory putting out goods in their line. This result is practical reciprocity. An immense trade has been secured, and a commercial recognition has been achieved that has made the name of this firm a household word throughout the State and country. For almost half a century this house has been a leader in its line. The company's warehouse and offices are centrally located in the city of Davenport, occupying an imposing and commodious brick structure on Third Street. This building is 44x150 feet, five stories in height. In addition to this building three large warerooms are located on Front Street with the Mississippi river on one side and a railway side track on the other, giving them complete shipping facilities.

The Sickels, Preston & Nutting Hardware Co. deal extensively in shelf Hardware and cutlery, tinners' tools and supplies, stamped ware and tin plate, sheet iron, belting and mill supplies, paints and all other articles handled by the best class of Hardware, paint and tinware trade. They also handle rope, cordage and binder twine, the last named article being a specialty with them. In barb wire they are heavy dealers, it being estimated that sales of each season for a period of fifteen years, would run a legal fence twice around the entire state of Iowa. As an illustration of the volume of business transacted by this house it is only necessary to take a single item, that of skates, of which they (including their New York house) have already sold, during the season of '95, over 100,000 pairs.

This house is headquarters for all goods handled by it, as all articles of whatever manufacture are bought directly from the factories. They buy nothing from jobbers or middlemen and thus are enabled to put their goods on the market at the most favorable market rates. The officers of the company are: Robert Sickels, president; A. J. Preston, vice president; J. R. Nutting, treasurer and general manager, and G. H. Nutting, secretary. The Eastern house of Sickels, Sweet & Lyon, of 35 Barclay Street, New York, is connected with the Davenport house and looks after the Eastern trade. The Davenport house employs a large number of clerks, salesmen and accountants in its various departments and has a force of eight traveling salesmen in the field all the time. They cover the entire West and Northwest.

The management of this large establishment devolves upon Mr. J. R. Nutting, the treasurer of the company. Mr. Nutting entered the employ of the company as an errand boy in 1864, and by faithful and conscientious service, honorable business methods and ability, paved the way to his present commanding position. He has clearly demonstrated what perseverance and application can accomplish when used in the proper channel. He is recognized throughout the entire country to-day as one of the most prominent and successful wholesale Hardware merchants in the West. He is a regular contributor to the leading trade journals of the country on topics concerning the iron and metal trade, and his opinions are given great prominence. Among the people connected with the house of Sickels, Preston & Nutting Co. are two of Mr. Nutting's sons, who are following closely in the father's footsteps and bid fair to attain as great a prominence in the trade as their worthy sire. They are Grant Hosford Nutting, secretary of the company and Ralph Everett Nutting, at present in charge of the cutlery department.

Church & Sleight Dissolution.

The following announcement carries its own explanation:

Gentlemen:—The co-partnership heretofore existing between the undersigned is this day dissolved by limitation. The business will be continued by Geo. W. Church, who will sign in liquidation for the late firm, and will continue in the same line of business. The sales department of the business will continue as in the past, under the supervision and management of James E. Sleight. The favors which have been extended to the late firm are solicited for its successor, and we take this opportunity to thank you for your consideration in the past. Yours very Truly,

GEORGE W. CHURCH.
JAS. E. SLEIGHT.

NEW YORK, January 1st, 1896.

HARDWARE'S "Prices Current" are reliable.

Travis' Lawn Sprinklers.

The accompanying cuts illustrate a line of Sprinklers manufactured by the W. S. Nott Co., Minneapolis, Minn., whose factory for the construction of these goods is located at Bridgeport, Conn., from which point the sprinklers are shipped out to the trade. Fig. 1 illustrates a new Revolving Sprinkler that possesses features not contained in the

NIG. 1.

construction of other sprinklers. This device is made to revolve without a water joint, and is guaranteed not to wear out, or leak, no matter whether it is run from a tank or hydraulic pressure. It is said to cover a very large area, and perfectly distributes the water from the base, outward. All of the wearing parts are made from brass, so as to prevent it from rusting. It is mounted on an ornamental base of circular form, which posseses the necessary attachments for the hose, and the device can be drawn about the lawn

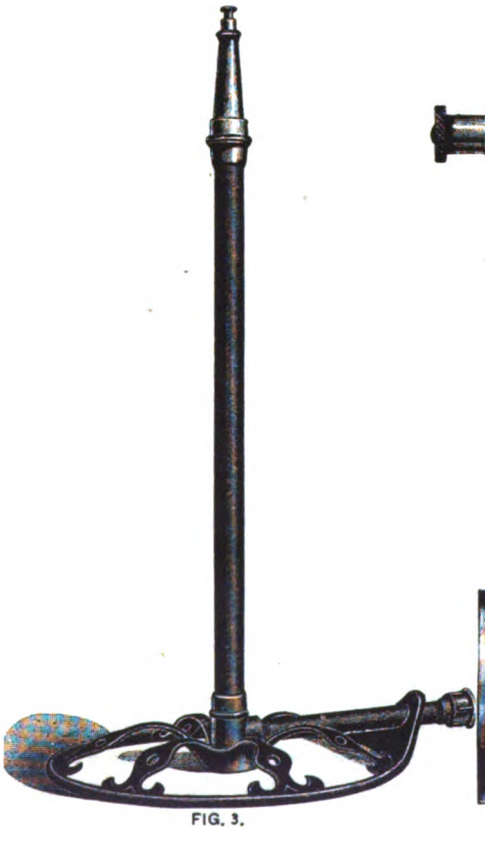

FIG. 3.

without turning off the water. For large lawns, this Sprinkler is especially adaptable, and the manufacturers give it the title of being the prince of lawn sprinklers. The base is finished in black enamel and the upper part finished entirely in nickel. It is capable of revolving from a pressure of fifteen pounds, and readily adapts itself to all conditions which are found with an ordinary water supply.

Fig. 2 represents the Travis Toboggan Sprinkler, given this name from the similarity to the form of the toboggan. There is mounted upon this low-down base, a connection for the hose, and on the opposite end of the said connection, is secured the automatic sprinkler. This sprinkler is peculiar in its construction, as it is provided with a close-fitting cone-shaped plug. The plug oscillates upon a cen-

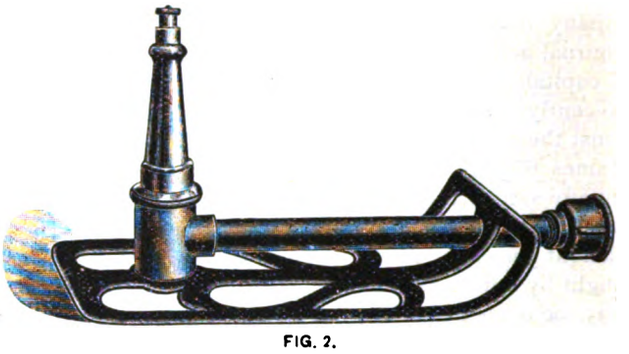

FIG. 2.

trally located rod within the atomizer proper, and a burled nut screws on the top of the adjusting rod, and compresses an indestructible spring, which may be turned down so as to adjust the cone in the mouth of the nozzle, to adapt itself to any degree of pressure. By this means a very fine spray can be ejected from the nozzle, or it can be screwed up so as to throw a very much heavier volume of water. By the employment of the automatic throat above referred to, the device can readily adjust itself to varying pressures. It will cover a very large area, and it also possesses the feature of being drawn about the lawn by the hose, without turning off the water. The finish is in black enamel and nickel.

The High Stand illustrated in Fig. 3 is new in its construction, being built upon a circular base, formed up in a light and ornamental style, and upon this base, is mounted

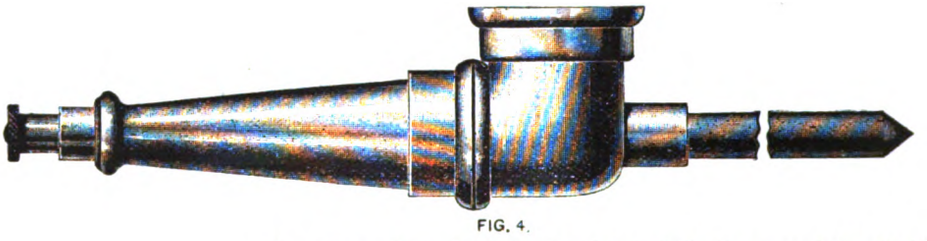

FIG. 4.

the connections for the attaching of the hose, and the light piece of tubing extends from the centre of the base in a horizontal position about 2½ feet high. Upon the upper end of this tube, is a fitting for the receiving of the spraying nozzle. This nozzle is of the automatic throat type referred to in Fig. 2, and can be adjusted to fit any pressure.

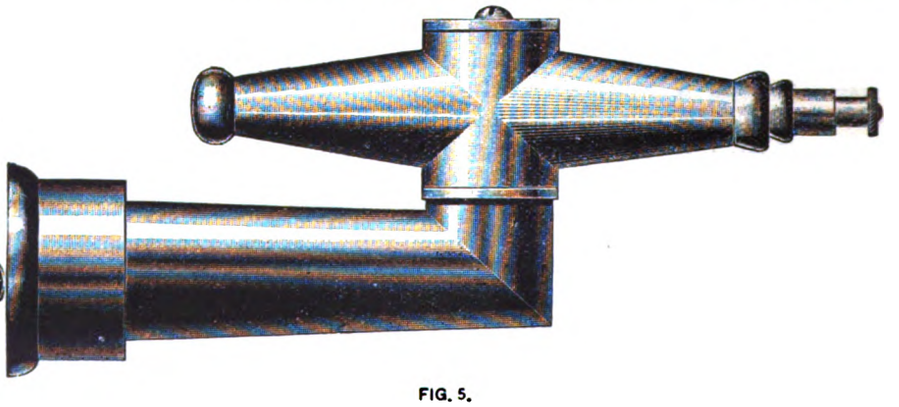

FIG. 5.

The High Stand can be drawn about the lawn, and is literally a movable fountain. The water thrown from an elevated position in a steam-like spray, is said to be very beautiful, attractive and effective, as it covers a large area, and the entire device has the distinction of being new

Digitized by Google

and novel in design. It is finished in black enamel and nickel.

In Fig. 4, we give illustration of the Elbow Sprinkler, the object of its construction, the manufacturers state, being to place an excellent device upon the market, at a moderate price, and to give the same results so far as the character of the spray ejected is concerned, as the "High Stand" gives, or the "Toboggan" possesses. To accomplish this, the same style atomizer is used, having the automatic throat with adjustable mouth cone for varying pressure. The Elbow Sprinkler is made entirely of brass, and is extra heavy, with a five inch spike provided at its base to stick in the ground. It does not, however, possess the features of being drawn about the lawn, as is the case with the other line of sprinklers illustrated herewith, but as previously stated, has all of the spraying qualities. It is finished entirely in nickel.

In Fig. 5 is shown the Reversible Spraying Shut-off Nozzle. This nozzle is designed to be held in the hand, and is provided at the spray end with the automatic throat referred to in some of the other constructions. This fineness of the spray can be adjusted to suit the conditions. It gives a large volume of water, perfectly atomized, and for flower beds and other delicate vegetation, can be adjusted, it is said, to throw a deluge of perfectly dew-like spray. To throw a straight stream it is simply a matter of reversing the ends of the nozzle which turns on a ground joint. It is pointed out that there is never any danger of getting wet while reversing from spray to straight stream, or *vice versa*. To shut off the water entirely, simply turn the spraying end at right angles to the main shank of the sprinkler. It is finished in nickel.

New York Hardware Club.

The Hardware Club, which occupies the fourteenth and fifteenth floors of the Postal Telegraph Building, at Broadway and Murray Street, is one of the most popular and prosperous clubs down town.

It was incorporated in June, 1892, by merchants in the Hardware trade, but members of other trades and businesses were never excluded from its list of members.

It opened its spacious and elegant rooms May 31, 1894, at which time it entertained its members and hundreds of their friends.

The club's rooms are handsome and well appointed, are finished in mahogany, and where not tiled are carpeted with rich Wilton carpets; their walls are pleasantly decorated, and the furniture is of mahogany throughout.

Across the Broadway front are the reception and reading rooms; along the Murray Street side are the dining rooms, capable of seating 200 persons at once, and in the rear are the cafe, kitchen, serving rooms, butler's pantry and wine-room.

Attractive rooms for private parties and the use of members' wives and families are also there. Every room is light and airy, and commands a fine view of the city. By going from room to room one may see the entire lower city, bay, and harbor of New York, with portions of Brooklyn and New Jersey.

The club has a roll of 528 resident and 106 non-resident members—it is limited to 600 resident and 200 non-resident members. Its admission fee is $50, and its annual dues are $50 for resident, and $25 for non-resident members.

The officers of the club are: President—Peter McCartee; Vice President—Robert H. Swayze; Treasurer—Thomas F. Keating; Secretary—J. Leonard Varick; Board of Governors—Arthur G. Sherman, Edward C. Van Glahn, George H. Sargent, Eugene Bissell, James H. Kennedy, Richard R. Williams, Alfred D. Clinch, Charles Daly, Brace Hayden, Mortimer C. Ogden, and Webster R. Walkley.

Among its prominent members are Franklin Acker, Benjamin Atha, Thomas J. Atkins, William H. Baker, Thurlow Weed Barnes, James M. Bell, E. Henry Boardman, George S. Brown, Thomas F. Byrne, Willard L. Candee, Edward F. Cole, Warren A. Conover, John M. Crane, Terence F. Curley, Phillip T. Dodge, Charles L. Dwenger, Robert N. Fairbanks, Joseph Gales, Augustus Gaylord, Hugh J. Grant, Charles E. Jennings, Thomas F. Keating, Richard M. Laimbeer, John W. Mackay, Edwin A. McAlpin, Edward H. Perkins, Jr.; Lemuel E. Quigg, George F. Spinney, Albert H. Tatum, Francis M. Underhill, Chief Justice Robert A. Van Wyck, and Webster R. Walkley.—*New York Times.*

The J. Stevens Arms & Tool Co.

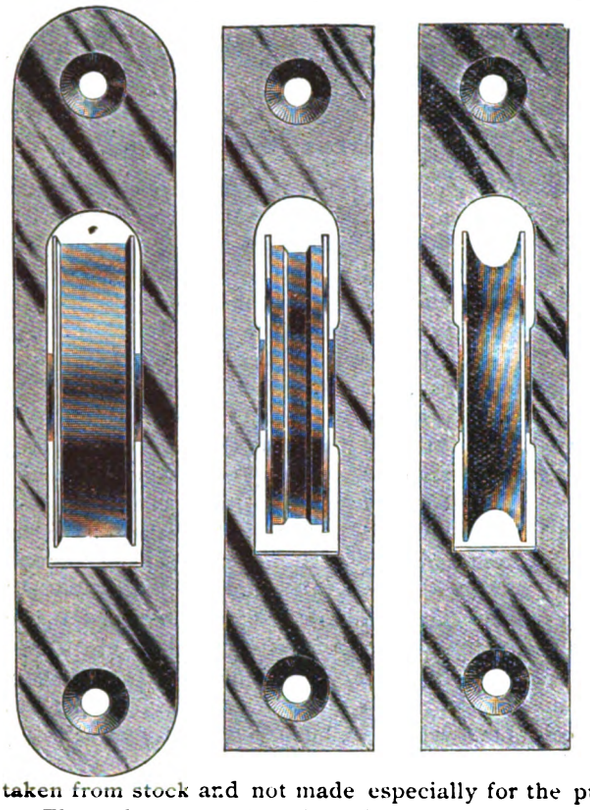
The new officers of the J. Stevens Arms & Tool Co., Chicopee Falls, Mass., held a meeting yesterday afternoon, and completed the reorganization of the new corporation. The capital stock of the company is the same as before, which will be amply sufficient for carrying on the business as planned. The officers chosen are: President and Treasurer, Irving H. Page; clerk, Miss Georgie E. Page; board of directors, these officers, with Charles B. Fay. The new company are planning to branch out after they have got started, along broader lines than the old company followed. This will necessitate the employment of more men. The old firm once had a large force of men in their employ, and after the new company get on its feet they hope to give employment to as many, if not more. The shops will be pretty thoroughly overhauled and everything be put into ship-shape. Mr. Page, the new president of the concern, has been employed as secretary for fifteen years, and has just returned from Athol, where he has been engaged in the machinist business for two years. The old board of directors met yesterday, but adjourned for a week.—*Springfield (Mass.) Republican.*

His Knowledge of Knives.

"I remember seeing on my father's table when I was a boy," said the middle-aged man, "some knives that had been so worn down with long use and repeated cleaning that they were almost pointed, and that were so thin that they were so flexible, like the knives that druggists use to get things out of mortars with; I know I used to think the folks must have had them a long, long time. The other day I saw at my place at the table an ivory-handled steel-bladed knife that was so worn down at the end that it was almost pointed, and that it was so thin that it was flexible, like a druggist's knife; I picked it up and tried it on my plate. An heirloom? It was a knife that I had bought myself when I was married, and which had gradually worn down to this, and I had never until now understood it.

"And I wonder what my children think of the thin-bladed knives they see on my table?"—*New York Sun.*

Garden Hose.



The New Jersey Car Spring & Rubber Co., Jersey City, N. J., who have won an enviable reputation as manufacturers of high grade rubber goods, are out with a very attractive line of Garden Hose for the year 1896. Two or three new brands have been added to the well-known standard brands which this company has carried so successfully in years past, and the trade will find it profitable to send for samples, prices and further information.

Alfred Field & Co., No. 93 Chambers Street, New York, have issued a sheet showing the prices upon the Shears made by the Trade Unionist Sheep Shear Co-operative Society, whose members, as we understand it, were former workmen—afterwards locked out—of Burgeon & Ball This settles the question of quality, and all other points are guaranteed by the fact that the goods are handled by the firm above named.

Gardner Sash Balance Co.'s Pulleys.

The Gardner Sash Balance Co., No. 312 First National Bank Building, Chicago, are making about five thousand different styles and finishes of pulleys, running from one inch in diameter up to ten inches for ribbon, chain or rope. Illustrations of some of them are here shown. They guarantee their pulleys equal to samples sent out, as the samples

are taken from stock and not made especially for the purpose. They also guarantee them in every respect as to quality and price, and will be pleased to send full information as to sizes, prices, etc., on application. They also make steel ribbons, attachments for sash balances, elevator doors, etc.

Columbia Safety Dumb-Waiter.

Speidel & Roeper, Reading, Pa., are offering the Columbia Safety Dumb-Waiter—Speidel's Patent—shown in accompanying cuts. They are made in three sizes—100, 300

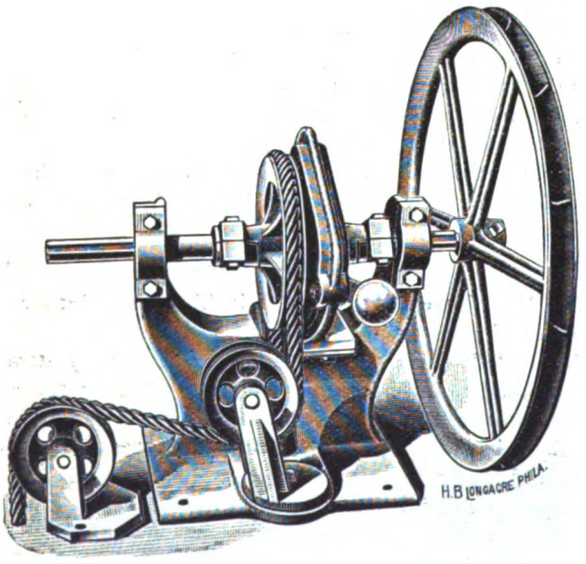

FIG. 1.

and 500 pounds capacity. Figs. 1 and 2 show the smallest size dumb-waiter, the machine proper and the regular residence dumb-waiter respectively. The machine, Fig. 1, consists of a strong cast iron frame with an arm extending upwards at either end, and forming the journals for the driving shaft. This latter carries the hoisting sheave in connection with the automatic friction brake and the hand rope wheel. The hoisting rope is brought up from the car, Fig. 2, through a hole in the centre of the base of the machine, over the hoisting sheave down to the swivel guide, and over another idler sheave to the balance weight. An endless hand rope is laid over the wheel in front, and pulling one side of it will raise the car, while pulling the other side will lower it. There is no brake rope required with these machines. The bearings are either anti-friction roller or self-lubricating graphite bearings, thus dispensing with the oiling. The brake is automatic, very powerful and reliable, and will hold the car safely at any point of the lift, no matter how heavy the load may be. The speed of the car is about 100 feet per minute, depending somewhat on the size of the hand rope wheels, which are made from 16 inches to 30 inches dia-

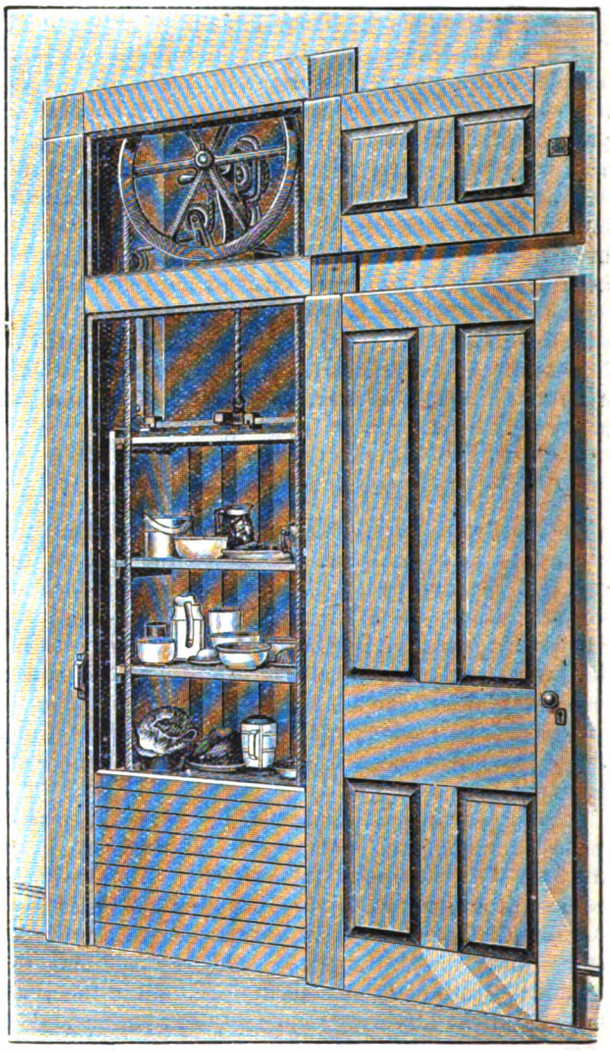

FIG. 2.

meter, corresponding with the width of the car. Another feature in favor of the machine is the ease with which it can be put up by any ordinary house carpenter, being self-contained and having all the sheaves and bearings form part of the main frame. No portion can be placed in a wrong position or become loose after being in use for some time. There are several hundred of the Columbia Safety Dumb-Waiters in use in all parts of the country, giving, we are told by the makers, entire satisfaction.

H. G. Higgins, of H. G. Higgins & Co., No. 19 Pearl Street, Boston, has been on a visit to his many friends in New York. He reports business as good, especially in the line of hickory handles. In this line, he says that they do not compete with the cheaper grades, that they keep up the standard, and have no connection with any combination.

The Manufacturers' Convention.

The first annual convention of the National Association of Manufacturers of the United States, which was formed in Cincinnati last year, concluded a very successful session in Chicago. About 300 manufacturers were present, representing a number of lines of industry, among which Hardware was quite prominent. The meeting was presided over by President Thomas Dolan, who in his opening remarks declared that the time had come when the manufacturers of the United States should stand together for the defence and promotion of their interests. A number of committees were named, and the report of the executive committee showed that the Association was in excellent condition. A number of reports were presented, and the following resolutions were unanimously adopted.

Resolved, That for the purpose of making practical the principles announced by this Association the executive committee, as provided for under the constitution, be and is hereby empowered to perfect and carry out such plans, to establish such permanent agencies as may in its judgment be best calculated to secure for the manufacturers of the United States the favorable results contemplated by the formation of this organization; and, to this end,

Resolved, That the membership of this Association pledges to the executive committee its moral and material support and confers upon it authority to make such expenditure within the limit of funds at the disposal of the treasurer, as may be best calculated to accomplish the ends aimed at by this Association.

When the election of officers occurred, Mr. Dolan declined to stand for re-election as president, and Theodore C. Search, of Philadelphia, was elected to that position amid great enthusiasm. Mr. Search is head of the John B. Stetson Hat Co., of Philadelphia. Robert Laidlaw, of Cincinnati, was elected treasurer, and E. P. Wilson, of Cincinnati, secretary, and the following vice presidents were chosen to represent the states named: H. L. Story, California; W. Hastings, Delaware; J. B. Kirk, Illinois; J. B. Hoard, Michigan; L D. Kingsland, Missouri; B. Atha, New Jersey; T. P. Egan, Ohio: J. H. Converse, Pennsylvania; F. W. Sivyer, Wisconsin; Pliny Jewell, Connecticut; J. F. Hanson, Georgia; P. E. Studebaker, Indiana; E. W. Lovejoy, Massachusetts; M. C. Peters, Nebraska; Warner Miller, New York; L. D. Cole, Oregon; C. D. Mitchell, Tennessee.

The executive committee were authorized to fill vacancies. The new executive committee was declared to be composed of the officers, the vice presidents of New York, Ohio, Missouri, Wisconsin, Indiana, Pennsylvania, Massachusetts, Iilinois, New Jersey, Michigan, Connecticut and California, and four members at large to be hereafter appointed.

The report of the committee on resolutions embodying action in asking a uniform classification of freight from the interstate commerce commission aroused a heated discussion. It also advocated the establishment of an industrial exposition in the City of Mexico; that a department of manufacturers be established under a secretary of equal rank with the secretary of agriculture; that the inequality of traffic conditions in various states be investigated and righted if possible, and that the Senate of the United States be earnestly requested to pass promptly and send to the President the revenue bill lately adopted by the House of Representatives.

Philadelphia was chosen unanimously as the next place of meeting.

President Crespo, president of Venezuela, recently instructed his New York agent to purchase for use in his family "two of the finest bicycles made in this country," to quote from the President's letter. On the steamer which sailed from New York, January 13th for South America, were two Monarch Models No. 40, in fulfillment of above order.

The "Herald" and Hardware.

The New York *Herald* has secured views from leading business men in all parts of the country as to the prospects for Spring trade. Those that relate to Hardware are here given:

Hardwaremen in nearly every section of the country speak hopefully of the outlook in their line of trade. From some cities extensive buying is reported as having already commenced, and in others there are indications that it is not far off. The views of prominent dealers in metal as given to the *Herald* are:

Mr. Laighton, of the Russell & Erwin Mfg. Co., this city, said: "We have every reason to believe that there will be good business in the Spring. The farmers are comparatively prosperous, the railways are doing good business, and there seems to be a general desire through the country to make the most of the improved conditions. We have to do with the domestic trade principally, and we can see signs of returning confidence. It is to be regretted that financial confidence is not restored, but we are hoping for some comprehensive action by the government which will take away this nightmare from which we have been suffering so long. Were this done it would be very easy to predict the future with certainty."

Charles F. Dowse, Boston, Mass.: "The unsettled state of the money market makes many somewhat timid; still we have taken larger orders for spring delivery in certain lines of goods than ever before, and with the present firmness of the iron market, and harmony among the nail manufacturers, we have great confidence that the business success of 1896 will be above the average."

W. W. Supplee, Philadelphia, Pa.: "The latter part of 1895 and the beginning of the new year found the Hardware trade in a healthy condition, and taking as a criterion the returns of our salesmen, who are making their first calls on customers for the spring business, the outlook is very satisfactory. The only demoralizing condition that seems to confront us is the unfortunate position of the Treasury Department in continually needing gold."

J. H. Humphrey, St. Paul, Minn.: "We have been gratified with our increased sales for the season. Our inquiries from the country indicate a satisfactory spring trade."

Adolphus C. Bartlett, Chicago, Ill.: "We could do a larger business than we are now doing, but this is because it is between seasons. In the spring we anticipate a better trade, not because conditions will be so much improved, but that stocks will be low in the houses of the country and smaller dealers, and will consequently need replenishing."

C. T. Jenkins, Baltimore, Md.: "In this section the year has opened very favorably and the outlook for spring business is more than promising. Baltimore, as a Hardware market, is dependent almost entirely on the Southern trade. The conservative policy pursued by the merchants in their purchases during the past year resulted in broken stocks—stocks so low, in fact, as to show empty shelves. Dealers are now placing orders freely."

John Bindley, Pittsburg, Pa.: "The rapid advances of last summer brought about a natural reaction. This is correcting itself, and as soon as merchants feel that prices have reached their natural level, buying will set in. This should give us a good year."

William R. Belknap, Louisville, Ky.: "So far as we can tell, Louisville will do a big business next spring in our line. The cotton crop was a profitable one, and our business is altogether in the South, which is now in a better condition than any other part of the country. Our salesmen are sending in encouraging reports, and collections are excellent."

HARDWARE costs only One Dollar a year.

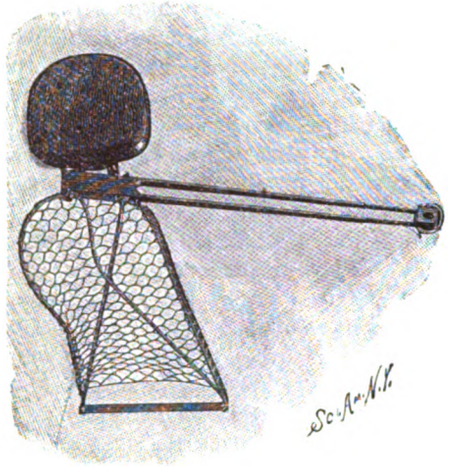
ILLUSTRATED BICYCLE NOVELTIES.



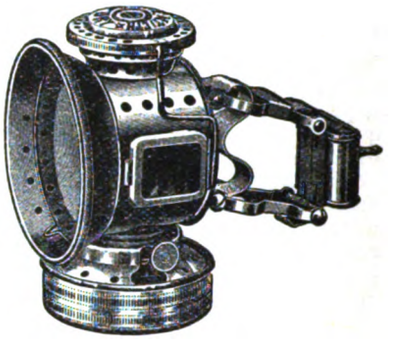
MANUFACTURERS and DEALERS are invited to make FREQUENT USE of these columns.

Anything NEW in BICYCLES or BICYCLE NOVELTIES should be sent us immediately. NO CHARGE, direct or indirect, is made, as our interest lies in SHOWING THE HARDWAREMAN what is going on in THE BICYCLING WORLD.

When your NOVELTY is ready, send us an Electrotype and descriptive matter, which will appear immediately.

A Bicycle Side Saddle.

Henry A. Lederle, Traverse City, Mich., is introducing a contrivance, which is here shown, to facilitate carrying on the ordinary wheel a passenger in addition to the one who



is propelling the machine, and to hold a lady's skirt from coming in contact with the wheel. It consists of an elongated clip frame attachment, shown separately in the small view, and composed of two parallel rods joined at the front by a block, and connected to the rear upright by a clip bolt, the front portion of the frame resting on the collar of the bicycle frame. Securely attached to the front of the clip frame is a transversely bent spring extending to one side, on which is a seat, while bolted rigidly to the opposite side of the clip frame is a skirt and leg support composed of a

frame work of metallic rods, over which is secured wire gauze or netting. This support extends rearwardly and outwardly from the side of the machine, and curves downwardly from the clip frame, to conveniently support the limbs and skirt of the person on the forward seat and afford such a balancing of the weight as will prevent undue tensional strain of the parts and avoid liability of breaking or bending.

The Twentieth Century Headlight.

The Betts Patent Headlight Co., No. 10 Warren Street, New York, are offering the trade the popular Twentieth Century Headlight, as shown in the accompanying cut. Col. L. F. Betts, the inventor of the lamp, has been en-

gaged in the lamp and headlight business for over forty years, and he is responsible for many of the improvements made in these lines. He is patentee of the tubular street and driving lamp, and his latest invention, the Twentieth Century Headlight is fully up to date. It has been patented in the United States and in nearly every foreign country. The special features of the headlight are numerous, it being built on an improved order of locomotive headlights, having no lens, but a great reflecting power. It burns kerosene oil, which is very easily obtained. By the arrangement adopted in the oil well, it is remarked, that it will not spatter and the wind or the jar of the wheel will not extinguish the flame. The bicycle attachment spring is instantly attached or detached from the headlight as well as bicycle, and in place of this spring can be used the driving attachment, which fastens the lamp at any angle on the dashboard or side irons of any vehicle. On account of its small size and handsome appearance it is becoming very popular as a driving lamp. When detached from bicycle or vehicle it makes a very handy hand lantern, by simply unsnapping the bail wires from under the body of the lamp, the wire acting as a handle. Each headlight is supplied with an extra ruby-colored front glass, which can be substituted for the clear glass as fancy dictates. They are also supplied with a gossamer hood or cover to protect it from dust or weather. They are furnished in aluminum, bronze and nickel finishes.

A New Nipple Wrench.

The Knapp & Spalding Co., Nos. 212, 214 and 216 Pearl Street,

Sioux City, Iowa, are placing on the market the Nipple Wrench shown in the accompanying cut. It is made of tool steel, and is designed for use in putting on rims and truing bicycle wheels. The work is done entirely on one side of the wheel, and the wrench is intended to fit any

Digitized by Google

size nipple, and is always adjusted. It is remarked that the wrench is made on the plan of the Alligator and the Always Ready wrenches. The wrench is furnished in plain finish, also nickel-plated.

Minute Repair Kit.

The New York Bicycle Equipment Co., Nos. 17 and 19 Park Row, New York, are introducing the Minute Repair

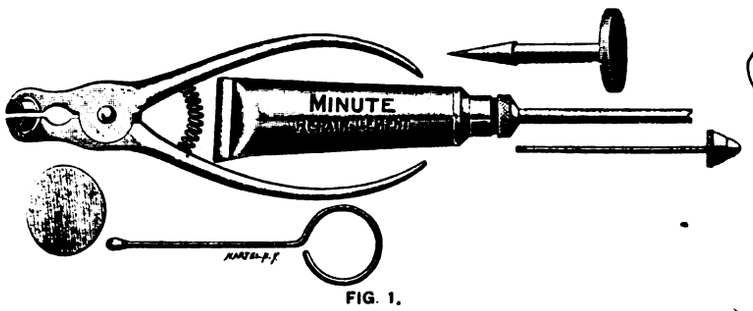


FIG. 1.

Kit as shown in the accompanying cuts. Fig. 1 shows the implements composing the kit; Fig. 2 represents the intruding tack that has made the puncture. The following are the directions given for repairing the puncture: Find the puncture, and inflate the tire to riding pressure, holding thumb meanwhile over puncture; then insert the tool, being careful not to prick the opposite side of the inner tube, Fig. 3. Withdraw the pin but not the pliers, being

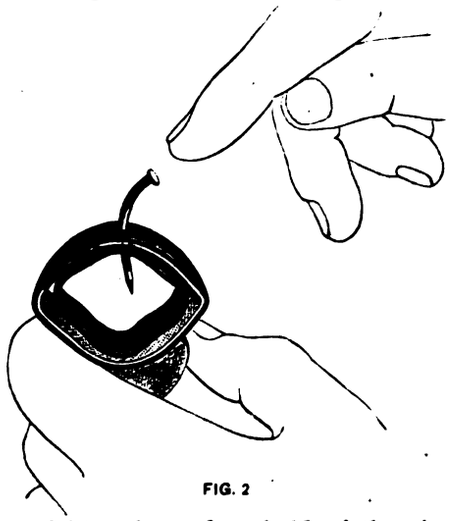

FIG. 2

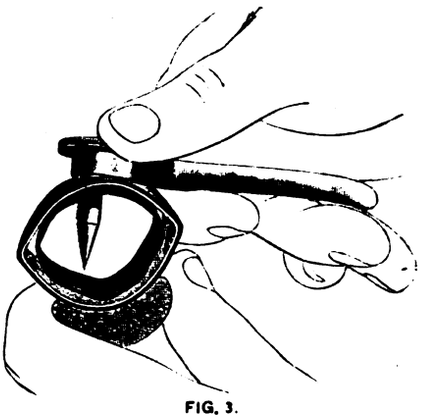

FIG. 3.

careful to take a firm hold of the pin to avoid accident, leaving the pliers in and through the tire, allowing the tire to deflate, Fig. 4. Place the patch, cloth side down, centered on top of the opening in the pliers and with the plunger push it through to the bottom wall of the tire, at the same time resting the pliers on the lower wall of the

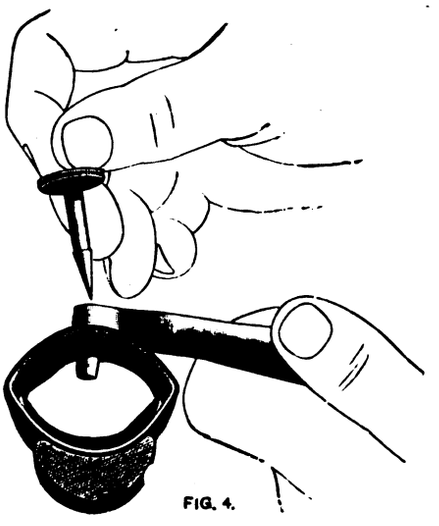

FIG. 4.

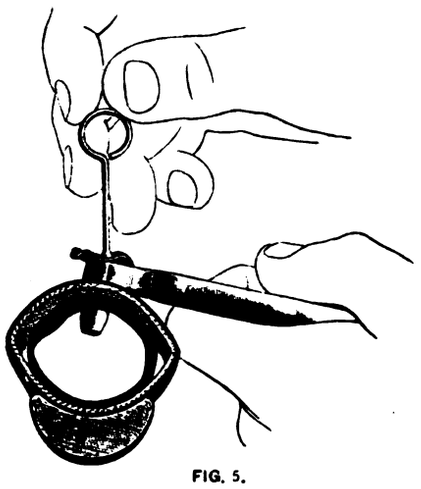

FIG. 5.

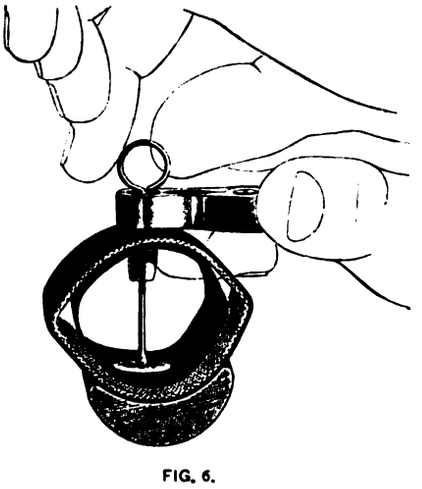

FIG. 6.

tire, to facilitate the easy introduction of the patch, gently force the pliers slightly apart, Fig. 5. When the patch rests on the bottom of the inner wall, hold the patch firmly in place by pressing down the pliers, and withdraw the plunger, Fig. 6. Insert the cement nozzle, with it keeping the patch in place, then raise the pliers slightly and squeeze a small quantity of cement on the patch. Lower the pliers once more against the patch, while withdrawing the cement nozzle, Fig. 7. Still holding the pliers firmly against the

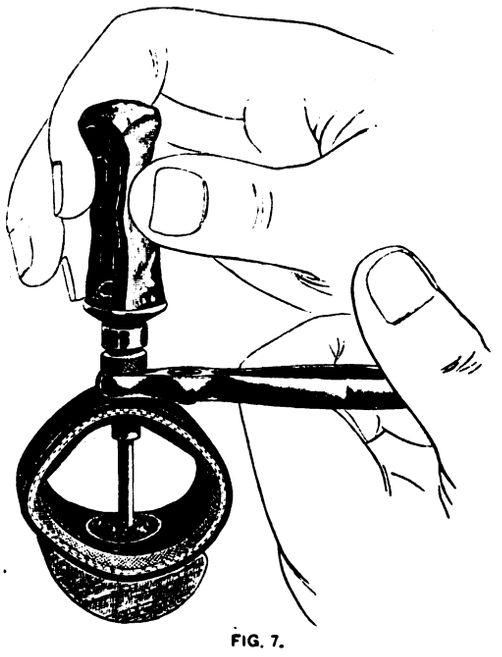

FIG. 7.

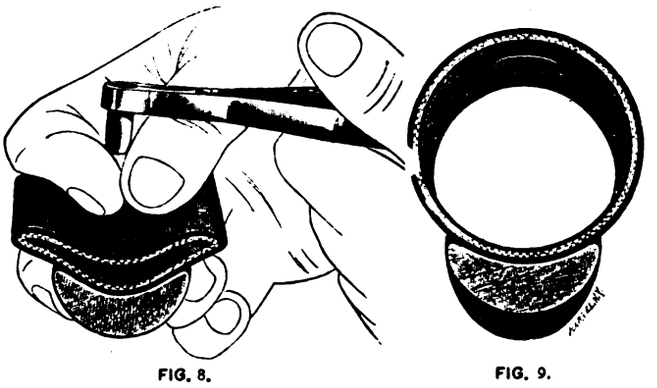

FIG. 8.

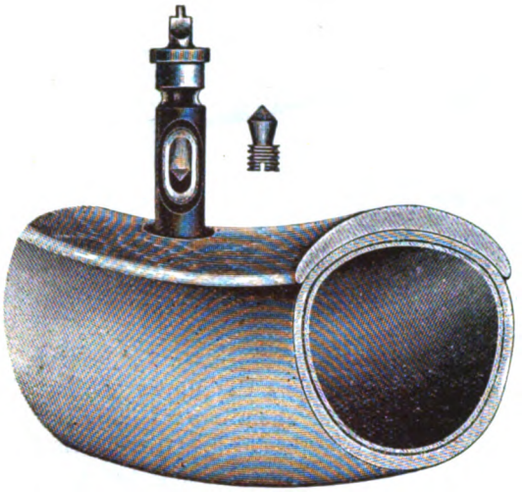
FIG. 9.

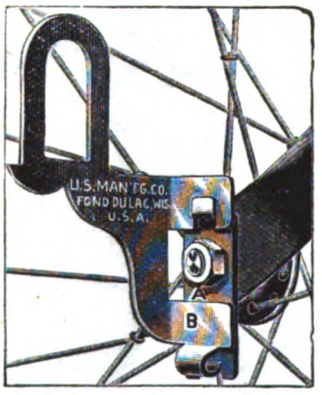


patch, press with the fingers the upper wall of the tire against the patch, remove the pliers retaining the pressure of the upper wall of the tire against the patch for a few seconds; then inflate the tire, holding the thumb firmly over the puncture until fully inflated, Fig. 8. Fig. 9 shows the patch in place and the tire completely repaired. The manufacturers remark that the kit is highly polished and nickel-plated, and put up in a neatly decorated tin case, with full instructions with every outfit, and will easily fit in any tool bag.

Ives Speed Tire.

The Mechanical Rubber Co., Cleveland, Ohio, are putting on the market the new Single Tube Tire, cut of which

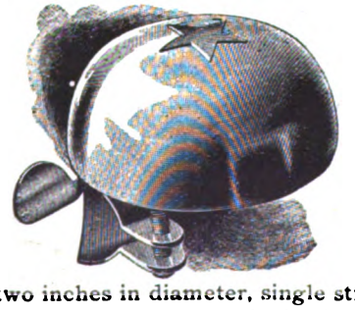
Digitized by Google



is herewith shown. It is known as the Ives Speed Tire. The company remark that the features of this tire are in its new and novel arrangement of thread fabric, laid in such a manner that a great amount of resiliency, life and speed is obtained. It is further stated that this valuable inven-

tion, together with the company's improved methods of molding tires to yield the greatest possible service of rubber and fabric, will no doubt be fully appreciated by the riding public, and this tire will be in great demand the coming season. Next in importance to perfect fabrical construction in a tire for comfort in riding, and ease of repair, is a perfect valve. This the company have in the well-known I. C. valve, manufactured for them and the trade by the Clark Novelty Co., Rochester, N. Y.

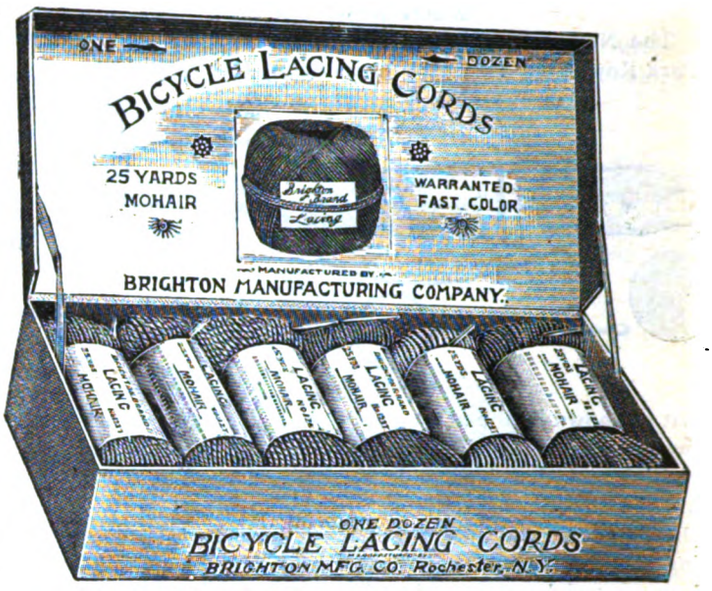
U. S. Detachable Lamp Bracket.



The U. S. Mfg. Co., Fond du Lac, Wis., are offering the U. S. Detachable Lamp Bracket herewith illustrated. It is made from cold-rolled open hearth steel, nickel-plated, and is held in place by a strong spring catch at the lower

end. It is remarked that the bracket B is instantly removed with the lamp, leaving only the small clip A attached under the axle nut, shown in cut. The bracket is left in the lamp and both are put on or removed together. The bracket sells for twenty-five cents.

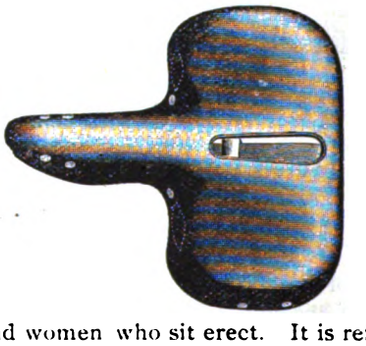
Star Bicycle Bell.



The Bridgeport Gun Implement Co., Nos. 313-315 Broadway, New York, are offering the Star Bicycle Bell shown

here. It is two inches in diameter, single stroke, and is referred to as having a clear tone and a loud note. Each bell weighs three ounces, having a star stamped on the top, and is, it is remarked, of strictly high grade at a low price.

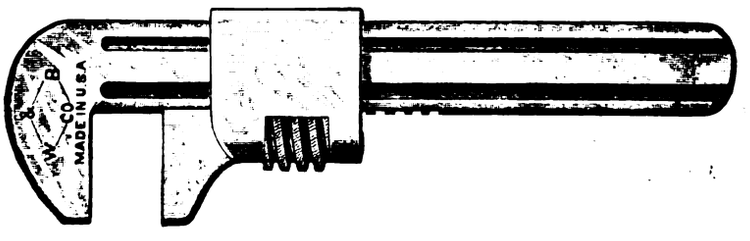
Lacing Cord for Dress Guards.



The Brighton Mfg. Co., P. O. Box 1395, Rochester, N. Y., are offering Bicycle Lacing Cord for dress guards on ladies' wheels. The makers remark the cord is a braided mo-

hair and is much more durable and fully as handsome as silk. The advantages of this method of putting it up are that the smaller dealers can have a large assortment of colors at a reasonable expenditure, while the "tipped ends" render the lacing of a wheel easy. The cord is known as the No. 125 T. mohair and is put up in one dozen assorted styles.

Bridgeport Bicycle Saddle.

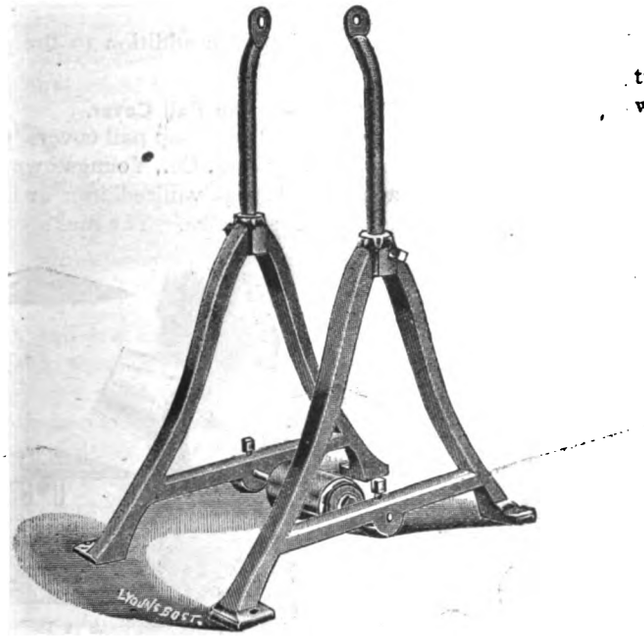


The cut here shown represents a Saddle offered by the Bridgeport Gun Implement Co., Nos. 313-315 Broadway, New York. The makers remark that the saddle is not constructed for racing, nor for riders who use drop handle bars, but is designed to produce a comfortable seat for road rid-

ing for men and women who sit erect. It is referred to as being made upon strict anatomical lines, the design being original and the model built under the supervision of a well-known rider and business man. The saddle is made in two sizes, adapted to both men and women, and weighs 18½ ounces.

Diamond Bicycle Wrench.

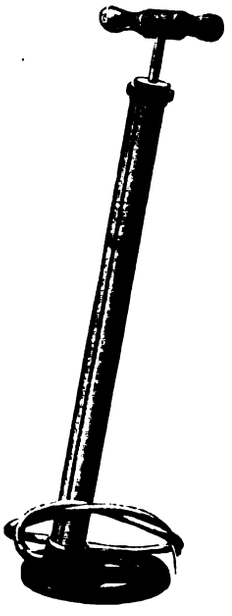
The Whitman & Barnes Mfg. Co., No. 111 Chambers Street, New York, are placing on the market the Bicycle Wrench shown by the accompanying cut. It is drop forged



from a good quality of steel, nickel-plated, and measures 5½ inches over all. The opening between the jaws is 1⅛ inches, and the wrench weighs 6 ounces. The jaws are thin, quick-acting, and the wrench, we are informed, is being favorably received by the trade.

Digitized by Google

The Quincy Home Trainer.



The Quincy Cycle Co., Quincy, Mass., are offering a Home Trainer, as here shown. In use the rear axle of the bicycle is inserted in the standards, and then fastened by

screwing up the axle nuts. The tire rests on the ball-bearing roller. Friction is increased or diminished by lowering or raising the standards, which are secured by set screws. The machine is adjustable to any width of axle, it is explained, by setting it in or out on the roller axle.

Tornado Pump No. 1.

The Davis & Stevens Mfg. Co., Seneca Falls, N. Y., are placing on the market the Tornado Pump No. 1 as shown here. It has a stroke of twenty inches operating in a cylinder two inches in diameter and twenty-two inches long made of heavy brass tubing, nickel-plated. The pump is designed for filling air tanks and inflating pneumatic tires, and is referred to as a desirable pump for shop use. If desired, the pump will be fitted with an air cock for filling tanks. It may also be used for drawing liquids under pressure.

The Standard Machine Co's. Lamp Brackets.

The Standard Machine Co., Nos. 80 and 82 South Market Street, Chicago, Ill., are offering the Lamp Bracket here shown. It is remarked that it is easily adjusted, light, durable, and at the same time, strongly constructed, and that it can be fitted to either the head of the wheel or front

FIG. 1.

FIG 2.

forks. Fig. 1 is a back view as attached to head of frame. Illustration to the right of this cut shows the T-hinge or swivel upon which the parts turn. Fig. 2 is also a back view showing the rear half circle reversed and nested with-in the front part, thus changing to position on fork by simply removing the finger nut. It is remarked that the real article looks much neater and more simple than the cuts would indicate.

Self-Locking Sprocket Lock.

The Smith & Egge Mfg. Co., Bridgeport, Conn., are introducing the Sprocket Lock, cut of which is given herewith. The manufacturers remark that this is the latest

sprocket lock placed on the market. The shackles are of steel, and it is stated cannot be cut by ordinary nippers. The springs are of phosphor bronze and the shells of wrought brass, and it has four tumblers, making it impossible, it is stated, for the lock to be picked or jarred open. Two cold-rolled steel keys are furnished with each lock.

Buffalo Hardware Dealers Organize.

For the purpose of promoting the general interests of the retail Hardware trade of that city, the Buffalo Retailers' Hardware and Tinners' Association has been formed, with the following officers: President, Charles J. Fix, of Fix & Roty; vice-president, J. F. Berner; secretary, G. Ballen; treasurer, J. G. Dobmeier.

A Hardwareman's Memory.

Excuses given by those called for jury duty, by which they seek exemption from serving, are somewhat varied. One of the men called in the court of sessions to-day asked Judge Moore to excuse him as his memory was very poor.

"Can't you remember anything at all?" asked his honor.

"No, sir," was the reply. "I can't remember anything for five minutes."

"What is your business?"

"Hardware, sir."

"Don't you remember the prices you ask for your goods?"

"They are marked so I can see them," was the reply.

"If a man told you to-day to send him $1000 worth of goods to-morrow, wouldn't you remember to do it?" asked the court.

"No, sir," was the response.

"Just sit down over there and we'll see if we can't give your memory a test."

The juror was still waiting when court adjourned.—*Brooklyn Eagle.*

The suit brought by the Spring Curry Comb Co., of South Bend, vs. F. E. Kohler & Co., in February, 1892, in the United States Court at Cleveland, was last week dismissed for non-prosecution. It is learned that the case of F. E. Kohler & Co. vs. Worthington Co., for handling spring curry combs made by the South Bend firm is being pushed to an issue as rapidly as possible.—*Canton (O.) Repository.*

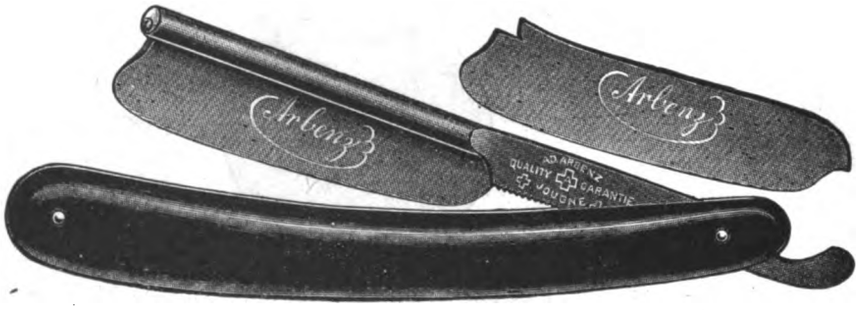
NEW GOODS IN THE MARKET.

If you have anything NEW, let the world know it by illustrating it in these columns.

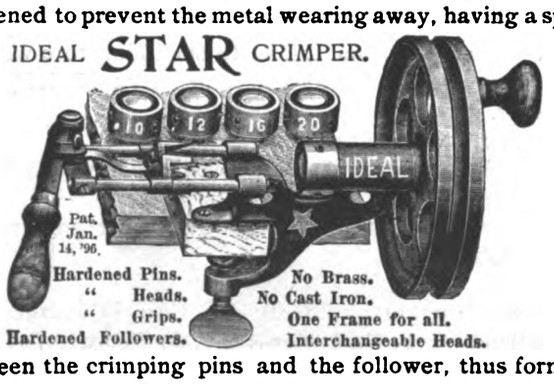


NO CHARGE WHATEVER is made, direct or indirect, as our interest lies in showing the readers of "HARDWARE" where the LIVE manufacturers and wholesalers are, and what they are doing.

When your NOVELTY or SPECIALTY is ready, send us an Electrotype and descriptive matter, which will appear immediately.

The Hardwaremen everywhere read this department; it is to your interest to make prompt use of it.

Arbenz' French Razor.



Accompanying this is an illustration of the Arbenz' French Razor, for which McIlwaine, Linn & Hughes, No. 122 Chambers Street, New York, are sole agents for the United

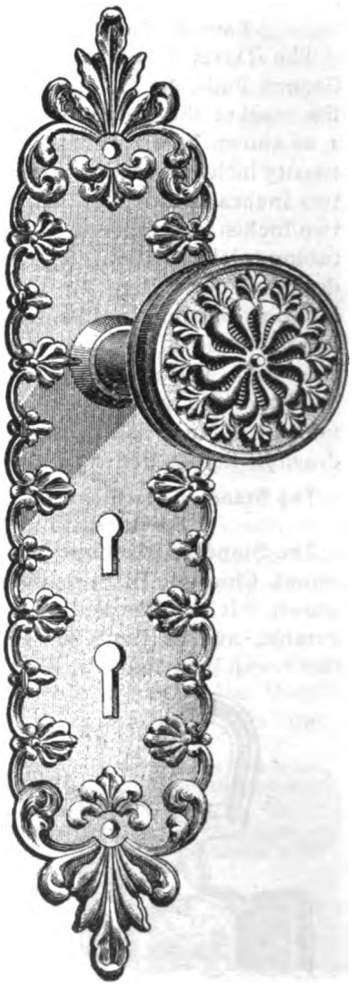
States. This razor is described as "the best, most reliable and cheapest high class razor in the world, and is made with interchangeable blades, as shown in the illustration, so that in the event of accident or injury to one blade, another can be put in its place by simply operating a small screw at the end of the frame, as shown. It is said that these blades, made of the very best English steel, forged very thin throughout, and hardened and tempered to the highest degree of perfection, will retain a keen edge for an incredible period, and with fair usage will last a lifetime. Should they become accidentally notched, they can be easily reset, time after time, even by an amateur, as the process is so simple, and the blades never require grinding and need but very little stropping to keep them in perfect order, and are adapted to all beards. Each razor is handsomely cased, with an extra blade, and additional blades can be obtained if required."

Star Crimper.

The Ideal Mfg. Co., New Haven, Conn., are offering the Crimper, cut of which appears herewith. It is made especially for the application of power, and may be attached to a sewing machine bed and run by foot power or otherwise. The machine forms a square crimp, and having an inside pressure follower, permits of interchangeable heads and followers. Only one frame is required for 10, 12, 16 and 20 gauge, and the heads, pins, followers and grips are all hardened to prevent the metal wearing away, having a space

between the crimping pins and the follower, thus forming a ragged crimp. It is remarked that the feed is a positive straight line, it taking all lengths of shells and not bending them; the lever and grips are detachable, and the balance wheel is heavy and the bearing and journal is long, insuring greater length of service and steady running. There are three screws used in the crimper in addition to the clamp, to secure it firmly to the bench.

The Youngstown Sap Pail Cover.

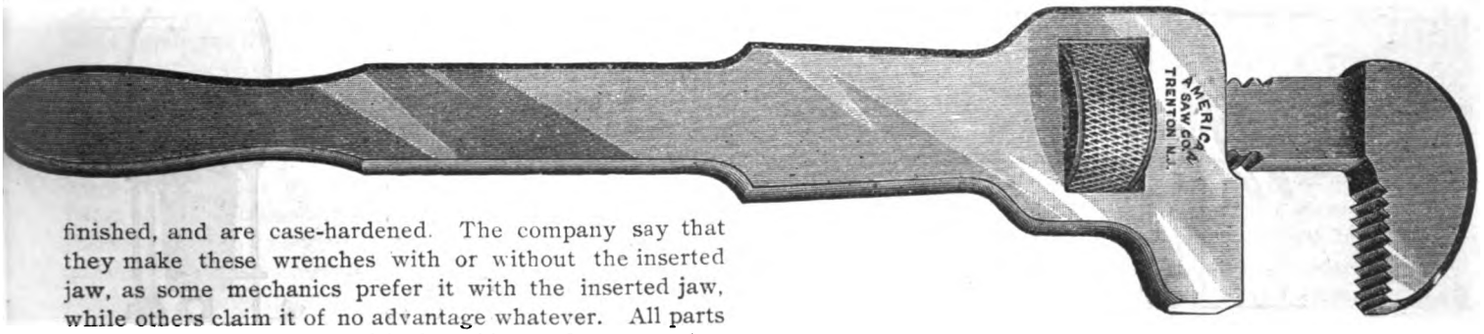


The accompanying cut relates to sap pail covers, offered by the Youngstown Specialty Mfg. Co., Youngstown, Ohio. The covers are made of either galvanized iron or tin, and the hinge is made of galvanized wire. The makers remark

that the cover can be attached to any tin or galvanized sap pail, that they will not blow off or open when attached to the pail, and that when gathering the sap the cover will open and fall back into place as the pail is tipped. The cover is designed to retail at five cents. The company also manufacture tin and galvanized sap pails in 12, 14 and 16 quart sizes.

Empire Design Lock Trimmings.

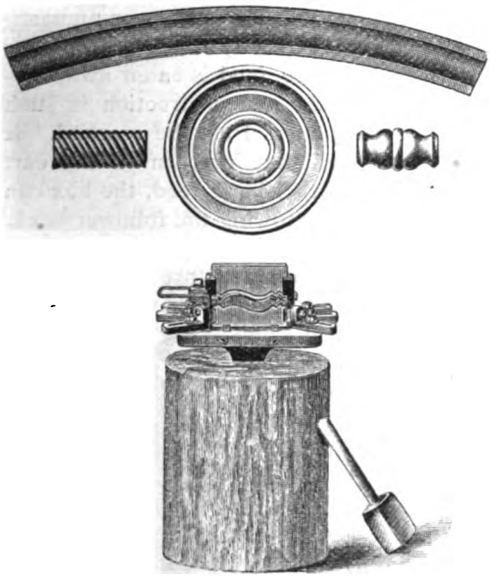
The Mallory-Wheeler Co., New Haven, Conn., and No. 18 Murray Street, New York, are placing on the market a new design of Lock Trimming of the Empire school, styled L design, as here given. The design is furnished in bronze and in antique copper finish on bronze and iron. The design, it is stated, will not be made in light bronze plate or in imperial finish. A full line will be offered, including front door sets, inside door sets, sliding door sets, flush sash lifts, etc.



The Stevenson Wrench.

The American Saw Co., Trenton, N. J., are offering the Stevenson Wrench as shown in the accompanying cut. The main body of the wrench is hollow its entire length, into which is inserted the threaded shank of the movable jaw. The back and forward walls are far enough apart to allow the rear end of the threaded shank a rocking movement, of limited extent, so that when power is applied to the handle it causes the jaws to move toward each other, thereby gripping the pipe firmly, while a backward move-

Digitized by Google



ment of the handle releases the grip. It is remarked that the wrench is made in the best manner, of the best materials known for the purpose. The jaws are of cast steel, polished and tempered. The thread upon the shank of the movable jaw is made by a new process, is absolutely smooth, and of such shape that stripping is an impossibility; the nuts are of soft bar steel, neatly knurled and truly

finished, and are case-hardened. The company say that they make these wrenches with or without the inserted jaw, as some mechanics prefer it with the inserted jaw, while others claim it of no advantage whatever. All parts are neatly finished and polished, making a fine appearing and attractive tool. It is pointed out that in its construction the inventor has avoided the use of swinging frame, springs and rivets, wooden handle, ferrule and nut, etc. (which are objectionable features), and has produced a tool as simple and yet as efficient as any made in this or any other country. The following advantages are claimed for the wrench: That it never loses its grip, does not crush the pipe, never loses the handle and never locks upon the pipe. They are made 6, 8, 10, 14, 18, 24, 30 and 48 inches long.

The Raiser.

The Tinners' Machinery & Supply Co., No. 26 Cliff Street, New York, are offering the Raiser as shown here. It is designed for hammering out circular work for cornice makers' use. It consists of a heavy iron base with a groove in the centre to hold the uprights and dies on which the work is formed, these uprights being grooved to hold the top and bottom dies in position. There are also two gauges, one on each side, which can be swiveled and set at any desired angle. The bed or support can easily be secured in a work bench or block hole. In operation the

sheet metal is passed between the dies while the upper die is being struck with a mallet, the sheet being again and again passed through the dies, the impression being deepened at each operation, slow and light strokes being given for the first passage. If long pieces of work are operated on, it is convenient to use the wire rest, which can be adjusted to proper height in the holes in the bed and fixed in position by set screws. It is adapted to circular work of small diameters, for which the horseshoe attachment accompanying the machine is used. The side guides or shapes may be made of No. 20 sheet iron, and when the shape desired is not provided for in the accompanying dies it is only necessary to bend a one-inch wide strip of metal to the size and profile desired, place it in the pan and pour the metal thereon. The machine weighs when boxed 110 pounds. With it are furnished a full line of illustrations of patterns and rules for laying out and cutting different styles of circular work, together with and rules for casting dies of plaster of paris to be used as patterns for casting iron dies. The attachments include ten sets of iron dies, eight side shapes, one set sinkedge dies, one steel horseshoe, one wrench, one mallet, one mould for casting dies.

Herrick's Shaving Cabinet.

F. A. Herrick & Co., Jackson, Mich., are offering the trade the Shaving Cabinet, illustration of which appears here. It is 12 by 24 inches in size, made of oak well finished, with an 8 by 10 inch mirror hung on double acting hinges to allow it to be adjusted to any desired height. The mirror door is provided with a spring catch and is opened from the inside. The drop door, when open, provides a place for the necessary articles when shaving and is fastened by a spring lock when closed. The shaving articles, when not in use, are kept on shelves within the cabinet and the swinging strop, and out of the way when the cabinet is closed. The claim is made that with the use of the cabinet a man's shaving utensils may always be found in their proper place and where no one can molest them; also that the cabinet is equally adapted for ladies' toilet.

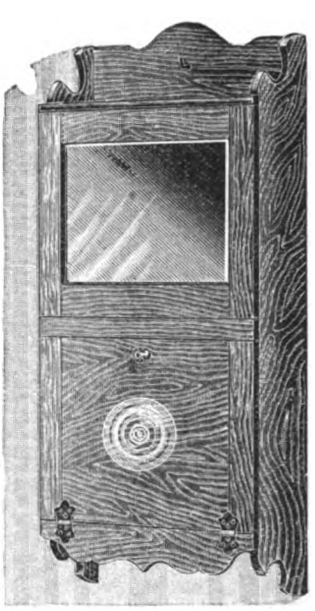


FIG. 1.

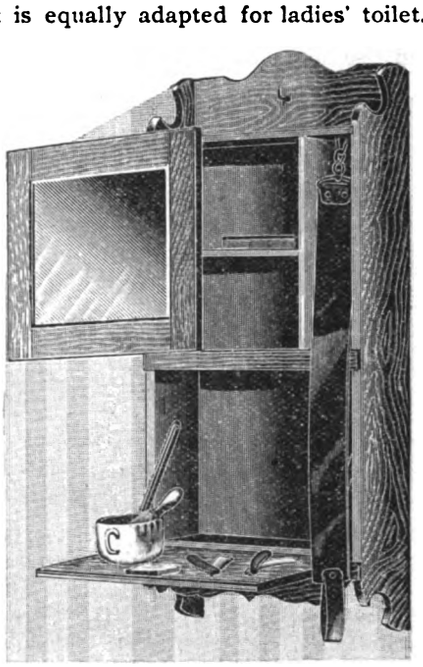

FIG. 2.

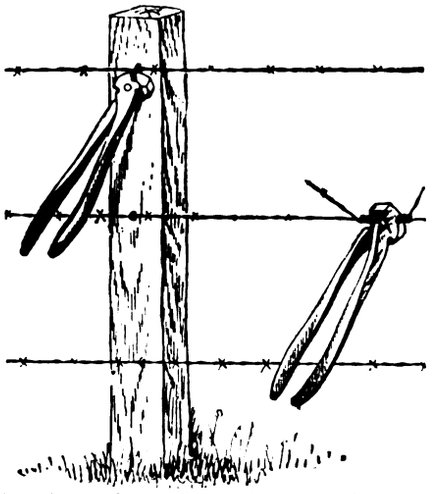
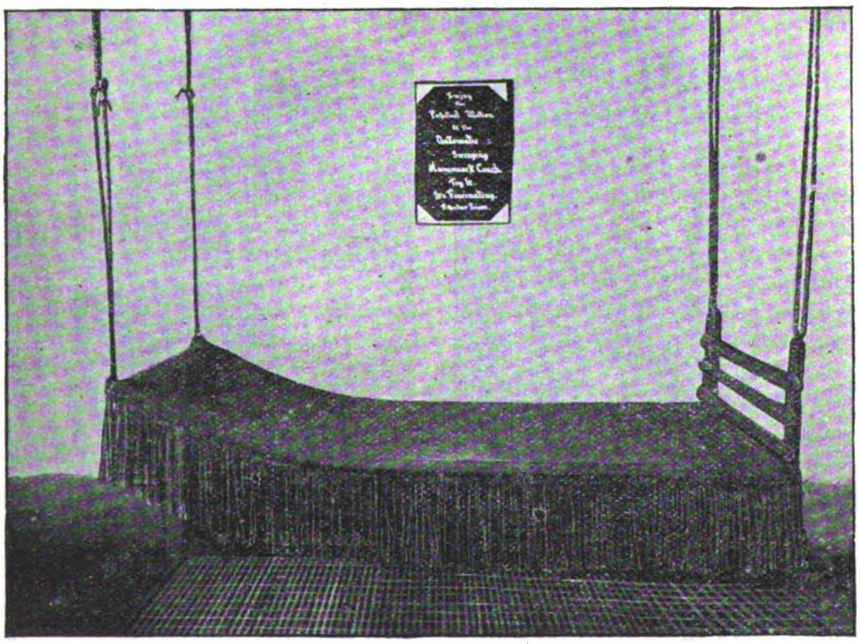


The manufacturers remark that the article is suitable for the holiday trade.

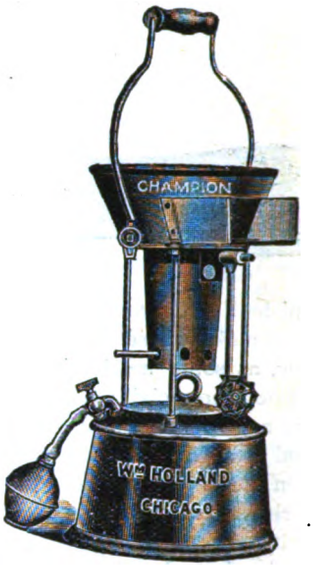
The Russell Staple Puller and Wire Splicer.

The Russell Hardware & Implement Mfg. Co., Kansas City, Mo., are placing on the market the Russell Staple Puller and Wire Splicer, cut of which is shown herewith. It is made of tool steel, warranted by the manufacturers to stand any test in the line of work for which it is intended.

Digitized by Google



It is designed for driving and pulling staples, cutting and splicing wire, and for doing nearly all the work connected with building, removing or repairing wire fences. The jaws of the tool are provided with a recess to receive one of the prongs of the staple when pulling it from a post. In



splicing wire the ends are brought towards each other until they lap four to six inches, when they are grasped by the pinchers, as shown in the cut, and the loose ends are wound around the main wire on both sides of the tool. For the use of the hammer, pincher or wire cutting parts of the tool no directions are necessary.

Automatic Swinging Hammock Couch.

The Travers Bros. Co., No. 107 Duane Street, New York, as sole agents for the James Beam Co., are introducing the Hammock Couch here represented. It is made of a frame of hard wood, strengthened its entire length with bands of iron. The frame is covered with duck or cloth in solid colors, the device being strong enough, it is remarked, to support the heaviest of persons. A footboard of slats is attached to the frame with hinges so that by a gentle pressure of the foot against the slats a perpetual lengthwise motion is obtained without effort. The hammock can be hung, it is explained, where any other hammock can be and also in places where the ordinary hammock cannot be

suspended. It is adjustable any height by patent cleats attached to the ropes, and can be drawn up out of the way when not in use. The point is made that at a small additional cost feet are attached, making it a stationary couch. The manufacturers state that the hammock has among others the following points of excellence: That it is stronger and cooler than the ordinary form of hammock; that it does not compel the occupant to assume an unnatural position by elevating the feet and head above the centre of the body; that it requires no pushing or pulling to get it in motion, as the pressure of the foot of the occupant sets it going; that it is as comfortable as a couch, shaping itself to the body; that it does not entirely envelop the body and muss the clothing, and that it can be lowered near the floor for the use of children without fear of danger. The hammock weighs about ten pounds and is made with ropes and cloth matching in color, in two qualities of cloth with or without fringe. Pillows to match are furnished if desired.

Champion Tinners' Furnace.

Wm. Holland, Nos. 56 to 60 South Canal Street, Chicago, Ill., is placing on the market the Tinners' Furnace illustrated here. It contains few parts and these are interchangeable with the H. J. & C. furnace. It is described as serviceable, strong, durable and well made. It is remarked that all the parts are made of the best materials suitable for the purpose. The price of the furnace is $6.00.

National Feed Box.

The National Feed Box Co., Detroit, Mich., have brought out the National Feed Box, as shown in accompanying illustration. The box is made of galvanized steel, with a dish shaped follower of the same material, which moves up and down on a guiding rod, and rests on top of the portion of oats or other feed. In the follower is a round hole or opening, five inches in diameter, with three bars across it, so that feed can be reached only through this aperture, permitting the animal to take up only the amount of oats or grain that can be gathered with the lips through the spaces. This results in the taking of small mouthfuls, eating more slowly and practically operates to prevent the swallowing of whole grains or unmasticated food. Gravity causes the follower to drop as the food is eaten away beneath it, and its construction is such that every morsel can be reached. It is remarked that for corn on the ear, carrots or other large feed, the box can be used by throwing the follower back, and the box can be utilized for a watering pot. Another feature alluded to by the manufacturers is that getting the provender in small quantities the animal is kept from slobbering or tossing material out of the box thereby preventing waste.

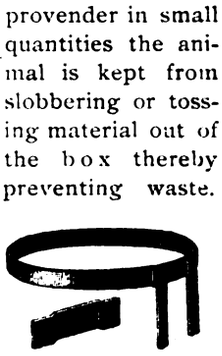


Fig. 1 shows the feed box as in use. Fig. 2 shows the supporting ring and wrought strap for attachment to manger, horse post, etc., extra straps being furnished if it is desired to use in several places. The boxes are made in three sizes, holding 6, 8 and 14 quarts each. William A. Powell, No. 63 Park Place, New York, is Eastern agent, having New England, New York, Pennsylvania and Atlantic Coast Southern States.

BICYCLE ANNOUNCEMENTS FOR 1896.

The White Sewing Machine Co., manufacturers of the White bicycle, Cleveland, Ohio, have gotten out an artistic catalogue illustrating their line of wheels for 1896, in which "The Woman In White" occupies a prominent position. The front cover shows a lovely country landscape and a beautiful damsel attired in spotless white, coasting down the hill on one of the company's machines. The centrepiece of the catalogue represents a scene in Central Park, showing horsemen, etc., and the general life on the driveways, with two girls in natty white bicycle costumes, mounted on White wheels. The book is enriched in many places by colored illustrations, the subjects being "Lovers Will Meet," "The Postman's Welcome," "The Doctor's Hasty Call," "Central Park New York Now," "Vassar Girls Exercising," "The Family's Country Outing," and the "White Girl Coaster." An illustration of the factory at Cleveland is also shown. The company say: "In illustrating and describing the bicycle production of this company, it is appropriate that reference be made to our manufacturing facilities. It is conceded that our factory is more completely equipped with modern machinery than any other similar establishment in the United States; also that our thirty years' experience as manufacturers of high-grade sewing machines, warrants the conclusion that in the building of bicycles we will maintain the highest standard of excellence." The White line consists of four wheels, model A and model B listing at $100, and model C and model D listing at $75.

The Defiance Bicycle Co., Defiance, Ohio, manufacturers of the Wheeler bicycles, will have three models on the market for 1896: Model A, model B, and the lady Wheeler. The company say: "The great success which attended the efforts of Clark, Holgate & Co. during the season of 1895, in placing upon the market a strictly high-grade bicycle, has led to the enlargement and incorporation of the company, under the name of the Defiance Bicycle Co. With a recently built, thoroughly modern plant, equipped with the best available machinery, and under the direct management of Mr. E. T. Clark, the company are in position to continue, upon a larger scale, the manufacture of a superior line of bicycles. We have adopted the name 'Wheeler' for our line, and it is, and always will be, a recognized expression of all that is meritorious in bicycle construction. It is the policy of the company to put the best material obtainable into their product, and this, supplemented with skill and honesty of purpose, cannot fail in attaining the desired results. Although the price at which 'Wheeler' bicycles will be sold is $85.00, we challenge anyone to show a better bicycle upon the market at any price."

The Hunt Mfg. Co., Westboro, Mass., are sending out their announcement for 1896. The company manufacture saddles and tool bags, carrying thirteen styles of saddles and six tool bags. The company make the following announcement: "At the commencement of our sixth year of saddle making we recall our humble beginning, when with meagre facilities we placed on the market the pioneer pneumatic saddle, the leather work of which was done by outside parties, comparing well, however, with the inferior metal work, also chiefly done by others. The following season we made our own leather covers, improved our springs, added superior clamps and adjustments to the regular cycle saddle we had begun to manufacture in connection with the pneumatic. The product of our study was favorably received by the trade, and our business steadily increased until our new factory became necessary, built for our exclusive use and convenience, fitted throughout with specially constructed machinery, allowing us to produce a grade of work unsurpassed by any saddle maker in the world."

The Black Mfg. Co., Erie, Pa., makers of the Tribune bicycles, have published their regular 1896 catalogue. Their line consists of seven lines of bicycles and tandems. The company say: "In presenting to your inspection the Tribune line for '96, we feel that a few words regarding bicycles in general may not be amiss. During the past season, the interest shown in this health-giving sport has far exceeded any previous year, and for business purposes the bicycle of to-day may be ranked almost as a necessity. The great demand for wheels which has been thus caused, has led to the manufacture of many inferior machines, which, in some cases, have been offered as high grade. There is probably no article at present upon the American market of which it is more difficult to judge the value than a bicycle. In outside style and finish, a wheel that retails at fifty dollars will oftentimes present as good an appearance to the inexperienced buyer as the finest machine listing at one hundred dollers, and it is only when such a bicycle is put in actual use that the real difference is apparent."

The Royal Cycle Works, Marshall, Mich., have issued a handsome catalogue describing and illustrating their 1896 wheels. The line consists of six wheels which includes a ladies' wheel and two tandems. The company say: "'Nothing succeeds like success.' The success that has attended our efforts to produce a strictly first class wheel is well known to all. We issue this, our 1896 catalogue, recognizing the intelligence of a discriminating public, and in full view of the active competition that at present exists. Our products have at all times received favorable consideration, and judging from the enormous demand, during the past season, for wheels of our manufacture, we believe that we may fairly claim to be leaders in bicycle construction. We have added considerably to our factory and plant, in order to keep our many patrons promptly supplied, and ask your careful perusal of the following pages, which describe the improvements we have effected for the present season."

The Ralph Temple Cycle Co., Chicago, will carry a line of nine models and a parcel carrier during the season of '96. The company say: "With fifteen years' experience in the bicycle trade, we stand unconditionally upon our record as manufacturers of high class bicycles, aiming to satisfy rider and dealer alike with the knowledge that our success depends upon the proper adjustment of honest claims. We expect, by pleasing our patrons in the quality of our wheels and our methods of dealing, to achieve even greater success this year and strengthen our foundation for future success. We stand hand in hand with our agents, ever ready for suggestions to improve the design and finish, so that our machines will be ready sellers in all localities. The agency for our lines of wheels, the most complete on the market, can be secured by reliable parties in any reputable business."

We have received a handsome catalogue describing the 1896 wheels of the Standard Cycle Works Co., Chicago. The company remark that "in the following pages we shall endeavor to interest our readers in a few of the many points of excellence of the Standard bicycle, and to show them the kind of material and workmanship that is necessary for the making of a truly high class wheel. We believe that there is but one way to build a bicycle, and that is to use nothing but the very best material, in connection with the finest workmanship. This, with the strictest attention paid

Digitized by Google

to detail, should produce what can properly be termed 'a high grade wheel.' For the season of 1896, we offer a line of seven varieties of bicycles and tandems. As we furnish a great range in height of frames and carry a very generous assortment of equipments, we are prepared to meet the requirements of all riders."

We have at hand a handsome catalogue from the Plymouth Cycle Mfg. Co., Plymouth, Ohio, illustrating and describing their line for 1896. Their wheel is known as the "Superb Smalley." The company remark that "in addressing those of our friends who have been our representatives or ridden the Superb Smalley, we need only refer to the past season in saying that it was one of phenomenal advancement in the popularity for the Superb Smalley, and beyond our expectations, as well as satisfactory to representatives in having sold his customers a wheel that made friends wherever seen, and was a source of pride to its owner in having a reliable mount which gave no trouble. This year we know we will surprise even those who are aware of our vigorous advancement towards the leadership of cycle building." Their line will consist of nine models, including ladies' wheels and tandems.

F. X. Muller & Co., manufacturers of the Empire State 999 bicycles, Buffalo, N. Y., make the following announcement: "During the past year we have striven constantly and diligently to manufacture a line of cycles which could be favorably compared with the best upon the American market to-day. The large and ever increasing demand for our wheels is ample proof of our success. In view of these facts we are naturally inspired to do more than ever during the ensuing year. To aid us in this work we have spared neither time nor money. New and up-to-date machinery has been placed in our factory, which will enable us to keep strictly abreast of this inventive age." Their line will comprise seven models.

A. M. Scheffey & Co., No. 92 Reade Street, New York, are mailing their 1896 catalogue to the trade.It consists of 32 pages and fully describes the entire line of bicycles, listing in price from $100 to $40. There are 14 machines in all, but probably the best sellers are Wynnewood B, C and X, all of which list at $60. The regular enamel is black, but four of the line are finished in maroon enamel, when so ordered. This house has the sole United States agency for Miller's Bicycle Lamps, and are now receiving shipments of these popular goods from abroad. A special lamp catalogue tells the whole story.

We have in hand the advance courier of the Tourist bicycles, manufactured by the Tourist Cycle Co., Syracuse, N. Y. Three models are shown, including a ladies' wheel. The company say "until our new catalogue, now in press, is issued, we offer this advance courier to those who seek information regarding the new Tourist. It embraces in an abridged form the essential features of our regular edition. The Tourist needs no introduction. It has been upon the market many years, and established by past service an enviable reputation."

The Queen City Cycle Co., Buffalo, N. Y., makers of the Erie wheel, remark that "the success of Erie bicycles in the past will be the pledge for their success in the future and for 1896, as for 1895, they will be one of the favorite mounts of the practical, particular wheelman. The times move, and we move with them. Erie bicycles will be better for 1896 than ever before—stronger and better finished, more up-to-date in every detail." This line is composed of four models.

Edw. K. Tyron, Jr. & Co., Philadelphia, Pa., have distributed their advance announcement for the season. They will represent the "America" bicycles in Pennsylvania, Delaware, New Jersey (south of Monmouth and Mercer Counties), and the following counties in New York State: Tioga, Tompkins, Cayuga (south of N. Y. C. R. R.), Seneca, Yates, Schuyler, Chemung, Steuben, Allegany, Wyoming, Cattaraugus, Chautauqua, Erie and Niagara, besides carrying the Apollo, Cycloe and Fairy Wheels.

The Butler & Ward catalogue for 1896 shows ten models of saddles, including the Empress, a ladies' saddle. The company remark that "popular approval goes far toward establishing the standing of a business house with the trade, and the good will and favor we have been shown indicates that those who have dealt with us have been eminently satisfied with their transactions." The firm are located in Newark, N. J.

We have received from Hermann Boker & Co., Nos. 101 and 103 Duane Street, New York, a special illustrated price list of bicycles and bicycle sundries. The company carry the IXL roadster and the IXL ladies' wheel and a complete line of lanterns, cement, illuminating oil, enamel, rubber solution, chain graphite, pocket oilers, wrenches, repair kits, pumps, handles, trouser clips, bells, lantern brackets, brakes and toe clips.

The Emblem line for 1896 will consist of seven models, including a tandem and three ladies' wheels. The manufacturer says: "Emblem cycles, as in the past, will be of the highest possible grade of an honest made cycle, up-to-date in all parts. In building Emblem cycles my motto has been, and always will be, quality first, price secondary." The Emblem is made by W. G. Schack, Buffalo, N. Y.

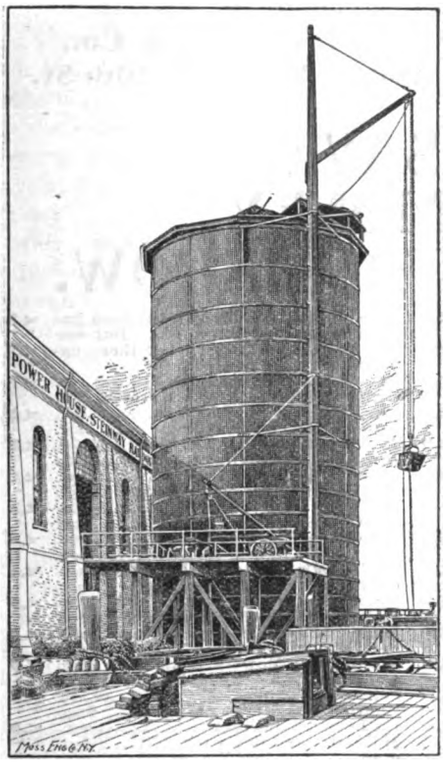
The Buffalo Wheel Co., Buffalo, N. Y., are sending out an attractive hanger, in colors, showing various views of Niagara Falls, including the Falls, the Gorge Road, the Maid of the Mist and others. In the foreground are seen a lady and gentleman mounted on Niagara wheels, seeing the sights.

The Henley Bicycle Works, Richmond, Ind., will offer eight models for the season of 1896, including two ladies' wheels and a tandem. The company's wheel is named the Henley.

The Van Wagoner & Williams Hardware Co.

At the annual meeting of the Van Wagoner & Williams Hardware Co., Cleveland and New York, on Thursday, January 23d, the following named gentlemen were elected officers: C. S. Van Wagoner, president; M. C. Ogden, vice-president; S. Bourne, treasurer, and C. T. Stork, secretary. The following directors were selected: C. S. Van Wagoner, G. S. Russell, E. H. Bourne, J. H. McBride, A. B. Fletcher, Henry Atterbury and M. C. Ogden. Mr. Ogden takes the place of William H. Williams, deceased, as vice-president and director, and the company is to be congratulated on securing so well known and able a business man as advisory at this end of the line. Mr. Ogden has had much valuable experience in the manufacturing and business worlds, he being president of the Eagle Lock Co., Terryville, Conn., the Southington Cutlery Co., Southington, Conn., and of the New York Vitrified Tile Co., Brooklyn, and a director in the Peck, Stow & Wilcox Co., New York. The management of the New York office will as heretofore be in charge of C. T. Stork, the secretary of the company.

Wants Bicycle Catalogues.



B. C. Merrill, general Hardwareman, Winchester, N. H., informs us that he will commence the handling of bicycles during the present season, and would be glad to have manufacturers and jobbers of wheels and accessories send him catalogues, prices, etc.

The use of caustics and alkalies for removing paint from wooden surfaces is frequently followed by very serious damage to the wood itself, soaking it with the solvent so as to prevent future coats of paint from taking complete and permanent hold, and bringing about its destruction in a comparatively short time. The burning off process of removal does not carry with it this objectionable quality.

Berlin Iron Bridge Co.'s New Coal Pockets.

A very important element in the designing and building of power plants is the question of the proper storing of coal. No power plant should be designed without providing for the storage room for from 500 tons to 1,000 tons of coal, and in larger plants this capacity should be very much increased. The danger of a strike in the coal regions, or delays in transportation, incident to strikes, weather, floods, etc., are so many and great that no power plant should take these risks, but should provide storage for sufficient coal on hand to provide against a contingency of this kind. The difficulties in designing a proper bin or pocket for storing this coal are many and great, owing to the large floor space required. Our attention has been called to a pocket lately designed by the Berlin Iron Bridge Co., East Berlin, Conn., for the power house of the Steinway Electric Railroad Co., at Astoria, L. I., which has attracted much attention. The design is unique, and possesses many points of merit, owing to the large amount of storage capacity in proportion to the exceedingly limited amount of floor space occupied. The general appearance

is shown in the accompanying illustration, which is taken from a photograph of the completed pocket in operation. Especial attention is called to the cylindrical form of construction. This particular pocket is 28 feet in diameter, 54 feet in height, and has a capacity of 1,000 tons of coal. The coal is unloaded from the barge or carts at the side of the pockets in the ordinary way, and hoisted by means of a bucket to the top of the pocket, so that no expensive machinery is required to fill the pocket, an ordinary hoisting engine being all that is necessary. Of course, more expensive mechanical appliances might be introduced for doing this work, in the shape of an endless chain or some of the other appliances of a similar nature, but we doubt very much whether the revenue would pay the interest on the incurred cost, over the apparatus shown in the illustration. There is an opening in the side of the pocket near the base for removing the coal in the ordinary way, so that it can be carried into the boiler room by means of an endless chain, with buckets, or by hand, or by carts, or whatever way may be desired. The advantage of this pocket does not lie in its presenting any additional facilities for handling the coal, but more in its being an economical method of storing coal, and as such it offers many advantages, and commends itself to owners of large steam plants as it admits of greater capacity in proportion to the floor surface than any methods that have lately come to our attention. The patents on this construction are owned and controlled by the Berlin Iron Bridge Co., East Berlin, Conn.

The Wright & Colton Purchase.

One of the most extensive real estate transfers of late is the purchase by the Wright & Colton Wire Cloth Co. of the property which it has been using during the past eight years on a guarantee lease, says a recent issue of the Worcester, Mass., *Telegram*. The purchase gives the company one of the best equipped plants in the city for manufacturing purposes, bordering on the tracks of both the Boston & Albany and the New York & New England Railroads. The manner in which the Wright & Colton Co. became the possessors of the property is somewhat out of the ordinary way of doing business. It took a lease of the property when it first settled in this city, paying the rent three years in advance and giving a guarantee in money that it would purchase the property later. At the end of three years it asked to renew the lease and paid another guarantee of several thousand dollars, which was to be deducted from the price when the property was bought. At the end of the sixth year the Dean heirs found the investment a good one and were willing to renew the lease, which was done after the payment of another guarantee, always going toward the principal. The third lease had still another year to run when the company determined to buy the property outright. The property had been in the hands of the Dean heirs about sixteen years, and was valued at a little above $35,000 when given into the hands of the Wright & Colton Co. the first year. There are 57,000 feet of land, which absorb the entire Hammond Street property between the tracks of the Boston & Albany and the Norwich & Worcester railroads, with the exception of a small piece in the front. There was but one building on the land at the time the first lease was taken, but since then four large additions have been added at a cost of about $40,000. The present main building is three stories high and 60 feet wide by 220 long. The old building was but one story high part of its extent. The trouble which the firm had in collecting the insurance on its buildings after the disastrous fire last summer had much to do with the immediate purchase of the property. The Dean heirs, in whose name the policy was taken out, are scattered all over the country, and considerable time was taken up before all could be got to sign the insurance papers. Wright & Colton are using about 80,000 feet of floor space. They came here from Palmer about four years after engaging in the manufacture of wire cloth.

A "Boss" Lantern Lamp.

Royall Givens, Corpus Christi, Texas, shows upon page 68 of this issue an illustration of a new "Boss" Lantern Lamp, that he is placing on the market. It is described as simple in construction, can be used with any chimney, light cannot be blown out, and is very economical, and retails at twenty-five cents, with the chimney. Terms to dealers (without chimneys) are given at $1.00 per dozen f. o. b. Corpus Christi, Texas; special price $9.00 per gross f. o. b. factory at Cleveland, Ohio.

The Toledo Stove Co., Toledo, Ohio, report that the outlook for business this year is very bright. They already have as many orders on their books as they had in all of last year; are improving their goods, and adding a new line of square oven stoves which is taking well with the trade. Naturally they feel very much encouraged over the outlook.

The annual meeting of the Ohio Hardware Association will be held at Dayton, Ohio, on February 12th, at the Phillips House.

ADVERTISING THE STORE—III.

This department is conducted by an experienced advertising man. It will be devoted to questions of profitable publicity as especially related to the retail Hardwareman.

We desire to make it of practical benefit to the readers of "HARDWARE," and to that end invite you to ask any questions on advertising, make any suggestions, or send in your ads. for criticism. We will do our best to make the path of advertising easy for you.

I have been advocating in this department for some time past the value of advertising as applied to the Hardware trade, and trying to show the readers of *Hardware* in as practical a way as possible how they could make use of legitimate methods of publicity to increase their business and capture trade.

While I was in Washington a few days ago, I was glad to talk with a firm which has demonstrated by practical proof the efficiency of advertising as a trade increment in the Hardware field—J. H. Chesley & Co., No. 1004 F Street,

June 14, 1895.

J. H. Chesley & Co.,
1004 F Street and 522 10th Street.

B-u-y C-h-e-a-p

Buy your Housefurnishings in the cheapest "RELIABLE" market. We handle only "A No. 1" goods and sell them as low as they can be bought anywhere in America. If you know anything about Gas Stoves you know that—

$1.40 for a 2-burner Gas Stove

—full nickel-plated, with good burners, is cheap. One shipment sold out this spring already and another partially gone. That's a pretty good sign, isn't it?

A 3-burner Gas Stove, nickel-plated, for $2.25.

Patent Gas Tubing, 6c. ft.

1-burner Oil Stove, 65c.

12-in. Lawn Mower, $2.50

It's a regular $3.50 Mower and brings that price everywhere. As a special drive for tomorrow, Saturday, only $2.50.

Peerless Ice Cream Freezers.

If it's a question with you of the best Ice Cream Freezer at the lowest figure, buy a Peerless Freezer. Can be operated from either side or top, freezes quicker and requires less ice than any other freezer on the market.

J. H. Chesley & Co.

Hardware, Builders' Supplies, Stove Repairs and Housefurnishings.

DOUBLE STORES.

1004 F Street and 522 10th Street.

who have been using the Washington dailies for a year past with most gratifying results. I called upon Mr. Rudolph, of that firm, and in the course of a conversation about advertising and store matters, I drew from him much information of interest and value to retail Hardware dealers everywhere, and a confirmation of all that I have said in these columns.

J. H. Chesley & Co. are among the largest Hardware firms in Washington. They have long been known to the people of the capital city for their honest dealing and first-class goods. Their store has an inviting look, and the windows are filled with a goodly array of the most seasonable articles. One of the first things that struck me on entering was a new and most convenient arrangement of the stock. Down the entire length of the store, with room in between for the attendant clerks, were two counters on which were displayed a quantity of goods. The side walls on both sides were lined with shelves, and on these all the shelf goods were neatly displayed, each article being in its own box, with a sample on the outside, so arranged that anyone entering the store could not help taking them all in at a glance. I thought to myself that such a handy arrangement had had much to do with the store's popularity.

"This method of arranging our stock has one great advantage," said Mr. Rudolph. "It does away with the necessity for technical knowledge on the part of our customers. For instance, a woman comes in who wants a particular kind of window lock. She don't know the name of it and can show us in a very crude way how it works. In our store she don't even have to do that. Our stock is displayed where she can see it all, and she simply walks in and points at the article she wants."

July 26, 1895.

J. H. Chesley & Co.,
1004 F St. & 522 10th St.

SAVE MONEY TOMORROW.

The increase in our retail business has been something marvelous. But one way to account for it. Let these extraordinary values speak:

One-burner Best Oil Stove	65c.
Henis Fruit and Vegetable Presses	35c.
5-ft. House Step Ladders	90c.
3-prong Nickel Towel Rack	20c.
Galvanized Wire Clothes Line	35c.
Rubber Clothes Wringers	$2
All-steel One-piece Trowels	10c.
An All-steel Hoe, wooden handle	25c.
Steel Garden Rakes	20c.

DOUBLE STORES.

1007 F St. & 522 10th St.

"When did you begin to advertise, Mr. Rudolph?"

"About a year ago."

"With what results?"

"We can trace to our advertising a direct increase in our sales of from seven to ten per cent. Where formerly we had a dozen women come into the store a day, we now have from forty to fifty."

"Do you follow any system in your advertising?"

"None except that we endeavor to advertise seasonable goods."

Digitized by Google

"What do you mean by that?"

"I mean that in the spring, for instance, we make special offerings of hose, lawn mowers, sickles, etc. Then in the fall we make more of a specialty of house-furnishing goods."

"Do you ever offer bargains?"

"Indeed we do, right straight along."

"You do not agree, then, with some Hardware dealers with whom I have talked, that the margin of profit on Hardware is so small that the Hardwareman cannot afford to offer any bargains?"

"Indeed I do not. I think the bargain idea is just as applicable to Hardware as to any other branch of trade. It has been my experience that the bargain has simply served as a magnet to draw the people to the store. I have always found it the case that people bought almost everything else except the bargain advertised. One instance I remember in particular last summer. We advertised a Special Sale of lawn mowers at $2.25. This was really a big bargain, and we expected to sell a lot of lawn mowers. The fact of the matter was that we sold only three, but the ad. paid just the same, for we did have a splendid day, and our sales were the largest of any day that week."

"Do you advertise all the year round, Mr. Rudolph?"

"No, not in January or February. These are the two slack months here, and we never expect to do much business. We shall start in again just as soon as there are some signs of Spring Openings and shall keep it up until after the holidays at the end of the year."

"Every day?"

"No—twice a week. We have found that that is all that it pays us to do."

"Do you run the same ad. twice?"

"No. We change as much as possible. Try to offer something in a different line each time so that if we don't strike it the first part of the week we will the last. Different people want different things, and we try to please everybody some time during the season if we can."

"Do you have any means for checking your ads. so as to know what particular ads. pay and what do not?"

"No, we cannot possibly do anything of that kind. We only know that advertising as a whole pays by the way our sales have crept up ever since we began to advertise."

"How do you plan your advertising?"

"On the principle that advertising pays when it is done systematically, and one is not stingy about it."

"What do you mean by being systematic?"

"Following up the advertising at regular intervals. While we advertise right straight along, we make a special effort about the first and fifteenth of every month. You see these are the two pay-days in the government departments where about sixty thousand people are employed, and we make an effort to reach them while they have the money in their pockets and so are in a buying mood."

"And not being stingy means what?"

"Using just as much space and spending just as much money as continues to bring an increase in the business of the house."

"How do you govern the amount you spend in advertising—by a certain percentage of the profits from your sales?"

"No, we make an appropriation at the beginning of the year and use it just as occasion may require from time to time."

"Upon what do you base that amount?"

"We make it what it ought to be."

"How do you know that?"

"From past experience."

"You didn't have any past experience when you first began to advertise—how did you know what to spend then?"

"Well, we looked at it this way. It seemed reasonable to expect that what had helped almost every other line of

December 20, 1895.

Open every night until 9 o'clock.

See us Before You Put Up the Xmas Tree!

Those of you who contemplate putting up a tree for the amusement of the little ones, and wish to avoid all of the trouble, dirt and danger attendant upon the presence of a Christmas tree in the parlor, should not fail to see our Patent "Safety" Christmas Tree Holders, Miniature Iron Fences, Lamp Posts and Gas Jets. A couple of trees in the front window of our F Street store, furnished with these model appliances, will serve as an object lesson to show you how handy and nice they are.

Christmas tree holders.

The "Eureka" and "Gem" Iron Christmas Tree Holders support the tree firmly and strongly, and can be fastened to the floor. They not only keep the trees green and prevent the leaves from falling, but all danger of fire is eliminated.
50c for the "Gem" Holder.
75c. for the "Eureka" Holder.

Miniature Iron Fences.

Neat Miniature Iron Fences to go around the Xmas tree garden—will last forever.
2 ft. sq., $1.
3 ft. sq., $1.25.

Miniature Lamp Posts

—for the Xmas tree garden, 4 in a set—with hundred tapers for burning oil, or same for burning gas, only $1.

75c. and $1 Pen Knives, 25 and 50c.

This lot of Penknives was bought at a special sacrifice, and are the genuine 75c. and $1 articles. Knives have two and four blades, put up in neat boxes, suitable for gift giving. Guaranteed perfect—or money refunded. We will close them out tomorrow at 25c. and 50c.

$2, $3.50, $5 English Carving Sets, $1.25, $2.50 & $3.50

Tomorrow we will close out a line of English Carving Sets, made by Elliott of Sheffield. They are guaranteed best English steel, and have the fashionable stag handles and "SCIMETER" blades. Worth $2, $3.50 and $5. Go tomorrow at $1.25, $2.50 and $3.50.

trade would help us. We made up our minds that we would risk a little money in it as an experiment. We decided that we had a certain sum that we could afford to lose and we spent that sum in advertising. Now we have a very gratifying experience to fall back upon in making up our estimate."

"What mediums do you use?"

"The *Star*."

"Only?"

"Yes. It is practically the only paper in Washington that goes into the homes, and that's the only place where an ad. will do us any good."

"Don't you use any of the Sunday papers?"

"No. They are not good for this business."

"Why?"

"Well, Hardware is a necessity and it is a heavy subject. People want light reading on Sunday, and we can't make a Hardware ad. light reading, so we stay out on Sundays."

"Do you use booklets, catalogues, etc.?"

"Yes, but only for our jobbing trade."

"Do you think they pay better than newspaper ads.?"

"I do not think so for the money expended."

"What do you regard as your best ad., Mr. Rudolph?"

"That is a very difficult question to answer. As I said before, we have no means of checking our ads., and can only judge in a general way of the value of each. They all seem to have brought trade, but I really do not know which one or ones has brought the most."

As he said this, Mr. Rudolph took down a big scrap-book in which he had all the ads. that the firms had used, and picked out two or three which seemed to him to show best what he meant by good Hardware advertising. These he has kindly allowed me to reproduce here. They are fair samples of a style of advertising that has proved effective, and *Hardware* readers may find in them many suggestions of value.

"Our best month, of course, was December. Then we advertised cutlery, knives, etc., and anything else that was suitable for Christmas gifts. I do not think that even there I can pick out any one ad. that was particularly effective."

I asked Mr. Rudolph if he wrote his own ads.

"No. We have neither the time nor the wish to do that. We believe that it is much better done by putting it in the hands of those who are constantly in touch with the best advertising everywhere—who are constantly working on advertising matters. I think that there are many ideas quite applicable to Hardware used in other lines of trade which we would never see and which we get the benefit of in this way."

"Who writes your advertising then?"

"Mr. Hungerford, of the *Star* advertising bureau. He has done the work from the very first, and I think it probable that much of our success is due to the way in which he has done it."

"Do you think that there is any Hardware store anywhere that advertising would not help?"

"So long as there are people in a place, a Hardware store and a newspaper, I believe that judicious advertising must bring profitable results. There was a time when I was like the vast majority of Hardwaremen to-day, and did not believe in advertising myself. Now you can put me down as a full-fledged convert, since I have seen its efficiency practically demonstrated right here in our own store."

I called upon William Hungerford, manager and proprietor of the *Star* ad. writing bureau, to whom Mr. Rudolph was inclined to give much of the credit for his firm's success as an advertiser, in the hope of gaining some further hints on the subject for the benefit of the readers of *Hardware*. Mr. Hungerford is regarded as the high-priest of advertising in Washington, and Washington is looked upon by business men as the home of the best advertising done anywhere in the country. Mr. Hungerford is a practical business man, and looks at advertising from a business as well as professional standpoint. His experience has extended over many years, and his beliefs are founded upon careful study and have been put to the tests of actual trial.

"I have always looked upon the Hardware field," said Mr. Hungerford, "as one of great possibilities for the Hardwareman who could make up his mind to leap over the prejudice that exists in the minds of all Hardwaremen against advertising. The success that has attended my two clients in this field, J. H. Chesley & Co. and Barber & Ross, has more than justified my belief. It seems to me now a proven fact that advertising is as practical for the Hardwareman as for the dealer in any other line of trade."

"Do you advocate any special style of advertising?"

"Well, my ideas of what and how a Hardwareman should advertise are pretty well illustrated in the course my clients. J. H. Chesley & Co., have been pursuing. Special offerings or bargains have proven the best and most effective method of attracting public attention and forcing sales. These we have offered in nearly every line of goods the firm handles, and they have been a 'go' every time."

"A new idea that I tried with them and that proved very productive of results was to advertise for estimates on builders' supplies. There is a great deal of building going on in Washington all the time, and a great many articles that a Hardwareman has in stock are necessary in the course of the work. So we have advertised now and then to get the builders to let us estimate on the necessary Hardware for them when they are making up their bids. It has proved a good card, and been profitable as well."

"Do you think it would be practical in other cities?"

"Certainly. Let a Hardwareman do something of the sort when a good-sized building is about to be erected in his town, and he will at least get the reputation for being wide-awake. That means that his regular trade will be increased for people who like to deal with that sort of a man."

ARTHUR B. CHIVERS.

The Hardware Dinners.

Arrangements are about completed for the annual Hardware dinner of 1896, to be given at the Hotel Savoy, on the evening of Thursday, February 20th. The following gentlemen have been engaged as speakers:

Hon. Horace Russell, New York.
James H. Hoyt, Esq., Cleveland.
Rev. M. W. Stryker, president of Hamilton College.
Gen. James R. O'Beirne, New York.

A. D. Clinch, chairman of the dinner committee, suggests that all who do not wish to apply too late, should immediately send in their orders for tickets to him, at the Hardware Club.

The annual dinner of the New England Iron & Hardware Association will be held in Young's Hotel, Boston, on the evening of Thursday, March 19th. The details are being carefully arranged by President A. M. Wiley and a competent committee, and correspondence held with several eminent men whom it is hoped may be persuaded to speak on that occasion. Those who wish to attend should make application as early as possible to Mr. Wiley, care of Frye, Phipps & Co., No. 23 Pearl Street, or to some officer or member of the Association.

C. B. Judd, vice president and general manager of the Bissell Carpet Sweeper Co., is preparing for his annual cruise on his new fifty-three feet naphtha launch. Mr. Judd is an indefatigible worker, and feels it necessary once a year to relax his strength in this way.

"I nebbah knowed but one man whose business suffered f'um too much advertisin'. He was er burglar."

The U. S. Export Association.

This is a movement to encourage the consumption of American products in other countries by combining the influence of American producers, manufacturers, carriers, merchants and bankers, and collecting and disseminating among its members information of value, besides steadily presenting the merits of American goods to the people of other countries. It is incorporated under the laws of the State of New York, in order to limit the liability of its members to the amount of their membership dues. It has taken offices at No. 143 Chambers Street, and has elected Mr. Francis B. Thurber its president. When asked regarding the objects of the association, Mr. Thurber stated:

"As Chairman of the Committee on Foreign Commerce of the Chamber of Commerce, I was in receipt of a large number of letters from all sections of the country asking information on one question or another, and, as the Chamber could not establish an information bureau, after considerable thought and discussion it was deemed advisable to establish an independent bureau. This we have done, and the membership is increasing so rapidly that we will soon have to take up more commodious quarters. The main object of the association is to encourage the consumption of American products in other countries by combining the influence of American producers, manufacturers, carriers, merchants and bankers, and doing all things necessary to that end. The bureau will distribute information gratis. To shippers it will answer inquiries regarding the responsibility of buyers and give full information on shipping, banking, exchange, insurance, publicity, translations at cost, and answer inquiries of every nature. To buyers it will show what the best products are, the best manufacturers, commission merchants, insurance companies, and will also attend to any other or special matter that may be sent in."

The following statement fully explains the scope of the association:

The objects of this organization are to provide manufacturers and exporters with reliable information regarding business affairs in foreign countries.

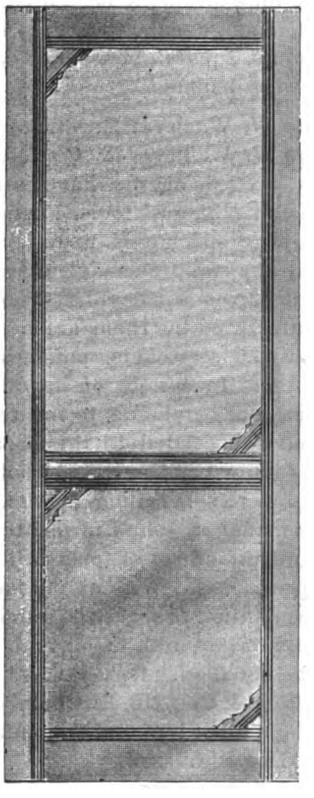
To obtain and circulate among its members the latest and most authentic information regarding the wants and development of foreign countries; the names and addresses of reliable buyers; the inauguration of new enterprises in plantations and mines, mercantile and manufacturing establishments, steam and street railways, light and power plants, water works, bridges, and all other enterprises likely to require American products.

To furnish reports indicating the kind, quality, price, style of packing and destination of goods exported from this and other countries, so that subscribers may be kept informed regarding the foreign demand for products similar to their own and have a clear idea of the customs and requirements of foreign merchants and how to get their trade.

To keep subscribers informed of tariff changes, transportation and banking facilities and other measures affecting international commerce. To provide suitable offices in New York City where foreign buyers upon their arrival in this country can find interpreters, obtain desired information and meet the representatives of American manufacturers. To advertise this feature in foreign countries, employ intelligent travelers speaking the various languages—missionaries of commerce—and invite such visits. To promote communication and reciprocity between the United States and foreign countries and advocate the study of commercial languages in our educational institutions.

To co-operate with and supplement the efforts of other organizations to the end of enlarging our export trade. The trend of the world's development in our direction and with intelligent and persistent effort the centre of exchange can gradually be transferred to this country, with all that it implies.

The United States form the greatest producing country on the globe; our capacity to produce is fast exceeding our ability to consume; our fields, forests, mines and factories can supply the world; the ingenuity of our inventors is proverbial; the quality and utility of our products are recognized wherever introduced; with increasing facilities of communication "the field as the world," and with intelligent effort we can command a reasonable share of the world's trade. It will be the constant aim of the United States Exporters Association to make this effort and to acquaint foreign countries with the greatness of this country and its ability to supply the world's wants.



Mr. Thurber said this circular had been sent to leading concerns in different lines and has been most favorably received.

"A small co-operative expenditure on the part of the producers, manufacturers, carriers and bankers of the United States in presenting our facilities to the world at the present time will yield fruit a hundred fold. It should be looked upon as an advertising expense. The circumstances are ripe for intelligent effort. Seeing that our commercial bodies could not do the specific work necessary, I organized the 'United States Export Association,' incorporated under the laws of the State of New York, with a nominal capital, in order to limit the liability of its members to the amount of membership dues.

"We have taken temporary offices at No. 143 Chambers Street, and will organize and push forward the business of the Association as rapidly as possible."

Standard Oil Screen Door.

The A. J. Phillips Co., Fenton, Mich., manufacture so many good things that it is hard work to keep from mixing them up. In our issue last preceding we made mention of their Standard Oil Screen Door, and by an error of makeup inserted illustrations of a door other than the one described. In this connection we show the door that was originally intended, and hope that those who are interested will note the change. The company have improved the design of their Standard Oil Screen Door, by cutting a scroll in the edges of the corner brackets, which practically makes a new pattern; this adds to the appearance of the door, and now gives the company what they state to be "one of the handsomest of cheap varnished screen doors." In this door the materials and workmanship are good, but the design permits rapid manufacture, and but one coat of varnish is used, enabling them, as the company say, to "make extra low prices and yet produce excellent value." The company stand very high in that line of goods, and, as we said before, by push and energy and continuous presentation of their goods to the public, have built up a very large and successful trade.

T. W. Williams, Eastern and foreign manager of the Bissell Carpet Sweeper Co., has just returned from a trip to the general office of the company at Grand Rapids, Mich. He reports everything in the most promising condition, and the outlook excellent for good spring trade.

George Chatfield, of the firm of Chatfield & Baker, Owego, N. Y., died very suddenly on January 27th of heart failure.

RECENT TRADE PUBLICATIONS.

The Toledo Tinware Mfg. Co., Toledo, Ohio, have issued a complete catalogue for 1896. The company say: "We take pleasure in handing you herewith our new illustrated catalogue, comprising a full line of pieced tinware, also copper and copper bottom goods. We are pleased to state that we are now using nothing but American tin plate, all full weight, which we find gives better satisfaction than foreign tins. We wish to call particular attention to our covered pails, flaring pails, as we only use riveted ears, riveted by machinery; these ears will not come off. Since the issue of our last catalogue we have doubled our manufacturing capacity, adding new machinery and a great many new tools and dies. We also wish to call attention to the city of Toledo as a manufacturing point. As we have excellent shipping facilities both by rail and lake, we can reach any point in the United States from Toledo, this city being one of the largest railroad centers in the United States. The company manufacture the following articles: Deep bread pans, coffee boilers, coffee flasks, coffee pots, covered buckets, cullenders, cups, dairy pails, dinner pails, dippers, dish pans, flaring pails, fruit cans, funnels, graters, lard cans, measures, graduated measures, milk kettles, milk pans, milk strainers, nested pails, oil cans, sap pails, sauce pans, sponge cake pans, sprinkling pots, strainer pails, steamers, square pans, syrup cans, tea kettles, tea steepers and wash boilers."

The W. W. Pryor Hardware Mfg. Co., Newark, N. J., for whom W. W. Pryor & Co., No. 81 Chambers Street, New York, are sole agents, have issued an attractive catalogue of the mechanics' tools, Foster's door springs and other Hardware specialties manufactured by them. It is prepared in a comprehensive manner, and attractively printed, and occupies some thirty-two pages. Among the goods manufactured by them are awls, chisels, pliers, can openers, carpet stretchers, punches, screwdrivers, box hooks, etc., etc. In a note of introduction they say: "In presenting our catalogue to the trade, we wish to state that we have succeeded to the business of M. Einwachter, and lately known as the Essex Tool Co., of which C. F. Guyon & Co. were sole selling agents. We have associated with us as manager, John Einwachter, long and favorably known as a manufacturer of tools and specialties, such as we now are producing. With ample facilities and capital, it is our determination to make tools and specialties, which for price, quality of material, finish and superior workmanship, cannot be equalled. Our finished stock will be carried by W. W. Pryor & Co., No. 81 Chambers Street, New York City, to whom all orders and communications as to prices, etc., should be addressed."

The Star Dinner Pail Co., Pittsburg, Pa., have gotten out their 1896 catalogue. The company remark "that they commenced business on a very small scale in January 1892, and were for some time manufacturing only two sizes of the Star dinner pail, which have since been increased to five sizes, and the famous Star dinner pails, which were first put on the market by us, four years ago, have constantly increased in popularity, until at the present time, they are being handled by nearly all Hardware jobbers throughout the United States. It is made in a number of different styles including both slip and screw cup, besides which we manufacture all other standard styles of dinner pails, for the manufacture of which our factory is equipped with all the latest improved machinery, so that we are in position to guarantee entire satisfaction, both regarding goods and prices, to manufacturers, jobbers and large buyers throughout the United States. We are also just now commencing the manufacture of considerable japanned goods, including dinner pails, dinner boxes, dinner baskets, lunch boxes, lunch baskets, etc." The company manufacture a full line of tinware specialties.

We have received the 1896 catalogue of Byrne & Millar, owners of the Millar Lever Motor, Columbus, Ohio. The motor consists of a light tubular frame and three wheels weighing it is said about 65 pounds. It is designed to carry passengers or to be used as a merchandise carrier, and in the first named form will carry three persons including the operator. It is propelled by manual force. In combination with a pair of cranks a pair of pedal levers are utilized, enabling the operator, it is explained, to employ his weight in propelling the vehicle as well as his lifting power, because the sweep of the pedals, having an up and down movement, always maintain the same relative position to the operator's feet, and seat, as well. The manufacture of the article for market has not yet commenced.

The Ideal Mfg. Co., of New Haven, have issued a new edition of their No. 7 Ideal Hand Book of Useful Information for Shooters. This contains a great deal of new matter, among which is a list of their foreign agencies, a description of smokeless powders, information as to shot cartridges, descriptions of their Ideal Pocket Powder and Shot Measure, Diamond Crimper, and special Ideal bullets. The book contains in short a vast amount of information which cannot but be of great value to all who are selling or using guns or ammunition of any character.

The Toledo Saw Co., Toledo, Ohio, have issued a neat little circular, descriptive of the "Toledo Blade" circular saw, and other tools made by them. They say: "Each saw is warranted free from flaws and seams, and practically true. Any saw failing to saw well will be rehammered free of charge, if immediately returned; or, if found defective in metal or temper, within thirty days from delivery, a new one will be given in exchange, if first saw cannot be repaired in a satisfactory manner."

J. H. Seed, No. 21 Centre Street, New York, has issued a revised price list of his reversible self-cleaning water filters, the changes of which will be noted in our prices current. It is a double sheet, filled with colored illustrations of his large line of specialties.

The Illinois Pure Aluminum Co., Lemont, Ill., have issued a new trade list which gives prices upon the large line of aluminum goods manufactured by them. These changes took place on January 1, 1896.

The Howard Iron Works, Buffalo, N. Y., have issued a price list on paper cutters and book binders' machinery. It is a neat and attractive little volume, and will be sent on application.

The Wagner Mfg. Co., makers of cast iron and aluminum hollowware, Sidney, Ohio, are sending their friends a handsome little card, which calls attention to their line of goods.

The Nubian Iron Enamel & Varnish Co., Chicago, have issued their little calendar for the first three months of 1896, which is filled with wit and wisdom, as of old.

Varnish for paper: Digest well together in a closed vessel 1 part dammar resin and 6 parts acetone for twelve days, then pour off the clear. To this add 4 parts collodion, mix together, then let it stand until clear. This is waterproof.

Review of the Markets.

The condition of the city Hardware trade is very dull and inactive, though dealers generally report a fair out-of-town business. A hopeful feeling pervades the market and a good spring movement is anticipated. There are some complaints that the bicycle business is detracting from the legitimate Hardware trade, so many Hardwaremen having taken agencies for wheels. The cutting of prices continues and causes no small amount of trouble, though as a general thing prices are fairly well maintained.

Wire Nails: The market exhibits signs of increased activity. Prices remain unchanged for February, though it was decided by the manufacturers, at the recent meeting in Pittsburg, to raise prices 15 cents, the advance going into effect on the 1st of March. The prospect of an advance in the near future, the manufacturers expect, will cause a promptness in the placing of orders, which will naturally benefit both manufacturers and jobbers. The system of guaranteeing the jobbers against a possible reduction, as practiced by the manufacturers, is also carried out in transactions between jobbers and retailers. Stocks held by the trade are in many cases small. We quote as follows: Carload lots, $2.25, base, per keg, f. o. b., Pittsburg; less than carload lots, $2.35, base, Pittsburg. On direct shipments on contracts in less than carload lots of 24,000 pounds of Nails an extra 5 cents per 100 pounds will be charged. To jobbers taking of one mill within one calendar month 500 kegs or more a rebate of 5 cents per keg will be allowed. New York prices are: Carload lots on dock, $2.43; small lots from store, $2.53.

Cut Nails: The same advance of 15 cents per keg will take effect on March 1, as in the case of Wire Nails. During the intervening month prices will remain the same. There is an active demand for Cut Nails. Quotations are as follows: $2 per keg, base, f. o. b., Pittsburg. New York quotations are: Carload lots on dock, $2.18; small lots on dock, $2.28, and small lots out of store, $2.30.

Linseed Oil: The New York quotations for Linseed Oil are as follows: American raw, 40 cents per gallon; American boiled, 43 cents per gallon, and Calcutta raw, 50 cents per gallon.

White Lead, Red Lead and Litharge: The National Lead Co.'s quotations are as follows: White Lead, dry or in oil, Red Lead and Litharge in kegs: In lots of 500 lbs., 5¾c. net; in lots of 500 lbs. and over, 5¼c. Red Lead and Litharge in barrels and half barrels, ¼c. per lb. less than price in kegs.

Putty: The quotations for the better grades are $1.40@$2.25, as to quantity and package.

Window Glass: French is quoted at 70@70 and 5% off and American at 70 and 10@75% from list.

The prices quoted below are for small lots. Round lots, except Tobin Bronze, can be purchased at lower prices:

Clapp & Co., bankers and brokers, New York, in their weekly letter say: "From 1889 to 1893 the public debt continually decreased. Since then it has steadily increased, and government bonds for $262,000,000 have been issued to meet expenses and maintain the reserve. The gold in the treasury is now less than four years ago. A premium on gold prevails for the first time since specie resumption January 1, 1879. We began coining silver on a large scale in 1878, paying $1.20 per ounce. The silver in the silver dollar was then worth 93c., now it is worth 52c., or 67c. for an ounce. Since 1878 the U. S. has bought 459,946,701 ounces of silver, paying $464,210,262.96 for it. Its intrinsic metal value is $309,536,118.17. Forty-two members of the Senate last Saturday declared against 35, that silver shall be bought from all markets at $1.29 per ounce and coined into silver dollars free, or practically at a fixed rate double its value in the open market. In 1895 our gold production was about $47,000,000; the African production about $45,000,000; the world's production about 9,653,203 ounces, or about $199,536,706. It is estimated Mexico produced in 1895 52,000,000 ounces of silver, and the U. S. product was 46,000,000 ounces, and the world's product 165,500,000 ounces, or about $100,256,236. In 1890 the average price of silver in London was 47 11-16 per ounce; in 1893, 35⅝; in 1894, 28 15-16; and last year 29⅞ pence per ounce, always payable there in gold. The *Chronicle* estimates the world's gold production increased in 1895 about $20,629,277 and silver increased $1,824,411."

THE CLEVELAND TRADE.

Trade shows somewhat more activity than at the date of our last report. The weather for the past two weeks has hardly been as cold as it is reasonable to expect during January and early February, but during that time we have had considerable rain fall, which will no doubt be beneficial to the country when spring opens up.

The market seems to be in a somewhat more satisfactory condition than at the date of our last report, there being a feeling of greater firmness. The manufacturers of smooth wire have stiffened their prices, and the demand for both smooth and barbed wire has been considerably increased.

Wire Nails, while unchanged in price, are in somewhat better demand, as the season is approaching when they must be put into use, and as stocks throughout the country are very low, it will be necessary for merchants to buy.

Wire Cloth remains somewhat unsettled. Galvanized Poultry Netting is very firm in price, and has not shown any weakness in sympathy with Wire Cloth.

Bicycles still continue to occupy a prominent place in the market, and will continue to do so for the next six months. Every indication points to an enormous sale, surpassing all previous records. The scarcity of wheels at a medium price becomes more manifest every day, and we predict that in April, when the season is at its height, there will be a scramble for this class of goods.

Everything now points to a good season for 1896, in which we trust that manufacturers, jobbers and retailers will share alike. McINTOSH-HUNTINGTON CO.

THE BUFFALO TRADE.

The outlook for spring trade seems to be improving very rapidly, and if the present "Fathers of our Country," who are spending the winter in Washington, would begin to realize that the country wants less politics and more business methods in taking care of the finances of our glorious land, we believe that the people would be happier, and greater prosperity would reign throughout the land.

The proposed advance in Wire Nails for March delivery, is a surprise, indeed, to our customers, as they thought the price had reached the high-water mark, and looked for a slight decline. Still the "Wise Men of the Wire Nail Association" by this time should know their business, and time must show us if that is the fact. WEED & CO.

THE PHILADELPHIA TRADE.

At last we have a little winter, and for practically the first time this year the ground has been white with snow, and accordingly wet with subsequent wet and slush.

Digitized by Google

Trade, however, undergoes no relapse, but on the contrary is somewhat brighter, by reason of the seasonable weather.

Salesmen are now actively at work, and a fair crop of orders is the result. While the assortment is quite general, it is evident, however, that the buying is far from speculative, and that buyers are pursuing a conservative course, and yet the need of goods is shown by the fact that in spite of this conservatism goods are being bought and purchased in excess of the same period of last year.

All this is encouraging, and coupled with the fact that the country is now slowly recovering from its late severe set-back, while more money is in circulation through increased wages, it seems to be but reasonable to expect a fair amount of spring trade, and this seems to be the general report from the salesmen.

Prices continue with but little change, the most notable being the advance of fifteen cents which has been announced on Wire Nails for the month of March. It is very evident that the high price of Nails has not deterred trade from buying, and a fair volume of business is being done in the staple lines of Nails and Barbed Wire, and general Hardware prices are almost unchanged; while goods which advanced heavily last Fall may have weakened, still the great bulk of the line is firm, and it would not surprise anyone greatly if higher prices should be announced on many goods before long. BIDDLE HARDWARE CO.

THE COLUMBUS TRADE.

We hardly know what to say about trade. Orders are coming in freely, but prices on many goods are not entirely satisfactory. If we could get prompt remittances it would not be so bad, but the slow fellows seem to be getting as low prices as those who pay promptly, with the exception of the cash direct.

The announced advance on Nails to go into effect March 1st, is somewhat of a surprise, and we think a mistake on the part of the Association. They seem to be bidding for outside competition, and are getting it; and Columbus jobbers are finding it quite a disturbing element. We don't know how it is in other markets. Nails are certainly high enough now, and they will do well if they can maintain present prices. The market on most lines is very steady, and it is to be hoped that we will not see so many ups and downs during 1896 as in the last two years. The weather for the past two weeks has been anything but right for winter business; rain and sunshine—in fact April weather in January is not good winter weather. "Frogs in your throat" are in good demand, as nearly everybody has the grip or its twin sister. SMITH BROS. HARDWARE CO.

THE DAVENPORT TRADE.

Values seem to have reached bottom and are beginning again to advance in sympathy with the recent advances of Steel of $2.50 to $3.00 per ton.

The extreme low prices of Barb Wire—lower than ever known before—have stimulated trade in that line, and wants are being freely anticipated, and an early advance would not surprise the trade. Nails are selling now freely on the assurance of the Association that prices will be fifteen cents per keg higher for March.

White Lead has dropped another quarter, but even at the present exceedingly low price, trade is decidedly dull.

There is very little doing in Tin and Terne Plates, prices remaining very low and weak.

The open winter and absence of snow has prevented the sale of sleigh bells and hand sleds, which will have to be carried over until after another election; it may snow the next day after election.

SICKELS, PRESTON & NUTTING CO.

THE TOLEDO TRADE.

Trade for the month of January was fair, although nothing very extraordinary. We find that merchants are very cautious in their purchases, purchasing small quantities, and oftener. We hear considerable complaint from our customers that it is next to impossibile to collect from the farming community.

Prices in general are kept fairly well, with the exception of such goods as wire cloth, screen doors and windows, and plain wire.

We are led to believe, from viewing the situation, that we can expect a fair trade for the spring. We hope that we will not have a *boom business*, but a steady and healthy growth. In conversation with a number of our customers in the smaller towns, we are led to believe that the average and careful merchant did a successful business last year, and if they could get in their money, they would feel happy. We do not expect higher prices on staple goods, as the manufacturing capacity has been greatly increased since last year. THE STOLLBERG & CLAPP CO.

THE PITTSBURG TRADE.

January was quite encouraging in the amount of business done, both for present delivery and for future shipment. There seems to be a better feeling, and, while generally conservative, merchants seem to think the time has come for a better demand, and we believe they will not be disappointed. Our industries are all fairly well employed, at better wages than they enjoyed a year or two since. The open winter has given us a river upon which the immense accumulation of coal in our harbors has all been gotten out.

Travelers are sending in fairly well assorted orders. Bicycle arrangements are being made for the Spring trade. In another month we should be quite busy.

LOGAN-GREGG HARDWARE CO.

THE GRAPHITE TRADE.

The close of 1895 was characterized by the fact that we were compelled to run the factories to the end of the year instead of shutting down for the last week, as has always been customary, for general repairs and inventory. This was necessitated by the numberless unfilled orders requiring attention.

Could we have delivered all the goods on which delivery was due, the year would have been the best on record, but actual sales footed up slightly behind a best previous year.

January, 1896, closes with a handicap of a shut-down of ten days in the pencil factory, for inventory and repairs, but although one-third of the month was thus lost, the sales of Pencils were only sixteen per cent. less than for January, 1895. In all other Graphite products of the company there was a decided increase, crucibles, paint and lubricants being almost double as compared with the same month of last year. The orders for the first two weeks of the year were not as voluminous as we had hoped for, but the latter part of the month was entirely satisfactory.

We have added three new men to our traveling force; covered our Jersey City factories with handsome new signs, and expect to have a lively year. Collections are fairly good. JOSEPH DIXON CRUCIBLE CO.

American Bells.

There are very few bells in the United States that are agreeable to the ear. The foundries seem to go on the idea that anything in the shape of a bell will answer the purpose, says a writer in *Harper's*, with little or no regard for tone, and we are called to church with the same metallic anger that invites us to a fire. The manufacturers are probably indifferent because the public are indifferent. Their products are mechanical, and only by chance musical. That this does not arise altogether from ignorance of what a bell should be is proved by the existence in the country of a few sets of musical chimes. It is possible, then, to make single bells agreeable.

Apparently now they are cast in a conventional form, with as little regard to their sound as a blacksmith has for

Manufacturers of MEASURING TAPES, Etc.,

BRANCHES:
111 Madison Street, Chicago.
708 Locust Street, St. Louis.

127 FULTON STREET, NEW YORK.

The Home Steel Tape is intended to supersede woven tapes (metallic or linen) by reason of its incomparably greater accuracy and its very low price. The Home Tape has a red bent sewed leather case, with brass-lined month piece, with anti-friction roller The folding brass handle is practically flush. The steel line is ¼ inch wide, and sharply and plainly graduated. The graduations and figures are bright, while the ground surface is nearly black. It is to all appearances a First-Class Steel Tape, but it is not to be compared with our well-known Excelsior steel tapes. Woven tapes are used on account of their very low cost for many purposes for which a more reliable tape ought to be employed, like in the building trades, construction and railroad work, etc. The low priced Home Steel Tape will therefore be welcomed as meeting a frequent requirement.

HOME STEEL TAPES.—Feet divided to inches and 1-8 inches:

25 feet.—No. 80, $34.80 doz. 75 feet.—No. 82, $56 40 doz.
50 feet —No 81, $42.00 doz. 100 feet.—No 83, $72.00 doz.

We can furnish these tapes also with feet divided to 1-10 and 1-100.

that of a horseshoe when he forges it. The shape is determined with little consideration for the sound it will produce, and if the particles of molten metal happen to arrange themselves musically, it is only by chance. No wonder that the great cultivated public are tired of bells, and wish their noise was not added to the other noises of the city! The bell in the United States is evidently perpetuated mainly on account of its poetic traditions. And it might be easily, and with little more cost, added to the poetry of our daily life.

Why cannot we take a lesson from our neighbor, Mexico? There the bells are almost all of them melodious; the harsh bell is an exception, and is modern. They say that silver enters into their composition, but there is more art and musical taste in their composition than silver. It is not enough to cast a bell in a certain form.

Its edges must be made thick or thin to produce a desired musical vibration, and it is tuned, filed, and fitted to the note required. And then attention is paid to the manner in which the bell is struck, and the material of the instrument used for evoking the sound. There is need of art in the making and ringing of a bell, as in the making and playing of a piano. We appear to be content with any mass of metal cast in the bell shape, and to let a ringer with the instinct of a blacksmith evoke its dissonance with a sledge-hammer.

Underhill, Clinch & Co., No. 94 Chambers Street, New York, have issued a revised price list of Ship Carpenters' Tools of the Horton, Watts and Bradley brands. They have a stock of these goods on hand, and orders for them can be filled promptly.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc, will be gladly received, and promptly published.

New Companies, Etc.

Birmingham, Ala.—John Laloge, of Birmingham, and Mr. Cominge, of Houston, Tex., have organized a company to erect bolt and nut works, with a capital stock of $10,000.

Birmingham, Ala.—The East Birmingham Hardware Specialty Co. will immediately rebuild its $25,000 burned plant.

Chicago, Ill.—American Merchants' Mfg. Co. Capital stock, $7500; to manufacture mechanical devices. Incorporators: Otto A. Drier, E. G. Asay, Jr., and John R. Caverly.

Dayton, Ohio.—The Dayton File Works has been incorporated by Frank W. Gebhart, B. F. Hargrave, O. B. Brown and others. Capital stock, $10,000.

Hoboken, N. J.—The New York & Rochester Steel Mat Co. filed articles of incorporation recently. The concern proposes manufacturing and dealing in steel mats and rubber combination mats. The company will have an office in Guttenberg. Its incorporators are Herman Walker, of Guttenberg; Frederick Walker, of Union Township, and Louis Walker, of Philadelphia. The capital stock is $100,000.

Indianapolis, Ind. — The Tippecanoe Hedge & Wire Fence Co. was incorporated recently with a capital stock of $25,000.

New Haven, Conn.—The United States Hardware Co., organized with the following stockholders: F. F. Bishop, Granville W. Wright, Howard C. Rich and Lyman W. Law. The capital stock is $20,000. The company is formed to manufacture Hardware for burial caskets. The business will be carried on at No. 125 Water Street.

New York, N. Y.—The Weak Ankle Skate Brace Co.; to manufacture skates. Capital, $10,000. Directors: Frederick Williams, Luke W. Kenner and Mary Conroy, of New York City.

Portland, Me.—The Standard Thermometer Co., organized for the purpose of manufacturing thermometers, with $200,000 capital stock. The officers are: President, Roger Upton, of Concord, Mass.; treasurer, Samuel C. Ford, of Peabody, Mass.

Richmond, Ind.— The Corus Fence & Foundry Co., incorporated, with a capital stock of $50,000. The company will manufacture fence and fence supplies.

Utica, N. Y.—The Utica Extinguisher Co. has been incorporated by Henry A. Doolittle, Thos. B. Keating, Wm. C. Pomfret, of Utica, and Ferdinand Rose; to manufacture fire extinguishers and copper ware. Capital stock, $15,000.

Worcester, Mass.—The Anthony-Bates Machine Co. has been incorporated by George E. Bates, president; A. H. Anthony, treasurer; to manufacture machine tools and implements. Capital stock, $20,000.

Worcester, Mass. — Metallic Goods Co. Capital stock, $5000. Directors: Arthur M. Evans, president and treasurer; J. William Buzzell and Henry F. Harris. Purpose of organization, the manufacture and sale of wire and metal goods, the making of machinery and appliances for the manufacture of snch goods.

Changes and Removals.

Freeport, Ill.—The Warner Hardware Co. have moved their manufactory from Spring Street to the east end of Washington Street, near the Illinois Central tracks.

Norwich, Conn.—The Norwich Nickel & Brass Works are moving into their new quarters in the Industrial building, Falls Avenue.

Rock Island, Ill.—The Sterling Mfg. Co., making heavy Hardware, removed to Rock Island, occupying the old Thompson foundry. About twenty hands will be employed.

New Buildings and Improvements.

Anderson, Ind.—The proprietors of the Arcade File Works contemplate making some very valuable improvements at that institution. If their present calculations are carried out they will erect commodious forging and grinding departments. Heretofore the plant has been entirely too small. The enlargement of the factory will necessitate increasing the number of men employed.

Dunkirk, N. Y.—The Romer Axe Co. have ordered additional machinery and will put into their factory an electric light plant and employ more men.

Sultan, Neb. — Fourteen additional nail machines have been put in place at the nail works.

Recent Fires.

East Birmingham, Ala.—The East Birmingham Hardware Specialty Works have been destroyed by fire.

General.

Ironton, Ohio.—The stockholders of the Kelly Nail & Iron Co. held a meeting at the company's office recently and re-elected the following board of directors: Col. Chas. Parrott and W. W. Franklin, of Columbus; D. S. Gray, E. L. Hinman, Oscar Richey, Lindsey Kelly and Ironton A. Kelly.

Kansas City, Mo.— The Russell Hardware & Implement Mfg. Co. have elected a board of directors, consisting of A. H. Russell, R. C. Maxwell, F. C. Wyatt, J. C. Maguhlman and John A. Kerr.

Southington, Conn.—The annual meeting of the stockholders of the Ætna Nut Co. was held recently and the old board of directors re-elected.

St. Louis, Mo.—Miller Lock Co. Directors: W. H. Thompson, W. F. Boyle and L. Cass Miller.

Wallingford, Conn.—At the annual meeting of the Housatonic Brass Co. the following directors were elected: C. A. Hamilton, G. E. Terry, J. B Underwood, E. A. Russell and F. F. Terry. The officers elected were: C. A. Hamilton, president; F. F. Terry, treasurer; E. A. Russell, secretary.

$2,150,000 Per Ton.

At the recent meeting of the South Staffordshire Institute of Iron and Steel Works, Manager Thomas Morris presented some interesting facts about the remarkable achievements that have been reached in the manufacture of fine wire. He gave an interesting description of the various articles that illustrated his paper, especially the various wires, and pointed out that the Warrington wire manufacturer who presented him with many of the specimens got $4.32 per pound, or over $8600 per ton, for the specimen of drawn wire, which was largely used in the construction of pianos and other musical and mechanical instruments. For the pinion wire he got $21.60 per pound, or $43,200 per ton. It took 754 hair springs to weigh an ounce of 437½ grains. It took 27,000,000 of them to weigh a ton, and, taking one to be worth a cent and a half, the value of a ton of these apparently cheap little things ran up to over $400,000. The barbed instrument used by dentists for extracting nerves from teeth was even more expensive, representing a rate of $2,150,000 per ton. A mile length of No. 19 size wire only weighed 21 pounds and many of the ingots were 12 to 14 cwt. each, and after allowing for all waste, they could get fifty miles of wire from one ingot.—*Boston Journal of Commerce.*

Blacksmithing in Corea.

"One of our ponies had to be shod, and another time we put shoes on the bull which carried the baggage. The pony was first thrown on the ground and his four legs were tied together so that he couldn't possibly kick. Then the blacksmith pounded hoop-iron shoes on his feet with a rude iron hammer. It was the same with the bull, though one man had to sit on his head while he was being shod. The iron seemed to be very good, and it comes from the mines in the northern part of the country. The tools of the country are made of it, and the farming tools are very ingenious, the three and four-pronged hoes being quite as good as anything we have in America. They were making tools in this blacksmith shop, and all the tools and plows are made by hand. The blacksmith had a aude bellows which was worked by a boy, who stood on a seesaw, and by moving up and down pumped the fire into a blaze. In other places I saw bellows which boys worked by pulling a stick in and out like that of a squirt gun, and everything is rude in the extreme. Sometimes horses are shod by being strapped up to poles, so that only two of their feet can rest on the ground, and the band which goes around the belly holds the horse up while he is shod."—*The American.*

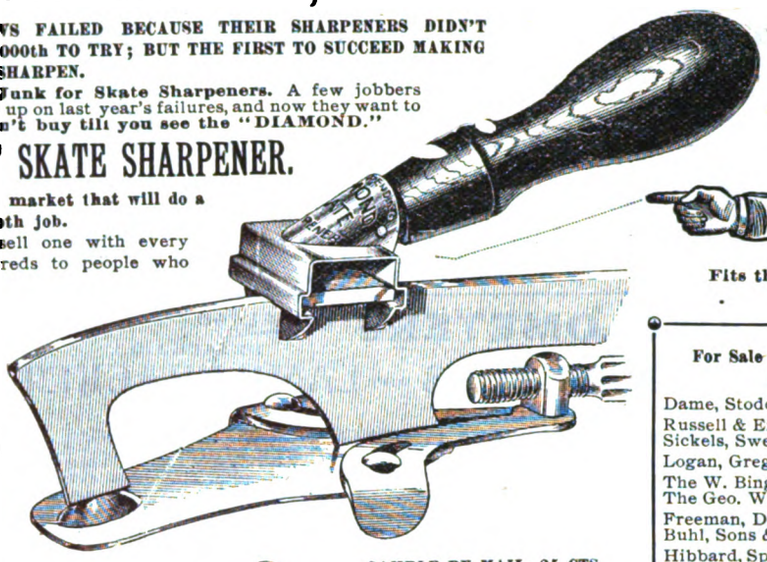
At Last We've Got "'Em," SHARPENERS THAT SHARPEN!

THE OTHER 999 FELLOWS FAILED BECAUSE THEIR SHARPENERS DIDN'T SHARPEN, WE ARE THE 1000th TO TRY; BUT THE FIRST TO SUCCEED MAKING SHARPENERS THAT WILL SHARPEN.



Dealers! Don't Buy Junk for Skate Sharpeners. A few jobbers were foolish enough to load up on last year's failures, and now they want to dispose of them badly. **Don't buy till you see the "DIAMOND."**

THE "DIAMOND" SKATE SHARPENER.

The only Sharpener on the market that will do a clean, smooth job.

HARDWARE DEALERS sell one with every pair of skates, and hundreds to people who already own skates.

All our Sharpeners are elegantly nickel-plated and packed one dozen in a box.

SAMPLE BY MAIL, 25 CTS.

SOMETHING ENTIRELY NEW!

Every Boy Sharpens his own Skates.

See that Pivot!

Fits the Curve of any Skate.

THIS CUT

represents our **Telescopic Detachable Crank Shaft,** forged in two pieces from best Sweedish Steel. How do you like it? Any child old enough to ride a wheel can take it apart or put it together. In four minutes you can take it out, clean the bearings and put it together again without disturbing the adjustment of the bearings in the least. The balls cannot fall out, there are no Cotter pins to annoy and vex you, in fact you have no trouble of any kind with this crank. Nothing can be more simple—nothing more durable. Expert wheelmen pronounce it out of sight of any Crank now in use. Please remember you will find this Crank Shaft on every
